You are making your decision right now, how well you will fit yourself. So decide wisely. To be a graduate of RCA Institutes stamps you as a man who knows the real worth of a good foundation. As one who knows that a year of training now, under America's finest radio instructors, is the surest way to acquire the knowledge and skill you must have.

You Can Study At Home

You do not have to give up your present position to enjoy the benefits of RCA Institutes training. You may study at home in your spare time . . . or at any of our resident schools throughout the country. The Home Laboratory Training Course includes a complete set of radio equipment of the most modern design.

Send For Our Free Book

If you have read this far . . . you have already indicated that you are the type of man who should study radio. This may be the big turning point of your life. You will not rest until you have sent for our free book that tells you the complete story of what RCA Institutes offers you. Fill in and mail the coupon below right now. There is plenty of time for investigation . . . but no time for delay in getting all the vital facts.

RCA INSTITUTES, Inc.

Occupation.....

Morton Downey

(*Continued from page 9*)

where he could pick up an honest penny or two with his voice. Why should the boss have to have a particular weakness for the pigs' knuckles in the identical place?

But however it might have been—so it was—and the boss failed utterly and miserably to appreciate the worthiness of his minion's ambitions just as thoroughly as the station master had failed to see comedy in the eggs.

So there was a sudden and precipitous end to train "butchering" for our young hero.

There followed more casting about and some singing, until one day, probably through acquaintances he had scraped up on trains, he landed a job as manicurist and masseur to a donkey engine in New Haven. The engine liked Morton at first, and Morton liked the engine to the end, but he developed an undownable desire to see how fast the darned thing would go. This annoyed several people and things, including both the engine and the boss, so Morton bade farewell to what was left of the engine.

The next phase was not so eventful, nor even so profitable, though time was found for an occasional job of singing —minor vaudeville engagements and this and that—but the vocation of the moment became the selling of phonographs to the public.

AS THE most obvious prospects, and the easiest, he picked on his friends and many acquaintances. Many of them bought his talking machines all right, but only a few seemed prepared to pay for them. In fact it became increasingly and painfully evident that they either would not, or could not, pay their bills. All this failed to look very profitable to Morton after he had figured up the red side of the ledger and found it impossible to make t'other come anywhere near it. So he turned to insurance—but that even his friends would not buy.

Now all this does not take so long in the telling, but the years of Downey had meanwhile been mounting regardless and he was just about to break from teens to twenties.

Today, when one sits down of an evening to enjoy the really pleasant, and as supper clubs go, refined atmosphere of the Club Delmonico, more familiarly known as "Morton Downey's Club Delmonico" and to revel in the verve and freshness, the spontaneity, the really unstudied wit of the entertainment that follows upon Downey's taking his cue—yes, indeed—it is hard to picture in the pleasant, well-groomed and impeccably clad host, the lad who a few short years ago could not even get a steady job as a song plugger, who was leading a hand to mouth existence singing when and where he could—and for what he could get.

Here he is—proprietor of the only remaining supper club in New York City where formal dress is still *de rigueur* in fact, of the only bonafide supper club, for they call the rest of them "night clubs" now, and rightly, for the doings in many would never bear the light of day. And he is getting away with it—the club is an outstanding success in a city of fly-by-nights.

But that is getting way ahead of the story again.

There he was, just another voice that did not click—waiting for a break. Among his friends he numbered a Congressman of no little influence in New York's theatrical district. He brought that influence into play in his frantic fight to land that song plugging job.

He went to a producer and publisher armed with a potent letter from friend Congressman, calculated to open most any door to most anybody.

Did he land? He did not! They wouldn't even listen to his voice. In fact, hardly let him inside the door. Told him they had so many song pluggers, as it was, they were using them for window washers and porters.

STILL under thirty Morton Downey has seen a great deal of life. He has been through most of the vicissitudes that come in the ordinary allotted years of threescore and ten. But now he is on the crest. His tide is high. How did he get there? How can anyone get there? You will be inspired by the second chapter of this man's life which will appear in the July RADIO DIGEST.

BUT hark—hardly more than the other day it was, that that selfsame publisher sought out Morton Downey and nearly on bended knee asked him would he please be so kind as to sing a certain song in the club and on his Radio broadcasts, and would he do so he would be eternally in his (Downey's) debt.

Downey, however, has songs of his own now, chief among them being *Waba Moon,* which is selling faster than pu lishers can print it or recorders pre it. The writing of this number is rath a romance in itself, but of that mo anon. Suffice it to say for the prese that any time Morton takes it into h head to trip out to Indiana they w mobilize the National Guard in his hon and hand him the state, with the Waba thrown in, on a platter.

To digress for a moment, that incide of the song publisher who turned Mort down cold a few years ago serves a mirably to illustrate a peculiar sid light of the Downey character.

There will be others, both funny a fascinating, before the tale of Mort Downey is fully told, but here be known that like the well-known Indi he never forgets a good deed and ne forgives a bad one.

Not that he harbors any malice ill feeling in the latter case—for t sort of thing seems rather far remo from the makeup of Morton. But bides his time, waiting for a break as he once waited for a break to pul favor and acclaim, until the time wh he can cancel the debt in his own go natured and often prankish way.

ONE of the richest an dotes in this category is that built arou the foibles of an English steward on Leviathan—and that brings us up to point where mischance was left behind a time, where the fickle goddess deig not only to smile but to show signs beaming broadly.

Morton found himself aboard the S Leviathan on her historic trial trip fore it was put into transatlantic ser for the U. S. Shipping Board. passenger list was made up of mill aires, the elite of political Washing outstanding newspaper writers, and a l of others who were prominent in m spheres.

Almost before he knew it Dow found himself setting out to sea in company and that of the Paul White organization. He sang his head nearly. They liked it—from the mill aires on up. Several of them bec interested in the clear-eyed, chunky, likeable youth, and life began to rosy indeed.

(Next month Mr. Richards will tinue his story of Morton Downe other spheres and better times. An other things he will paint word pict of Downey as he found him in his h and of his beautiful wife, Barbara net. Don't miss the next installmen this thrilling biography.

Sinister
s are back of BIG WAVE GRAB?

FALSE TEETH ARE A GREAT INVENTION *BUT* KEEP YOUR OWN AS LONG AS YOU CAN

What is *"pyorrhea"* that millions dread it so?

IT'S a pretty grim statement, but the truth is half the people who wear false teeth must do so because they failed to guard against pyorrhea, which is responsible for one-half of all adult teeth lost.

They cannot, however, be entirely blamed for their line-drawn lips and sunken cheeks—those telltale marks of artificial teeth.

For pyorrhea, which comes to four people out of five past the age of forty, is a sly, insidious disease. It may infect your gums early in life, and lurk there for years before you become aware of its dangerous presence.

Do not wait for gums to bleed

The first warnings of pyorrhea are tenderness and bleeding of the gums. If neglected, pyorrhea softens the gums, loosens the teeth in their very sockets, until extraction is essential to preserve the health.

But do not wait for these warnings. Take care of good teeth while you have them. See your dentist regularly—before trouble develops. Visit him at least twice a year.

And in your home, brush your teeth, massage your gums with Forhan's. This dentifrice is unique in that it contains the benefits of an ethical preparation developed by Dr. R. J. Forhan, which thousands of dentists use in the treatment of pyorrhea.

Protect the teeth you have

Your own teeth are far better than anything you can get to replace them. Perhaps you do not realize what a blessing they are, so long as they are firm and your gums are in good health. But do not risk the unhappy experience of losing them. There is no finer dentifrice than Forhan's—no better protection for gleaming teeth and the mouth of youth. By all means, make Forhan's *your* dentifrice—you can make no better investment in the health of your mouth and the safety of your teeth. Forhan Company, Inc., New York; Forhan's Ltd., Montreal.

FORHAN'S

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

False teeth often follow pyorrhea, which comes to four people out of five past the age of 40

NOW ON THE AIR!

New Forhan program—featuring Evangeline Adams, world-famous astrologer—every Monday and Wednesday at 7 P. M. Eastern Daylight Saving Time—Columbia network.

FOLLOW MY STARS OF YOUTH TO A Clearer, softer skin

Frances Ingram herself tells how to keep the skin lovely at its 6 vital places

"YOU are just as young and attractive, or just as old, as your skin looks," I told a charming woman who recently came to consult me. "Keep your skin immaculately clean... Keep it youthful at my six stars... And *you* are youthfully lovely."

Then I explained to her my method with Milkweed Cream.

"To cleanse the skin, spread my Milkweed Cream generously over your face and neck. Let it remain for several minutes, to allow the delicate oils to penetrate deeply into the pores, and then remove every vestige of it with soft linen.

"Now—apply a fresh film of the Milkweed Cream. With outward and upward strokes pat it into the skin at the six points starred on my mannequin.

"There are special *toning* ingredients in this Milkweed Cream. These penetrate the cleansed pores and defend the skin against blemishes and aging lines and leave it clear, soft and lovely."

* * *

This charming woman came back to see me, a day or two ago. Her skin looked *marvelously* clear and soft and fresh! She looked at least five years younger—and said she felt it!

* * *

I have recommended my Milkweed Cream and my method to so many women, and I have *seen* their skin grow fresh, clear, young. Won't *you* follow my six stars to a clearer, softer, younger skin?

If you have any special questions to ask about skin care, write for a copy of my booklet, "Why Only A Healthy Skin Can Stay Young." Or tune in on my radio hour, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated Stations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES — *If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

SENSATIONAL VALUE!
SEND NO MONEY

A daily sun bath—a few minutes in the morning or evening—will keep you looking and feeling physically fit.

Invalids confined indoors missing the life-giving, health-bringing power of natural sunlight, find the Health Ray Lamp a boon.

Ultra-violet rays prevent rickets by supplying Vitamin D to the System

Now the Amazing Benefits of ULTRA-VIOLET RAYS for ONLY $5.95

A $100 Sun lamp can do no more

Now, through the magic of the Health Ray Lamp, artificial sunlight, containing all the rejuvenating and healthful properties of sunshine, is available to all—at any time of the day or night—at any season of the year. Now the great benefits of ultra violet radiation can be yours . . . through this new, full-strength, therapeutic, ultra-violet (and infra-red) lamp at the *lowest* retail *price* in the world . . . $5.95!

Mass production and tremendous sales alone make this possible.

Youthful Vigor and Vitality

A few minutes in the morning or evening will suffice for your daily sun bath . . . will keep you feeling and looking physically fit . . . your body stimulated with Vitamin D . . . your brain alert . . . colds, grippe . . . annoying little aches and pains will pass you by. The whole family will enjoy greater health.

Inexpensive Health Insurance

It costs only a few cents a day to enjoy the relaxing, healthful, vitalizing rays of the Health Ray Lamp. By subjecting yourself to these rays, you are building up a reserve of health and strength to withstand disease. You will look and feel vibrant, vigorous, fully alive. You are safeguarding your health in a pleasant, inexpensive way.

Real Sun Tan (the glow of health)

A genuine sun Tan is quickly and easily secured with a Health Ray Lamp. A few minutes a day spent bathing in the rays of this lamp will give you the same kind of tan you get on a Florida beach.

Innumerable Uses Found for Ultra Violet Radiation

These rays are especially effective in destroying germ life and imparting vigor and vitality. They also stimulate glandular function. They are remarkably efficacious in some forms of skin diseases. Strongly antiseptic, they destroy germs and clarify the skin. Pimples and temporary blemishes yield quickly to their purifying action. Children respond rapidly to the beneficent effects. In cases of listlessness and anemia, the rays are unusually effective. An invaluable aid in the treatment of rickets.

Same Benefits as $100 Lamps

The Health Ray Lamp is a remarkable bargain. Users receive the same benefits as with the $100 and $150 lamps. It is two lamps in one. It not only produces ultra violet—those rays that destroy germ life, invigorate physically and mentally and stimulate glandular function—but an especially designed generator produces at the same time the warm infra-red rays which stimulate blood circulation, soothe, comfort and penetrate deeply into living body tissue . . . healing and preventing illness.

10 days Free Trial — Send No Money

The Health Ray Lamp, including goggles, carbons, instructions, guarantee, etc., will be sent you for free ten days' trial in your own home. Try it at our risk. For ten days, experience its vitalizing, health-building effects. Compare the results with higher priced equipment. Send no money. Simply fill out coupon below and the complete outfit will go forward immediately. When it arrives, deposit $5.95, plus a few cents postage with the postman. After 10 days' trial, if you aren't amazed and delighted with results, simply return it and we will immediately refund your money.

There is only one requirement—that you include on the coupon the name of your local dealer from whom you would ordinarily purchase the Health Ray Lamp (for instance the name of your druggist or department store.)

Take Advantage of this special offer now! Fill out the coupon below and mail it today. Please print name and address plainly.

Brings These Many Benefits

1. Builds strength and vigor, resistance to sickness; invigorates the entire system.
2. By activating the cholesterol in the skin, Vitamin D is created which fixes the calcium and phosphorus in the blood, preventing rickets.
3. Prevents colds, grippe, lumbago, stops the annoying little aches and pains of every day.
4. Improves the appearance by imparting the natural ruddy glow of vigorous health. Gives the same kind of Tan you would get from a month on the Florida beaches.
5. Frees the skin from pimples and temporary blemishes.

Specifications

Operates on either Alternating or Direct current. Resistance coil is of the best Nickel Chrome wire. Guaranteed for one year.

Observations on Events and Incidents in the Broadcasts of the Month

JULY and August are relatively poor months for the news stand sale of RADIO DIGEST, a seasonable condition that obtains with practically all other magazines. It was therefore decided to produce one Summer Issue for these two months and advance the publication date for subsequent issues. All mail subscriptions will be automatically extended to include an extra issue.

* * *

WHAT is a good old-fashioned beef-steak dinner? You'd be surprised. The invitation was in honor of the opening of the new Camel quarter-go over CBS. It was a sort of "Here's how and good luck" to Morton Downey and Tony Wons at the Hotel Warwick. You hook one leg around the iron pedestal of a round table and hoist a piece of toast with a juicy slice of steak atop: "Here's looking at you!" Then you gnash into the toast with the dry crumbs rattling down from corners of your lips. Of course there was more than toast and steak—quite too many things to mention. And it was not at all necessary for one of the gentlemen to go to such extremes as he did when he suddenly stood up and began biting off the heads of the flowers in the table decorations, then he ate up the ferns. He seemed to enjoy hugely eating lighted cigars and cigarettes. One delicacy was a book of matches. With the eager delight of one who chooses well and enjoys what he eats he tossed a stream of lighted matches into his mouth. Then his eye caught the fluffy collar of Uncle Nick Kenney, Radio editor of the New York *Mirror*. Nick remonstrated vigorously, and he is a big, strong man, but the glutton reached, grabbed, rip—and the upper layer of the fluffy collar had gone the way of the matches and the lighted cigars. Of course, you know now, as we all soon discovered, that this omnivorous gourmand with the insatiable appetite was just part of the show. But the beef-steak dinner was grand.

DOWNEY

WONS

* * *

COME to order, please. Mr. Floyd Gibbons has been nominated to the office of editor-in-chief of the world's first great Radiozene. Who will second the nomination? The chair recognizes Linda O. Frome of Hillcrest, Phillipsburg, New Jersey, who writes: "I just received my June RADIO DIGEST today and you see how prompt I am in responding to your invitation on Page 4. I think your idea of a magazine of the air is fine, *if* Floyd Gibbons is editor-in-chief, so I heartily second the nomination, and third it too . . . Here's hoping you get a million other letters seconding the nomination." Well, they're still coming in, Linda, and also a few nominations for other possible candidates. Sorry we haven't room to print them all. Wouldn't it be swell to have a three hour program with all the finest kind of entertainment selected and balanced in a magazine of 180 minutes between the covers of 8 and 10 o'clock!

* * *

DON'T you ever believe again that a lion is a ferocious beast. Carveth Wells, famous author and explorer, whom you hear regularly over the NBC network, proved that the lion is a patient plodding animal who will permit himself to be disturbed and driven away with no more than a reproachful look toward the person who approaches his resting place. It was all ludicrously revealed at a Radio party Mr. Wells presented to a few friends in New York a fortnight ago. He proved his statements with motion pictures. "You clap your hands or honk your motor horn and he will reluctantly give up his place in the shade. But he'll plop down again beneath the next tree." The pictures showed Mr. Wells driving a pack of lions through the grass while his photographer took the pictures. Pete Dixon vowed he'd like to get one of those lions to raise after Mr. Wells showed a young cub tumbling around with the author as playful as a puppy.

* * *

SPEAKING of magazines and their contents—and what do the readers say—should RADIO DIGEST go in for scandals, divorces, and domestic tribulations such as have found much vogue in the movie magazines? For instance, was RADIO DIGEST remiss in deliberately avoiding mention of the generally known facts that led up to the divorce proceedings against a well-known Radio artist recently? Should RADIO DIGEST have gone Hollywood and blabbed everything? Someone declared not long ago there never had been a worth-while scandal in the Radio firmament that amounted to a whoop as copy . . . And, goodness gracious, what a story it would make to tell about that world-famous sponsor who surprised his wife not long ago as they were stopping in Paris. They were visiting the tomb of Napoleon. Mr. X paced back and forth in front of the tomb thinking of himself as a Napoleon. Suddenly he paused and pointed his finger at his astonished spouse as he said: "When Napoleon decided to go forward for greater things he told Josephine to go. So say I, now, Ellen, I am through with you." And sure enough divorce proceedings followed shortly after. Somehow we never quite liked that sort of literature for RADIO DIGEST. But maybe we're wrong. H—mmm.

Famous A & P Chief Knows His Romany Rovers Through Actual Personal Experience as Refugee from the Bolsheviks—Once His Violin Saved His Life as unruly Mob distrusted His Loyalty

By TED DEGLIN

THE streets of Petrograd were white with the deepest snow of winter. The dreamy old city lay under a fleecy blanket, quiet in coma of hibernation. Peace there was, nd hush, then out of the stillness the many-echoed reports of guns, screams of orror, rapine and murder! And the hite snow turned a brilliant red from ie blood spilled in the name of Revo- ution——.

A regiment of soldiers had recently een quartered in the city. Weary and agged from fighting the Turks in his- oric Crimea, they were now to have a ew weeks respite. But at the clarion all of Bolshevism they turned against ie Czar they had been fighting for, and ook a lustful revenge from the Aristoc- acy which had made them slaves.

Restraint is not an easy lesson to learn, specially when a new world is to be had or the taking. The wild-eyed revolu- ionists saw freedom, and in the sweep nward painted the way with the blood f their victims and sang to the tor- ured shrieks of the unfortunates who ell into their hands.

Many were the deserters then; men who had joined the Revolution because f ideals, but whose Utopian hopes had oon been shattered. A young soldier vas one of these; a music student from he Caucasus Mountain city of Tiflis. He had fought for the Czar, gladly joined he revolutionists and had been horror- tricken at the wholesale bloodshed. Death loomed ahead for deserters such s he, whether against the wall by a quad of comrades, or by the chill cold f that Russian winter. But, thought he dark haired, dark eyed youth, better eath than such existence. On to Con- tantinople—on to freedom! The youth endured extreme suffering and privation, but was befriended by a band of Gypsies, and with their help finally made his way to freedom.

The American Consul in Constantinople took an interest in the young man. Perhaps it was because he heard him play his violin in a cafe there. Perhaps it was the certain fire in this young man's eyes. At any rate, the Consul helped the deserting soldier achieve a lasting freedom by arranging for his passage to the United States. And now the dark eyed youth immersed himself entirely in music. The haunting memories of the months spent with the Gypsies, months of wanderings to the accompaniment of soul-stirring songs and dances, blended with the memory of his studies at the Conservatory at Tiflis. He created melody and introduced a new spirit to the country. People began hearing of him. Now millions know him and listen to the orchestra he directs over the NBC network. Harry Horlick, former soldier of the Imperial Russian Army, revolutionist and gypsy, has achieved tremendous success.

TODAY, as director of the A & P Gypsies, he is secure and firmly established, but the thought of those days of horror still remains with him. One incident he recalls with mingled emotions of pride and fear. One of the comrades, drunk, and lusting for the sight of more blood flowing in the "Cause of Freedom", questioned Horlick's loyalty to the new order. He called the young soldier an aristocrat because he always withdrew from the blood-spilling adventures. A few others of the ragged, dirty horde began muttering to themselves. It was a bitterly cold night, but a night without a breeze. The men were huddled about a fire fed with wood from the demolished palaces. Horlick knew his danger—these were creatures of instinct. Let the cry be taken up, and he was a doomed man. He admits that he was terror-stricken, but some instinct showed him the path to deliverance. Calmly, as though nothing were amiss, he took his violin which he had kept carefully wrapped in a dirty blanket, and began playing the folk-songs dear to the heart of every Russian. He motioned to a friend to start singing. All of the men were homesick to some degree, and the sound of familiar melodies caused a wave of feeling to come over them. One by one they joined in the song, and soon the entire encampment had taken up the tune. And Harry Horlick played his violin in tremulous happiness, blessing the instrument that had saved his life.

A thrilling story it makes. Harry Horlick likes to reminisce of his adventures in Russia with the soldiers of the Czar; as a Comrade of the Revolution; with the peasants of South Russia; of his stay in Constantinople. Weekly he tells a new story, and he tells it with the words of music. As he directs the A & P Gypsy orchestra he tells of those bitterly cold nights around the Bolshevik camp fire. He tells of desperate encounters with the Turk. His orchestra repeats

the saga of the wandering gypsies. And Harry Horlick becomes more personal in his musical reminiscences as he takes up his violin and tells of Tiflis, his native city; and of the quaint Constantinople cafes.

When this war veteran came to the United States he brought with him a few compatriots whose bodies were racked with privation but who glowed with the fire of music. They, as well as Horlick, had learned the Gypsy songs from the Hungarians, and were such able musicians that when they expressed their emotions musically, a hardened New York took to the string quintet immediately. Their fame grew. In 1922 they signed their first contract as the A & P Gypsies, under the direction of the round-faced, dark haired young man, their comrade Harry Horlick. Of the original Gypsy orchestra, after eight successful years of broadcasting, Horlick still retains three men, and the four of them are inseparable companions. The A & P Gypsy orchestra has now reached true symphonic proportions, having a personnel of twenty-seven musicians, a tenor and a contralto.

AT the NBC studio the leader is "Harry" to all of his men. His quick, vibrant personality allows for a spirit of good fellowship that is recognized and appreciated by the members of his orchestra. After the weekly broadcast, Mr. Horlick and his men always find their way to some quiet restaurant where they solve the music problems of the day, and where they sing Russian and Gypsy songs. He likes his men. He wants to be, not the Maestro Horlick, but plain Harry Horlick, one of the Gypsies. "I am just a friend with my men," he says. His voice has a strong Russian accent and his speech retains the academic touch that his English studies in Russia left with him. "I want always to keep in very close contact with them. I am not strict. I do not have to be. My men are true musicians, they are all artists. I do not tire them out with weary rehearsals, and that is why they are at their best during broadcasting." He alludes with evident pride to the fact that there are members of his orchestra who are also members of the New York Philharmonic Orchestra, a world-famous group admitting only outstanding musicians.

A true Gypsy is Harry Horlick. He has two great loves: primarily his music; and then, to be in the sun's rays. He chose his studio because it is such a sunny place, and he delights in playing his violin in the spotlight of the sunbeams that come in through the wide-open windows. And he is an outdoor man, also. An excellent swimmer and oarsman, he spends the summer days at a beach, and finds keen enjoyment in motor boating and yachting. He goes for long tramps, his ears tuned to the music of the wayside. The snatches of songs he hears he jots down, and now has thousands of these musical notes—the Gypsy songs he keeps in the form of memos, and also the tunes he heard in Russia and Turkey. From these he takes the music which brings relief to those who turn aside from the jazz of the modern day.

HE has often been called the apostle of the "popular concert", and well he might be, for his musical philosophy gives no quarter to "hot-stuff" (as he calls it, with a grimace). "I cannot stand dance arrangements as they are done now," he said, his black eyes flashing with the spirit of the evangelist. "There is no soul to the music, but only a thinness that makes the music disappear. That is not music—it should be tangible, and should be retained in the heart of the hearer. Concert music is slowly coming back; there are many lovely songs in the popular vein today, and these in concert form are melodic and stimulating. I am trying to make every popular number I offer have concert form. That is why Max Terr is with me. I want my presentations to be original, of course, and I also want to contribute something to the spirit of music here, just as the music of the Gypsies has given something to the music of every country. So many people write me that my orchestra is filling a musical deficiency in their lives. I think soon all orchestra leaders will realize that such music is wanted and needed. Everybody *needs* music." He speaks with great feeling. It is his life. He becomes excited and glows with an inner fire.

When he speaks of Max Terr—his concert arranger, he speaks with the warmth of close friendship. Terr, while comparatively a newcomer to the A & P Gypsies, has carried out the spirit of the organization in every sense. His arrangements, unique and inspiring, have raised the orchestra to new heights of musical success. When Milton Cross announces a Max Terr arrangement, listeners-in settle back to a period of keen enjoyment, for the melody of the number is woven with the symphonic countermelody into a delightful pattern. The reputation Mr. Terr achieved while music supervisor of the Paramount West Coast studio has been more than sustained by his record with the Gypsies; hence Harry Horlick, whose religion is music, offers whole-hearted friendship to a man who unfolds the beauty in the world of melody.

HORLICK is thirty-four years old, unmarried. He makes up the paradox of the artist and business man in one. In his frequent conferences with members of the corporation to which he is contracted, he shows a surprising grasp of those things too many artists find beyond comprehension. Perhaps it is this spirit of worldliness, which enters into the interpretations of the compositions he and his orchestra play, that accounts for the popularity he enjoys in a field where success is often all too transient.

"The satisfaction I find in conducting is but a vicarious one," said Mr. Horlick. "To me, my violin is everything."

So the history of a lad who had many adventures; who saw the primitive side of life, but who *heard* much of the harmony of the land. So a history filled with blood and terror, with privation and suffering, but one with an ending even happier than tradition demands. Harry Horlick has not only carved himself a niche in the hall of Radio and musical fame but has opened a new road to musical enjoyment for those who find the usual symphonic way too rocky, and the primrose path of the "hot stuff jazz" too artificial and unreal for enjoyment

Little **Jack** Little

Harold Stein Photo

F LITTLE JACK LITTLE hadn't been so restless when he was a small boy, probably he now would be leading a more prosaic life than that of lebrated NBC entertainer.

ick was an energetic lad. Left to his devices, he was always in mischief. had a genius for disarranging well-red rooms. And because his mother ys had to keep her eye on him, Jack taught to play the piano—to keep busy. ck was born in the Silverton section ondon. Not far away was the London servatory of Music. The authorities he conservatory permitted the women the neighborhood to use the vacant o studios several mornings each week, Jack's mother was one of those to advantage of the opportunity.

ack was too small to be left at home le his mother was studying music at conservatory, and it would have im-lled the draperies and ornaments of studio had he been permitted to fol-his undisciplined impulses when his her sat at the piano. There was noth-left to be done by Mrs. Leonard—for le Jack Little was born John Leonard —but to take her four-year old son in her lap as she played.

At first the music was so interesting that the lad forgot to fidget. But as soon as he discovered what caused the music he began to bang away at the keys with his chubby fingers. No one but a mother could have discerned in this childish prank that the boy had a natural gift of melody. Mrs. Leonard proudly predicted to the neighbors that her little Johnny some day would be a great musician. And instead of perfecting her own playing, she began to teach Jack. Later private tutors were employed.

Jack's father was connected with one of the large English manufacturers of motor cars. W. W. Marsh, late Democratic leader in Iowa, purchased one of these cars on a visit to England. During the transaction he became acquainted with the elder Leonard. He urged Jack's father to come to America and promised to establish him in business if he would make a home for himself and family in Waterloo, Iowa.

So, when he was nine years old, Jack left England. A certain Patsy Campbell, now a successful London business man, was his best pal and playmate. Tearfully, Jack gave young Campbell his most prized possession as a goodbye gift—a bag of marbles. Last summer, visiting the scenes of his childhood for the first time since he left, Little Jack Little met his old friend on the sidewalk in the Silverton

district. Surprised, they halted instantly. Each recognized the other immediately, and both recalled the gift of the marbles.

It was a wan and sea-sick lad who landed in Montreal after a rough voyage across the Atlantic. Even if the boat on which the Leonards crossed the ocean had been larger, they all would have suffered from the usual landlubbers' ailments, Jack says. One rough day Jack was wandering around the pitching, wave-washed deck in a blind search for more comfort. He paused on the stern deck and held weakly to a wobbly air vent on the ship's very end. The vessel was tossing, the wind was howling and the sea occasionally flooded the deck. If his parents missed him from their cabin, they were too exhausted to look for him. Little Jack Little doesn't understand how he managed to keep his precarious perch, but he remembers that he didn't care then whether he was washed overboard or not.

JACK'S introduction to the neighborhood boys in Waterloo was memorable. His mother dressed him up in his best clothes, and sent him forth to meet his future playmates. But Iowa boys had never seen anything like him before, and probably few such specimens since. Jack wore an Eton suit with a wide white collar, a cap of marvelous shape and he carried a cane.

"And did those kids give me the raspberry!" Little Jack Little grins now as he recalls that first day in Waterloo, Iowa.

But before his father had completed his naturalization, Jack was completely an American boy. He learned to play baseball and was a star shortstop on the high school team. He still is an ardent baseball fan.

His parents wanted Jack to win a degree at the University of Iowa, but the young man never could get excited about his various courses. He organized a band and soon was playing at numerous dances and social functions around Iowa City.

In two years he decided that he had all the academic training he could use. He planned to go to California. With two other young student-musicians, he set forth. They found Kansas City a congenial city and for a week took in the sights. When they checked up on their finances they discovered they didn't have enough money to get to Denver. But it was May, and they had fine overcoats. So they sold them for enough money to get to Denver.

But May in Denver was different. A thick blanket of snow covered the "mile-high city" when Little Jack Little and his three companions, in their light spring clothes and minus top coats, reached there. Jack and another of the trio obtained jobs washing dishes in a cafe. They were able to eat heartily again, but his two companions were discouraged and wired home for money to return East.

Jack found a job playing the piano in an orchestra. For the next eight months he remained in Colorado. Then, when he had money enough for a ticket to New York, he set out for the Mecca of musicians on Manhattan Island.

While he was looking for work he loafed around the publishing house of Irving Berlin. One day he was playing idly on a piano when Yvette Rugel, featured vaudeville entertainer, dropped in. She was impressed with his playing and invited Jack to become her accompanist on a tour "around the big wheel". Six months later

"And did those kids give me the raspberry!" exclaimed Little Jack Little as he recalled the day he made his debut in Waterloo, Ia., after his arrival from England. His mother had dressed him up in his best Eton suit with a wide white collar and he carried a cane. It was like circus day for those Iowa tads when Jack sallied forth in all his finery. He was 9 years old at the time.

the tour ended and Jack was looking for a job again.

"The need of money caused me to begin writing songs," Little says. "But I had difficulty in getting publishers to print them. That was nine years ago and Radio was enjoying its first wave of popularity. The idea of popularizing songs by broadcasting then occurred to me, and I sold the notion to Henry Waterson, a music publisher. He found a singer to team up with me, and we went from city to city, singing over any station that we could reach. There were only a few Radio studios in those days.

"That proved successful and Waterson formed other teams to follow up our work. When my partner succumbed to too much hospitality and failed to show up, I began to sing as well as play. At first I thought little of my voice, being more interested in introducing the lyrics to the listeners, but my peculiar whispering style clicked. I used informal monologue between the songs; just a bit of homey stuff as though I were talking directly to a family group. Folks began to write in that they liked me."

Soon theatres began to make offers to Little Jack Little for personal appearances. There he proved as successful as he had in Radio. For several years he divided his time between broadcasting and stage appearances.

Then he tried to attract an offer from the big broadcasting chains. But he failed to make a connection. He thought he was destined to remain a sectional favorite of the Middle West.

"That wasn't such a bad prospect, after I forced myself to quit dreaming of a wider audience. So I settled in Cincinnati.

"I built a fourteen room house in the exclusive residential district of Hyde Park. The big home was built on an acre and three-quarter of land. During the three years I lived there I spent a great amount of time, thought and money on improving that ground, and when I came to New York to live after I signed with NBC late last December, it was a garden spot. I was glad, of course, to begin my career as a national entertainer, but it nearly broke my heart to leave my beautiful home in Cincinnati."

Little says that he experiences greater nerve strain when he's singing before a microphone than he does before an audience.

"Before a crowd you can gauge your performance by the way the folks out front are receiving it. You can sense the mood of your visible audience, and tell whether light, classical, dramatic or humorous songs would better suit its fancy. But in a Radio studio you feel pretty much in the dark. You don't know what they'd prefer to hear, nor how your voice is coming to them.

"Then often you don't put over a song like you rehearsed it, and that bothers you. I try to figure out exactly how I'm going to sing, but often when I'm on the air I don't put the accent where I intended to.

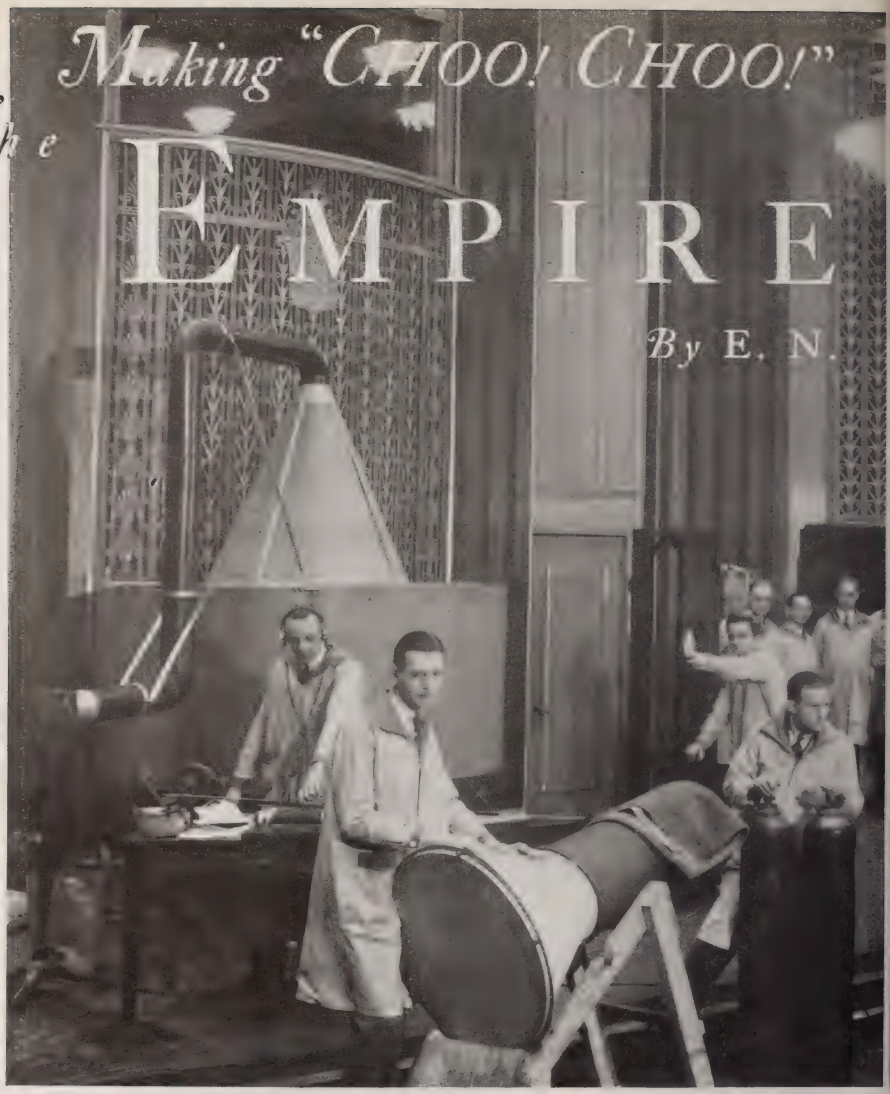
When Little Jack Little broadcasts he sits at the piano accompanying himself and sings close into the microphone with his peculiar voice, half talk and half melody, which has been termed a "speaking easy baritone". His voice transmits the bright and magnetic personality which characterizes him in real life.

THIS NBC star stands five feet four inches, weighs 130 pounds, but is broad and husky. One of his early partners also was about Little's stature and Jack changed his pal's name from Paul Lougher to Paul Small. In the Middle West the pair was booked as "Jack and Paul; Little and Small". Paul Small now is a prominent Radio entertainer.

Even in the coldest winter Little Jack Little doesn't cover his smoothly brushed light brown hair with a hat.

Automobile speeding is his greatest delight. Although he employs a chauffeur Little is always at the wheel when he is motoring where city traffic doesn't interfere with speed.

His other chief outdoor diversion is golf. And he shoots a good game, too. Last summer on his home course in Cincinnati Little was going around in the middle eighties. This year he expects to score in the seventies before winter forces him to sheath his clubs again.



Jack rehearses his songs and programs many hours each day. He is always trying some new arrangement of his own melodies, or playing some new tunes.

LUCILLE HUSTING, feminine star of the Empire Builders, is especially fitted for the part as her own ancestors had a share in the scenes she portrays. In one of the productions Miss Husting wrote the script and created for herself the role of her own great-grandmother.

The Making of "CHOO! CHOO!" EMPIRE

By E. N.

Here are the "soundicians". Left rear, funnel picking up roll of toy car on circular track, beneath, and conveying it to mike at end of stove-pipe. Incidental effects by man with earphone. Choo-choo in front. Hissing steam, and door-slam, right.

A-BO-O-O-ARD!
A-bo-o-o-ard!

The engineer in the locomotive cab acknowledges the conductor's "highball" with two short blasts of the whistle, pulls the throttle open a couple of notches, the super-powered locomotive puffs, steam hisses, and the long train of heavy steel pullmans gains momentum, and is whisked away, becoming fainter and fainter in the distance until only an occasional distant whistle is heard.

It is the Empire Builder leaving—via Radio. The National Broadcasting Company and the sponsors of this program, the Great Northern Railway, receive hundreds of letters each week asking how the train effects, which are an important part of the "Empire Builders'" dramatic sketches, are produced. "Are they recordings?" some inquirers want to know. A great many others seem to think that the train effects used on "Empire Builders" are obtained through some ingenious system of microphones strung out along the right of way some place between Chicago and the Pacific Coast, so that the studios in Chicago can pick up a train sound somewhere along the line any time it is required. Still others give the orchestra credit for producing these effects. There is an inter-

Bernard, directing, center. Harvey "Old Timer" Hayes, facing mike; Don Ameche, beyond him and Lucille Husting and adine Flynn are at right. Ted Pearson, announcer, is seated below Bernard; Joseph Koestner, orchestra leader, is in back.

g story behind the Empire Builder ie air.

hen this program first went on the from the New York studios of the onal Broadcasting Company, in Jan- of 1929, an imitation train was ob- ed, through a combination of or- ra effects, a tank of compressed air, comotive bell, and a small wooden le. The effect was considered pretty in those days, but it was hardly more than suggestive of a railroad train and hardly close enough to the real thing to be called an imitation.

All Radio listeners will recall the great broadcast that opened and dedicated the Great Northern's eight-mile tunnel under the Cascade range in western Washington, as well as the remarkable program broadcast from Chicago six months later when the railway inaugurated and dedicated its new fast train between Chicago and the Pacific Coast—the Empire Builder. On these two occasions microphones were used to pick up actual train sounds and thousands of letters were received by the railway expressing the thrill of listeners in hearing a railroad train roaring in their own living rooms.

These two programs set a standard for Great Northern sound effects that the sponsors of the programs were determined to live up to. Naturally it was

Tiny car, beneath funnel, that produces click of rails by "express".

impractical to broadcast actual train sounds each week—but it was imperative to find means of simulating the real sounds as closely as possible. This gave Harold Sims, the man in charge of the Great Northern programs back in St. Paul where the headquarters of the railway are located, the idea that every train used in a Great Northern program should be the real thing and he began work on a plan of recording a wide variety of train sounds which could be fitted into each week's dramatic sketches as required. While the plan presented a great many serious obstacles of a mechanical nature the thing that finally caused the whole scheme to be abandoned was the broadcasting company's positive refusal to permit the use of a recording on its network. A prolonged controversy ensued in which the broadcasting company was adamant and no choice remained to the program sponsor, if he wished to continue "Empire Builders" on that chain, other than to build up a synthetic train effect that would be as satisfactory as a recording.

Developments in the talkies and in the making of recordings made it imperative that this objective be accomplished. Where a wooden whistle, a bell and a drum was acceptable as substituting a railroad train two years ago, it was becoming increasingly obvious that they would not long remain acceptable substitutes. Some recording companies had obtained fairly satisfactory recordings of trains and these were being sold to local Radio stations and used by them on local programs. The result was that the local stations were using better train effects on their programs than the Great Northern was able to use on its big chain broadcast. In addition, the talkies were being developed and people were commenting on the excellent train effects heard in the movies, which reflected unsatisfactorily upon the Radio reproduction.

This would not have been so serious if "Empire Builders" had not been a railroad program, but being such, it seemed to the sponsors of the program imperative that their train effects should be second to none.

There was only one thing that remained to be done and that was to attack the problem with a view to reproducing, through mechanical means, the sounds of the real thing. It was particularly necessary to do as good, if not a better job, than could be done by recordings.

THIS looked like a large order, and it was. However, there was one slight advantage enjoyed over recordings, and that was that none of the recording companies had gone to the expense of elaborate experiments to get train recordings that were entirely satisfactory. The recording might be virtually authentic, but the discs invariably recorded a large volume of varying sounds which reproduced as more or less of a meaningless jumble. For theatrical purposes, trains have certain distinguishing sounds which listeners clearly identify and a synthetic effect built up with only such sounds and without the meaningless jumble of noise, would have sounded more real than the real thing, if such a paradoxical situation might be stated.

To illustrate, the most impressive paintings of scenery are not a mere process of duplicating form and color. If it were, an actual photograph, carefully colored, might be presumed to surpass any painting that an artist could hope to do. As a matter of fact, the artist develops and emphasizes form and color so that it appeals to the eye and the imagination. In the same way, it was with this thought that the Great Northern Railway wen about the problem of reproducing trai sounds which, while not entirely authen tic, would seem fully as real as hearin the train itself.

Experiments along these lines were be gun while the program was being broac cast from New York last year. A crud circular device with parallel rails, an three rail joints, was constructed to sim ulate the clickety-click-click of the rail A set of wheels were operated over th circular track to produce this effect. Th rumble of the train was produced by couple of wooden wheels mounted on four-foot turntable which had a wood base. Long wire brushes were made a used on a tympanum and snare drum were used to reproduce the "chuggin of a locomotive. A Great Northe locomotive bell was sent to New Yor A wooden whistle and a tank of co pressed air completed the outfit. Th did very well for the time being but h many shortcomings of which it was o vious the Radio public was aware.

THE bell, for instan despite the fact that it was a real lo motive bell, sounded too much like cowbell. This probably was due to fact that it was in the studio and n out-of-doors. The whistle did not s isfactorily imitate a real whistle with tremendous power and volume. An fort was made to see what could be do about installing a real whistle on roof of the National Broadcasting Co pany in New York and also about putti the bell on the roof, with a microph pickup. This plan had to be discard for the reason that about the time "E pire Builders" went on the air there usually a traffic jam down on the str below and it was feared that in some the playlets where the train was suppo to be rushing over the Montana plains roaring through a canyon out in Rocky mountains that the microph would pick up also the noises of a tra jam in New York at night, with all motors honking their horns. Too, might have been something of a surp to Fifth Avenue suddenly to hear an gine whistle and bell sounding high up the stately skyscraper.

The matter of these sound effects, well as the sponsor's desire to assu direct responsibility for the productio its broadcasts, resulted in transferring current series of shows to Chicago autumn.

The National Broadcasting Comp was just opening new studios on the floor of the great Merchandise M built by Marshall Field & Company. building, with more floor space than other building in the world, had space far above the street and sev blocks from the congested Loop would be available for sound effects, it was decided to utilize this advanta

Throughout the summer various dev

ere experimented with at St. Paul with view to perfecting a device that would produce the sound of the heavy Pull- in tracks whirling along over the ls. The work was undertaken by arold M. Sims, Executive Assistant of e Great Northern Railway, who has en in charge of the "Empire Builders" ograms. After numerous plans were olved and discarded, a circular track as built at the railway's shops, consist- g of thirteen pieces of rail steel. This ack was built absolutely to scale. Trucks nilar to those used on the big heavy ullmans were also built to scale and all nditions which could conceivably have y effect upon sound were carefully sim- ated. For instance, even wooden ties re used, and elevation provided to take re of the curvature of the track. The ints were fastened together with fish ates, similar to those used on real rails. hen came the matter of determining hat kind of ballast should be used. It as found that sand or gravel produced e sound of a train passing over a estle and after much experimenting it as found that the most natural effect as obtained by the use of a certain type wall deadening material placed between e ties and the board upon which the ack was mounted, with another piece the same deadening material under e board. A motor to drive the machine s placed under the table.

In the meantime, Mr. Sims had been refully analyzing the large variety of in sounds. We cannot go into any borate discussion of this work, but we ll use one effect as an example of the pains and effort that were expended on all of the sounds that one hears on "Empire Builders"—that is the effect of a passenger train coming from the distance, up past a certain point, and fading again into the distance. After stationing himself at different places along the right-of-way on fifteen or twenty different occasions, Mr. Sims found that almost every locality produced a different sound. Working with a stopwatch, it was found that the sound varied greatly also with the speed of the train, the weight of the train, topography of surrounding country, direction the wind was blowing, whether the train was picking up speed, slowing down or coasting; also the type of engine on the different trains accounted for quite a variety of sound. Finally the figures on about fifty different trains were taken down and an average reached that gave an index to the principal sounds, i.e., whistling, puffing of locomotive, roar of train, steam, bell, etc.

THE track machine has now been developed to a point where it reproduces very faithfully the click of the rails and the roar of the cars.

The "chugging" of the locomotive as it is now done, was the result of the construction of probably more than one hundred different kinds of wire brushes and it was quite by accident that the method now used in reproducing this part of the effect, was discovered. One of these brushes had been left lying on a kettle-drum during a sound effects rehearsal, when one of the assistants happened to pass a tiny wooden mallet over the brush. The sound was picked up by the microphone and carried into the control room where Mr. Sims and his assistants were discussing the problem. It was quite a faithful reproduction of the "chugging" of the locomotive!

Special valves were built to operate on compressed air tanks in order to get steam effects. It was found necessary to try several locomotive bells, before two bells were obtained which registered correctly over the microphone.

To bring these various units together into one effect is accomplished through a time chart which looks about the same as music does to a musician. It is spaced off as to seconds and Mr. Sims sits in the control room during each program with a large second clock in front of him and beats off the seconds with his hand, as well as counts aloud. The men who are operating the track machine, the steam tanks, the drum which produces the puffing, count each second with Mr. Sims, as they can see him through three panels of glass which separate the studio from the sound-proof control room. They know just what is required at each second, so that just as the engine, in theory, whisks past the bystander, all sounds are brought to their proper volume and speed.

The studio audience, which usually comprises between two and three hundred people, hear neither the bell nor the whistle, nor the noise produced by the track machine. They hear only the puffing as done by the drummer, the operation of the steam tank, and the clanking of the swiftly moving mechanism of the engine.

Some of the more impressive sounds are produced on the roof as shown above and piped into the studio for blending into program at proper sequence.

The LUCKY *Adam's*

From a Radio Interview about and with G. W. Hill in the Columbia Fortune Builders Series

By Douglas Gilbert

Douglas Gilbert, who conducts the Fortune Hunter series

THIS is Douglas Gilbert, generating to you tonight the voltage of George W. Hill, dynamic president of the American Tobacco Company; third-rail power of his industry—the lighted end—of Lucky Strikes. Mr. Hill is here beside me. He will clinch for you, in this mike-to-mike manner, some of the points I shall make at the close of my talk.

Last year George Hill earned for his company $43,294,000, and distributed to his common stockholders $29,293,000 in dividends. These are figures unequalled in the tobacco trade. The whole tobacco trust, dissolved in 1911 in the trust-busting days of Teddy Roosevelt, never approached them. This money is the financial Phœnix arising from the ashes of six billion two hundred-nineteen million cigarettes sold by one man—Hill—and smoked by 30,000,000 customers.

A record is supposed to speak for itself. It does. But in Hill's case it has to be, it ought to be, translated, interpreted. Such earning power must be deserved. There's more to Hill than dollars and cents. High-spot, red-hot, head-line Hill, sloganeer of cigarettes, means something. Stands for something. Is a symbol of some kind or other. Let's try to smoke him out from under that battered Borsalino he wears so rakishly. We'll turn off the switch that makes him revolute. For fifteen minutes Hill's going to be powerless, while we chuck away our rubber gloves and dismantle, barehanded, this human dynamo to find the spark of his success.

That spark glows for a psychological reason. For Hill is a business bundle of suppressed desires. Graduating from Williams College he came to the American Tobacco Co. in 1904, serving under his father, the late Percival S. Hill, then president of the company. He was curbed by tw handicaps at once. He was a rich man's son—and the son of the presi dent; tie-ups at which the rank and file of any company bristle.

Moreover, he was the son of his father, a company baron of the ol commercial school. When George offered a suggestion he was pipe down by the parent quickly. George was given to understand at the star that he was there to learn—not to suggest. He started learning; an kept his suggestions to himself for future reference. As a matter of fac he did pretty well, since his first major activity was the promotion o Pall Mall cigarettes, a swanky and expensive smoke in the old days yo old timers like to remember. He put them over as a swanky cigarett with his first slogan—"a shilling in Lor don, a quarter here". Not so hot a "reach for a Lucky", but it got over h idea—the suggestion of the Savage Club

started in with his board of directors—HOT, without dressing. He laid down the law to them with a hitherto unheard of money-demand for promotional work and advertising. You can imagine the battle that took place. Enough of the representatives of the old régime remained to bristle up a series of tut-tuts that later gave way to unqualified rage. This young business upstart with his costly highfalutin' methods wasn't going to jazz them out of their shells.

To all of which Hill replied with the equivalent of "oh, yes" and proceeded to move his advertising Big Berthas into position. You have felt the raking fire of his barrage. But have you sensed the advertising psychology behind it? Hill's policy is to advertise so as to compete with the news columns in interest. This interest he makes a highly specialized, super-subtle appeal. Its note is personal and interesting. It is designed to reach not only the pocket-nerve of you readers but also your intuition, your subconsciousness, your self-interest. Yes, Hill's whole advertising, for which his annual outlay this year will exceed $12,000,000, is written (mostly by him, by the way) to this special purpose, or this special effect.

THIS accounts for the editorial quality in his advertising — "sunshine mellows"; "heat purifies"; "Luckies are k-i-n-d to your throat"; "an ancient prejudice removed"; and his calling attention to overeating. These are declarative and significant statements such as you find on the policy or editorial page of your newspaper.

Well, all this was a tidy morsel for his colleagues to chew over. But remember, he promised to justify his

methods. And, I started this broadcast with the record figures of his last year's earnings, earnings, recall, in a year of depression. So now does he meet with opposition? Listen, his old opponents lap it up. Nobody ever quarrels with success. If someone showed you how to redouble your profits, how to make that financial spade slam in your business contract bridge game, you wouldn't fight back. No one does with Hill now either.

A couple of years ago Hill became president of the American Cigar Company, a subsidiary of the American Tobacco Company. And again he started stepping out. The revitalizing methods of the vital Mr. Hill were at work. And again Hill did the unexpected. He employed the late Alfred W. McCann to visit his newly acquired, dirty and in-the-red cigar factory, and tell him what was the matter with it. Whoever heard of hiring a food expert to analyze the vitamins in an ailing cigar? Well, McCann put his whirlwind vacuum cleaner to work and swept Hill's factory clean.

HILL installed modern machinery—"no human hand touches your cigar"—I'm quoting Mr. Hill, who proceeded to apply the same kind of mass production to cigars with an intensity that marks his labor for Luckies. The tremendous advantages in cleanliness in smoking struck Hill forcibly at this time. Nothing is more personal to you than your smoke.

What is it in a word, Hill asked himself some eighteen hours a day for six months or so that epitomizes what I have done. The answer, ladies and gentlemen, rests against an easel above a box of Cremos in his office at 111 Fifth Avenue, New York—it is a framed work—"Spitless".

A while back we called him a sloganeer, for Hill is responsible for the catch phrases that confront you on the billboard, in your newspaper, and magazine, or beguile or startle your ear over the Radio. He must have raised you out of your chair a few weeks ago with his "one man's spit is another man's poison". Startling, but true, and saleable.

He is a master of epitome—the electrifying word or phrase that sums up his two hundred million dollar tobacco enterprises. And he knows almost to the penny what its response will be.

The candy manufacturers, through the Sugar Institute, were up in arms against him two years ago when he reached for his Luckies instead of a sweet. Boycotting methods were suggested against him; suits were threatened; the Federal Trade Commission was invoked to call him off what the Sugar Institute called his "unethical" advertising, whatever that may mean. Hill faced them and fought them back. Get the psychology back of this.

"Don't you see what I'm doing for you?" he asked. "I'm centering the nation's attention to two things—sugar, and cigarettes. Wait 'till the results are shown". They waited. At the close of the year Department of Commerce figures revealed that more sugar had been consumed and more cigarettes sold than at any other time in our commercial history. Then Hill, the victor, and maybe this means something, withdrew the criticized slogan.

B. A. Rolfe, conductor of the Lucky Strike Orchestra

The doodads and gadgets that he has installed in his factories are equally humble, and interesting, in their origin. For example, the ultra-violet ray that is now applied to the blend that goes into Luckies. Hill, in London some years ago, was guesting some friends at dinner. One was served with an unripe melon. Hill had recently yielded to the high-pressure methods of a British salesman who expanded on the miracle of synthetic sunshine that was his for the price of an ultra-violet ray lamp. He bought one Presto! The unripe melon was a chance to prove its mellowing, purifying, ripening sunshine claims. Hill took the melon and exposed it to the ray. In twenty minutes it was edible.

"WELL!" said Hill, "if it'll do that to a melon, its effect on tobacco might be equally advantageous. I'll try it anyhow." He did. The tobacco seemed improved. Scientific tests substantiated his belief. So today the factories are equipped with th process.

Competitors are often aroused by h aggressive methods—but his wise friend enemies hold back and let him have h way. For they know that his methods methods that are in step with the jaz mad beat of America's currently pulsin life—are for the good of the industr More cigarettes are sold of *all* bran because of Hill. And Hill knows it. looks over his annual report and those his rival companies, and believe me they satisfy. For an analysis shows th for every dollar earned by eve cigarette sold in America, Hill and the American Tobacco Co. takes 68 cents.

He can afford to be frank. A he can also be decent. No i industrial executive in the Uni States shepherds his stockhold with greater zeal. His reports veal—always—the soul of company. His statement at close of 1930 told—and for first time in tobacco history—h many cigarettes he sold.

IT WAS some billion odd, you'll remember.

And about six months bef that, if you were a stockhol you received a letter advising of a contemplated split-up stock on a two-for-one ba This letter was in line with H belief that owners of shares v entitled to know the plans of management so that they c be guided in their holdings cordingly.

And there's our man, the man dynamo we took apart, ning up Hill, a mile a minut dollar a second. SPLIT-se symbol of America's high pres industry. And here he is in per

Interview with Mr. Hill

GILBERT: Mr. Hill, do you mind s ping here to the microphone a mom The American people are smoking m than 46 billion of your Lucky Strike arettes a year and several billion c ettes of other brands. That's a lo cigarettes, Mr. Hill, and I have wondering just what the possibilitie expansion are.

HILL: Why, Mr. Gilbert, that's f easy. Mr. Ford and Mr. Firestone answered that question for me a time ago. On the other side of th lantic is potentially as fertile a fiel future development as *this* country been for the past ten years. South A ica is another strong possibility. T lieve that our foreign sales have incr at an even greater speed than our A ican sales. You know, Mr. Gilbe cigarette that is good and pleasing is ally just as pleasing 5,000 miles away

GILBERT: Do you think, Mr. Hil

will ever come when the people in country will develop a taste for thing different from the cigarette?

LL: It may be, but I think the time ar way off. The cigarette, you know, perfect tempo with contemporary rican life. If the time ever does , however, when the American pub- ill turn to something else, well, I be- that the same qualities of perform- and imagination that have made y Strikes and other cigarettes out- ling in this country will establish a rship in that other field, whatever ay be.

LBERT: Do you look for an up-trend ur own industry, Mr. Hill, during the year?

ILL: Why, I think my industry is not different from the general run of r major ones in this country. I per- lly feel that they are all on the up- l. I'm not given to predictions, you v, but a man would be foolish to for anything but forward movement his country during the next few s."

Man Behind the Program

y A Radio Digest *Staff Writer*

WHEN thirty or forty million people tune in on the Lucky Strike pro- ns every Tuesday, Thursday and Sat- y night, and cock their ears and wiggle r heels to a distinctly Lucky Strike po and harmony, they are registering roval not merely of B. A. Rolfe and orchestra and soloists, but of the men hind the set" who also play an impor- part in putting the programs over. adio has its stage managers too. For Lucky Strike hour the stage manager e impresario—is George Washington

Hill picked Rolfe and he helped Rolfe ct the members of this fifty-piece or- stra. Hill names the soloists and goes to some effort to get the people he wants. (When he gets them they never have any reason to complain about the size of their cheques). He controls the expenditure of more than two million dollars in time and talent yearly to make the Lucky Strike Hour one of the most popular features on the air. It was Hill who decided upon the type of music to be played and the instruments to play it; who developed the formula of interspersing dreamy and spirited selections; who devised most of the hundred and one means of keeping the orchestra and the audience on their toes.

And yet, so far as the public is concerned, George Hill is self-effacing—and virtually unknown. He is not mentioned on the programs. You don't hear his voice on the air. He doesn't wield a baton or pull a bow or toot a horn, in public or in private. He is not a "professional" musician or Radio technician (although listeners must agree he knows as much about these things as some top-notch professionals.) He is a manufacturer and a salesman of cigarettes. And the reason Lucky Strike programs are popular is precisely the same as the reason Lucky Strike cigarettes are popular. It is because George Hill knows "people." He knows how to interest multitudes in programs and products because he knows, better perhaps than any other man in America, what scores of millions of Americans want. And he knows also how to persuade them to want and enjoy what he has to offer. Showmanship and salemanship are pretty much the same, and George Hill has both.

BILL SCHUDT has a pair of ears to be proud of. They are useful as well as ornamental. Not long ago he had one of them screwed to a telephone receiver when he received a very agreeable shock. "Say, you've got a great Radio voice!" he exclaimed to the party at the other end. That party was Douglas Gilbert, the author of this article. He first appeared on Bill Schudt's Going to Press Period. Then he was engaged for the Fortune Hunter series. He is a newspaper man of long experience and is said to have interviewed every person of national prominence in the country.

Let us drop in and watch the man at work. He may be said to have two "headquarters"—one is at the executive offices of The American Tobacco Company, at 111 Fifth Avenue, at Eighteenth Street, the other at the Directors' Room of the National Broadcasting Company at Fifth Avenue and Fifty-fifth Street. The first building is blackened with age, the other is new and bright. George Hill is oblivious to both. He is working with tremendous energy at the particular task at hand. Surroundings mean little to him.

You are ushered in to the President's office in the corner of the tenth floor at "111". (One of American Tobacco's brands of cigarettes, you may remember, had that number as a name.) You pass a life-size statue of an Indian, which appears on the company's trade mark. You enter the corner door and find yourself in a large room. There is plenty of light in the room, but the fittings are black. On one wall is a photograph of an elderly man —probably Percival S. Hill, father of the present President, or perhaps it is James B. Duke, one-time king of the tobacco industry. Until now it might be a law office. But on top of the bookcase is a statue of a bull. The bull has his "associations" too—he typifies Bull Durham. On a dark colored desk in the far center are boxes of cigars and cigarettes. Yes, Hill smokes, when he has time. He prefers cigarettes to cigars.

At a long black table in the center, big enough for a directors' meeting, a red faced man in a blue suit is writing. Although

Chicago as

By MERLIN H. AYLESWORTH

President of the National Broadcasting Company

Grant Park, below, beautifully landscaped and including the million dollar Buckingham fountain, gives approach to the bristling skyline and to the forthcoming world's fair

CHICAGO, Radio's capital?

The prediction has been made many times. Regardless of the opinion of any one individual, it is certain that there is already enough evidence as to the trend in this direction to cause discussion of the question. No doubt can exist in the mind of any individual but that Chicago already is a Radio center. It was one of the first Radio Centers in the world, and it has to its credit many other of the "firsts" in broadcasting. It had one of the first broadcast transmitting stations in the United States. It presented, over the air, the first broadcast of a grand opera production from the stage. This was nearly ten years ago, in November 1921, when station KYW picked up a performance of what is now the Chicago Civic Opera Company from the stage of the old Auditorium Theater.

Geographically, of course, Chicago occupies a preferred position in the heart of the country and a vast population.

In matters pertaining to nearly all phases of broadcasting, from the development of talent to the invention of mechanical equipment, Chicago has always been to the fore. This is due to

Within sound of the demolition of Fifth Avenue skyscrapers in New York, to make way for the new Rockefeller Radio City, Mr. Aylesworth states his belief in Chicago as the Radio Capital of America, and tells why. With the Midwest metropolis radiating into thickly populated sections unhindered in all directions the NBC president's contentions seem especially well founded.

t h
fact that a
most from the sta
the mid-western city had
number of active, intelligently ma
aged individual Radio stations. Amo
them the spirit of rivalry has be
stronger, perhaps, than among the broa
casters of any other city in the Unit
States. The foremost of these statio
were owned or affiliated with newspape
which insured for them a most inten
spirit of progressivism, and fostered
ever advancing standard of program pr
duction.

The broadcasters of Chicago have n
been content to permit the stage, t
cabaret, the Lyceum Bureau, the conce
hall and vaudeville to supply them wi
most of their entertainers. On the co
trary, they have developed and ma
many names that were never heard
before, and are now nationally know
One outstanding instance is the int
nationally known act of "Amos 'n' And
which was incubated in the studio of
local Chicago station.

From the viewpoint of music, the ci
is adequately supplied with musicians

Radio Capital

Merchandise Mart, home of the new NBC studios, looks down on the river that "runs up hill" from the lake

hest class, and it has within its ies many well conducted schools nservatories of music.

it becomes plain that the spirit of tion among the Chicago stations veloped and will continue to de- many new supplies of Radio talent.

NOR have these individ- tions been lacking in progress in tter of equipment and studios. e in the world are there any finer al broadcasting units than in . All of the more prominent have new studios and offices ave been created within the past of years. There have been con- mprovements in the transmitting f these stations, located outside of y limits. From the eye of an ; these transmitters are on a par y in the world. Their capacities ll the way from 500 to 50,000 Many of them maintain their search laboratories and are con- experimenting with television, ave transmitters and other forms less communication.

Because of its early start in Radio, there are now announcers, entertainers and engineers scattered all over the country whose experience in broadcasting came first in Chicago. It is certain that the backbone of broadcasting is, and always will be, individual stations. Without these to carry the programs, it would not be possible, naturally, for the American people to have such major production units as have been created by what are popularly known as the chains.

Merlin H. Aylesworth

Some idea, therefore, of the completeness of the broadcasting service given the listening public in the Chicago territory and states adjacent, can be gained from the statement that there are at least eight grade A stations in the city.

Ample and concrete evidence of the faith that broadcasters themselves have in Chicago's future as a Radio center is already at hand. The National Broadcasting Company has created the newest and most completely equipped network broadcasting center in the world on top of the Merchandise Mart in Chicago. There, in a prodigious penthouse, are housed six of the finest broadcasting studios in the world, and one of them is the largest in existence. Into that plant has been put all of the knowledge and experience gained in the past ten years in broadcasting.

Some further idea of the importance with which we regard Chicago is indicated by the fact that the office force of the National Broadcasting Company, exclusive of entertainers, has been increased from two to more than two hundred persons. More than sixteen hundred people appear before NBC microphones each month in the six studios mentioned.

Further than that, provision has been made for the addition of at least four more studios when necessity arises.

It should be understood that the Chicago unit is not merely a branch office. It is a complete broadcasting organization and has every department necessary for the production and presentation of

Niles Trammel, vice-president of the NBC, in charge of the Chicago studios

Radio programs. In fact, there is nothing in New York that is not duplicated in the Chicago quarters.

Some more concrete idea of the Chicago plant may be obtained from a recitation of statistics. It is, in reality, a large two story building that has been erected on top of the Merchandise Mart, which in itself is the world's largest building. It contains more than 66,000 square feet of space, and two of its six studios are two stories high. The studios themselves measure more than 240,000 cubic feet, and more than 56,000 square feet of sound proof material was used in their construction. Light for the studios is obtained from more than 95 light fixtures or chandeliers, and more than 33,000 watts of electricity are required for this purpose. The halls, corridors and offices have more than 13,000 square feet of carpet, and the total floor space of the studios is more than 11,000 square feet. The various hallways and corridors have a total length of more than 1,760 linear feet. In the observation rooms, which permit visitors to watch broadcasts, there are more than 8,000 square feet, and these visitors look through more than 1,500 square feet of glass.

AS THE Radio audience of the country already knows, there are a number of Radio acts originating in Chicago that have become immensely popular. Among these are Amos 'n' Andy; Paul Whiteman and his orchestra; Phil Spitalny and his Edgewater Beach orchestra; Clara Lu 'n' Em; East and Dumke, with their "Sisters of the Skillet" sketch; Joseph Koestner and his orchestra; Lee Sims, piano individualist; Al and Pete, recording artists; Abbie Mitchell, interpreter of blues; Wendell Hall, the red-headed music maker; the Empire Builders dramatic cast headed by Harvey Hays, the Old Timer; the cast of the semi-dramatic sketch, "The First Nighters"; Chauncey Parsons, noted tenor; Coon-Sanders and their original Nighthawk orchestra; Adolphe Dumont and his symphony orchestra; George Dasch and the Little Symphony orchestra.

Only recently the production of the WJZ-NBC daytime sustaining programs were shifted from New York to Chicago.

ATTENTION is also called to the fact that the National Broadcasting Company has already completed arrangements for the acquisition of Station WENR, Chicago's popular 50,000 watt unit.

The Columbia Broadcasting System also has been continually enlarging its Chicago quarters. Only recently it completed large new studios in the Wrigley Building. It has enlarged its personnel many times over its original force.

It was only yesterday, figuratively speaking, that no nationally broadcast programs originated in Chicago. Now nearly two hundred come from that city every week. Argument in rebuttal has been advanced that the National Broadcasting Company is soon to build in New

York a great Radio City. This is true, but those who argue make it appear that this huge project that is to house Radio City is to be devoted exclusively to broadcasting. On the contrary, it will have, in addition to broadcasting studios, such enterprises as theaters and many other activities that are only indirectly connected with Radio production.

The success of any center that is to be considered in this argument regarding the capital of broadcasting, must depend to a great extent on its program talent supply. It is obvious that a town of two hundred people would have difficulty in finding among its citizens enough persons of sufficient musical and histrionic ability to give a complete broadcasting service sixteen to eighteen hours a day. As in the past, such talent has gravitated toward the larger centers of population. For this reason most of the men and women who professionally entertain are found in New York and Chicago.

Certainly it is true that New York is the theatrical center of the United Sta but such a statement does not mean t it is the home of all the talent in country. If the argument regarding N York's supply of talent held good, t Hollywood would not be the talking ture capital of the United States at present time. There is no argument that the "talkies" need and use all k of musical and histrionic ability. I also true that because talking pict are produced inside on the sound sta sunshine is no longer a factor.

Consequently, it is logical to assu if we are to believe all the argument hear, that when talking pictures bec a success two years ago, the produ companies would have immediately t ferred all of their activities to New Y City. These facts are pointed out in endeavor to show that New York ha exclusive hold on talent.

Even more important, however, any of these thoughts, is another one has to do with the year 1933. At time, in Chicago, as we all know, is to be held the greatest fair and position the world has ever known. it is not debatable that during 1933 cago will be the amusement center, of the United States alone, but of world. Naturally it will draw to it leading entertainers, artists, orche and bands of the world. This ex by the way, has already started. recently, Paul Whiteman, conceded one of the foremost orchestra leade the world, signed a contract with NBC Artists' Bureau in Chicago five year period. In addition to W man, the mid-western city is even playing host to some of the most fa orchestras. Internationally know Frederick Stock's Symphony Orch Numerous other symphonic organiz claim it as their home. There is need to discuss the artistic and m reputation of the Chicago Civic

CONSEQUENTLY, now on the city will play an increa important part in the amusement It is obvious that its position in casting is to be advanced in measu

In conclusion this can certai said: Chicago is a world's cen broadcasting; whether it will THE world's center is debatab everyone has a right to his own o

GABALOGUE

By Nellie Revell

The Voice of RADIO DIGEST

EVERY Wednesday night at 11 o'clock Miss Revell takes her WEAF mike in hand and rattles off a good old fashioned chinfest about the great and the near-great of Radio and stage circles.

HOWDY, friends. I think I could call this "old stagers'" night, because most everybody on my program tonight comes from stage. . . . My first is to be about e two gloom chasers, Snoop and p . . . or I should say, Messrs. Finan Winkopp. These boys were both in New York and have been friends e their boyhood days. . . .
y went to public school ther, played marbles and key, went swimming and ng, and then they entered mbia together. . . . At mbia, they played on the ball team, before the cap- found out what was g with the team, and decided he'd er have football players than come- s.

hen they decided to go on the stage. Finan joined the road show with the *Boots* company—then came back to York and joined George M. Cohan's *y Malone*. . . . Winkopp was a mem- of the late Sam Bernard's company, *old You So,* which played here on dway. . . . The boys teamed up n and went into vaudeville—but they tired of looking for the last half ext week. . . . So they left the stage d each tried a business career. . . . wasn't so good, either, because they were already theatre-minded and were ruined for any other profession. . . . So, they decided to uplift Radio and wrote a series of burlesque detective stories, "How to Find out the Reason for Which." . . . They took these sketches to an executive of the National Broadcasting Company. . . . One week later, they had an audition, and two weeks later, the Radio audience were chortling at "Snoop and Peep," solving such startling mysteries as "Padlock Holmes," "The Shooting of Dan McGoo," and "Phil, the Phoney Firebug."

IF YOU happen to be passing the National Broadcasting Company on Fifth avenue, and see a big truck in front of the place, and five or six helpers unloading it, you'll know that "Snoop and Peep" are broadcasting and those things are their property sound effects. . . . In a recent program, their sound effects property list included: a bulb horn, train whistle, bell plate, tin pan, railroad locomotive, wire beater, (only the stenographer hit the wrong key, and made it *wife* beater) a chain windlass, a cow bell, a wood block, a Ford motor, and one announcer. . . . In fact, nearly every program includes everything from a baby pacifier to a steam dredge.

The boys are both single and live with their parents. . . . They write their own sketches, and say they've never had so much fun in their lives as they do putting these on. . . . They're on at eleven o'clock every Tuesday night and if you've got any mystery story to solve . . . such as why somebody always rings the telephone when you're in the bathtub; or why, in a restaurant, you can never get your coffee served with your meal, instead of afterward; or why the waiter always runs away with the menu before you get through eating . . . just write to "Snoop and Peep"; they will tell you.

Well, to change the subject, here's a lady who really did leave a vacancy on the stage when she stepped out. . . . I mean Lucille Wall. . . . She is known as the "Collier's Love Story Girl," and has been four years on the Collier program. . . . She's also on the "Polly

(*Continued on page 88*)

What is the Secret of *Charm?*

IRENE BORDONI, Grace Moore, Mary Pickford and Ruth St. Denis discuss this delicate and peculiarly feminine subject from their own respective viewpoints

By Lillian G. Genn

EVERY woman, since the day of Eve, has longed to be charming. She knows that with this shining armor, she can sally forth into the world and capture many of the prizes of life. But never before, however, has its possession been of such primary importance as in this age of beauty, of youth and of self-development, when every woman must be able to hold her own.

Naturally, we are tremendously interested in the women who have reached the top and who are famed for their ability to sway the hearts of all. What are their views on charm? What secrets have they to impart? What things have they learned which will help others to open the magic door to success, whether it is in the business or social world or that of love?

Four fascinating women of different types were chosen. Each has won renown in her field and is known to a wide personal and Radio public. Let us first "listen in" to that international musical comedy star who is winning new laurels over the air—Irene Bordoni. She is small, petite and vivacious, and has that proverbial captivating charm of the French woman which at once draws you to her.

"Ah, charm," she smiled. "That is a very necessary thing for a woman to have. If she hasn't it, she must set about acquiring it right away!

"Of course, to tell you what it is requires a lot of thought. I don't know if I can tell you, even after thinking! But I am certain that it is a hundred times more important than beauty. The world is full of beautiful women. But how many do you hear about, or know about? But a charming woman—ah, that is different. And if she is a beautiful woman with charm, she will be known the world over.

"No matter how beautiful a woman is, if she has not charm, she soon palls on one. But with that quality added, she becomes *vivant*—a person who has glow and animation to her. She is one who gives pleasure to whomever she meets.

"Each one of us has something different . . . which gives us charm," Grace Moore.

"In France, a baby girl, from th time she is old enough to under stand, is taught to be charmin She is taught to be particularl charming to men," twinkled th actress, "so that some day she ca make a suitable match. The im portance of good manners, of grac and of tact is emphasized. Tha is all a part of charm, is it not She studies music, singing an dancing, and cultivates a pleasan speaking voice. These things giv her poise and help to make her companionable person.

"She also learns the necessity f a sweet disposition. A girl, or f that matter a man too, who is i tempered and inclined to argue the slightest provocation, can nev be charming. As for a pessimi or a grouch, do you know a charm ing one? I do not. It is the o who smiles and is cheerful, w radiates charm.

"That is why I say, forget wor when others are around. Even you must force yourself to sm and laugh, then do so. Life is full of cares and troubles, that t woman who can dispel them w her good humor and her smiles v never lack friends. People v flock to her, for she soothes th and makes them happy.

"The girl who wants to deve charm should also be an interest conversationalist. She must r and know what is going on in world. In that way she makes her co pany more desirable.

"But at the same time—" Miss E doni paused to lift a cautioning fin "she must be able to listen well. must not monopolize the conversation be indifferent. If she listens sympath ically, that flatters the other person makes him feel," she smiled roguis "that she is a very, very charming son!"

The fairy godmothers were lavish v their gifts when they came to the cr of Grace Moore. Given a voice of ly

"It is the one who smiles and is cheerful, who radiates charm," Irene Bordoni.

is, exquisite blonde beauty, it dramatic talent, she has not ained a much coveted place at ropolitan Opera House, but is he foremost of our screen lu- . Yet the brilliant success has achieved in these fields, turned her head. She is simple, ed, and very much herself. as not surprising, therefore, ie was asked what she consid- portant for charm, to have her reply: "Naturalness. pose," she continued, "that is h to impart. But it seems to a great many young people e or lose their charm simply they try to be like someone m they admire. They adopt id affectations. They imitate sms. They try to be cute or ated when they might be really if they were simple and dignified. one of us has something in us akes us different from the next And it is that 'differentness' which charm. That is why I advise the eker to let her manner, her con- and everything else about her al.

I think that the qualities of the d mind have much to do with it: yous and happy and enthusiastic, ng a genuine desire to make others will find that the charming man an are always trying to do some- other people. There is a gallant in the way they carry themselves, patience and a kindliness of and impulse. Nothing is too ouble for them.

"Culture is another great aid to charm. The person who has many interests and hobbies and who has an appreciation of the arts and of beautiful things, makes a better and more lasting impression than the girl whose only possession is a pretty face.

"A woman's charm needs an effective setting. And that of course includes all the feminine lure of clothes, physical loveliness, and poise. No matter how little a woman can spend on her wardrobe, she can at least be immaculately and daintily groomed. Well-kept hands, a fine, clear skin, and shining hair, add to the appeal of fastidious grooming. Carriage, graciousness and ease, all these things that comprise poise, are contributing factors to

"Steadiness, balance, serenity and self-confidence are important to the element of charm in personality," Ruth St. Denis.

charm, and pleasing personality.

"But perhaps more than anything else," the prima donna said in parting, "I believe that the secret of charm lies in the beauty of one's inner thoughts. It is these which project themselves in an attractive personality."

We next went on the trail of Ruth St. Denis, the world-famous dancer, who has given a very delightful talk of her art over the Radio. Dressed in a nile-green robe, her bare feet encased in sandals, she formed a lovely picture against the exotic background of her Denishawn studio. It is a large, artistic house, built in Spanish-Moorish style and filled with treasures that she and her husband, Ted Shawn, gathered in their years of travel in every quarter of the globe.

The famous dancer has the grace of movement and of gestures which give one a sense of beauty as one watches her. Her face, devoid of makeup, is smooth and firm and is framed by a mass of white hair. She was very much interested in our search for charm recipes, and thoughtfully considered our questions.

"I think," she began, "there has to be a combination of elements to produce that special glow of personality which attracts others to us. And these, people are usually born with.

"However, there are things that can be acquired and which make very acceptable substitutes for the natural elements that are lacking. Grace, social poise, and ease of manner are among them. The best aids for these are the dance and contact with the world, which comes under the head of travel.

"I do not mean that it is necessary to travel physically, but rather mentally. One should have a curiosity about life that is fed by reading, studying, meeting people, attending clubs, lectures and concerts. Such a background of culture helps in contacts with people. One knows how to approach them and to draw them out.

"The art of repose is a distinct and a rich asset to charm. Most of us nowadays are nervous and distrait. We are either tired to death

"This subtle quality is a composite of daintiness, perfect grooming, joy of living and love of one's fellow-beings," Mary Pickford.

Julia

Julia and Frank

Famous Radio Sweethearts Are Married and Proud of It — Stage Romance Sticks for Crumit-Sanderson—on Both Chains

By DUKE PARRY

PERHAPS it's because they don't take themselves too seriously in the Radio studios.

Possibly the explanation lies in the fact that they frequently skip around a microphone that they use jointly, ad lib at will, and refuse to be terrified by their audience, no matter how large the coast-to-coast networks that carry their voices, may become.

At any rate Julia Sanderson and Frank Crumit are rated by broadcast critics as among Radio's most popular teams. Superlatives crowd upon superlatives when the fans and the critics express themselves about this pair who are credited by the Columbia Broadcasting System for materially increasing the morning audience during their Friday morning Bond Bakers broadcasts.

"The greatest Radio romancers"—"clowns, lovers and delightful song birds all rolled into one"—these are just a few of the comments that are collected weekly from the fan mail which long ago had run into the hundreds of thousands of letters and post cards.

It has gotten to the point where the fans take sides. They argue about whether or not, during their Blackstone Plantation broadcasts on Tuesdays and Thursdays in the evening and in their morning broadcasts, Julia is singing enough and indulging enough in her distinctive giggle—in a word if she is getting her share of attention on the programs. Equally loud in their plaints are others in the Radio audience who want to know why "funny Frank Crumit" doesn't devote more attention to his comic songs such as the famous *Barnacle Bill the Sailor*. But the letters end by assuring Frank and Julia that they are the best Radio team on the air.

The first words Julia Sanderson uses when she starts in to tell you about Radio may explain the key to their success as stars dealing purely in Radio entertainment.

"The funny thing about Radio is that we started into it just for fun . . . sort of a lark," she will tell you. "And the fun keeps up even when we have to get to the CBS studios early in the morning to sing for the Radio early birds".

Julia contributes a contagious giggle during the moments between the songs of their program. One of her admirers calls it a "merry little musical laugh". The other day, in the studio she and Frank were ad libbing, indulging in bits of nonsense when, without warning she almost took him completely off his guard by saying to her Radio audience as well as to her Radio partner — "Look out, I'm going to sneeze!"

Frank

AS A Radio funster Frank Crumit is in as much demand as he is while singing such romantic songs as *It Looks Like Love* and *That Homestead Steady of Mine*. At the moment he is president and "General Factotum" of one of Radio's most unusual clubs, "The F Facts Club", which he sings about i Plantation programs. The foolish he sings about are not unlike his fa song *What Kind of a Noise Anno Oyster?*, which explained that a ' noise annoys an oyster more". Wh first started introducing his own f facts to the Radio, the Radio fans them so well they sent in voluntee of foolishment.

Frank formed Foolish Facts and Radio fans promised a copy "Foolish Facts" music, with man ses if they sent cigar band. Ther twenty thousan sheets of musi out within two But best of all, Frank tell it, the so many "foolish submitted to h use on the air has enough on l supply his progr mand for the the year. Tho write in to the eral Factotum" tomatically mac bers of the Facts Club."

The Crumit son team dates back to the le stage days. Both Julia, who car Springfield, Mass., and Frank, from Jackson, Ohio, heard the ca

tieth century America. "Romance—it's all right for the stage and the Radio. But they're too happy—it's just an act."

To all of which Julia and Frank offer themselves to the listening world as two artists who can be happy though married.

Julia may be called diminutive. She weighs a scant 126 pounds . . . she has a pet bull dog who's been named "Lindy Lee" . . . Jocko is her pet parrot because he mounts Frank's shoulder, cackles into his ear and attempts the inimitable Sandersonian giggle of Julia . . . her greatest extravagance is perfumes, but she wears the heavier sort with velvet and lighter ones with chiffon . . . she has no idea of the size shoes she wears but admits, embarrassedly, that her foot takes one of the smaller sizes . . . and her sweetest moment in life . . . she will tell you so . . . was when Frank Crumit, comparatively unknown to her, strummed his now famous ukulele to her and sang his own composition of *Sweet Lady*.

Scene from *Tangerine* when Frank sang *Sweet Lady* to Julia—and meant it for life

AND SO the fairy story said—they were married. And they all lived happily ever afterward.

They are probably one of the most observed pairs that enter the studios of the Columbia Broadcasting System. They aren't at all heavy with their affection for each other. Rather, they are nonchalant, much the same as one of Frank's brother Phi Delta Thetas in the University of Ohio —by the way Frank is proud of the Phi Delts and Ohio University—would be with a fair co-ed.

Now Frank, leaving Julia out of it for the nonce, has revived some of the most famous characters of light music. What would the records do —and Frank was famous as a reporter long before Radio came into its own—without Frankie and Johnnie? And Abdul Abulbul Amir? And the Gay Caballero? Not to mention Donald the Dub, one of America's championship golf songs of the King of Borneo. Many of them he wrote himself. And—as a parting shot—Frank weighs 209 pounds!

MAJORITY of Listeners Has Poor Taste, Say Educators, Who Seek Share of Time for Exclusive Use—Subtle Hand of Politicians Seen in Move to Break Competitive System

By Doty Hobart

Cartoon by Fred Morgan

HOW would you like to have a Washington Bureaucrat go over Radio programs for the day, run a blue pencil through your Amos 'n' Andy, scratch out Rudy Vallée, cross off the most of your other favorite entertainments and substitute lectures by Mr. John Lobby, talks on the activities of various Washington bureaus and permit you to listen to some of the boresome repetitious cadenzas from the time hallowed classics? Of course it would all be prepared for your cultural uplift, but how would you like to have it happen?

Now, don't scowl and shake your head. You may have to take it and like it. You have already been declared, dear listener-in, incompetent to choose what is good for you to hear. The campaign is now well under way to throw out the American plan of free, competitive broadcasting for the European plan of government bureau broadcasting. Of course you would pay a tax for the privilege of hearing a choice of two or three programs the Washington bureau would prepare for your uplift.

Americans would never stand for such a scheme, did you say? But you do not realize how deftly the unseen hand is leading you through insidious propaganda to accept this point of view, so adroitly conceived by the Hon. John Lobby and his surreptitious cohorts. John has beguiled some very wise people.

Who is John Lobby? So far as this article is concerned he is just a name—just one of those persons who works behind the scenes pulling strings that operate dummies of other people who are out on the stage and ostensibly putting on the show. By recognizing the signs and following the tracks we may find him in the Little Green House, or possibly in the end room off the corridor on the top floor of the hotel.

Here he is lolling back in his easy chair, a fat cigar screwed into the corner of his mouth. The room smells of departed spirits and stale smoke. We remain invisible to John and his visitors. The Radio is going. Enter Peter Pickwick, the high-powered press agent.

"You know," says John, grumblingly, "this spread has been goin' on for twenty minutes an' my man Senator Dunmore ain't made a peep. What's he waitin' for?"

"Give him a chance, John. Maybe he's waitin' to hear their cases then spring his own oratics and shake 'em off the boxes."

"Maybe you're right. Gosh, if there was some way we could get a strangle hold on this here Radio, control it and use it so it would do the most good—"

"That shouldn't be such a trick for a guy like you, John."

"I've been thinking. But we didn't grab quick enough. They're too strong now. Everybody's suspicious. There's an Ethiopian in every woodpile. And you can't pull nothin'."

GUESS you're gettin' old, John. You didn't use to talk that way. Remember what the war did for you? I'm the fellow who dopes out the propaganda to fit. Don't forget, Big Boy Propaganda."

"No, I ain't forgettin'—that's why I asked you to come up and talk things over with me. Can't we hatch up somethin'?"

"It's a cinch you got to keep your own mug out of the picture."

"Don't tell me things I know already."

"You can't use any of the Big Guns in the Capitol."

"Yeah, go on."

"How about the churches, the Reds are gettin' over some swell pacifist stuff to disarm the country?"

"They might—but where would we get off? What we got to do is work in som where with some big power that ain't be mixed up with anything yet."

"Well, John, there ain't nothin' left b the schools. And nobody is goin' to st for any monkey business with the schoo you know that."

"Listen, don't be a sap. Who said ar thing about monkey business? Who d covered this Radio business anywa Wasn't it the professors? Who ought have first rights by discovery? T schools, of course. And who robbed schools? The big trusts and commer interests? Do you see the line?"

"DO I! John, I alw said you were a genius. And will I that idea to the dear public—watch m

"Well, don't try to go too fast. T it easy. Ask for about 15 per cent these here waves *back* for a starter—mind you put it that way, say the teach have got to have 'em *back*. Make ou though they had been cheated out of 'e

"Right again, John. Then after we the 15 per cent we'll find that in orde do the job right for the little kid they'll need another 15 per cent—"

"Wait—wa-a-a-it a minute. Don't too fast. How about some of these o interests that will be wanting a sha Ain't they got no rights? Don't put your waves in one basket, young fel Wait till they git to squabbling am themselves. Just as soon we crack the present system and hand out a to the educators we'll be havin' a pr dent to go on and all the other gr will be wanting their slices. We'll 'em along against each other until we the whole thing in a mess and then have old Dunmore introduce a bil establish a bureau to operate all these waves under my control—but it won my name you'll see in the papers."

"You must have had this pretty figured out before you called me in, d you, John?"

"Well, I've had parts of it on my for quite some time now, Peter."

"It can't fail."

"Don't forget to get the little Have the teachers send 'em home to

."

ar reader, this has all been an
conversation between imagi-
acters. But watch your news-
r covert slams from Peter's pen
ercial broadcasting stealing the
annels from the educational
the country. The newspapers
don't write it. They get it as prepared copy. It sounds interesting and costs nothing. Besides that some of the newspapers claim the "commercial broadcasting" is taking away some of their advertising revenue. And don't you forget that Peter isn't overlooking that bet either. He's watching out for "the poor starving newspapers."

SOME of High-pressure Peter's 'ganda is pretty thin but he's pumping it out from every possible angle. You'll probably recognize it when you see it now.

Granting that all the comment about John and Peter has been only by way of parable, visitors to the First Annual Assembly of the National Advisory Council on Radio in Education in New York, May 21 to 23, were surprised to find how far the encircling movement to corner Radio had progressed.

Senator Simeon D. Fess, Republican, Ohio, had introduced Bill S. 5589 in the United States Senate, January 8, 1931. The bill provides:

"Not less than 15 per cent, reckoned with due weight to all factors determining effective service, of Radio broadcasting facilities which are or may be subject to

the control of or allocation by the Federal Radio Commission, shall be reserved for educational broadcasting exclusively, and allocated when and if applications are made therefor, to educational agencies of the Federal or State governments and to educational institutions chartered by the United States or by representative States or Territories."

With less than 100 broadcasting channels at our disposal this bill would provide for the confiscation of 15 per cent of the facilities to be administered by forces which so far have failed to utilize a generous share of broadcasting facilities already placed at their disposal.

This demand was made also in face of the fact that the two principal networks and most of the individual stations contributed and are contributing an average of nearly 15 per cent of their time to carefully worked out educational programs and are willing to increase the volume as fast as suitable programs can be developed.

In the rush of business during the closing hours of the spring session the Fess bill died without coming up for a hearing. But it will be reintroduced at the next session. And it may win.

It was made evident at the national assembly of the Radio Council that the following eminently respectable and wholly unquestioned educational organizations had been persuaded to join the National Committee on Education by Radio, which sponsored the Fess Bill:

The National Council of State Superintendents of Public Instruction.
The National Association of State University Presidents.
The Association of College and University Broadcasting Stations.
The National Education Association.
The National University Extension Association.
The National Catholic Education Association.
The American Council on Education.
The Jesuit Education Association.
The Association of Land Grant Colleges and Universities.

EVERY one of these educational groups has a sincere interest in educational promotion, and there are hundreds of other educational groups ready and willing to align themselves with any move which has as its fundamental principle the promotion of learning.

One of the most startling and enlightening papers read at the First Annual Assembly was by Mr. Joy Elmer Morgan, chairman of the National Committee on Education by Radio, editor of the Journal of the National Education Association and former president of the National Education Association. Mr. Morgan's view may be summed up in the following excerpt:

"The most powerful educational tool of our day is the Radio. Every other country in the civilized world has recognized from the first its educational and civic possibilities. America is the only great civilized country that has allowed this new garden of opportunity to grow up to the weeds of commercial advertising, competitive exploitation and selfish greed. . . .

"The commercial stations seek to reach great numbers of people. They measure the worth of their programs by the size of their audiences. In order to get large audiences they cultivate the lower appeals. The educational stations realize that the finer things of life have always appealed first to the few. Education seeks to maintain standards and pull up."

IT IS perfectly obvious from this attitude that Mr. Morgan is quite out of sympathy with our American plan of broadcasting. If Mr. Morgan should succeed in adding to his other official functions that of the Chief Dictator of the Department of Radio there would be considerable shake-up in our system.

Whether or not you want to be elevated by your ears would not be for you to choose. The better things are appreciated at first only by the few, Mr. Morgan declared in the course of his speech. And the few would decide for you what would be best for you to hear. Your "weeds" would be taken away from you. For elsewhere in his speech Mr. Morgan said:

"There has not been in the United States an example of mismanagement and lack of vision so colossal and far-reaching as our turning of the Radio channels almost exclusively into commercial hands."

You see the scheme goes all the way back to the beginning, to the fundamentals of our form of government—our democracy. The masses are too dumb to know what is good for them. Uncle Sam should be looked upon rather as a father protecting his infant progeny, tasting the candy first to see whether it is pure.

What is this European plan of broadcasting which Mr. Morgan considers of such superior vintage? Probably the British Broadcasting Corporation could be regarded as typical. R. S. Lambert of that organization is quoted as follows:

"The British system of broadcasting is operated under monopoly conditions. The British Broadcasting Corporation is licensed, by a royal charter, to hold monopoly over a certain number of years. The majority of listeners in London have a choice of two programs from which to select a preference throughout the most important listening hours. We think that the listener will be satisfied if he has a choice of two good programs wherever he lives. Our corporation has an income approaching $5,000,000 a year, most of which is derived from licensing of receiving set owners. The government turns over to us one-third of this license money, but they take away 12½ per cent f cost of collecting it. We operate one-third of the revenue which we sider we earn."

How do you like that idea? T ceiving set owners pay the gover $15,000,000 for the privilege of tu to one of two possible programs. service they get on these two progr presumably the best that the supe judges possible for $1 out of $3 t paid to produce it. There is no inc to command your interest by any ordinary effort. Nobody has to se any new ideas. You can take wha fered or leave it. If you don't li Radio wind up the old "gramophon the English call it.

Following is a typical four day gram listing as published in the *Radio* (of London) for dates ind There is also a "Midland Regiona made up mostly of one or the o these programs.

Have you read her book, Bread ve? *She lived in the squalor of Rus- get her material first hand. And you er over the NBC in the series, Around rld with Betty Ross. What a lot of she has had! What was the biggest Let's ask her as we whirl away through ntry. Miss Betty, tell us about the t thrill you ever had, please. . . .*

By BETTY ROSS

HRILLS? My greatest thrill? Need you ask? Life itself is the greatest thrill—life and the present moment. Now, now, NOW! alive and going to a party surd by friends who also are alive, rilled, although they may not be ware of it. The Big Thrill always Tomorrow—and what new thing in will bring. Yesterday is dead and . At best it is only a memory.

re have been millions of thrills in buried yesterdays. Precarious mo- with odds against all Tomorrows. stand out like jagged peaks from a ng plain. Vagabonding through a world I have touched hands with great persons and felt that these were s from a life-time never to be for-

n in strange places I am lost in the ain folds of the Canadian Rockies— n the heart of an ice-field. On my a glacier, my timid riding had left behind the party. One false step Indian pony meant a drop over a foot precipice. Dreadful, nerve- g seconds as those tiny hoofs felt cautious way falteringly over the y ice . . .

ice and snow remind me of another lay in Russia as we plodded over the as steppes in the dead of night pur- y bloodthirsty brigands . . . and the f that moment when our car mired ly in a mud hole, sinking hopelessly ve could hear the shouts of the cut- riders at our heels. . . .

look back over the last seven years life I think the experience etched eeply in my memory is the adventure that carried me by armored car through the Arabian desert to interview Abdullah, Emir of Transjordania, in the arid fastness of his glamorous kingdom. That was a real thrill.

MY INTERVIEW-CARAVAN had trekked into Jerusalem where immediately I began to hear many strange tales about this Emir and his Oriental splendor. He was fortified by vast barriers of burning sand and the hazards of meeting roving bands of barbarous robbers. But I also heard of Abdullah's harem of beautiful queens and his retinue of eunuchs.

To interview this mysterious monarch promptly became the obsession of my life and forthwith I started action to achieve this purpose.

"I'll bring back Abdullah's first interview to America," I eagerly exclaimed to the officer of the Royal Flying Corps who brought these stories from the desert.

The officer looked at me in amazement. "You know why no one has ever interviewed him before? The trip is too dangerous. It takes you through the Jordan Valley and the Dead Sea, which lies hundreds of feet below sea-level, and Jericho, in summer one of the world's hottest places. Then the desert—."

Graphically, he depicted the hardships of reaching Transjordania, a little principality lying between Palestine and Arabia, whose Moslem population is about 300,000.

Although under mandate to Great Britain, the country is run independently by Abdullah, whose family is well known in contemporary history. His brother Faisal is ruler of Mesopotamia. Another brother, Ali, is the recently deposed King of the Hedjaz. Hussein, his father, formerly ruled the Hedjaz, and traces his ancestry back fifty generations directly to the Prophet Mohammed.

This colorful background made me more determined than ever to interview Abdullah.

STILL the officer shook his head: "You'll never get there. No driver dares brave the desert."

He was right. For once, the magic of American dollars failed me. "Who wants to die?" all guides and drivers queried, and dismissed the subject.

Finally I appealed to Sir Ronald Storrs, at that time Jerusalem's governor, to send me in a government car. Sir Ronald immediately refused.

"The desert is unsafe these days," he explained. "The Druse are revolting against the French in Syria. They escape into the desert. Deserters from the French Foreign Legion also hide there. After wandering around a few days, they become crazed by heat and thirst. They're bloodthirsty and lie waiting for travelers to pass. These desert bandits not only steal the car and rob the passengers, but strip them of their clothes, leaving them naked to die in the sun."

"But to a woman. . ." I began.

Lady Storrs interrupted, "The last woman who crossed that desert shot herself on her return."

Gravely I listened to them both. "Well," I said, "that settles it. I'm going!"

"You're not!" snapped Sir Ronald. "I refuse to sanction your trip. I will not be responsible for an American life."

That night my dinner was tasteless. My soup was salty with tears.

Suddenly I heard my name called:

"Betty . . ." it was the English officer, "do you still want to visit the Emir's palace?"

I hated his sudden sense of humor, so didn't reply.

"Here's your chance!" he continued, "A

Pasha is going there tonight in his armored car. He heard about your courage—and said he'd take you along!"

But no longer was I encouraging false hopes. "Even if he does take me," I argued. "What's that? Sir Ronald tells me there are no hotels or lodgings. The natives all live in mud huts and sleep in clusters on the floor."

"The Pasha, as Commander of the Arab Legion, has the only real house there," replied my friend. "You're his guest."

Just then the Pasha approached. "Bring a revolver and water," he said, tersely, "we leave at midnight. The Jordan Valley is unbearably hot during the day. We must get there before sun-rise."

A long, low car . . . armed guards . . . a black-skinned Kurd chauffeur—and into the night we rode. The mosques and minaret-spires of the Holy City were soon lost in blackness as we threaded our way along winding, serpentine roads with hair-pin bends.

Each moment it seemed we would tumble down a steep precipice. The great mountains of soft limestone took on outlines of gigantic beasts. From behind them ran skulking figures . . . desert bandits . . . snipers. Every minute we expected them to fire on us.

DULL and listless lay the Jordan River. Tranquil and calm as a stagnant pool gleamed the Dead Sea. The river valley, hundreds of feet below sea-level, was hot, stifling.

I didn't dare utter a sound. I could catch my breath . . . Stifling. Choki for breath. Gasping. Fiercely I clutch the goat-skin filled with water. . . .

On ascending to sea-level once more, became warmer. To my amazement, companion handed me a blanket! "C he be losing his senses?" I wondered, wh he began tying his head-dress about neck and face and wrapping the blank around him. Suddenly I understood actions, for along came a rain of sting sand, cutting, piercing every particle my skin.

We were in the desert! The heat came little tongues of flame licking cheeks, my arms, my neck. Stinging sa blinded my eyes, choked my breath. ward off all this, I crawled underneath blanket. Still hot. I wished I had a coat to keep off those flaming hot sa Then I understood why the Arab in desert, on a hot day dons extra ha garments!

Hours we rode. Past primordial li stone mountains, past miles of sand-du harsh bushes, with sinister figures cr ing behind them, past black, low-h tents of the Bedouins.

The sun was peering through the bl ens when we reached Transjordania.

(*Continued on page 92*)

"Kief Hallec! exclaimed . . . extended my

DEMURE, yet fearless, his young woman has dared every sort of danger from the Russian steppes to the Arabian deserts. Read her most thrilling experiences on the preceding pages. Maybe you heard some of her talks over the NBC circuit, "Around the World with Betty Ross."

Betty Ross

Agnes Moorehead

DO YOU like Radio drama? So d we. And this young lady has held u breathless many times in her thrilling role as you hear them in **The Adventures of Sher lock Holmes.** She's also heard in **Bertie Sees the World** and **The Silver Flute**

Helen Gilliga

(Right)

BROADWAY musical comedy prima donna engaged by CBS to lead in a series of condensed operettas featured as the "Star Reveries"—sched uled for 10:45 EDST, every Sun day night

Bebe Daniels

(Right

WHEN Mr. Mike appeared on the movie scene and demanded voice as well as looks Bebe simply said "Listen now—' And Mr. Mike did, to the satisfaction of everybody concerned. All Mikes look alike to her and she has won a large Radio audience as recently proved on the Camel Pleasure Hour

Claudia Ivanova

SHE'S on the Red network from NBC Chicago studios—but that's not because she is featured soloist of the Russian Symphonic Choir. She was born in Russia and is a graduate of the Petrograd Conservatory of Music. How do you like that beret—or is it a beret?

Arabelle
Chambers

SHE croons all the way up to High C through the WCKY, Covington Ky., microphone. Will be on theatrical tour with other WCKY artists by the time you read this.

Mae
Questel

SHE'S practically a carbon copy of anyone of the stage or screen whom she may choose to imitate. Recently she doubled for Helen Kane boop-a-dooping Broadway and no one tumbled.

Lois Bennett

MISS BENNETT has distinguished herself on many notable programs over the National Broadcasting Circuit. You have heard her on the Armstrong Quaker period, and more recently on the General Motors program, where she is presenting selections from the Gilbert and Sullivan operettas.

LITTLE AMERICA TUNES in

Aunt and Uncle Mike

By Evans E. Plummer

ONCE upon a time—Funny, but it is certainly apropos that I should begin thus a tory about the "aunts" and "uncles" who ell Radio's young listeners their nightly edtime stories, but anyhow, once upon a me—

Back in 1920 and before, there were eally very few important figures outside f the family circle who meant a thing o Annie and Willie or Johnnie and Mary, unless it was the Boogy Man and anta Claus. The Goblins, of course, uled over a portion of Childom, but henever Satan or Old Man Boogy was rought to the rescue by a despairing arent as aide de camp in laying down he law to an unruly tot, its eyes opened n wide-eyed fear, and the battle was on without a casualty

But since Radio—well, even old Saint Nick hasn't a fraction of the invested ower young America has surrendered to s favorite Aunt So-and-sos and Uncle Whosits, broadcasting nightly at 5:30 or hereabouts from Stations A to Z. These unts and uncles, sometimes known by ther titles, are real flesh and blood peo-le—not mere figments of the imagination r illusions—and their mysterious power over youngsters is greater than that of parent, teacher, candy or even the frowned upon rod. And so good is the work of these children's idols, that, were there no other kind of program on the air, still the aunts and uncles would be reason enough for broadcasting and the necessity of a Radio receiver in every home with a growing child

These broadcasting guardians of America's future citizens are doing a noble work in setting up ideals in the young mind. They teach honesty, obedience, care and safety, rules of hygiene and health, civic pride, etiquette, kindness, thrift, unselfishness and other sterling qualities. They inspire the growing mind with faith. They create in youth a love for the wonders of nature—the trees and flowers, the beasts and birds.

In nearly a score of years the Boy Scouts of America organization has finally reached a membership of over five million, but in less than a half-dozen years the children's clubs of the broadcasting stations in this country have attained a total enrollment, conservatively estimated of over ten millions of youngsters! There are uncles, aunts and story ladies on every network, and also broadcasting individually from ninety per cent of all stations. Who are some of the better known of these "pied pipers" who've won such lofty places in the esteem of the little tots?

Uncle Don, of WOR, Newark, is one of the more famous. He has an Etiquette Club for the little ones that has grown to almost 600,000 members. His mail knows no boundaries, coming, as it does, from Germany, England, and even as far south as Panama. One of the requisites of being an Uncle Don club member is that you must perform a daily good deed And DO his members do those daily deeds? You should watch them.

Uncle Don's full name is Don Carney.

(*Continued on page 48*)

Just below you see Tiny Renier the Lullaby Man of WDAF, Kansas City. He's not so tiny but he could out-balance a half-dozen of his young listeners on the other end of a teeter-totter. But turn the page and see all the snap-shot photos the children sent Uncle Peter of CJRW-X-M of Manitoba and Saskatchewan. "It's a great life being a Radio Uncle," writes Uncle Peter to Radio Digest, "I even have Peterkins in far-away New York, besides three of my very own at home in Winnipeg."

Aunt and Uncle Mike

(Continued from page 45)

HE GREW up in Michigan's fruit belt, graduated from high school in St. Joseph, and ambled on to Chicago where the first notes in his varied career were those he struck on the piano of a nickelodeon, playing six or seven hours at a time. Harry Weber, a Windy City booking agent, saw and heard him, booked him in vaudeville at the Majestic Theatre and other Chicago playhouses, and finally Carney wound up in New York at the end of his contract the better for several hundred dollars he'd saved. The Louisiana land boom was in full bloom, and Don sunk his money in a "farm" there. After a sad attempt at running it, he went to work in a lumber yard to make money to pay a farmhand to do the farming by proxy.

I finally took the rap," Carney said, "and sold the place to another sucker for half what I paid for it." Then he came back to New York, tried vainly to regain the stage, obtained work with a watchmaker until his employer learned Carney knew nothing about watches, and next was hired as a laborer in a shipyard at 30 cents an hour. Then the war broke out! In less than a year's time Uncle Don had become assistant superintendent of the yard at a salary of $10,000 a year. But wars end eventually, and with the last one went Carney's job. Next he became an extra—$10 a day—in D. W. Griffith's motion picture *America*, and while thus employed he heard his first Radio program. After the picture was made, Carney said,

Eight years as a Radio uncle is almost a record for Uncle Bob Wilson at KYW, Chicago. Many big boys and girls are alive today only because they were influenced by his advice to stop at the curb. The Radio pal and his small friends at right were unidentified on the photo. Below are a couple of Dixie "Uncles" and a little "Missy". Both the old darkies were former slaves.

bullied myself into asking for an audi-
n, and was somewhat shocked when I
hired as an announcer for WMCA."
OR's program director heard him and
ited him to the studio for an audition
"Luke Higgins" in the beloved *Main*
eet Sketches. He clicked at once.
isteners' commendations were so em-
tic that he was retained also as a fea-
e of many other programs. Thus he
ame "Uncle Don," the entertainer
en nights a week of WOR's children
o sings etiquette songs and tongue
sters, and also doubles in the parts of
cle Otto and Simple Simon.

FOR over eight years Uncle
b, of KYW, Chicago, has been enter-
ning the children of the Midwest. Uncle
b, whose real name is Walter Wilson.
w has his "Curb Is the Limit" Club
mbership cards and buttons in the
nds of over a half million youngsters,
ne of whom have grown up and married
the years he has been on the air, and
now contributing the second generation.
Beloved Uncle Bob came to KYW in
22 originally as a "song plugger." He
s then western office manager of a
sic publishing company, and as such,
ended the KYW studios to sing his
n's new numbers and help to make
m popular. One of these was *Dream*
ddy. The children went for it. Not only that, but they went for Walter Wilson even stronger. Big and jovial, he was just one of those "naturals" who have a way with children. KYW's officials noted the juvenile applause and asked him to take charge of their children's hour. So he became "Uncle Bob" and has religiously broadcast to the little tots every week night at 5:30 Central time for almost a decade.

But simply singing songs and telling stories was not enough, Uncle Bob told himself early in the business, to keep the children interested. There was so much good he could do—tell the children to scrub their teeth, mind their parents, and be careful. So it was on the fifth of October, 1923, that his *Curb Is the Limit* Club germinated, with free membership to all and the only requirement that a prospective member first pledge himself to be careful, always count ten and look both ways before crossing the street, and never play in the highways or streets. The club has a slogan you might like to know. It goes:

"In roadways I must never play.
I have no legs to give away.
I have no arms that I can spare.
To keep them both I must take care."

So successful has Uncle Bob's work been in the Midwest that he is an ever sought after speaker before juvenile gatherings at churches, schools and theaters, and even the City Council of Chicago has passed unanimously a resolution of thanks to Uncle Bob Wilson for his good work in safeguarding the city's children against traffic accidents. And do the children observe his warnings? Everywhere you go you'll see little fellows hesitating and looking both ways before crossing the street. Ask who taught them that, and they'll reply, "Uncle Bob."

"BIG Brother Bob" Emery had an idea when he was just out of his teens and struggling along in 1924 as announcer, talent, and general factotum at WGI, Medford, Mass., a pioneer station. That idea was big enough even to outlive WGI, long since passed, extend itself to WEEI, Boston, and even now has become a weekly feature of the National Broadcasting Company, commercially sponsored.

Emery's plan, in brief, was to appeal to both the older boys and the little tots as well. The older ones were to be "Big Brothers" to the younger boys and girls. With this plan as a foundation, he built a program of entertainment with his Joy Diggers' music, historical and educational dramatic sketches, and other educational bits designed to appeal to the boy, or even girl, from eight to sixteen years of age, without bearing the distinct label of education. Bits of interesting information on woodcraft, botany and the like

Good-Bye GLOOM

Colonel Stoopnagle and His Valiant Army of Tastychasers March on old Gen. Depression and Take Him for a One-Way Tour

By Nelson S. Hesse

THIS is two success stories in one. It is a story, first, of the phenomenal rise to a place of prominence in the national Radio picture of "The Colonel and Budd—the Tastyeast Gloom Chasers". And it is a story of how a great organization and business was built up almost entirely through the medium of Radio.

Radio's history is filled with tales of sensational success, but few compare with that of "Colonel Lemuel Q. Stoopnagle and Budd", Buffalo's two exponents of extemporaneous comedy. The rise of this dizzy duo has been even faster than meteoric, which is pretty fast. It happened in a manner which was something like this.

Announcer Wilbur Budd Hulick, of Station WMAK, Buffalo, found himself in somewhat of a predicament on the morning of October 10, 1930. This predicament arose suddenly and painfully in the form of a 15-minute gap to fill between programs.

In a panic he rushed into the studio offices. The first person he saw was F. Chase Taylor, announcer, continuity writer, director and actor for the Buffalo Broadcasting Corporation, who was pounding out a script on his typewriter.

"Hey!" pleaded Hulick, "I've got fifteen minutes to do and nothing to do it with. Come on and ad lib with me."

Pausing only to lug a folding organ into the studio, the pair went on. Hulick's first words announced an overture on "the mighty gas-pipe organ" by "Colonel Lemuel Q. Stoopnagle". They began their extemporaneous buffoonery. Radio history was in the making.

Just a couple of "mike" men until that time, with a few mild successes to their credit. Taylor and Hulick overnight were catapulted into prominence.

"The program went over in spite of everything we could do," Taylor, alias "The Colonel", observes philosophically.

Letters poured in after that first broadcast asking for more. "The Colonel and Budd" continued their ad lib nonsense, taking the name of "The Gloom Chasers". They made no special effort, wrote no script, kept the chatter extemporaneous and soon were given a half-hour spot. A little later they were switched to an evening period over WKBW because business men complained they could not hear "The Gloom Chasers" in the morning a because it kept their wives from doing t housework.

The popularity of a Radio presentat is gauged largely by the response throu the mails. "The Colonel and Budd" sh tered all Buffalo fan letter records i tiny pieces. There were weeks when fr 2600 to 2700 missives addressed to "T Gloom Chasers" cluttered up the offi of the Buffalo Broadcasting Corporati Some of these epistles bore post ma of cities in Alaska, Bermuda and N Scotia as well as of neighboring Sta The fan mail editor of the B. B. C. hi an assistant whose duty it w to devote his time solely the correspondence of t dizzy pair.

The flood of mail grew lar and larger. If "Stoopnag coughed during a broadc the next day's mail conve scores of boxes of cough dr If "Budd" sneezed, audi sent handkerchiefs and adv in profusion. Their mail cluded hundreds of well-d drawings and paintings of listeners' conceptions of act and its principals.

Fan mail was not the c indication of the growing p ularity of Taylor and Hul From 1600 to 2300 pers crowded into the B. B. C. dios each week to watch " Colonel and Budd" perfo even though no invitation extended to them. Busses w chartered by the residents nearby towns and excurs were made to Buffalo for sole purpose of seeing " Gloom Chasers" in action.

Dowd & Ostreicher, of ton, advertising agents Green Brothers Company Springfield, Mass., manu turers of Tastyeast, searching for a good Radio

"Take the whole Air Division and chase them Gloomics into the ocean," ordered Col. Stoopnagle. "O. Q." replied The Army

...en they heard news of "The Colonel ... Budd". John C. Dowd, a member of ... firm, went to Buffalo, heard the act ... signed up Taylor and Hulick for a ...d period along with other acts in differ... sections of the country to determine

...ich was best suited for a nationwide ... work.

Taylor and Hulick, with their nightly ...f-hour of nonsense, built up the sale of ...styeast 600 per cent. in their listening ...a and created such a demand for the ...duct in Canada that the Green Broth... Company decided to open a branch ...tory there. There now is 100 per cent. ...tribution of the product in that area ...ere hardly a bar was sold in November, ...30, "The Gloom Chasers" put Tastyeast ...ll chain stores without a representative ... salesman ever calling.

...A little more than five months after ...t morning in October when they first ...gan their clowning over the air, Taylor ...l Hulick were signed by the makers of ...styeast to broadcast nightly except ...days over WABC and the Columbia ... work from 8:45 to 9 P. M., EDST. ...e contract signed by the Green Brothers ...mpany with the Columbia Broadcasting ...stem was the second largest ever placed ...h the chain. It calls for the appearance ...fore the microphone of "The Gloom ...asers" for two years.

Not content with having shattered a ...mber of records in Buffalo, Taylor and ...lick had to break another one before ...parting for New York to begin broad...sting over the Columbia chain. Billed ..."Buffalo's Most Famous Laugh Creators ...d Fun-Makers", they appeared for a ...ek at Shea's Buffalo Theatre and broke ... attendance records.

Taylor and Hulick made their network ...but over twenty-three Columbia sta...ns on Sunday, May 24. Many stations ...ve been added to the hook-up since then, ...d it is safe to say "The Gloom Chasers" ...ll be heard over virtually the entire net-work before much more time has elapsed.

There you have the story of the amazing success of Wilbur Budd Hulick and F. Chase Taylor—"The Gloom Chasers". More chapters will be written in the months to come if "The Colonel and Budd" continue at the same pace.

As for their modus operandi, Taylor and Hulick never have used a written script. Radio listeners, with their letters, write their programs. Most of the requests they receive are for imitations of Henry Burbig, Calvin Coolidge, Lindbergh, Rudy Vallée and Amos 'n' Andy. Sometimes they mix them all up and have Amos and Burbig or Coolidge and Andy working together.

These fun-makers work best when a crowd is present in the studios. They have

never lacked a capacity audience. Because of the many requests for passes to the studio in which they work, Columbia shifted them to one of their largest studios so that as many of these requests as possible could be filled.

Taylor and Hulick are going to keep the tenor of their humor unchanged. Some humorists may deal in sophisticated gags, but "The Gloom Chasers" will adhere to homely, naive, simple jests. And they'll continue to ad lib their absurd nonsense.

Before that day when he asked Taylor to go before the microphone and ad lib with him, Hulick had only a few months of Radio experience to his credit. Although he had been dabbling in Radio for seven years, Taylor had only taken it up as a career a month or so before that day.

Taylor was born in Buffalo thirty-three years ago, a son of Horace F. Taylor, prominent Buffalo business man. He was christened Frederick Chase Taylor. His friends call him "Chase".

Originally Chase Taylor intended entering the lumber firm founded by his grandfather in 1865 and headed by his father since 1904. He prepared for this career at Nichols School, Montclair Academy, in New Jersey, and the University of Rochester, where he was a member of Alpha Delta Phi.

During the World War he served in the Navy. It was at that time that he first became interested in Radio. Radio became his hobby after the cessation of hostilities and continued to hold his interest after he entered his father's lumber firm. Later he became a stock broker, advancing to the position of vice-president of his firm.

All the time he was working Taylor was active in amateur dramatics and writing. For several years he was seen in the principal parts of many productions of the

Buffalo Players, a Little Theatre group.

Taylor was heard many times over the air before the hobby became a career. He appeared before the microphone over WGR some seven years ago for the first time. Later, in 1926, he achieved considerable success in "Nip and Tuck", a black-face comedy act, which was presented regularly over WMAK. Still later came several series of presentations over WGR, and finally, a year and a half ago, the "Smax" and "Smoke and Ashes" broadcasts. On these last two programs he appeared with Louis Dean, who is announcing the "The Gloom Chasers" over the Columbia network.

The hobby finally gained the upper hand last fall and Taylor became a full-time member of the production staff of the Buffalo Broadcasting Corporation.

Taylor is good-looking, ruddy of mien and jolly as a comedian should be. He is

(*Continued on page 91*)

"So this is New York, hah-ha-ha!" mused the imperturbable Colonel Stoopnagle as he lolled back in the upholstery of his skidding charger. Commander Budd brought the Cavalry to a halt before Central Park where G. H. Q. was established.

Broadcasting from

The Editor's Chair

When Liberty is at Stake

THE future of Radio broadcasting as we now know it in America is threatened with destruction if the Radio public does not watch its step. Not only that, the Radio public in addition to losing its privilege of selecting programs according to individual choice from a wide range of programs, is facing the possibility of a new and odious form of taxation. Still worse, we all may soon find that "self elected interests" have decided to do our thinking and to a large extent our living for us.

The danger with which we are confronted is much like that which has from time to time threatened the freedom of the press. In Italy, Russia and some other countries, the press has been subjected to the will of political leaders and a great human principle has thereby been sacrificed to the ambition of the few instead of the many. Fortunately in our own country, the Supreme Court has recently upheld freedom of the press through declaring unconstitutional the so-called "gag" law by which the politicians of the State of Minnesota sought to control, in part at least, the time-honored prerogatives of the press.

At this moment, there is a substantial, well organized, well financed, movement on foot to enact legislation in the form of a bill to be reintroduced by Senator Fess that will turn over 15 per cent of the air channels to educational interests. On the face of it, the objective sought seems worthy and desirable, but on investigation and analysis the movement is found to involve a national menace to the Radio public as regards choice of programs and to the still more basic factor of human liberty.

These may sound like strong words to use when referring to a movement backed by such an altruistic element as educational interests. The fact is, however, that the educational interests are very much divided on this matter with leading elements opposed to the Fess Bill, and there are strong reasons for believing that many of the minority of educational bodies now backing the latest movement to legislate the use of ether, have been misled by compelling oratory and subtle propaganda. That is why the people—the Radio public as individuals—should make a point of acquainting the educators, the politicians and all others, with their personal viewpoint. In the field of Radio, there is much need of educating educators, because up to the present time, the educational interests have failed woefully to keep pace with the progress of Radio and its influence on human affairs of every description.

Here are a few facts to bear in mind and to spread as broadly as possible:

1. There are many purely educational Radio broadcasting stations in the United States today. Some excellent programs have been produced, but from the standpoint of the total time used by such stations, their public acceptance and popularity is woefully small.

2. Practically all broadcasting stations, including those c the major chains, desire to increase the amount of broadcas ing along educational lines, but in spite of the free time beir offered, they are limited by the inability of educators and othe to make good at the program end on a quantitative basis, l alone a qualitative basis.

3. Radio programs must always stand or fall on their ab ity to *please* the public. No one is big enough to dicta successfully what the public must have.

4. Competition is the life of program excellence.

5. Advertiser programs are the money-fuel for sustainii as well as sponsored programs.

6. There is no reason to question the good intentions the educational interests or to do other than encourage th wholehearted and intensive interest in Radio, but there every reason to help prevent the educational interests at lar from becoming the dupes of politically ambitious men.

7. Government ownership or domination of broadcasti will result in taxation of the Radio audience.

8. Government ownership or domination will steal aw *your* right to listen to what *you* want to select.

9. Government, in political control of Radio, will strik crushing blow to human liberty and American democra There is much reason for suspecting that the current effort obtain 15 per cent for the educators is in fact the fo runner of a demand for government ownership and 100 cent political control. The use of the educational intere at this time supplies the mask behind which the sinis aims can be hidden. Whenever through the medium of g ernment a handful of more or less well meaning people h tried to standardize the religion, the morals or the hum liberties of the people, they have always failed. History centuries back stands witness that such is ever the case. M of us know that the trouble with the present prohibition l lies not in its worthy objective but in the way it trespas upon human liberty, and that this is why it has not recei the hoped-for public acceptance.

THE men who colonized America and who fought bled for its creation as a land of personal liberty and t democracy must now lie writhing in their graves at the n est and most serious menace to American freedom, nam the insidious effort that is being made to stifle and con human thinking and human living through subtle but powerful domination of Radio broadcasting—the grea democratizing and socializing influence of modern tir With the help of God, may the people prove able to def themselves from the Radio wave grab which now threat them not only with losing the right to choose programs on a wide scale, but with straight-jacketing of their mind soul.

ntimate Gossip *about* Song Hits *and their* Writers

Miniature yacht racing is a favorite sport of Rudy's

Tuneful Topics

By RUDY VALLÉE

Come To Me

"F YOU have had that supreme pleasure of seeing Gloria Swanson in a picture which is really an epic; namely *Indiscreet*, you uld probably understand why I pick s song as one of the most captivating ngs written in a long time. To me the ture is one of the finest things the een has ever produced, and Miss anson deserves all the honors that can showered upon her for her work in it. Messrs. DeSylva, Brown and Hender-, who wrote not only the songs of the ture but the picture itself, may take very deep bow for a most unusual, re-shing, and thoroughly interesting story. feel very happy that the songs which will sing in George White's *Scandals* ll be written by the last named two of e trio, Lew Brown and Ray Henderson. ie trio, who became music publishers d millionaires almost overnight, are nceded to be the greatest song writing o in the country.

Unfortunately the triumvirate is no nger that. Buddy DeSylva has stayed at the Coast to write stories and songs r the Fox Film Co., and has assumed e dignified title of George DeSylva. However, both Lew Brown and Ray Henderson are in the foremost ranks of song-writers, and I know that they are going to supply me with great material for the *Scandals*.

Miss Swanson sings this song in the picture twice. The significance of the singing is that when the song is rendered it brings her sister to her to take care of the unwelcome attentions of the young man who is with her as she sings it. In her second rendition of it it precipitates a crisis which turns out quite happily for both sisters.

You really must hear Miss Swanson sing the song in the picture to appreciate the beauty of it. It is published by DeSylva, Brown & Henderson, and we play it taking a minute for the chorus.

Two Hearts In Three Quarter Time

WITH the fad of German pictures being shown in the swanky little theatres in the 50's in New York City, there subsequently followed the publishing of some of the songs from these German pictures. There have not been very many pictures nor very many songs, and this is the first one to achieve real popularity.

The song is typically German in its swing, make-up and lyrics, and when I first rehearsed it some time ago I put it down as just another clever German waltz. The public, however, has shown such a great liking for the song that it has become one of our outstanding hits, and I can thank the song for the tremendous applause that greeted it during my rendition last week here at the Brooklyn Paramount.

I have had the audacity to sing it in both English and German, though I have never studied German; happily no grapefruit was thrown. There is no question of its popularity.

It is published by Harms, Inc., and like most German waltzes it should be played very brightly.

On The Beach With You

OF COURSE the summer songs come with the warm weather. In the hope that she has another *Swinging In A*

Hammock, Tots Seymour, who wrote the lyrics for that remembered song, has had the inspiration for another summer song, but this time the scene of action is on the beach. The song is quite simple, yet extremely catchy.

Miss Seymour, as usual, has written a different type of lyric, dealing entirely with beach atmosphere, at Coney Island or the Lido Beach.

After running through about thirty songs yesterday, this song stood out like a sore finger in its unusual qualities. It should be very popular. It is published by Davis, Coots & Engel, and we will play it at about fifty seconds to a chorus.

Toodle-Oo, So Long, Goodbye

IT IS a little difficult for me to blow my own horn in talking about a song, though as I have said, obviously as I am in the American Society of Authors and Composers, and since I do feel the urge to write, with the subsequent carrying of that urge into practise, it will be necessary from time to time that I at least mention songs which I have helped to write.

Byron Gay is a native Californian of unquestionable hit writing ability, chiefly known for his *The Vamp, Sand Dunes, Horses, The Little Old Ford Rambled Right Along, Have Another Drink,* and in fact many other songs known in different localities. This same Byron Gay, after a period of quiescence during which domestic troubles disturbed his writing muse, is back again on Broadway, intending to show Tin Pan Alley that he is still writing hit songs. Certainly no one, with the exception possibly of Fred Fisher, seems to have as many ideas and titles for comedy and "nut" songs as does effervescent Byron Gay.

Lacking a piano to aid him in his composition, I have volunteered my own in my new apartment, and there I sat and listened to Byron one evening as he fooled around with the keyboard. As he played the opening phrases of the song I am discussing, I asked him what it was; he gave me the title and the opening phrases—the rest of the song was very nebulous. We began work on it that evening, and a week and a half later, after much changing, we finally evolved the song as you will probably hear it. Both of us felt it was the type of song that drinking parties will sing when breaking up, a sort of *Good Night, Ladies.* At least the song will be a relief from the raft of moon songs, and passionate love ballads so prevalent today in this era of overproduction of popular songs.

The reaction after two broadcasts has been very unusual, which leads me to believe that it may come through. The appearance of my name on it will unquestionably cause many leaders who otherwise might play it to refrain from doing so; but if the song ever gets on with the public these leaders will have to play it, as regardless of what personal reasons any of them may have for desiring not to play a song, once the public demands it we would be cutting our noses to spite our faces were we to refuse to give the public what it wants.

A picture of Byron and yours truly adorns the cover of the song. Just as we finished the collaboration in my dressing room at the Paramount, the photographer stood waiting to take the picture.

We have several more things of the same nature in preparation. If this goes well these will follow.

It is published by the Red Star Music Co. and we play it at about forty-five seconds to the chorus.

It Looks Like Love

THE names of Arthur Freed and Harry Woods themselves should guarantee a very pleasing song whenever both names appear on the same cover. Freed was the lyric writing team mate of Nacio Herb Brown and together they wrote hit after hit. Woods wrote *A Little Kiss Each Morning* and *When the Red Red Robin Comes Bob-Bob-Bobbin' Along.* Both of them have been under contract to M. G. M., writing for pictures on the Coast, and this is evidently one of their collaborations before they separated, Freed going into his own publishing company, to publish *I Surrender, Dear,* and *It Must Be True,* and Harry Woods still on the Coast writing.

This song is one of those breezy things, extremely danceable, and a fine piece of material for cabaret singers who want to liven up the group. There is nothing unusual in it from a standpoint of lyrics or melody, but it has a catchy quality about it that will bring it into some popularity at least.

It is published by the Robbins Music Co., and we play it at about forty-five seconds to the chorus.

Pardon Me, Pretty Baby

OUR old friend Phil Kornheiser sponsors another song which has been very well received by all the orchestra leaders since it has been called to their attention. Vincent Rose, that little song writer of Italy, who seems to be in his stride again, has collaborated with a young man named Jack Meskil who seems to be fitting himself to th task of wedding the melodies whic spring from Rose's fingers to the word which are running through his own brai A third writer, Ray Klages, whose nam is seen on many songs these days, aide the above two, and the three of the have evolved this song. It has bee picked by several of the leading orche tras as the "Hit of the Week", or "H of the Month", as the case may be.

Although the song begins rather hig and stays well up in range, it is qui easily singable and bids fair to becom quite popular.

I Surrender, Dear

I WELCOME the opportunity to di cuss the merits of a song which really unusual in character. Few son are constructed in such a fashion th they will bear much analysis, but this one of those songs which causes a gre deal of comment, though it may fail have a high sales value. Written Gordon Clifford and Harry Barris out the Pacific Coast, it has gradually swe Eastward until today one hears it at le three or four times throughout the cou of an evening's Radio performanc Even with the major stations blue penc ing repetitions of popular songs, *I S render, Dear* is found on enough progra to convince the listener that it has me

While it is of the *Body and Soul* type song, it is much less physical and mu less difficult in its composition. T verse lends itself admirably to ad lib terpretation; the chorus, however, mak for fine "Dansapation".

Perhaps one of the most unusual r ditions of it on phonograph records is t of the negro orchestra leader, Lo Armstrong. He is little known except musical faddists and a few of the e who have run across him either in a ni club or on one of his phonograph reco He is a mixture of a hot trumpet pla and a vocalist who bellows his lyrics in much the same fashion as he plays hot chorus on the trumpet, so that rendition of *I Surrender, Dear* is one the most fascinating things I have e listened to. Still it seems almost sacrilege that such a beautiful compo tion should be rendered in the care style which is typically Armstrong.

But getting back to the song, it published by Freed & Powers, and is tainly holding its ground in popular We play it at fifty-five seconds to chorus.

Stardust

BEFORE I discuss this song I wish clear up the wrong impression ab my writing of this particular subj *Tuneful Topics.* There are those believe that my function is mainly

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

'RENE BEASLEY? Off the air in two minutes. Go up to the twenty-second floor. You'll catch her. You don't know her? One of the pages point her out."

much from Columbia's Publicity De-ment.

I dashed to the reception room, e almost immediately I was shaking ls with a tall, brown-haired girl who one of those nice southern voices and of those nice southern manners—the (both voice and manner) that puts at ease and makes you think of

Irene Beasley

ie hospitality, famous the world over. But," I exclaimed, as we sat down, u're the girl who was resting her mind." l then I hastened to explain that about ear ago I had happened to be in that e reception room and had watched her sitting across from me with a decidedly frantic expression on her face and saying to everyone who came up for a chat, "You mustn't talk to me. I'm resting my mind." For months I'd wondered who she was, and for what, or from what, she was "resting" her mind.

"I remember," laughed Miss Beasley, "that was the day I'd promised to write some stories for a series of children's programs and I didn't know what in the world I was going to write about."

"Did you get them written?"

"Yes, finally. The Aunt Zelena stories. I was a sort of female Uncle Remus and made my animals sing and talk."

Miss Beasley had the right start in life for a musical career—two parents who sang and a grandmother who was an expert pianist. But Irene was a practical lass. She decided to teach school, be sure of her monthly pay check, and do music on the side.

After she graduated from Sweetbriar College she went to a little village in Mississippi and there taught seven grades made up of eleven pupils. In the time she wasn't teaching she wrote songs. One of them, *If I Could Just Stop Dreaming*, she published herself and to popularize it, sang it over a small local Radio station. This led to work in Chicago and eventually to New York and an audition for Columbia. She has been a WABC staff artist since April, 1929. One of her latest programs is Peters' Parade.

Her Aunt Zelena series ran three times a week for five months and she has gathered some of the stories into a little book, called *A Dozen Stories With Songs For My Chilluns*, which is now in the hands of a publisher.

She feels that her school teaching experience has given her an insight into child psychology, but says that the best way to learn how to handle people of all sorts is to work in a Radio studio.

They call her "the long, tall gal from Dixie." and since she was born in Tennessee she has the right to the title. You feel she should be standing on the steps of some old southern mansion, with a welcoming smile and hand and an eager, "Come in and make yourself at home."

Harry Vonzell

Tennis and swimming are her hobbies, and horse racing, too. Just now she is living in a hotel, but says she is soon to have her own apartment and is going in for some good old-fashioned southern cooking in a big way.

Harry Vonzell

HARRY VONZELL, WABC announcer, doesn't believe in being too definite.

"What's the use?" he asks. "Soon as you get your mind made up to one thing, along comes fate, takes you by the scruff of the neck, and there you are—in a totally different place from where you expected to be."

Oh, yes, he is pretty definite about his wife and child. You see, Columbia has a questionnaire it sends to all its artists. "Are you married?" is one question. "If

so, do you wish it mentioned for publicity?" is the next. To the first Harry Vonzell says, "Yes," and to the second, "Absolutely."

When it comes to acknowledging his wife and child—yes, there is a child—Columbia's blond and smiling announcer knows just where he stands. But as for saying what he's going to do next, no, sir.

"Look," he says, "there was never any idea in my head but that I would spend all my days in California. And isn't that a funny joke?" He gestured towards the window through which one could see the tall towers of Manhattan.

"I was in Los Angeles, working in a railroad office. My ambition—if I had any—was to be paymaster some day. Maybe it was the climate, maybe it was the 'manana' spirit of the land, but I hadn't thought much ahead of that. One thing I knew, that I'd never leave the Golden West."

"There was a Radio station near my office. They found out I used to sing a bit in college and asked me to help out with some programs. It was in the days when Radio entertainment was very casual. When everyone who could say anything, or sing anything, was welcomed at the mike. There was no pay, of course. One day the announcer failed to appear and I had to announce myself. Enter fate, you see. I was offered a permanent position as announcer, and took it right then and there."

"About this time Paul Whiteman was in Los Angeles with his Old Gold Orchestra. Ted Husing had been the announcer, but Columbia had had to bring him back to New York. So there was a big contest held to see who would take Ted's place. I thought I'd take a chance, and I think the reason I won was that the judges thought I sounded like Ted Husing. I don't think I do, but they did."

At this point Harry Vonzell looked a little wistful. "I won, and that meant leaving California. For the first six weeks I was here I didn't have my family and many a time I felt like putting this little old New York on a platter and giving it back to anyone who would take it. But it isn't so bad now. I've become adjusted to its tempo. It's the place to be to get ahead. You don't have so much fun, but you go further. Yes, I've definitely made up my mind to stay here."

And then Mr. Vonzell grinned. "Which probably means that fate will step in again, and that the first thing I know I'll be in Greenland or Afghanistan."

We hope not, Harry Vonzell, for many a listener would miss your fine, sympathetic voice.

Incidentally, Mr. Vonzell is twenty-three years old and was born in the Hoosier State, in Indianapolis.

Among the programs he announces are Old Gold, La Palina, Henry George, Graybar Electric, Central Savings Bank, and that of McAleer's Manufacturing Company. On the "outside" he has worked with Ted Husing on the International Yacht Races and on the Columbia-Pennsylvania Regatta.

Jolly Bill and Jane

TO MEET William Steinke and Muriel Harbater you get up to NBC at seven forty-five A. M. Seven-forty-five, Eastern Daylight Saving Time. Really six-forty-five. That's pretty early in the morning. It means setting the alarm clock at six-thirty or thereabouts. No breakfast either—that is, not till later. On Fifth Avenue the heavy curtains of those super-exclusive shops are closely drawn. Clearly none of *their* customers would be abroad at such an hour. The only sign of life is in the window of a specialty shop devoted to bon voyage fruit baskets. There a man sits, quite unabashed, dusting off the apples and alligator pears. At NBC the elevator boy is sleepy-eyed. Early, very early, but how else can you meet William Steinke and Muriel Harbater.

You ask the natural question: "Why meet them?" Oh, but don't you know who they are? Why, they are Jolly Bill and Jane. Yes, Jolly Bill and Jane of the Cream of Wheat program, which at seven forty-five every week day morning goes out over the NBC network.

Jolly Bill—who looks just like his name—is one of those souls who was born to enjoy life just as some other souls were born to have curly hair. And Jane's another one. They are not only jolly themselves; they make you feel jolly. At seven-forty-five in the morning, too.

After the program we all went down to the little drug store which is run in connection with NBC, and sitting on the stools, crunched bacon and nibbled toast while Jolly Billy and Jane went over the next day's script. They always do this—have a rehearsal just after their program and then one the next day just before.

The rehearsals are, like the programs themselves, very informal. Jolly Bill tells Jane a story. She giggles at the places he wants to giggle. There is nothing set about it. On the air it sounds as if they were having an awfully good time, which is exactly the truth.

Jolly Bill was for many years in the newspaper business—cartooning for newspapers. In Bridgeport, Connecticut, and later, in Newark, New Jersey, his drawings were a daily feature. He would stand on the corners of busy streets and sketch prominent citizens. He would go to kiddie parties and give them "chalk talks". Then WOR he had his first Radio experience giving cartoon lessons over the air. It sounds rather difficult, doesn't it, but it was an immense success. Amateur artists sent in their drawings by the thousands. Jolly Bill would take the best ones and have them reproduced, and they published in the paper. Then there were prizes and blue ribbons for the winners.

Eventually Bill appeared at NBC with an idea for a children's program. His feature became one of NBC's most popular sustaining hours. Now it's a commercial with the Cream of Wheat Company as the sponsor. In connection with the program is the H. C. B. Club. Mysterious initials, which only members of the club can know. And do the boys and girls who join have a good time, what with gold badges and medals and everything.

Bill takes about nine parts himself and Jane three. So you see, betweeen them, they carry on quite a show. The morning was in the studio, Jolly Bill and Jerry, the dog—and what a bark he has—'Rastus, the Cream of Wheat Chef, Schultz, the delicatessen man, and Paddy, the pirate. If I hadn't been looking I should have sworn there were several people at the mike.

Besides taking the parts of many different characters, Bill's pockets are always laden with

Jolly Bill (William Steinke) and Jane (Muriel Harbater)

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

BOTH TODDLES and I have finally yielded to the behests of our many friends who want to see our pictures. And my dears, Jones is such a splendid artist—why it took weeks and weeks and w-e-e-k-s before he was satisfied with that expression around the feather in Toddles' bonnet. And of course, while one is hesitant about these things—don't you really think I have—uh—well, of course one should be very modest about one's own advantages—but I really can't resist remarking that my legs show off very well. Toddles' are quite a bit scrawny—she must never know I told you—and that's why she's in the background. Autographed copies on request.

Bill Vallée

My dears it's two weeks since I saw Bill Vallée, brother of Rudy—and I simply haven't come down to earth yet. If he isn't the exact image of his brother—why it's just like being with The Crooner himself. Bill isn't quite so tall as Rudy, but he makes up for this loss horizontally. He's just twenty-two, has blond hair and soft, romantic eyes. And maybe you think it's fun being related to some famous person and being introduced around as Soandsose brother. Well, it just isn't. You lose all your identity, whatever that may be. But Bill doesn't have to depend upon his brother's popularity—he comes into this State of Popular Acclaim by his own rights and writings. For he's a writer, having worked in the Publicity Department of Paramount, he's an artist, and he's a downright good business man. He made his Radio debut on a new program called *Chats with Stars* a few weeks ago. By the way, girls, can he make popovers? Well, they're something like muffins with a vacuum in the middle. Both vacuum and surrounding territory are fit for a king, and 'tis said that Rudy of a morning garnishes his internal economy with no end of palatable popovers. And are they good? Well, let's not talk about them anymore. By the way, maybe I can get Bill's own personal recipe for making them if anyone is interested in trying them out. And next month there's going to be some thrilling news about a new organization called the Brothers of Celebrities. Bill and the brother of Ted Lewis have already started it and I mustn't say a word more—except—and my dears, I know you will be terribly thrilled—your own Marcella is to be Secretary—imagine—the only Female—even Toddles won't be able to poke her nose in the doorway.

A. Sandersen

Toddles and I—Pleased to meet you

* * *

AND now we come to a very important person—Alexis Sandersen, Program Director of WGBS, New York. (Just as an aside, he's a popover exponent himself. He and Bill Vallée had a great time argufying about who could make them bigger and better.) It's seldom that you find a singer who has any business capacity at all. But when Mr. Sandersen is not singing on chain programs (he's been heard on the Baldwin Hour over CBS) he arranges and directs WGBS features. Lovers of music are familiar with Mr. Sandersen's beautiful voice, for he has given many recitals in New York. His greatest thrill was when he saw his name on the motion picture screens in France, where scenarios were especially written for him. And now his greatest ambition is to appear in the talkies here, and he will if movie producers want good talent. He speaks French, Italian, German, English, Scandinavian and Russian.

Which reminds me that Dr. Thatcher Clark is now on WGBS Television programs every week with his French lessons, and on WOR every Saturday with a new series called *French for Travelers*. Good chance to brush up on the language before you take that trip to Gay Paree.

There have been a great many puckered brows around the country these many weeks. Who can it be? Is she on any other program? That voice certainly is familiar? If I could only know who she is. Marcella has received many letters beseeching her to reveal the identity of the Old Dutch Girl who broadcasts three times a week over the CBS—but all I can say is—nothing doing. No, she isn't Lily Pons nor Rosa Ponselle. You'll just have to keep guessing and enjoying the program until this charming, appealing personality is ready to step out of her role as the Old Dutch Girl to appease her listeners' curiosity. Evidently she enjoys impersonating this figure which has held sway over so many households for the last twenty-six years.

* * *

DID I hear anyone say that the American home was disappearing? Well, if you saw the great big batches of home-made cookies, pies and other delicacies that admiring females send to A. L. Alexander, Chief Announcer of WMCA, you'd know that the emancipated sex hasn't quite deserted the old-fashioned oven. Mr. Alexander is so well-liked in these parts that a taxi-driver on learning that our popular announcer was his passenger, exclaimed, "Well, I would have driven him around town for nothing had I known it!" In his beautiful, clear, rich, resonant voice, he has presented such celebrities as Ethel Barrymore, Mary Pickford, George M. Cohan, Al Jolson, Arthur Brisbane and a host of others, to the Radio audience. Radio is his one and only love, his work and his play. He received his education in Boston, was engaged in newspaper and social service work and finally broke into Radio in 1925.

A.L.Alexander

Ralph Kirbery is known in Radio circles as the singing fisherman. His voice is like a siren call to cod, bass, flounder, whale and other lake fish. Aspiring fisherman need no longer stop at a local store after a day's fishing and buy a quantity of good-sized catch to take home with them. Ralph's voice is the best bait. It seems that while fishing one evening with a newspaper friend and rather impatient at no sign of even a sardine, Ralph burst into song. Amazed at such a glorious baritone voice, the fish left their abiding place and came to the surface of the water for the concert. I

R. Kirbery

want to assure you, my dears, that this is not a new version of a fish story. And the pisces (short for fish) they caught were this big. Believe it or not, Ralph Kirbery gets away with it, and I for one, although not a member of the water-breathing craniate vertebrates, enjoy his songs tremendously as do his WMCA and WOR audiences.

". . . . . and look at me now." is Art Gillham's philosophy in a nut-shell. It may seem paradoxical to most of us but Art insists that when people cry they are happy—so he spends his time on the CBS chain stimulating listeners' lachrymosynary glands. The Whispering Pianist came to his parents as a New Year's gift thirty-six years ago in their home in Atlanta. Unlike most presents, Art stayed in the family. You may have heard him say that he is just a poor, broken, trodden down human being, weighing some 376 pounds. But you mustn't believe it. He weighs a paltry 2,640 ounces, Fahrenheit. Being a very obedient son, he joined a traveling orchestra as a pianist—his father having laid out a surgeon's career for him. Later he and two others, by name Scott Middleton and Billy Smythe, wrote *Hesitation Blues* which sold more than four million copies. This was in St. Louis from where he rolled in great wealth to New York. Here he entered the dignified profession of song plugger. Since he has been hanging his troubles on the CBS clothes-line, more than 65,000 letters have been sent him by fellow sufferers. Summed up in Omar Khayam's way, Art would say, a cup of coffee, a heart-ache, some calla lillies and I.

Art Gillham

* * *

LANNY ROSS is a Yale graduate and should therefore attract all Rudy admirers. A score and four years ago, Lancelot, as he was christened, was presented to his parents in Seattle while they were on a vaudeville tour. He received his early education at the Horace Taft Preparatory School in Watertown, Conn. owned by President Taft's brother. Here he became a member of the school glee club, and when he entered Yale, he soon became a member of the glee club there. As soloist of this organization he made a tour of Europe. Has been heard on many NBC presentations.

Lanny Ross

Applications by aspiring announcers are received in great numbers at the CBS in the form of letters and telephone calls. The little, unpretentious black mike has an irresistible lure and its call is heard and answered by men of all sizes, ages, backgrounds, educations, etcet, and etcet. On a cold and mathematical morning a committee at CBS got together ten announcers for averaging purposes and after much compounding subtracting, dividing and square rooting, they arrived at a composite announcer. He is handsome, has light hair and blue eyes. Is under twenty-nine, stands five feet, eleven inches tall and weighs 166 pounds. This composite picture was obtained from Ted Husing, Frank Knight, David Ross, Harry Von Zell, Louis Dean, Don Ball, Tom Breen, Andre Baruch, George Beuchler and John Mayo. Now two more announcers have been added to the CBS family. They are Kenneth Roberts and Edward Cullen. I can see where Kenneth, my dears, is not going to be lacking in neckties and cookies and whatever else admiring listeners send to favorite announcers. Already a pair of new fond parents have christened a small bundle after him. Kenneth, himself, was born in New York City. He studied law but left school to join Christopher Morley's Hoboken production, *After Dark*. Edward Cullen is the other CBS newcomer. From Boston. Left college to join a stock company. His first New York engagement was in the same company with Tom Meighan.

Ken Roberts

* * *

MARY HANLON of Pittsburgh says she saw Rudy last summer and she knows that all those nasty reports about him are the "bunk". "I want you to thank Peggy Hull for me for speaking so nicely of Rudy and Floyd Gibbons," she continues. By this time, Mary, you must know that Rudy is now playing up at the Pennsylvania roof and that early in June he opened up on Broadway with *George White's Scandals*. Peggy Hull, by the way, started a year ago with a very lovable, affectionate kitten. What is that saying, "Great oaks from little acorns grow?" Well, Peggy is now proud foster parent of twelve handsome felines, and at the same time of a dozen problems. Peggums is writing a book, and what can she do with a big thought when a kitten or two or three runs up on her lap and comfortably settles there for the rest of the afternoon. Eleven cat-loving homes wanted—and Peggy is not paying for this ad either, but I'll get it out in some way—maybe in a home-made cooky.

Gossip: Mr. Woods, Royal Treasurer of NBC became proud father recently of a young eight-pounder. Irma Glen, the little lady who plays the big organ at WENR has 13 babies named after her. Please won't someone get another baby and christen it Irma Glen so's to pass the dre'ful 13. If Donald Nichols of Smithboro will turn to the rotogravure section in last October's RADIO DIGEST he'll see a beautiful picture of Irma. We'll have another one very soon again. Yes, Julia, Rose and Mr. Milton, Irma went and accepted a husband recently. She started to study music ever since she was seven and has been before the public most of her life. At fifteen she organized her own orchestra composed entirely of girls and in 1924 she took the *Irma Glen's Co-Eds* to South America where they played for eight weeks. "The year before that," writes Irma in her letter to me, "I toured Europe, unprofessionally, however, with mother who is my best pal (next to my husband). We visited eight countries and I heard all the music they had to offer."

A big floppy hat, great round brown laughing eyes, and a sunny disposition—that's Sue Read, one of the seven girls chosen by CBS for its television programs. You've heard her on the Miniature Theatre, Collier's, Maltine, Lux and other programs. She comes from Philadelphia where she used to pose for photographers who recognized in her hands and fingers, a grace and exquisiteness worth perpetuating on film.

Mrs. Diven, Rudy's very efficient secretary, was knee-deep in press clipping volumes when I saw her the other day. And girls, do you know that Rudy disguises himself whenever he takes a walk. Try and guess what he wears: whiskers, mustache or—well I mustn't tell you. Here, Elizabeth Stevens of Chicago, are the answers to your questions. Rudy is 29, five feet ten and a half, is not married, broadcasts from the rehearsal room of the Paramount Theatre and his office is at 67 West 44th Street.

Sue Read

* * *

SHE had just scoured the antique shops for oriental jewelry—had Josephine Breskine, well-known contralto heard over WBZ, Boston—when she came into RADIO DIGEST's domicile. She was smartly dressed and wore gorgeous jewels—pendant ear-rings, a long necklace and very attractive rings. Miss Breskine is sister of Sylvia Breskin, internationally known prima donna who just returned from Italy and is niece of A. I. Breskin, late composer and musical director, and she herself, with her beautiful voice, stands on the threshold of prominence.

Writes Mrs. O'Brien of Lagrange "Have always enjoyed the wonderful programs broadcast by John Stamford Let us have a picture, please." (*See next page.*) John is a Program Director having been in Radio for the last seven years, and also a tenor of no mean ability. He spent a season in concerts, was in musical comedy, vaudeville and dramatic stock. His programs, the *Stamford Players* are so intensely interesting that they hold the unbroken attention of the audience sometimes for over an hour and forty minutes.

Grace Hammill, formerly of RADIO DIGEST, bumped into Russ Russell of WGN th'other day.

J. Breskin

. Stamford

She says it made her feminine heart quiver. He's *tall*, good looking and has blue eyes and coal black hair. Single and has a weakness for blondes, brunettes, chestnuts, ebony and Titian-haired. Used to be with Dean Fitzer of 'DAF. Grace says that some time in ugust Frank Clark and Sarah Ann Mcabe, now on NBC, will celebrate sixth eddin' anniversary.

Sally Barrett can hear Will Osborne very Wednesday night on the CBS. He nd his orchestra are playing at the ossert Roof, a Brooklyn hotel.

Ormah Carmean, Program Director of MA, espying the SOS about the Ray-Vac Twins, writes this illuminating and riendly note: "Russ Wildy is now work-g with Freddy Rose in Chicago and ppears over KYW twice a week. Billy heehan is with the Cudahy Packing Comany of Chicago in the sales department. hey were known over our station as the aint Boys and their fans are still asking bout them. I realize you must be a very usy lady but should you ever be out in owa, we want you to make yourself at ome at our station." Thank you, Miss armean, and I shall certainly look you p when I am in your fair city.

For the benefit of W. N. Crosley and ena B. Camire: Lloyd G. Del Castillo as born in Boston on April 2nd, 1893. le is staff organist and assistant musical irector of WEEI and he must be a good ne for he is a musician of the first rank, omposer, symphony conductor, writer nd bandmaster. At the age of four his nother, a musician herself, gave him his rst piano lessons. Mr. Castillo, his wife, hyllis and his two daughters, Elaine and anet perform regularly over WEEI. Got is degree with honors in music from larvard in 1914.

Jerry Wilford, it is rumored about, is o return to KFRC, San Francisco, according to Maye of El Paso. Thanks for he tip, Maye.

To a crowd of Mansfield Ladies and to Betty Jamieson: Marcella dedicates this rio of WTAM-ickers: Harry Frankel, nown as Singing Sam, Edward H. Smith nd Russell B. Wise. Mr. Wise admits hat he's married and boasts of a son at Ohio Wesleyan College who is a star track man. This dean of WTAM announcers started his business career in the milk business and then went insurance-wise.

Del Castillo

* * *

ED SMITH is Program Director of WTAM. Engineering was his vocation until he was called to service in Panama and South America. Over WGY way Smith put into practice his idea of producing Radio dramas. In this he was a pioneer and Roxy devotes a whole chapter in his book to Smith's efforts in this work. The discovery of Rosaline Greene, well-known NBC and CBS star, is credited to our Pioneer of Radio Dramas and last but not least he appeared in *Seventh Heaven, Broadway* and *The Gorilla*.

Johanna Grosse, a former WTAM-icker, is not in Radio as far as Hal Metzger, Pub. Director, knows. Last he heard she was taking care of invalid mother in Cleveland.

Will Violet Harris of Muskegon Hgts., Mich., and M. M. of Neenah lend me their ears. This is WTMJ: Billy Russell no longer in Radio—Margaret Starr when last heard of was in Chicago with no

H. Frankel, Ed Smith, Russell Wise

broadcasting connection — Glen Welty conducts the Milwaukee Athletic Club Orchestra—Merrill Trapp is in charge of Cramer-Krasselt Advertising Agency's Radio Department, and WOW of Omaha never had an announcer named Thurle B. Evan. Stanley Morner, one of the latest of WTMJay's announcers, is known to everyone as the winner for two consecutive years of the state Atwater Kent audition. After college he sang in grand opera in his state. No mere printed word could adequately describe Mr. Morner. Television alone will do him justice—blond, wavy hair, blue eyes and an appealing smile.

Julanne Pelletier, 22-year old lively French pianist, entertains WTMJ's audiences with her popular piano tunes. She is a real Parisienne, five feet two, dark brown wavy hair, white glistening teeth and sloping green-brown eyes. At the age of seven she was accompanist at every public and social entertainment held in the small Michigan town where she was reared.

Merle Blackburn, the third of this trio, is one of WTMJay's singing announcers—

Stan Morner, J. Pelletier, M. Blackburn

or better still, a singing salesman—and what a crackerjack he is in the sales department of the station. This "Early Bird" announcer has very blue eyes, very black hair and very five feet—almost six tall. His hobby is disciplining billiard balls.

Since the separation of Mr. and Mrs. McNamee was talked about, the May issue of RADIO DIGEST has been selling like popovers. Why? It contains a splendid article on "Friend Husband" by the Mrs.

* * *

TO HELEN of Peoria, who enjoys this column so much. Introducing Bob Longstreet—just 24—Columbia's newest and youngest announcer. Bob's pa is Managing Editor of the Asbury Park *Press*. Listeners will remember having heard Bob sing on the Paul Tremaine concerts which were broadcast from Asbury Park last summer. He's a grad of Lehigh University, worked as public office manager for the N. J. Bell Telephone Company but Mike got him at last.

Julia Kline will soon find a picture of the Futuristic Rhythm Boys, the WOV harmony team, in one of our future issues. Al Simmons is not Connie Mack's Al—he's 22, medium height. Manny is the same age and quite good looking, but you will see for yourselves when the photo is published.

Marie, where have you been! Haven't you seen Gene and Glenn's picture in the May issue, page 15?

Hearts and stomachs are common in that they share mankind's greatest yearnings but they differ when it comes to mending. Frank Gow, junior announcer of WEEI, proved this when he found himself on a ship as Radio operator. The boat was a bit too wiggly for the old "tummy" and he was mighty glad to get on terra firma again. But two weeks on solid ground found the august stomach healed and he boarded a tramp steamer. After two years of sailing here and there he resigned and took to the land for good. For a while he taught code and theory to aspiring Radio operators at the Eastern Radio Institute, but when WEEI needed a new operator, Frank stepped into the job and was soon after that promoted to his present position.

B. Longstreet

Carl and Clara Britt—where have you been? Edward B. Husing was horoscoped and photographed especially for RADIO DIGEST May issue. Yes, Bob of the True Story Hour is a new person. I've looked all over for your twenty-one letters, but cannot find them.

This one concerns Mrs. Ellen Dickey, now of WAAT, Newark. While broadcasting for WJJD, Chicago, a Texas man fell in love with her voice. They met, everything was set for the wedding, but he suddenly disappeared in a foreign land while on Secret Service duty. Awful life, isn't it?

* * *

MARCELLA hears all, tells all. Write her a letter, ask her any of the burning questions that are bothering your mind. Information is her middle name.

Frank Gow

HIS peculiarly gifted singing voice led Morton Downey, famous Columbia tenor, into many adventures. Adversity was his lot in early years. But unfailing ambition and boundless optimism led him on to remarkable success. Below, Mr. Richards presents the second phase of young Downey's career

Riding the Morton

By
GRENVILLE RICHARDS

Morton Downey at the microphone a his orchestra as seen from the cont room in the CBS studios, New Yo

HERE we find that Morton Downey has "arrived".

Picture a footloose and free youngster, who has led for the first twenty years of his life what at best was an uncertain existence, suddenly thrust to the front, accepted as a singer and entertainer with a capacity for earning in a month as much or more than he had ever been able to scrape together before in an entire year.

So was Downey not so very long after he got his first real break on the S.S. Leviathan while that stately craft was on her trial trip before acceptance as a Shipping Board liner.

Radio had not yet entered the picture, nor methinks, had Morton even dreamed of it. In point of fact, should we wish to draw a parallel, the rise of Radio and that of Downey are not so very much separated. Radio itself was pretty much in its babyhood insofar as being generally accepted as a medium of entertainment, in the days when Morton, viewed in the light of the same medium, was wholly an infant.

How different today—with Radio ranking as the foremost and most widely disseminated means of entertainment that the world has ever known—with Downey riding the crest created for him by Radio, beyond any question a success.

AND success rides lightly, today, just as did his smaller and earlier ones, on the shoulders of this chunky, blue-eyed youngster who inherits his clear gaze, straightforward manner and scorn of restraint from his father and through him from Auld Erin; and his voice from Heaven knows where.

He harbors no illusions about success in his field—nor for that matter illusions on much of anything else. He is rather much inclined to take each day as it comes, and is singularly devoid of surprise over whatever each may bring.

For instance, while he was annoyed, and chafed far more than would you or I when his recent illness and throat infection kept him in bed the better part of a month, he was not any more surprised than we are at the fact that winter follows summer.

Chiefly he was angry, mad clear through you might say, that it had to hit him just at the time which by all signs bid fair to be the most lucrative of his life.

Most of us feel endowed with all due and just cause for a bit of "grousing" if we have to shell out a few hundred dollars for physician's, surgeon's, and hospital bills—but in the average case the old income comes in just the same. Suppose that illness had cost us in cold cash, twenty—thirty—forty thousand, as his did Morton. Then, say you, we would have a real kick coming.

But how did Downey take it? Well, with about as much emotion as cream rising on milk. Don't think from that he liked the idea. Nay—nay! He just refused to let it get under his skin, treated it about as seriously as he regards most things in life—not at all so.

"What the heck," to quote Downey literally. "If I were going around talking about my art and my public, and were trying to sell you the idea that this was all 'art for art's sake' and a lot of bunk like that; then perhaps to keep in form I ought to bemoan the fact that by being such a darned old fool as to get sick I was unfeelingly depriving [illegible] thousands and thousands of admirers [illegible] one of the great things in life—the [illegible] of hearing me sing."

Of course I may have been mistak[illegible] but it seems to me that the next th[illegible] Mr. Downey said was—or at least sounc[illegible] very much like—"Hooey!"

"But all joking aside," he went [illegible] still grinning at the thought of his si[illegible]ing being the moment of moments [illegible] anyone's life, "I truly did not have [illegible] idea how much how many people thou[illegible] of my work until I did get sick. B[illegible] I'll bet there will be a shortage of [illegible] produce in Indiana for the next year.

THIS last crack was [illegible]spired by the fact that *Wabash Mo[illegible]* the theme song of his own composit[illegible] which Downey uses in his broadcasts, [illegible] resulted in his being made something [illegible] a popular idol in that state. Well [illegible] half of the gifts, remembrances and w[illegible] wishes that poured into his sick-bed c[illegible] from there—and there were thousa[illegible]

"I haven't any illusions about all [illegible] wave of popularity. How long wil[illegible] last? How do I know? It will have [illegible]

Crest with Downey

ay and I am having mine now. But when hey slide the old skids under me I am oing to see to it that I do not have to orry about it or anything else no matter ow well greased they may be."

IN RESPONSE to a gently-worded question on whether the present days of affluence and adulation, or those earlier times when he first got into the swim, almost literally, aboard the Leviathan, were best, he thought deep, ran a pocketful of silver from hand to hand much in the manner of a conjurer running a pack of cards through the air, and decided the old days were more fun and the present more desirable in most ways.

"But boy," and a reminiscent and somewhat satanic gleam bore silent witness, "those were the days!"

Here followed an exposition of that trait of the Downey character alluded to previously—that of never forgetting a good deed nor ever forgiving a bad one.

It seems there was aboard the Leviathan in those days if not now, a head steward, who, if not as Morton hazarded, was "Limey" in fact, was at least that by act of parentage and desire—who did his best to make it evident.

Now if you know Downey it would be to realize that that fact alone would be more than enough to make his hair stand up, but when it developed the steward seemed more or less in charge of Downey, the Whiteman orchestra, and all other entertainers, and had classified them as "help", the situation grew serious.

When, moreover, he ruled that as help they were barred from the swimming pool, open revolt became general. As a means of quelling the rebellion he banned them from the smoking-room also, and then the gymnasium.

By this time, and particularly when he caused forcible eviction of certain members of the orchestra from those sacred spots, not a few of the musicians talked openly of dropping the steward overboard.

NOT so Downey. He simply smiled a knowing smile and let nature take its course. Nature it seems can always be counted on, for the very next year Downey made his first, and highly successful invasion of Europe.

With malice aforethought Morton booked a de luxe cabin on the Leviathan. And with the same quality and purpose Morton took pains to hunt that steward, to remind him of his, Morton's, identity and of the fact of his presence on the maiden voyage. That accomplished, Morton deliberately kept the poor devil on the jump throughout the voyage.

If he lagged he spurred him onward. If he demurred Downey threatened to report him. He had him at every task, almost to bringing him down the mainmast cap for inspection. Then just as deliberately Morton strolled ashore in England, quite, and with all that old malice aforethought, forgetting that it is customary for one to lavishly tip one's steward on leaving ship. The worst of it was that Morton had kept him so busy the fellow hardly had time to get in solid with any other passengers. Yea—truly revenge is sweet.

For the greater part of the ensuing four years Downey stayed with the Paul Whiteman organization, save for those times that he went off on European jaunts of his own during summer seasons. One of the best gags of this period is of an authorship now gone to the limbo of the lost in memory.

IT WAS of a nature that might well have been born either of the brain of Whiteman or of Downey. They are either of them quite capable of having conceived it, though to my mind it smacks more of the wit of Downey.

At any rate there was an apparently bonafide French horn player in the band. He tooted with the best of them. That was Downey, and what of it if not a sound came from the horn. It looked good. Once in each program he got up and sang a song and the audience always gave him a big hand, probably because they thought they had before them a musician who strangely and rarely enough, could also sing.

Well—one more anecdote of this—let us say—formative period, and we will hie us once more to the Downey of the present. Anecdotes, by the way, are one of the most prolific things that Morton has. If there is anything the lad really likes to do it is to get away to some quiet spot and relate these priceless bits from a day long gone in experience, but of the immediate past in point of actual years.

Just about the time that Morton was getting some early breaks as a singer he answered a call to serve as soloist at a banquet of a Jewish federation at a mid-Manhattan hotel. He only knew five songs at the time, and did not know until he arrived that he had been booked for a Jewish affair. All of the five songs were Irish ballads. But he got by all right, as he always seems to, on his wit when he can't do it by singing, and left with a bonus.

He saw the humorous side of it then as he does now, as he does in nearly everything he undertakes, for that matter. He is an inveterate jokester, but goes about his pranks so quietly and with such

serious mien that you usually wake up to find that he has put one over on you and everyone else is laughing.

Nowhere, perhaps, does this quality assert itself more than in his Radio work. Downey's rehearsals as a rule are one long laugh, and I've a sneaking suspicion that more than one official is as a rule present in the control room during these periods who would be hard put to it if asked to explain any official reason for being there.

I also have a very distinct feeling that more than one official lives in daily, weekly and mortal fear that one of these days Morton will forget he is on the air, think it is rehearsal and treat a nationwide audience of Downey fans to one or more of those quips whispered into the receptive "mike", intended solely for the ears of the crew in the control room of the studio, and in all probability directed at one or more of them in highly personal manner.

DOWNEY draws a packed house in the studio as surely as during those periods which he has given to stage appearances around New York, and which, though cut short by his illness, will probably be resumed very soon after this present moment.

He has a "cuddly" sort of way with a microphone, much as though he were taking it into intimate confidences, but the self-same habit gives control engineers a chance to figure out which of the many chills chasing each other up and down his spine is going to come in winner.

For this intimate microphone manner often results in that delicate instrument being hit, however gently—the surest road to reverberating manmade static. Of course all that could be avoided by having him sing to a microphone suspended from the studio ceiling rather than to the floor type, but Downey refuses to sing to a hanging mike.

That, and one other thing, are about the only signs of temperament this lad allows himself. He knows that in the present day he is a busy man, so if the rehearsal is not ready for him say five or ten minutes past the appointed time he may get testy about it. Not really badly of course, just in the mild Morton manner.

THE other day, however, rehearsal for his Paramount hour was set and waiting. When, an hour later, they were still waiting, from company executives on down to the kettle drummer and guest artists, the city began to get flooded by frantic telephone calls to police stations, hospitals, morgues, hotels, his apartment and everywhere else fevered officials could call to mind. His car was parked in front of the Hotel Delmonico, where he has his offices, but of Morton not a trace.

About the time theories of kidnapping came up for discussion Morton hurried in, very much harassed. On leaving his office to go to rehearsal he had found a police ticket on his car, and to use his own words—he "got so d . .n mad while looking for the cop that did it he completely forgot there was a rehearsal."

And here the boy in the man showed right on the surface. He was chastened, humiliated, downright sorry, and promised to be good. I was with him the next afternoon when he suddenly jumped up and announced he had to rush to rehearsal. He got there fifteen minutes ahead of time and sat around, kidding friends, jingling coins and generally fidgeting until the others showed up.

Another juvenile trait that crops up in Downey ever and anon is that of being unable to resist the temptation to tease when it is at all evident that the object of his attentions is vulnerable.

So, with that in mind, when he has an odd moment on his hands for a session of that nature, and finds himself in the building of the Columbia Broadcasting System at 485 Madison Avenue in New York City, with whom he has his Radio affiliations, he hies himself to the Press Department where, he knows, is suitable material for his bedevilment.

OF COURSE Downey has not achieved success without the usual chorus of pessimistic comment—seeming adherents and supporters in spite of themselves. He has gone the limit they have told you from time to time, or again, he is slipping. Slipping is right, but in defiance of all laws of gravity—uphill.

Columbia tried him out as a forlorn hope—an act that could successfully buck Amos 'n' Andy on the 7 P.M. spot—for one day a week. It was a matter of just a few days only when they began adding days to his schedule until he appeared at that hour four times a week.

Soon he became the highlight of the Paramount hour, and as a flyer on the side appeared at the Palace and was held over, so surely did he click. And now word comes to me that with the passing of Camel from the programs of the National Broadcasting Company that Downey has been picked to sing them on to sales via the new series on Columbia's air. Good boy Mort—you're slipping.

The Club Delmonico has closed for the summer, like all good supper clubs, which is just another evidence of much little-suspected business ability on the part of Downey He should have been a theatrical producer on Broadway—he knows when to close—while the public still has a definite taste for more. The minute weather became milder and Saturday nights failed to show many reservations turned down because of lack of space he shut up shop—just like that.

May I remind you at this time that all of this has been done wholly without the aid of that indefinite vocal or physical quality much vaunted and widely publicized under the slangy pseudonym of "It' His voice above all things is wholly de void of this stigma, and—though M Downey may not be thrilled when h reads this himself, he is also lacking i that quality.

In fact judging from the letters he r ceives from members of the opposite se they as a rule seem to be Downey fans i spite of themselves. Take for instanc the young lady from upstate somewhe in New York who wrote on nice statio ery in red pencil. After assuring hi that she never missed a single Downe Radio appearance she proceeded to pu him thoroughly to pieces. She was, to l gentle, far from complimentary, either Downey or his voice, even accusing hi of taking bread from the mouths sopranos, and concluding her letter in th manner:

"PLEASE, Mr. Downe send me your best picture so I can ha it up on the wall and throw knives at it

This fairly well classifies her as a wor an in the prime of life for Mr. Downey real conquests seem to be among tho females under six and over sixty.

It is true. Something in that silve voice inspires infants to adoration a elderly ladies to an undownable desire cuddle and mother him.

Really my intention was to tell y something here of the amazing thin Downey can do with that voice, and take you with me into his home—a re home—where many charming and surpr ing sides of his complex character co to light which would never even be su pected amid other surroundings by a mere acquaintance.

Downey, whose patron Saint is he w watches over wanderers and travelers, yet in love with his home, and there lo reigns supreme. There Downey rela utterly—there he throws off all restra —and among other things indulges own peculiar ideas of exercise. More that anon.

NOTHING is ever qu right in that home. There is alw something not quite as perfect as it sho be in its physical aspects as a setting his lovely and charming wife, Barb Bennett. He would not be Downey if felt otherwise. For most of all that ho is a monument to a real love—to a m who worships his wife—and a wife w adores her husband.

Yet—even as I write a shadow is l ing from that home, a shadow laden w the chill breath of death. Downey's ho has not been of late either in the Ra studio nor in his home or office, but b bedside in a New York hospital.

Happily the shadow has passed, when Downey welcomes his wife back their nest the telling thereof, of resur and augmented happiness, should m beautiful reading.

Harry Glick *mixes* Chuckles *and* Exercise at WMCA

By MURIEL ALLEN

WHEN you're the world's welterweight wrestling champion, you have to answer a lot of questions. The two ost important ones are "How?" and Why?"—"How did you get so strong?" id "Why did you take up wrestling?" One lad has the answer to both quers. He's Harry Glick, the exuberant r personality who conducts the "Seat Health" gym class over WMCA every orning at 10.00 o'clock.

"You, see, it's this way", says Harry or some reason nobody ever thinks calling him "Mr. Glick; he's such an l round good fellow)—"When I was a oungster—well, we won't go into the mily album that far back—but all dding aside, at thirteen years of age threw a scare into myself—and the st of the family—by having a serious tack of heart trouble. The doctor's rdict was. 'Don't have another or u'll be sorry.' That nearly took the ck out of me, and for the next seven ars, while I was learning all about aesar's Gallic War and the shortest dince between two points, I wasn't even lowed to run a foot race.

"When I reached the age of twenty I lebrated the event by contracting eumatism, and if you think that's any n, even after you pass the eightieth ilestone, you're very much mistaken. addition to being wrecked in pain, I as as mad as the proverbial March hare.

Harry Glick

Right there and then I made up my mind that I would become physically strong if it was the only thing I accomplished in life. So when the neighborhood gang went out to have a good time, I went down into the basement and started rigging up a gym. I made parallel bars out of my mother's old broom handles and a trapeze out of a discarded curtain pole. A friend of mine, an old 'salt', had taught me how to splice ropes. I made flying rings out of an old set of quoits and strung them from the ceiling.

"Being an omnivorous—I guess that's a good word, eh?—reader, I studied everything I could lay my hands on that had anything to do with physical culture—and what is more, I consistently put it into practice. Gradually my health began to improve and the gnawing rheumatic pains abated.

"A little later I joined the gym of the local Y. M. C. A. and while standing along the ropes one night watching a wrestling match, someone pushed me forward on the mat with the words, 'Go on, kid, let's see what *you* can do.' I wouldn't welch, so I went through with it—and floored my man. I had known nothing about the technique of wrestling, but the sport fascinated me from that time on. My muscles were now as strong as iron and my whole physique had improved.

"And then—the big scrap—on the other side, I mean. I was in the 27th A. E. F. (the fact that I passed that physical examination is proof of my general condition). Somehow fighting got to be a habit with us 'Over There' and along with the rest of the battles we went through, I had the good fortune to win welter and middleweight wrestling championships in my division.

"And when we came back—well, I literally threw my hat into the ring—and that's that."

"You mean, that's all?"

"Well, nearly all. I had a taste of the stage as a Russian dancer with Natacha Nattova; a turn before the kliegs with Adolphe Menjou, and every once in a

(*Continued on page 95*)

Do you want to reduce? Do you want to build yourself up physically? Are there any other health questions on your mind? Harry Glick will be glad to help you. Simply write to Harry Glick, care of RADIO DIGEST, *420 Lexington Ave., New York, N. Y., and he will give personal consideration to your particular problem.*

Harry Glick's "Seat of Health" Class at Brighton Beach. Left foreground, Gus Van; center, Harry Glick and, right, Billy Snyder

SHOULD STARS TELL THEY'RE MARRIED?—A "MUTT" LETS THE CAT OUT OF THE BAG

MAY an insignificant mutt poke her nose into this all-important question that was discussed in the April issue of your most interesting magazine about whether or not a Radio star should let the cat out of the bag if he or she is married?—Whether or not you let the aforenamed mutt wag her tale, she is going to anyway. My answer is YES. After all, was the Radio created to give enjoyment and education, or to provide husbands for old maids?—She who had the last word." New York, N. Y.

* * *

THE less we know of the stars and announcers in a personal way the more mystery and romance we can build up about them. As the song goes, "Let me have my dreams." I'm a hard boiled business woman but please don't tell me my Prince Charming of the air has a wife and sixteen kids.—B. E. Neale, Deming, N. M.

* * *

OTHERS who expressed their opinions on the subject of "Marriage—Should a Star Reveal it" were . . . Agnes Richardson, 615 Fleming St., Howell, Mich. . . . Jeanne Davis, . . . Dorothy M. Swan, R.F.D. 1, Fluvanna Ave., Jamestown, N. Y. . . . G. Fusee, R. N., 94 Windemere, Highland Park, Mich. (for her family) . . . Jennie Kress, 2333 West 42nd St., Cleveland, Ohio . . . Lack of space prevents our printing their interesting letters, but all voted to have celebrities reveal their marital status, as did the majority of writers whose letters appeared in our June issue—*Editor*.

INFORMATION WANTED

CAN anyone tell me what Radio station put on my play *Gaius and Gaius, Jr.* during the summer of 1924? It is in Carolina Folk Plays, Second Series, and was broadcast without permission and the payment of royalty. A friend of mine heard it but could not remember from what station, other than that it was some New York station.—Miss Lucy M. Cobb, Y.W.C.A., Raleigh, N. C. (*Please write Miss Cobb direct if you can help her—Editor*)

QUIT JAZZING THE CLASSICS

I AM writing beside my Radio while I'm in the mood to say just what I feel. From my speaker is coming a fast, peppy fox trot, one which makes one whirl and swing dizzily about. It's not the tempo that's gotten me wild. It's the number they're playing. Believe it or not, it is the *Lament* from *Pagliacci!* A little while ago I turned the dial to escape a similar treatment of the *Meditation* from *Thais*. And several times recently, *Liebestraum* and *Serenade*. Can't the jazz bands be satisfied with *Sweet and Hot, I Got Rhythm*, and countless others, without resorting to the opera and classics?

It's outrageous that compositions of real and rare beauty should be torn to pieces and hurled at the listeners by blaring brasses, jangling pianos and thundering drums. Won't the other V.O.L. fans give their opinions?—Sally Barrett, 10 Stanyan St., San Francisco, Cal.

TRANSCRIPTIONS ARE O. K. THESE CORRESPONDENTS SAY

I AM very strongly in favor of *good* electrical transcriptions. Pray, what fault can Mr. R. J. Doyle of Bay City, Mich., find with the "Chevrolet Chronicles" or "Pequot Personalities"? I wager that the people who object so strenuously to phonograph records and electrical transcriptions could never tell the difference between "live" and "canned" programs if no identifying announcement were made.—Clara D. Lange, 2007 Marquette, Davenport, Ia. . . . I can listen to half a dozen of the electrical transcriptions and enjoy them as well as I do a coast to coast hook-up.—Mrs. C. L. Walton, 2381 Greenway Ave., Winston Salem, N. C. . . . To our way of thinking the ones who kick the most at transcriptions are ones who have tried to get on the air from their local stations and were not able, and are venting their petty jealousies in this manner. Perhaps we are wrong, but give us a good transcribed program to a poor talent program any time—K. S. Rogers, Managing Director Radio Station CFCY and Staff, Charlottetown, P.E.I., Canada.

BUT THESE FOLKS HOLD CANNED MUSIC LEAVES 'EM COLD

WHICH would I choose—a "good" program on wax or a bum one through the mike? I would choose to turn the set off and save batteries and use my own canned music on the premises. Has it ever occurred to the broadcasters that many listeners have the records at home which they are broadcasting—and frequently have better phonographs and can remember to change needles?—A. G. Taggart, Ebb and Flow Indian Reservation, Reedy Creek P.O., Manitoba, Canada . . . When I tune on a station and learn that it is a record, I immediately turn to find something different. I have canvassed our neighborhood and all of the twenty people owning Radios in my vicinity feel the same as I do. They turn the dial. Now it costs to advertise over the Radio, and I imagine that any firm taking advantage of the Radio wants as large an audience as it can get, so why not cut out the electrical transcriptions?—Clarence J. Kirby, Vice-Pres., The Monroe Nursery, Monroe, Mich. . . I certainly can tell the difference between transcriptions and first hand music and singing. There is no comparison in tone quality on the Radio.—Hazel L. Humphrey, Route 1, Box 15, Evergreen, Colo. . . . I heartily agree with Mr. Doyle who said he didn't care for "canned programs". Besides, I don't think it's fair—it's taking work away from real entertainers.—M. Hess, Cleveland, Ohio.

YOUNG LOVE FOR SALE

PLEASE enter this as my protest against the broadcasting anywhere over any Radio circuit of the vocal refrain in the dance melody entitled *Young Love for Sale*—R. C. Messner, Rockford, Ill.

A MAN RAZZES RECIPES

EVERY time I purchase your magazine I find more *junk* about raising children, politics, gardening, beauty and care of skin and cooking recipes. If we want that stuff there are magazines which print it. We buy your magazine because it says "Radio Digest" and we expect articles about Radio, television and the different Radio stars. Cut out the other rot. My favorite departments in your magazine are Coming and Going, Tuneful Topics, the picture section, Chain Gang Chatter, Radiographs, Marcella, news about stations all over the U. S.; Hits, Quips and Slips, and of course, V.O.L.—Jack Lee, 1883 North Ave., Bridgeport, Conn.

AND THIS MAN ASKS FOR 'E

PLEASE send me your recipes for M Smith's Mystery Cake and Miss Bow ing's Cubist Cake, and let me thank you v much for the same.—Mr. W. Burrows, F simmons Hospital, Denver, Colo.

GO AHEAD, HUGHIE

I HAVE a Radio-telephone station (bro casting over wires) and use some of y plays. As it broadcasts only to five hot it really isn't commercial. I'm only thirt and go under the name of the Superior S tem—Independent Broadcasts. If you ject to my using your plays, tell me so, I'll stop.—Hugh Linst, California.

ENGLISH AS SHE IS SPOKE

AFTER I read an article delineating the high requirements demanded of nouncers and then turn on my set and some of the most elementary rules of gram completely disregarded and some of the plest words in the English language tre as total strangers, I cannot help wonde what these announcers do with all the ed tion they are supposed to have.

I am not demanding "high-brow" Eng but don't you think that anyone who tends to talk over a Radio should know to pronounce such words as "recogn "suggest", "exquisite", "aviation" and "di ble", just to mention a few? Yet I can ha listen to a program of an hour's length w cut hearing one or more of these words pronounced. Now don't forget, I am talking about the little 100 watt stat either, but the big city, super-power, c stations and the others who have indulge so much publicity as to the qualificatio their staffs.

Here are the mistakes of a week. Mo —"Alley" for ally and "avertiser" for ac tiser, to mention a few. Tuesday—"tej for tedious. Wednesday a speaker at eastern station persisted in talking about "influenzer" which recalls the fact that m others have peculiar "idears". Thursd minister called further "futher", Frida announcer called a heroine a "herein" Saturday someone called bouillion "bull-j and accented the word embassy on the " These are but a few of the most gl errors during six days and I listened b few hours each day. This makes a good for the listener, and if you look up every take you notice, but about which you ar sure, you will be surprised to see how you were wrong and the speaker right. if you will occasionally let the stations from you it may be of mutual benefit t and them.—R. C. Hall, Proctorville, Ohi

JUICY BAIT FOR FAN MAI

MORE Radios are standing idle an being used more than once a week t because the owners can't get anything some tin pan orchestra or some old screeching at the top of her voice. They and brag about the fan mail they get an chances are, ninety-nine times out of a dred, their announcers throw out some juicy bait to draw it in. Give us fewer m programs and more talking acts like Gen Glenn, Amos 'n' Andy, Abe and David Cook and Al and Pete.—Will C. Mitchel So. Ohio Avenue, Abingdon, Ill.

Listener

GUESS WHO!

re is this saxophone player,
doubtedly best crooner, too,
lt as an orchestra leader,
t that isn't all he can do.

rious things he has mastered,
lead him to fortune and fame
ely success from his writing,
rished on him more acclaim,
eryone's heard this boy, surely,
h line of this verse spells his name.

ORCHEST-ORATIONS

HE DIGEST has Rudy Vallée listed in Thursday's programs as an idol and de- r to feminine listeners. That is true only i degree and is a slam on women in the t run. They change their minds when v see and hear him. They find they have n attracted by an air voice that cannot id the test of a theater. Detroit is too big i him. When he attacked the $50.00 per k man the way he did he spoke unwisely. n't misunderstand me—my hat is truly off him for the money he receives. I enjoy writings and I harbor no malice toward —Jennie Blakely, Detroit, Mich. . . . ly Vallée is my favorite star. I went over e hundred miles, from St. Louis to Chi- o, to see him and his boys, and it was sure th the trip.—L. L. K., St. Louis, Mo. . . . lk up another Vallée fan. He is one of most unspoiled entertainers on the air— rese Meyer, Union City, N. J. . . . ays see to it that RADIO DIGEST contains a ure of him. If the cranks don't like it can tear it out and dispose of it, but t one each time for his fans.—I. M. H., ntic City, N. J.

* * *

LEASE put my name under the Voice of the Rudy Listeners"—that's the cry from many feminine throats. We haven't room rint all their letters, so here goes—we list es of loyal fans just to show the letters appreciated. Writers were . . . Judith Dee, Lancaster, Ohio. . . . Mrs. Louise Stevens, East Braintree, Mass. . . . emarie Lee, Nebraska. . . . Agnes rhart, 1746 Arlington Ave., Toledo, Ohio. . Marjorie Page, Huntington Sta., New k. . . . Ida Farrow, Elizabeth, Ia. . Mary J., New Britain, Conn. . . . y Barrett, San Francisco, Cal. . . . J. Woodlawn Ave., Chicago, Ill.

* * *

HE only numbers I dislike to hear the Royal Canadians play is their closing ature, because I know it means the end heir half hour on the air. I am a new ler of the DIGEST and I hope this letter tes me a member of Voice of the Listener Irs. B. C. Raynor, 108 Fairfield Ave., acuse, N. Y. . . . Please put more items ut Guy Lombardo in your magazine— s Mary De Missett, Port Colborne, Ont., ada. . . . Let me add to your list of singers Carmen Lombardo—Verna Dun- 5 Lexington Ave., Merchantville, N. J. . Please give us a picture of Guy Lom- lo and his renowned violin. It is not fair is to always favor Rudy Vallée's friends. —Christine Hvass, 7320-25th Ave., Kenosha, Wis. . . . We regret sincerely the lack of appreciation shown to our favorite orchestra, Paul Tremaine and his boys. No others can soothe the mind and pedal extremities so quickly and thoroughly as this aggregation. Without Paul Tremaine at lunch time we are like a ship without a sail.—The Boys of Weiser's Pharmacy, Camden, N. J. . . . I wonder how so many can overlook Ted Lewis and his Orchestra—M. C. S., El Paso, Tex. . . . Ben Bernie has the most appealing personality. His semi-presto rhythm is simply delish.—Olga Garon, 80 Brock St., Drummondville, Que., Canada.

LAH-DE-DAH LADIES, BEWARE!

DO YOU think a campaign could be waged to have the women who broadcast speak naturally? Some try to adopt a languid, bored accent with an attempt at a Bostonian or Oxford pronunciation, and it is really very distasteful. I love a Boston accent which is natural, and a soft Oxford accent is charming, but to hear a woman say "tomawto" in one sentence and "tomato" in the next is simply ludicrous. It reminds me of the story of the newly rich woman who was going to take a "bawth in the bath-tub". What do your readers think?—Margaret (Mrs. W. L.) Johnston, 13405 Gruner Road, Detroit, Mich.

GET WISE, RADIO HOGS

WILL someone please edit a new book of etiquette covering Radio manners? An appropriate title might be "How to Run a Radio Politely". As an introductory chapter please advise what to do when a guest assures you that his Radio is never noisy with static while yours has bangs of static to punctuate the program. Is it necessary to say "How remarkable" or can you reply, "Oh, Blah!", as you felt like doing?

Then what to do when you are comfortably seated and tuned in on that play which you have anticipated all day, and that neighbor drops in to broadcast all the gossip. Please advise which one shall be tuned out, the Radio or the neighbor?

Then there is the question of family manners. Must one say tamely, "How kind of you," when High School Betty sails in as you are absorbed in that interesting description of an Arctic trip by an explorer . . . only to say sweetly, "Oh mother! I know you don't care for that—" She twirls the dials to find a snappy dance program, but what shall you do?

How about a chapter too, on "Keeping One's Temper" to deal with the friend who ridicules all your favorite Radio stars, says the music is distorted and your pet announcer a big bum?

These, and many similar ones are the problems confronting the Radio fan today. How may we keep within the bonds of etiquette and still enjoy our Radio? Who will be the first to compile this much-needed book?—Mrs. May B. Turner, Wayne, N. Y.

SEE MAY DIGEST, J. B.

FOR some time I have waited for a write-up on Georgia Backus and I have failed to see it. If she won't consent to a story, please print a large picture. I know you won't disappoint me. She and Frank Knight are one of the best combinations I have yet heard. (*May Radiographs fill the bill—Editor*)—J. B., Belmont, Mass.

DX FANS, HERE'S YOUR MEAT

I WOULD like to know the requirement of some DX Clubs because I am very anxious to join. I have logged 315 stations in three months, including Canada, Cuba, Mexico, Nova Scotia and a few police and experimental stations. I have no short wave set but my R.C.A. goes to 1715 kilocycles.—Bill Caventer, 103 N. Hazelwood Ave., Youngstown, Ohio (*DX Clubs please answer Mr. Caventer—Editor*).

* * *

WE GET good reception here in Prince Edward Island all through the summer as well as in winter time. I've heard about 250 different stations in the U. S. and about 25 in Canada. I would like to hear from any DX listener and promise to answer all letters received.—Anthony Arsenault, P. O. Box 444, Summerside, Prince Edward Island, Canada. . . . Any DX fan who would like a tip on how to make his Radio reach out further, drop me a line and I'll oblige with the tip. I have received 209 stations up to now on a seven tube Radio. DXer's let me hear from you—Orrin L. Case, 403 Clairmont St., Port Huron, Mich. . . . Jack Owens is lucky to have logged that many stations. I wish I could, but we have so much trouble here that DX'ing has never been very good. Would like to know what kind of Radio you have, Jack Owens, and what time of day or night you DX?—Nancy Saxton, 317 N. Sergeant, Joplin, Mo.

* * *

FOLLOWING up the letter of Mr. Erlewine, I would like to add my suggestion that you carry a separate "DX" department in your magazine. A DXer's column would be of year 'round interest, as it would include both shortwave and longwave listeners, their "logs", catches, most prized reception verifications, hints on "mystery" stations and comments in general. My own DX list includes 414 different longwave stations. The first was logged on Oct. 15, 1930 and the last on March 24, 1931. I use a custom-built, nine-tube, modern electric receiver. For the summer months I will drop to the shortwaves with a "superhet" converter on my receiver.

I would like to express my personal appreciation of your list of Cuban, Mexican, Canadian and U. S. stations. Such a complete list, including even the smallest stations of neighboring nations, is not easily found in ordinary log books. To help start the DX mail, I'd like to ask for a few return letters from Frank E. Howell, Eddie G. Erlewine and C. L. Swafford with more details about their DX'ing. I've been wondering if Mr. Howell's 170 stations were all received on a crystal set. If he knows of a method by which one can receive verification from all stations, he should let us know about it. Anyhow, let's start this DX department—Paul K. C. McAfee, R. 4, Salina, Kans. . . . In commending Mr. Erlewine's suggestion for a DXer's column, may I add that he has been my correspondent for the past few months through the good will of your magazine. Such a column should gain immediate popularity and DX'ing undoubtedly will claim many readers of RADIO DIGEST.—Malcolm Rackow, Eastport, L. I., N. Y.

* * *

THERE you are DX Fans, there's your column. It's yours to fill as you will, so get busy and write a few interesting letters.

And the rest of you V.O.L. fans, drop us a line. What's wrong? No kicks this month. We must have had a perfect mag. last issue, or our Helpful Critics must be getting lazy. —V.O.L.—*Editor.*

Director Bagley is floored . . . pacing the bicyclists of the Tower Health League. There's modest Bill Mahoney at the piano in his rôle of rhythmist.

They Leave Comfy Beds

Bagley, the Bantering Bicyclist, Leads Fo[r] Millions in World's Largest Gym Class Every Week Morning

By Bruce Gray

"I CAN'T get 'em up, I can't get 'em up, I can't get 'em up in the morning." The bugle sounds its brisk message at 6:45 o'clock every weekday morning and, as if to contradict the bugle's expression of futility, the members of the world's largest gym class—4,000,000—count 'em—4,000,000—hop from their warm, cosy beds, turn on their Radio sets and proceed to do the daily dozen.

What is the motivating force that transforms this sleepy, inanimate mass of humanity into a vigorous, seething body that moves rhythmically to and fro in a series of calisthenics? The answer is—human nature. Who is responsible for this unusual urge so early each day? The answer this time is—Arthur E. Bagley. And thereby hangs our tale.

The world's largest gym class, as the Tower Health League has come to be known, was the result of an idea—one that seemed at the time to be a small idea, at that. But first let us consider some of the events leading up to the birth of this idea.

Even as a boy in Rahway, N. J., where he was born and attended grammar school, Arthur Bagley was interested in what was then known as physical culture, but has since become physical education. He liked the gym class best of all his high school studies. He acquired a certain skill in things gymnastic and, like every other real boy, he was proud of his prowess. He practiced the various feats of skill and strength until he could perform them to his own satisfaction.

However, it never occurred to him, when he was choosing his life work, to become a physical instructor. He wanted to be a newspaper man. When he had graduated from school, he set out to attain this desire. He got a job on a newspaper and experienced in it all the thrill that he had anticipated. But the long, irregular hours and the strenuous work, which monopolized practically all of his time, caused him to forsake this line of work.

During the five years he had been a reporter Mr. Bagley occasionally had attended gym classes. So he now decided to return to his early love, not only as a source of amusement and as a means for his own personal development, but also as a livelihood.

His first job was as physical director of the Ansonia, Conn., branch of the Y. M. C. A. This was the beginning of twenty-two years' association with the "Y" in Taunton and Lawrence, Mass., and later in Newark. During this period he was absent from the "Y" field for a year, when he served as athletic director in army cantonments at Rockingham, N. C., and Camp Green, N. C.

IT WAS while he was physical director at the Newark "Y" that Mr. Bagley's big idea came to him in rather modest guise. He thought that it might be a pleasing novelty to broadcast some of his simpler drills over Station WOR, which was located not far from home. The station authorities agreed to let him try his plan.

The response was surprising. People let it be known in no uncertain terms that they wanted to do calisthenics in the Bagley manner; that is, as a part of a large gym class all working in unison and harmony, and guided by the "master's voice". The tone of this voice, they learned, is always changing. It is, in turn, pleadi[ng], admonishing, encouraging and jesting, [but] it is always tempered by the "maste[r's] thorough understanding of human nat[ure].

The news of Mr. Bagley's broadc[asts] spread rapidly. It was in March, 1[92]5, a year after he had started broadcas[ting] over Station WOR, that the Metropol[itan] Life Insurance Company, which preac[hes] assiduously the doctrine of health [and] well-being, asked him to broadcast [his] talks daily under the Metropolitan's sp[on]sorship. Arrangements were made for [the] broadcast to go over Station WEAF [and] several other stations in the eastern [part] of the country. Gradually other stat[ions] were added to the chain until now t[here] are eight. The most recent addition [is] Station CKGW of Toronto.

Mr. Bagley's keen insight into hu[man] nature is the result of his twenty [two] years of work in the Y. M. C. A. field. A[s] he says, he really had to learn a [lot] human nature if he was to preserve [the] semblance of order among the large cr[owd] of men and boys under his direction. [He] had to be prepared to meet any situa[tion] that might arise. He had to know ho[w to] handle those who became fresh and [un]ruly, how to encourage those who [are] disheartened, and how to instill ambi[tion] and life into those who were lazy. H[e] found that this last class is represent[ed in] every gathering of men. Invariably [there] are surly chaps who do as little as pos[sible] at all times and grumble at having t[o do] that much.

However, there is a spark of good, [even] in this type, Mr. Bagley believes. It [is] theory that every person has within [him]self the potentialities for greatness. [If] anyone is a failure, he feels, it is [only] because the potential best has not [been]

Their *for* Him

"Rrrrip! There go pa's pajamas!" Arthur Q. Bagley starts the whole family off on their morning pursuit of health via the exercise route

brought out. Mr. Bagley, therefore, endeavors to ignite the spark of personal pride in such people by pointing out to them their latent abilities.

Mr. Bagley tries to appeal to every sort and condition of person. As a result, he receives all kinds of letters. Some thank him for what he has done for them in showing them the way to rugged, glowing health. Others, unattached and lonely women, pour out their hearts and troubles to him, feeling that they know him and he knows them as a result of the daily class meetings.

Still others complain, because, as Mr. Bagley says, "you can't please everybody." Some people write in to tell him that he talks too fast when giving instructions. Others tell him he is much too slow. Some people complain that he nags them, while others say he is too easy with them. Some suggest that the exercises are too strenuous to be followed entirely, while others demand that he give them something hard to do. Like a good pilot, Mr. Bagley tries to steer a middle course and please the average person.

MR. BAGLEY usually finds time to give a few words of advice to his classes about the food they should eat. "For," he says, "if people abuse their stomachs, no amount of exercise is going to do them any good. The two things, exercise and diet, go hand-in-hand to produce the perfect human specimen."

People often write to him, asking individual health advice. If they seem to have something really the matter with them, he advises them to seek medical aid. But, if they are merely too plump and want to reduce, or if they want to build up their general health, he sends them the diet list, which gives them scientific advice about eating. Every letter that comes to him is answered. Many are merely requests for the printed exercise charts, to facilitate following the Radio directions, but others require careful individual instructions.

Now let us get a glimpse of Mr. Bagley and the Tower Health League in action. When the bugle sounds at 6:45 A. M. six mornings in the week, all classes of people respond. Men, women and children of all sizes, types and shapes, and from all walks of life join in the daily dozen. Some want to reduce their weight, while others are trying to add to their poundage. But, provided they keep exercising faithfully, they all eventually attain the desired end.

FOLLOWING the bugle call, Director Bagley steps to the microphone, greets his class with a cheery "Good morning, good friends!" and immediately proceeds with the first exercise. A snappy piano accompaniment is played by "Bill" Mahoney, Mr. Bagley's ever-faithful man Friday. Due to Bill's reticent nature, his Radio admirers have not learned much about him, but they have come to regard him as a most important part of the broadcast. It is said that, after Bill gets through playing for the Tower Health League, he goes downstairs to his desk in the Metropolitan's accounting department, where he does his bit toward making a big insurance company's routine move more smoothly.

While Mr. Bagley is taking his class through the first exercise we glance around the studio. It is ideally appointed for broadcasting, after the manner of the large Radio studios. Located on the 27th floor of the Metropolitan Tower on Madison Square, New York City, it affords an

(*Continued on page 86*)

What's What "Way Down East"

ALL the folks in Providence studios aren't angels, as you would expect. There are rumors of college pranks committed by John Gordon Freaser, WEAN's newest announcer. But he graduates this month and all that will be over. He has been with the Rhode Island station in a paying job while attending Brown University. . . . Lloyd Wesley Dennis, Jr., is another of these collegiate announcers, beating John out of Brown by only six months. He writes continuity, sings and plays the violin.

"Blue-blooded" Charlotte Presel has two ancestors of the nobility, Count de Presel and Baron de Rothschild, but finds it impossible to sit still and be a "noble lady" and fill her three jobs . . . director of women's programs, announcer and concert pianist at the Providence station.

* * *

GETTING hot is a habit which is contagious at WNAC, Boston. John Shepard, Jr., head of the station does not object to his musicians warming up but he does protest when the studio carpet and furnishings become ignited by the spark of syncopation. Linus Travers, production manager of WNAC, discovered the studio floor covering afire while a broadcast was being made. Fire fighters put it out without listeners knowing a thing about the near-catastrophe.

* * *

YORKSHIRE pudding is the favorite delicacy of Edgar R. Carver, musical director of WGY, Schenectady, who was born in Leeds, England . . . which city is of course in Yorkshire. At eleven young Carver was called England's greates boy composer and conducted a juvenile orchestra before th King of England. Coming to the United States with an Iris Band to play at the St. Louis Exposition, he liked it here an finished his education at Friends University at Wichita, Kans Then came more ferrying back and forth between England an the U. S., and finally complete adoption of this country whe he filled important musical positions with the Rivoli and th Rialto. After several years as conductor of the Roxy Theatr and of a symphony ensemble at WJZ, Mr. Carver joined WG as musical director of all programs.

Salty Allen of WOV, Countess Von Luckner and Felix, Count Luckner, aboard S.S. "Mopelia". Salty was "beer taster" and outboard motor adviser to the Count on his recent trip to the United States.

WeTEL you WHAT, Mayor Mackey of Philadelphia is some Radi w-FAN. Here he is, surrounded by the mikes of the nine station over which he has made the WELK-in ring at various times.

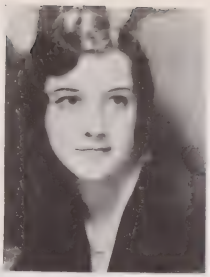
* * *

CORRECTION: Jean Scull, the attractive young Philade phia star whose photograph appeared in April RADIO DIGES sings on the Amoco Hour at WCAU (not WPEN as stated

* * *

WHAT with all the sage advice to mariners and boatir enthusiasts which issues forth from Salty Allen in h Daily Boatman's Column at New York's WOV, you'd expect t see a gray-bearded old tar behind the mike. But Salty is ju a young fellow in his early twenties, who's seen a lot of th world for his age. He's traveled both by land and sea and m many celebrities whose common bond of interest with him a desire to win outboard-motor races. The German submari commander, Count Felix Von Luckner, is one of his co-hobb ists, and Salty has spun one or two yarns about the Cou on his daily noontime program. Some day when he has tin and typewriters are built into cruisers he expects to wri the "great American novel".

* * *



IT looked like a catastrophe for Rose Gallo, but it turned o to be her greatest blessing. Rose was an organist at t Alhambra Theatre in Philadelphia, when along came the vit phone and forced her out of a job. Then somebody told h her voice would take kindly to the mike. She tried it wi great success. Now she is heard daily over WELK and WPE

* * *

AVIATORS are no novelty to Radio, but the credit for p ting a real underground worker on the air belongs to WN of Washington, Pa. "The Enterprise Miner" who appears th times a week to give interesting anecdotes about mining, s really an old-timer who spent many years on the job. H partner and accompanist is a young "breakerboy" who hands a ukulele and sings like a professional.

Chain Gang Chatter

By Janet Dublon

Another opera star gone completely Radio—Helen Oelheim

staff and his "Meet the Artist" broadcast. He interviews headliners before the mike so that listeners can find out from their own lips favorite foods, sports and deep dark secrets. It *does* make a good airact.

OPERAS are fine for the ears but sometimes heavy on the eyes, when the soprano weighs a mere 240. That's why I'll always retain pleasant memories of the American Opera Company and pretty young Helen Oelheim in particular. After its death she took to the air. Now she's "Freda Zorn" of the CBS Dutch Masters. This is to tell all those conclusion jumpers who think she's a real opera diva size because of her rich full voice . . . Helen is young and petite, with blue eyes. Born and raised in Buffalo.

YOU SHOULD have seen the festivities opening night at the Penn Roof to welcome Rudy. And all the Radioites who were there . . . Maurice "Right Now" Chevalier, Little Jack Little, Norman Pierce. And plenty of his fans with their B. F.'s turned out for the dancing.

Gloria Gay unmasked at last! She's pretty Frances Wilcox

EMBER the "Perils of Paul- ? And how you on the edge of seat every Sat- y in the dark- movie house Pauline was ered from the in's last week's h, only to hop another di- na? Well, if you to recapture e of those old ls, listen in on ia Gay one o' these Wednesdays on onal net. Gloria's real name is ces Wilcox, and she's one of the iest girls I've seen up at 711 Fifth. er looking than the hostesses . . . s saying something. Biography? At years arrived in Deposit, New York. —tried to run away to New York. repeated. Nothing else important college days at Syracuse U. Then —ran away to New York, but this arrived. In *Firebrand,* the play. r plays and Radio since. Isn't mar- . . . yet.

JIMMIE—Gloria's co-partner in nture? Modest, and hard to track to air. But finally found not far from studio. One Carver Johns, born in Wayne. Writes "Gloria Gay's Af- " himself. Age—29, graduate of rd (the only one I ever heard who 't come back with *that* accent) author lays and short stories. Ditto marks he "isn't married . . . yet."

ELT like a piece of Swiss cheese," Eddie Freckman. "I landed in a ital in France full of bullet holes. ors told me I'd always be an invalid." leave it to the marines . . . Eddie's accompanist on Columbia's Pabstett ty hour, weighs 235 pounds, walks out a limp and—does he play the !

THDAY PARTY: Last month the ele Lady and her song writer husband were eight years in Radio. I mean, of course, May Singhi Breen and Peter De Rose . . . NBC threw a party for them. Did you hear the festivities, with Ray Perkins as Master of Ceremonies? Eight announcers did the honors. Paul Whiteman and Rudy Vallee contributed by wired-in programs and skeenteen others did their bits right in the studio.

IRENE BORDONI never wears the same evening dress or wrap to the CBS studios twice . . . I once had my hair waved alongside Irene. Hers was being washed. It was then the longest, thickest I had ever seen. Way below her waist. She wore it off her ears, way up high on top of her head. It's not so long now but in comparison with ex-bobbies, it's munificent. She had it cut because hats weren't becoming.

IN CASE you're wondering what's become of NBC's Revelers . . . they are concertouring various lands. France, Germany, Holland, Austria and . . . where in heck is the city of Schaveningen? The four of 'em, James Melton and Lewis James, tenors; Elliot Shaw, baritone, and Frank Banta, accompanist, will be back in pronounceable U. S. cities (New York, to be exact) about September 1st.

DISGRUNTLED Radio stars sometimes tell the Press Department, "I could write a better publicity story myself." To which Press never dares respond "I could do a better airact myself." But they up and prove it. Take Bob Taplinger of Columbia's

Two femmes? No, one homme in disguise (Jack Shannon) on the right, and one femme (Marie Stoddard) in their rig-up for the Gossipers, popular transcription skit

CHATTERING again!

And if we seem breathless and a little flighty don't blame us for we can't help it—not today. We are just recovering from an encounter with the "Three Doctors" of WMAQ fame. They've signed up now with Dr. West's and adopted a trade.

When "Dr" Pratt and "Dr" Sherman first went on the air with their humor, hokum and harmony, some four and a half years ago they conceived the idea of being doctors of the spirit, so to speak. You see Russell Pratt and Ransom Sherman had played pranks together back in high school days in Appleton, Wisconsin, and sung and played together on many a long winter evening—and thought it sounded pretty good, too, they admit. So when the two families moved to Chicago it was natural that Russell and Ransom should continue to sing and play together and continue to think it sounded pretty good. As they came to man's estate they entered the insurance business together. The Radio venture began just for fun. Some months later they took on as interne, Joe Rudolph, who was already well known about town for his ability to produce unbeatable music.

During these years they have been making nonsense and poking fun at everything. They have had a wonderful time burlesquing national advertising and the chain broadcasts and they're still at it. As a matter of fact it is said that these three were the original burlesquers of chain feature ideas, although the "Doctors" themselves discreetly say nothing on the subject.

Serious camera study of Chicago's ad libbing Three Doctors. Pratt, with the (of course, Dr. West's) toothbrush mustache, Sherman in the vise. What's left is Rudolph

Everywhere that people talk about the trio the question is sure to arise—do they write or plan their broadcasts? The answer is *no*. It's pure and simple ad libbing—(not always pure, but sometimes simple). Incidentally it's interesting to note that their ad libbing has it all over ad libbing as it's done on the stage. Whereas on the stage it's a spontaneous wise-crack interjected here and there, with these three it is a steady flow of 'em from day to day and year to year.

BOB GREER and Mal Clair, who are widely known to their Radio audience as "Snowball and Willie" come rightly by that slow and easy drawl, for Mal is from Alabama and Bob claims Arkansas as his home state. After many and varied experiences on the stage and screen, Mal and Bob became friends and vaudeville partners. They met on the sunny shores of Southern California and as a team they traveled the road from Hollywood—to New York—to Chicago. They're on WIBO nightly, except Sunday, at 6:15 CDT.

The courts lost a prospective attorney when Don Ameche, now featured on Chicago NBC dramatic programs, changed mind while a student at the Universit Wisconsin and joined a stock com at Madison.

And the stage lost one of its risin

veniles when Ameche caught the lu Radio a year or so ago and deserte footlights for the greater audience re through the microphone.

Ameche was active in dramatics d his prep school and college days an an active member of the University ers before he left school to go wit stock company.

After leaving the stock co Ameche played with Fiske O'Ha *Jerry For Short;* went from New to Greenwich, Conn., with the Cha lain Brown players and played the ju lead in *Illegal Practice*, when it pla the Playhouse in Chicago. His last appearance was with Texas Guin vaudeville in New York.

About a year and a half ago Don to get Radio fever and appeared in s shows at WJJD and WCFL and th turned to New York where he ap before the microphone at WMCA.

He's an ardent six day bicycle race and these nice days are finding h the golf links a lot, too.

YOU'D never think, to look at Grant, the slight, rather short

From the Local Broadcasters

Pacific Coast Briefs

By Dr. RALPH L. POWER

CASTANETS should be clicking frequently at KPO these days. Alice Gentle, newest addition to the San Francisco station's list f operatic stars, has been called the reatest "Carmen" of the country. She's n the air every Monday and Friday vening, Mondays with Cy Trobbe's salon rchestra and on Fridays on KPO's con-ertized opera hours. Born in Seattle, lice has roamed up and down the coast, aking stellar rôles with nationally recog-ized opera companies and appearing of ite in the talkies.

EARL J. GLADE is just a hobbyist, according to Dick Evans of Salt Lake ity's KSL. But his hobbies have had a ay of outgrowing their original minor ôles and becoming important in Mr. lade's life. In the beginning Radio was hobby with him, and he promoted one f the first commercial broadcasting sta-

lice Gentle, newest staff diva, is inducted into the KPO holy of olies—Cy Trobbe's library of over 20,000 musical compositions

ions in the West. The early KSL days ere starvation periods and pretty lean icking, but now Mr. Glade manages two rosperous broadcasters, KSL and KLO.

The Tabernacle organ and choir broad-ast was another hobby of the Salt Lake ioneer. Now it's on coastwise waves. ut his most unique hobby is words. Did ou know how to spell the leather leg-in's that cowboys wear? They're called shaps" or "chaps". But it took Mr. Glade o discover them in the dictionary—and ou'll find them there as chaparajos.

RADIO has a strange way of drawing people from other fields to the mike, ut KFRC claims the one and only female rchitect. She is Merle Matthews, pro-uction manager, and her orderly, ship-hape dovetailing of programs and people how the influence of her training. It all came out when a certain summer resort, Cuesta La Honda by name, which advertises on the Frisco station's wavelength, received a number of plans for very unusual summer cottages. They were from Merle.

REGISTER another Radio marriage on the book of time. George Snell surprised his listeners at KDYL when he took as wife Miss Althea Pederson, who has been KDYL traffic manager for the last two years. It must be admitted, however, that it wasn't a shock to the Salt Lake studio folks, for they could see it brewing for many months, and bets were even placed on the date it would occur.

Hundreds of KDYL fans and "Uncle Ben" (that's George's Kangaroo Club name) devotees sent congratulations to the pair. George is dark, and extremely good-looking, so Althea is holding down her desk in the traffic department to see that no feminine fans try to win him away.

THERE are two pretty Kelly babies in a big house in Berkeley who listen to the loud speaker of the Radio expectantly at all times. Mother is Dorothy Desmond and father Tom Kelly, of the NBC Coast dramatic staff. Tom and Dorothy met under the auspices of Shakespeare—they were both playing in a summer stock company. Romance blossomed, and when they found Radio offered an opportunity to continue in drama and run a happy home as well, they signed up for mike work.

Dorothy Desmond is slender, charming and doesn't look a bit like the mother of two youngsters. She has famous ancestry on both sides of her family. Her mother was a Wells of the Wells-Fargo bank family, and her father a descendant of the bold bad Earls of Desmond. She's been a dancer, a stock player and actress.

"EIGHTEEN Feet of Harmony"—no, not a new mammoth piano. That's a new male trio just descended on the Northwest Broadcasting System. Three boys from the University of Washington, each over six feet tall—Bob Youse, tenor, Herb Bartlett, tenor, and Jack Little, baritone.

Ted Osborne reading his daily stint for the KHJ burlesque news reports. Uncle Ted has disguised himself with false mustache and wig

Sweet Six-ty

"I Can't Understand Why People Get Old!" Declares Miss Hopper Who Is Still Brimful of Youth Although She Is Approaching Seventy

By Anne B. Lazar

A DAINTY little woman, under five feet and weighing ninety-two pounds, has triumphed over all of the cruel laws which old age imposes on mankind and is still young at sixty-odd years.

Creaking Knees, Sallow Skin, Wrinkled Neck and Falling Hair, which have been the foes of youth ever since Eve lent her ear to the serpent, received a mighty death blow as far as Edna Wallace Hopper is concerned, and they are now probably crawling subtly along ready for a spring on an easy victim.

If you are beginning to groan, complain and fidget about inconsequential happenings—whether you are nineteen or ninety—you are yielding to the onslaughts of senility. For age isn't a matter of years, according to Miss Hopper—it's a state of mind.

I had heard how Miss Hopper succeeded in warding off old age and looked young in spite of the passing years—but I must have proof. Surely there were wrinkles and a few streaks of gray hair—it must be all theory with her, I concluded. The fountain of youth may have its place in legends and romances, but no one could be expected to believe that even Edna Wallace Hopper had completely escaped from the ravages of six decades of time.

With these doubts assailing me, I approached the entrance of the St. Regis—one of the few remaining exclusive hotels in New York City—with vestiges of old Manhattan's traditions. Two footmen led me through the massive canopied entrance, and I was whisked up to Miss Hopper's apartment by a crisply uniformed elevator boy.

"I'll come back with a tale of dyed gray hair," I consoled myself—"and with a wrinkle or two in the bargain." One might get away with this perpetual youth stuff from the stage of a theatre and over the Radio, but not under the lens of an interview.

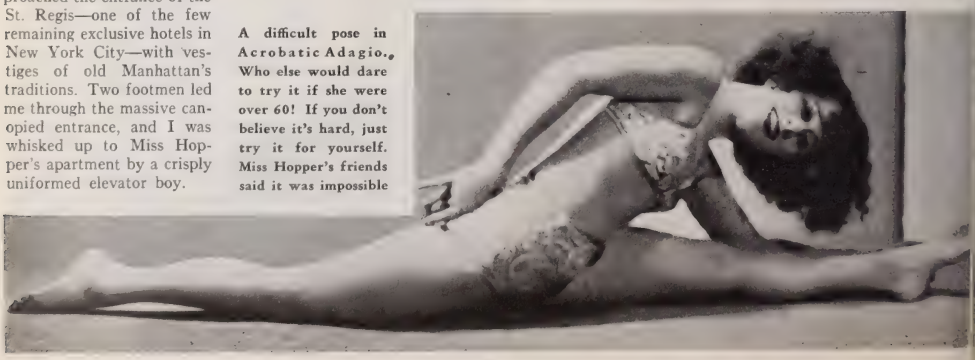
I had brought myself up to the point of being sorry for Miss Hopper. It would be too bad to disillusion the American public and to tear down this happy illusion of Youth at Sixty which Miss Hopper had built up, but everything must be sacrificed for the cause of truth.

WITH a mixture of feelings, I rang the bell. The door was soon opened by a bobbing little figure with a smiling face framed in a wealth of brown wavy hair.

"Miss Hopper?" I asked of the big, brown-eyed miss.

"I'm Miss Hopper," was the reply, at the which, dear reader, I managed to create a good long sneeze, thereby giving me a good opportunity to drown an embarrassing moment. When I finally overcame my surprise, I mysteriously stopped sneezing and returned Miss Hopper's cordial greeting.

I looked at her again. She was fresh with youth, graceful, pretty and merry. Of course—this must be the daughter but I would wait before asking any othe question that might make it necessary fo another sneeze.



We both sat down in this comfortabl room furnished in old rose—but no on else entered on the scene.

Then this was Miss Hopper—this youn person who looked no more than twenty five in appearance and action. The tw distinctive features about Miss Hopp are her great big brown eyes and he brown silk fluffy hair which she admits as straight as a stick and needs wavin every now and then.

"Let me tell you a few things abou youth," began Miss Hopper with twinkle in her eye. By this time needed a little advice to fortify my your years, for Miss Hopper was in spirit an energy much younger than I.

"Given diet, exercise and the right sta of mind, and you can't get old. The righ mental attitude is everything in life. An you can't maintain this mental equipoi if you are going to allow yourself to b tossed by every wave of circumstance.

"Men and women ought to take off little time each day for self-study an self-analysis. If they find themselv fretting and stewing over every ill win

A difficult pose in Acrobatic Adagio. Who else would dare to try it if she were over 60! If you don't believe it's hard, just try it for yourself. Miss Hopper's friends said it was impossible

ever!" exclaimed Miss Hopper. "I
never gone to anybody for anything.

Just like that—tossed from one part of the stage to the other. Miss Hopper gets a great "kick" out of it

Not even my husband. I have never asked anything even of my closest friends —and that is why I am able to keep them.

"The day following the reversal of circumstances, I looked the situation squarely in the face. I wasn't at all discouraged. I felt it was the best thing that could have happened to me, for it aroused me from the ease in which I had been living. I had been sitting smugly in the lap of luxury—now I had to get up and work. I studied myself and asked, What am I fitted for? How can I be of service to others and to myself? At that time everyone was discussing youth—people were in quest of it. It was talked about at teas, at parties and at clubs.

"Having been on the stage most of my life, I had my own public, and although I had never lectured before, I said to myself, there's no time like the present to start.

"People had always wondered how I retained my youth and men and women would be interested in what I had to say about it, I thought.

"Now the point that I wish to bring out," continued Miss Hopper, "is that I did not sit down on the ruins of a mighty fortune and weep bitter tears. Crying isn't the best exercise for the eyes anyway, and tears tend to obstruct one's vision to the opportunities that are waiting ahead of us.

"I just brushed the last remaining ashes of my departed wealth from my party frock and started right away to build another treasure trove. I agree with Henry Ford," continued Miss Hopper, "that this depression is just the result of poor thinking. What men and women need now is courage to lift themselves out of the rut into which they have been gradually driven down. It should awaken them to new life.

"If I succeeded in starting a new business when I was over fifty, other people can do the same. Self-pity is probably another great hindrance to progress. When a man pities himself, he can't get the right perspective of his case, and he gets himself right in the way of his own possible advancement.

"Now, this may all seem to be quite

Iron ivy tree affords graceful arms which hold small pots concealed by trailing vines. A malacca wheel seat.

Dressing U

Your Porc

Accessories are just as important as the large pieces of furniture

By SHERRILL WHITON

Director of the New York School of Interior Decoration. Heard over National Radio Home-Makers' Club Wednesday mornings

I SUPPOSE there are more people who would like to know how to rearrange or redecorate their homes than those who have new homes to decorate. You can't all become professional decorators, but you can do something that's far more important and useful. You can all make an effort to make your home a place more agreeable to live in, more comfortable, more convenient and workable, more pleasing to the eye. Not a place that you want to get out of and go somewhere, but a place where you want to go back to and stay.

I'm going to give you a little advice about the furnishing of porches and sun parlors.

Lots of people get these two kinds of rooms confused or rather they think of them as being the same kind of room—really they're two entirely different kinds and as such they have to be furnished and decorated very differently.

A sun parlor is primarily a winter room where you want to bring a little of the effect of outdoors into the house during the winter months. You also want to get all the sun you can and for cloudy days when there isn't any sun you try to bring sunlight into the sun parlor by using various colors, lots of tones of red, yellow and orange.

But the porch is an entirely different proposition. The porch may be enclosed but it has to be arranged with lots of windows that can be thrown wide open to let in the air. The porch is a summer living space and the idea is to let in as much air as possible and still keep the sun out.

A porch has to be protected from dust and the weather and usually from insects and the first thing that we should think about is proper screening. There is only one kind of screen to use and that is made of copper. It costs a very little more than the ordinary iron wire screens to start with but it pays in the long run. It doesn't need any paint, never rusts and lasts forever unless the small boy in the house tries to throw his base ball through it. Screens help keep out the dust too and that means much less outdoor housecleaning.

NEXT to wire screens the most important things are shades, curtains and other devices to keep out the sunshine.

Sunshine is usually considered healthy but we can get too much of a good thing at times, and in the summer we have to dodge it.

During the last few years, Venetian blinds and slatted wooden shades have returned to popularity. Venetian blinds keep the sun off but let the wind through — and that's what we want in the summer time. They also prevent glare, and they are heavy enough so that they don't blow out of position—you can even get them with devices to prevent flapping—and the best of them are painted in sun-proof colors to prevent fading.

Then we have the European types of porch furniture becoming more and popular, such as the bent iron chairs tables. The chairs are the kind one to see in the little German gardens parks of Paris with iron seats wi spring in them.

If you like the so-called modern they're making porch furniture in a metal called "chromium" — constr out of either pipe forms or square bars. It looks like polished nickel they say it always keeps its polish and shiny—doesn't tarnish, rust or rode; it's as strong as steel. Whil arms and legs and uprights are ma this metal, the seats and backs are u of brightly striped canvas.

A DASH of Discontent

Smug Satisfaction with things leads men and women into ruts. Progress is made possible by looking a step or two ahead

By Frances Ingram

Consultant on Care of the Skin heard on NBC every Tuesday morning

Ann Sawyer—the first television girl to be signed up by the NBC on the Pacific Coast—Drafted from the talkies

THE hotel dining room was crowded and it was impossible not to overhear the discussion at the next table. One of the men in the group had evidently brought o the conversation some instances of at she considered men's prejudice ainst women in business.

"Tommyrot", said the man beside her. t isn't a question of prejudice against men—the point is that women lack the cessary qualifications for success."

The women's voices were immediately sed in indignant protest to be silenced moment later by an authoritative sig- l from the man.

"If you give me a chance I'll explain to you", he offered. "Sure, women e accurate, neat, efficient, honest, loyal all of that—but they don't get ahead cause very few of them are discon- nted enough. That's what they need— dash of discontent. Look at that girl our general office. She's been with e firm longer than I have. She knows re about the firm's business than I do. d where is she? In the general office. st week when we were hiring a secre- y to McKinley, did she get the job?). We hired a new girl. All right, aybe it's unfair, but I don't think it is. at girl is contented—she's satisfied. l she cares about is her pay check at e end of the week. What's the matter th the woman? Well, I just told you— far as anybody knows, she hasn't got dash of discontent in her make-up."

That's all of the discussion I heard, fortunately, but thinking it over later, seems to me that the argumentative gentleman was right. Every advancement, every achievement, every bit of progressive and humanitarian work has been due to a dash of discontentment in someone. If man had been content to travel on his own two legs, he would never have learned to ride behind a horse. If he had been content with horses as a means of transportation, the automobile would never have been invented. Had he been content with the automobile, the aeroplane would never have been conceived. If women had been satisfied with brooms, they would not have carpet sweepers and vacuum cleaners today. Would we have the telephone, the Radio, the trans-Atlantic cable, or any advances in science, in art, in literature if it were not for the presence of some malcontents among us?

CONTENTMENT is eulogized, discontentment denounced. But why? Every humanitarian movement, every effort to alleviate pain and suffering has sprung from divine discontent, as Charles Kinsley in his "Health and Education" wrote some years ago: "To be discontented with the divine discontent, and to be ashamed with the noble shame, is the very germ of the first upgrowth of all virtue." It is this divine discontent of which I am speaking. To be discontented and do nothing about it—to grow disgruntled and neurotic—is no virtue, certainly. But to reach out for something better, to be *constructively* discontented is the divine discontent from which all virtue springs.

Now women do not lack this spark of discontent although it is true that as a group they may not yet have learned to use it for their own immediate advancement in the business world. But to women's discontent can be attributed the success of innumerable men who sit on the top rung of the ladder of success. A man may be content to rise one rung upon this ladder. His wife's constructive discontent inspires him to reach for a higher rung. There is one man who has achieved what would seem to be the very pinnacle of fame and fortune, but he is not resting there because his wife's belief in his ability and her divine discontent are spurring him to even greater achievements. Hers is not a disgruntled neurotic dissatisfaction, remember, but a constructive progressive expectation of better things. Hers is not a materialistic discontent—it is a desire to have her husband utilize the gifts which might otherwise lie dormant and undeveloped. Such discontent spells happiness, not only for the individual, but for the race as a whole.

THE world would have less of beauty and idealism if woman lacked this fine dissatisfaction with things as they are—with herself, for instance. If women were without the desire for improvement, culture would be lagging centuries behind. Beauty, too, would be much rarer than it is. It is due to

Out of the AIR

HITS—QUIPS—SLIPS

By INDI-GEST

Cash for Humor!

IT WILL pay you to keep your ears open and your funny bone oiled for action. Radio Digest will pay $5.00 for the first selected humorous incident heard on a broadcast program, $3.00 for second preferred amusing incident and $1.00 for each amusing incident accepted and printed.

It may be something planned as part of the Radio entertainment, or it may be one of those little accidents that pop up in the best regulated stations. Write on one side of the paper only, put name and address on each sheet, and send your contribution to Indi-Gest, Radio Digest.

Getting into Indi's black books doesn't mean that a bad mark is entered against your name (if you're a Radartist). No, it only means that at one time or another Indi has heard a particularly good story from or about you, which has been entered in the "little black note book".

Now I've collected a good batch and have decided to air them. Here they are, copied right out of Indi's storybook:—

HE PICKED A GOOD LINE

Do you, or don't you know that all the chain programs are carried on specially leased telephone wires? This, in explanation of the fact that a telephone linesman unwittingly became an announcer. He climbed up to tap a wire and make a report to his home office. Astonished at hearing music on the line, he yelled to a fellow worker on the ground, "Great gosh! There's music on this darn line." All Texas heard him!

PEEPING TOM

An indignant man in Portland phoned the police to "Come quick and arrest the men who are peeping in my window and frightening my wife." A patrol wagon pulled up, to find two scared kids, the oldest only 15. They explained that being far away from home, they had stopped to hear what was happening to Amos and Andy.

BOYS WILL BE BOYS

Even when they're full-fledged Radactors, boys will be like this. . . . Donald Hughes, who is the second part of the Daddy and Rollo program on CBS, insisted on taking the mike nearest the control room. As he finished his last line, he made one wild dash for the glass door and hurled himself into the operator's room, nearly knocking over two studioites in his way. He just wanted to hear what his voice sounded like!

ALMOST A NON-CONDUCTOR

When a dog bites a man, that's commonplace, but when a man bites a dog, that's News. Likewise, when a passenger is left behind that's nothing unusual, but when a conductor is left, well, "dat's sumepin". Ray Ferris and Chuck Haynes, of Chicago NBC were returning from Huntington, Ind. to the Windy City when a cow calmly walked out on the track and caused a minor collision. The train stopped, and in the interim passengers and conductor did a little track-walking to stretch their legs. Damage repaired, passengers came aboard. The train started and Ray stood on the last platform smoking a cigarette, when far, far away he spotted the conductor running like Charley Paddock to catch the train. Ray pulled the emergency cord and stopped the train. Now there's a "Chuck and Ray Fan Club" on that railroad.

ADV: FOR EMPIRE STATE AND CHRYSLER BUILDINGS

Blackstone program (NBC):
Capt. Blackstone: An Englishman w arrived in New York from London r marked that the American sky was much clearer than their London sk You know, Frank, I've been wonde ing why it's that way ever since.
Frank Crumit: Oh, that's because have skyscrapers.—*Rose Bailey,* 1 *Grant St., Greensburg, Pa.*

Puzzle: How can you travel by rail a by boat at the same time? Ans: T being seasick. A spot "by rail" is m convenient!

The Next "Special Personal Appearance Broadcast" Will Be This.

Jimmy the Thug:—"Crime Don't Pay—Instead of Reaching for the Diamond, I Should Have Reached for a Cigarette."

Call It A Day

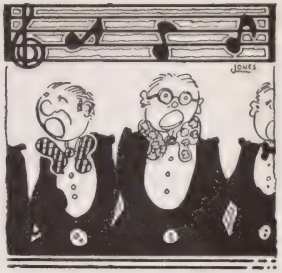
and
says "A storm is near."

Next in our line of march today
Comes "Edna Wallace Hopper" gay,
Before they "Shove her off the air"
She tells us NOT to brush our hair.



"Fleischmann's Yeast" croons "Rudy" dear
"Bugs Baer" gently answers, 'here'
"Graham McNamee" now takes the wheel
And drains a glass before his spiel.

Sir "Rolfe" has made his "Lucky Strike"
As "Vincent Lopez" takes the 'Mike'
And with a yawn I can't express
I board "The Sleepy Town Express."

But do I sleep? Ye Gods, No! No!
For "Amos and Andy" are giving their show,
The only rest I get is a 'Jonar'
"By special permission of copyright owner."

ouncer:—Friends! I Wish You Were Here. It's Just One Great Big, Jolly Party.

SLIPS THAT PASS THROUGH THE MIKE

MORMONISM IN THE MOVIES —Heard in WOKO news flash:—"Douglas Fairbanks, the husband of Mary Pickford and nine others will enter the English golf tournament." Doug had better watch out, or Will Hays will get after him!—*Mrs. L. S. Zanche, 222 Newell St., Pittsfield, Mass.*

FRANKNESS IS THE BEST POLICY — Milt Cross announcing the A & P Gypsies, "And who doesn't know that lovely song of Carrie Jacobs Bond, The End of a Perfect Day—the A & P Gypsies!"—*Isyla K. Powers, 319 Hanover St., Meriden Conn.* (Isyla was first with that slip and cops the prize, but *Mrs. G. F. Parkin of Meriden, Conn.*, was also heard from).

BE A SPORT AND CALL A TAXI —Sammie Watkins of WREC announcing his next two numbers—"I've Got Five Dollars and Walking My Baby Back Home". Some cheap skate! —*Virginia Riddick, Coffeeville, Miss.*

UNFORGIVABLE CRIME

I hate the voice of one announcer
  This man I'd like to bury
And yet he is a clear pronouncer
  Of all vocabulary.
I hate him not for all his learning
  Although it makes me giddy.
One fault has set my hatred burning—
  He calls a child a kiddy!
—*William H. Eldridge, 300 Portage St., Hibbing, Minn.*

SAFETY FIRST

From KFRC: Lord Bilgewater (Monroe Upton) answers questions. Here's one he read:

> Dear Sir:—
> I moved to Twin Peaks five years ago, and after a year there my wife presented me with twins. Then I got a job up at Three Rivers. A year later my wife presented me with triplets. I have just had a wonderful offer to go to the "Thousand Islands". Lord Bilgewater, what shall I do?"

Said Bilgy:—"Accept by all means. But for goodness sake, go alone!"—*Mrs. M. J. Schuler, San Francisco, Cal.*

Tuneful Topics

(*Continued from page 54*)

pick hits. While I do try to portray budding hits while they are in embryo, my main delight in writing for this particular column is to discuss the inner workings and harmless gossip in the writing of, and the publication of the various songs which I mention. Notice I say "harmless gossip", because I am not in accord with the Broadway fallacy that it is necessary to be supremely critical, nay, even vituperative, in discussing artistic efforts in order to be interesting.

A columnist works on the theory that to say nice things about people would be to be uninteresting. Personally I believe one may be very complimentary, and yet extremely interesting, depending upon the interesting facts about the subject.

Therefore, when someone jumps to his feet after my discussion of the song *Stardust,* which has been a hit for some time, and which has been out for even a longer time——when this person rises to state that I am late in my discussion of the song, I am very happy to agree with him, although a careful check-back on the songs I have discussed in these columns will show that my judgment has been vindicated in quite a few cases where the songs have achieved an unusual popularity, yet I made no pretensions to being a picker of hits. Please remember that the time between the writing of the article, and the subsequent publication of RADIO DIGEST is approximately a month, in which time many a song may blossom forth to an intense popularity, and then completely disappear from the counters of the music stores.

Stardust, however, is a song which has been out for a long time, that is to say, several months, and only recently has it come into a great popularity. Just the reason for this popularity is hard to say. Personally I have always felt that melody in a song is the chief attribute which brings popularity. Certainly *Stardust* has a most fascinating melody.

It was written by a young orchestra leader-vocalist, who is sponsored by the Victor Co. in his recordings and writings, one Hoagy Carmichael, and the lyrics are by Mitchell Parish. The song has steadily found its way up to the threshold of appreciation of the song-buying public.

It is published by Jack Mills, and must be played quite slowly in order to be appreciated. I would take at least a minute and five seconds for the chorus.

Cubalero

LESTER BANKER. has contributed so much to the enjoyment of our Fleischmann programs by his excellent pianistic efforts in conjunction with either Cliff Burwell or Walter Gross (depending upon which young man was with us at the time Mr. Banker was associated with the Connecticut Yankees). This same Lester Banker has always shown a leaning towards composition. Many evenings at the Villa Vallée we have played a tango which he wrote with another young man, also a pianist.

In the case of the tango, Mr. Banker's contribution was that of the lyrics, both in English and in Spanish. The Spanish lyrics lack that patois-like and colloquial quality that only a genuine native seems to be able to put into the lyrics of a song, however technically right they may be. In fact, that is probably the reason that no English-speaking person should try to write lyrics in a foreign tongue. The English-speaking person is apt to translate too literally, as Mr. Banker has done both in the tango and in his new composition, *The Cubalero.*

In the case of *Cubalero,* the words and music have been written by Lester Banker, Joe Young, and John Sizas. They have handled the rhythms exceptionally well. These boys have combined the elements of both the modern Rumba and the old Bolero, which has come into popular fashion since the advent of Ravel's *Bolero.* The bolero is an old Spanish dance coming from Spain, and the Rumba comes from Cuba.

The rhythm is extremely syncopated and staccato. This is one of those compositions which, like *The Peanut Vendor,* must be heard before it can really be appreciated.

It is published by the Witmark Music Publishing Co., and it is hard to make any rule as to its speed of tempo.

Making Faces At The Man In The Moon

MY OLD friend, Max Rich, pianist-composer of *My Bluebird Got Caught In The Rain; Yes or No; Smile, Darn Ya' Smile,* and in fact many other tunes, too numerous to mention, has collaborated with Al Hoffman, Ned Washington, and Kate Smith, in the writing of what looks to be another hit "moon song".

The poor old moon has been twisted around and fitted into so many states and situations of late that it is a wonder that we have any moon left! Still, it makes a highly desirable subject for the composition of a song, and in this case I believe the twist is quite unusually novel. The title itself is indeed clever. The song is lilting and catchy, simply being the complaint of a young swain who feels that the moon shines on all other lovers but makes an exception in his case.

We will play it at a minute for the chorus.

One of the newest and best liked of Tin Pan Alley publishers who has gone, in a modest way, into publishing hit songs, is George Marlo. He may take a bow, for any success that this song may have. My best wishes to the Marlo Music Corporation.

They Leave Their Comfy Beds for Him

(*Continued from page 67*)

inspiring view of the sidewalks of New York, the skyscrapers and the East River. The walls, which are hung with specially made draperies, and the ceiling are constructed so as to prevent echoes and deaden all unnecessary sound in the studio Thick carpet on the floor also helps.

Now our attention is again called to Director Bagley at the microphone. He is dressed in a white shirt and white duck trousers. He is of medium height, compactly and slightly built. His muscles are hard, his movements are quick and sure, the movements of a man whose mental and physical co-ordination are perfect He drinks many glasses of water during his broadcasting. He smiles with his eyes as well as his lips, while he talks.

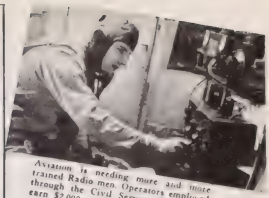
We hear his deep, pleasant voice, as he keeps up a rapid-fire chatter of instruction and comment to his class. He has a veritable enchanter's gift for coaxing and cajoling, for instilling vigor into the laggards and ambition into the ambitionless He has an uncanny gift for projecting his personality over the mike and making every member of his class of four million feel that he or she is being personally supervised.

There is no resisting the spell of Mr Bagley's words. Before you know it you are filling your lungs with the early morning air. Sleep departs from your eyes and heaviness from your heart. You are splendidly and vibrantly alive from your finger-tips, which are stretched high above your head, to your toes.

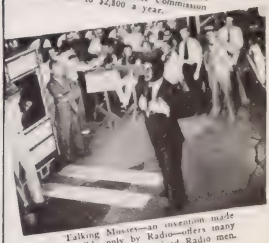
Being the physical director of the largest gym class in the world is, of itself, a great responsibility. Although Mr. Bagley's wife, son and lovely daughter live in the family home in New Jersey, he occupies a room in a New York hotel where, safe from the vagaries of transportation, he can be within easy walking distance of the Metropolitan Tower.

Since his first broadcast Mr. Bagley has been absent only once and then it was due to a death in the family. He has never been late for a class. Sometimes this is difficult, too, because he is in great demand as a speaker. He says that the masters of ceremony at the functions at which he appears almost never realize that he has to get up at 5:45 A. M., so they are not always careful about placing his talk early on the program. *(Since this was written Mr. Bagley underwent an operation for appendicitis, but has now returned to class in good health—Editor)*

Recently the Tower Health League celebrated its sixth birthday. Since March 31, 1925, when it first went on the air, the Tower class has broadcast regularly six days a week. It has the distinction of being the oldest daily feature on the NBC networks, from the standpoint of broadcast hours. In establishing this record of more than 2,300 broadcasts, Mr. Bagley



Broadcasting stations need trained men continually for jobs paying $1,800 to $5,000 a year.



Television—the coming field of many great opportunities—is covered by my course.

Operators on ships see the world and get good pay plus expenses.

Aviation is needing more and more trained Radio men. Operators employed through the Civil Service Commission earn $2,000 to $2,400 a year.

Talking Movies—an invention made possible only by Radio—offers many fine jobs to well trained Radio men.

You'll Get *Thrills*-~~Adventure~~ BIG PAY in RADIO

I will Train You at Home to Fill a Fascinating Job in Radio

J. E. Smith, Pres.

Radio's Amazing Growth is Opening Hundreds of Big Jobs Every Year

You like action, romance, thrills! You'll get them in Radio—plenty of them! Big pay, too. That is why I urge you to mail the coupon below for my free book of startling facts on the variety of fascinating, money-making opportunities in this great, uncrowded field. It also explains how you can quickly learn Radio through my amazingly simple 50-50 method of home-study training, even though you may not now know the difference between a "Screen Grid and a Gridiron". Thousands of men who knew absolutely nothing about Radio before taking my course are today making real money in this growing industry.

Thrilling Jobs That Pay $50 to $100 a Week

Why go along with $25, $30 or $45 a week in dull, no-future work when there are plenty of good jobs in Radio that pay $50, $75 and up to $250 a week? For instance, by taking my training, you can see the world in grand style as a Radio operator on shipboard. There are many splendid openings in this line with good pay plus your expenses. You'll also find thrills and real pay in Aviation Radio work. Broadcasting is another field that offers big pay and fascinating opportunities to men who know Radio. And think of the great, thrilling future for men with *Radio training* in Television and Talking Movies. My free book tells all about these and many other branches of Radio that bring you in contact with interesting people, pay big money and make life pleasant for you. Without doubt, Radio training is the key that opens the way to success. And *my* training, in particular, is the *only* training that makes you a *"Certified RADIOTRICIAN"*—the magic words that mean valuable recognition for you in whatever type of Radio work you take up after graduation. You'll see *why*, when you receive my interesting book.

Earn While You Learn

You don't have to quit your present job to take my course! You stay right at home, hold your job, and learn in your spare time. (Lack of high school education or Radio experience are no drawbacks.) I teach you to begin making money shortly after you enroll. My new practical method makes this possible. I give you eight big laboratory outfits that teach you to build and service practically every type of receiving set made. Many of my students earn $15, $20, $30 weekly while learning. Earle Cummings, 18 Webster St., Haverhill, Mass., writes: "I made $375 in one month in my spare time, installing, servicing, selling Radio sets." And let me emphasize right here that a Radio business of your own is one of the money-making opportunities my training prepares you for in case you wish to settle down at home.

Get My Free Book

Send the coupon below for my 64-page book of opportunities in Radio and information on my home-study training. It has put hundreds of fellows on the road to bigger pay and success. It will tell you exactly what Radio offers you, and how my Employment Department helps you get into Radio after you graduate. I back my training with a signed agreement to refund every penny of your money if, after completion, you are not satisfied with the Lesson and Instruction Service I give you. Fill in and mail the coupon NOW!

Travelled 75,000 Miles

"Dear Mr. Smith: I have worked as Junior Operator on board S. S. Dorchester and Chief Operator of the Chester Sun. I have travelled from 75,000 to 100,000 miles, visited ports in various countries, fished and motored with millionaires, been on airplane flights, etc. I am now with Broadcasting Station WREN." (Signed) Robin D. Compton, 1213 Vermont St., Lawrence, Kansas.

$400 a Month

"The Radio field is getting bigger and better every year. I have made more than $400 each month and it really was your course that brought me to this." J. G. Dahlstead, 1484 So. 15th St., Salt Lake City, Utah.

Employment Service to all Graduates

When a hotel manager *made a road map*

THIS guest was leaving early in the morning for the South. And he didn't know the road. During the evening, the manager himself made a road map for the guest. Did the guest appreciate it? He wrote back and said he never made a wrong turn.

Perhaps we're wrong in talking about such little things, when we have such big things to offer. Bigger rooms at lower prices... Roomy closets . . . Popular priced cafeteria or coffee shop... Central location . . . Even specially selected meats for all dining rooms. But somehow, it's the little extra things that bring our guests back. You'll be back, too, once you know us.

Extra service at these 25

has built up a following estimated at 4,000,000 people. He has received more than 1,000,000 letters from his class members during the six years. A force of 15 secretaries is required to handle his enormous mail, which averages over 400 letters a day and about 14,000 a month.

In the course of the six years of broadcasting, Mr. Bagley has entertained more than 10,000 visitors, most of whom were members of the exercise class. No less than 9,999 of them have asked: "What does Mr. Bagley do with his time after the last class at 8 A. M.?

The first thing on the morning's routine is breakfast. After that, Mr. Bagley starts in on his 400 selected letters, reads them and makes notes from them to be used in the following morning's broadcast. If no visitors interrupt, he can finish the day's mail before luncheon.

Luncheon frequently means making a speech somewhere. He then returns to the studio and finishes his notes for the following day. The bicycle itinerary must be laid out and a poem must be selected. Mr. Bagley has more than one hundred volumes of poetry in his studio library, and he prides himself on the fact that he rarely repeats a poem, which means that he has already used about 1,800 poems. Between these things, Mr. Bagley finds time to keep abreast of the day's news by reading five or six daily newspapers. At five or five-thirty he goes home and he retires early.

Gabologue

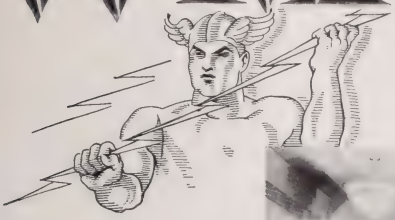
pianist, that he is a good wrestler and boxer . . . and that he was once a terror to the youngsters in that part of Chicago in which he grew up. He's also a runner and a swimmer . . . and his technique is always above reproach, whether he's hitting the piano keys or a fistic opponent.

He was born in London and brought to this country when he was just a little fellow, by his mother, Sarah Lewis, a dramatic coach and member of the Morris Grau Opera company.

COCK-A-DOODLE-DOO! That's KFYR crowing over its Radio Tribe of Long Boy Scouts. The Lone Scouts are boys who live in outlying districts far away from organized troops, and when the Bismarck, North Dakota, station conceived the idea of organizing a troup, National Scout Headquarters okayed it enthusiastically. This first Radio tribe holds meetings every other Wednesday evening at 6:15 CDT. Eagle Scouts Melvin Munger and Robert Edick of Troop 2, Bismarck, take the part of "Bud and Bob," who relate experiences and give friendly help.



BROADCASTING Station WLS announces that Edgar L. Bill, for seven years its director, has organized the Peoria Broadcasting Association to take over the ownership and operation of Station WMBD, Peoria. He has resigned his WLS position and takes active charge of WMBD, following the approval of transfer of ownership by the Federal Radio Commission. Mr. Bill is a pioneer in the broadcasting field, becoming director of WLS when it went on the air in April, 1924. Previously, he served several years in farm and daily newspaper work. He made the Prairie Farmer station outstanding in farm and home service.

13,000 square feet of modern broadcasting facilities . . . . . 7 perfect studios . . . . . the WMCA THEATRE, first Radio Theatre of the Air with auditorium comfortably seating two hundred . . . . . studios overlooking the Great White Way . . . . . a staff of more than one hundred experts to prepare and present your programs . . . . . a truly modern broadcasting plant.

THE AIRLINE TO THE NEW YORK MARKET

Twelve million people live within the trading area of New York. Nowhere else in the world is there a greater concentration of buying power. The yearly consumption of luxuries and necessities of these New Yorkers reaches a staggering total.

New York is the world's richest, most compact market for every kind of product and service that human ingenuity can devise. The New York market *alone* has made millionaires of men.

Because of its size—the many-sided angles of its life—the cosmopolitan character of its population—some advertisers believe that the New York market is difficult to sell successfully.

But radio broadcasting through WMCA has shattered this prejudice; has proven, through actual *results* for a varied clientele of advertisers, that New York is *now* one of the *easiest* markets in the world in which to gain a firm foothold.

NEW YORK'S OWN STATION

WMCA covers practically *every* event—*every* happening that is of *interest to New Yorkers*. If there is an important New York news story WMCA broadcasts it. Banquets of local importance and significance, outstanding ring and sport events, theatrical performances, the smarter night clubs—these are a few of the things that New Yorkers expect WMCA to cover.

We believe that no station has more friendly and personal relations with its army of listeners than WMCA. Because they are always sure of finding something of immediate and local interest on its program, New Yorkers have an exceptionally warm regard for WMCA.

Lucky Adam's Apple Man

(*Continued from page 19*)

he isn't going out, he is wearing his hat.

He greets you with a quick, penetrating blue eye. If he knows you well he offers you a cigar. There are few formalities. You state your business, get a decision and go. George Hill seldom keeps anyone who has an appointment waiting, and he exacts the same courtesy from the visitor. If he finds your questions irrelevant or impertinent, he can shut his jaw like a trap. But if he likes you or your errand, he can relax and smile.

Beside him in neatly arranged piles on his desk are books of proofs of Lucky Strike and Cremo cigar advertisements. He is also president of the American Cigar Company, a subsidiary, and incidentally on March 16th he began a fifteen minute broadcast of band music by Arthur Pryor and his Cremo Military Band six nights a week over the Columbia Broadcasting System.

Hill knows no hours in the conduct of his business. No matter where he is nor what he is doing, ideas flash through his mind. When these merit it, Hill goes into action. He manages to supervise every detail of his business. He keeps every important fact about it handy. Ask him a question about certain figures in his business, and out pops a paper with the answer on it. He prefers facts to estimates. He does things in a big way, but he does not exaggerate. Neither does he understate. He seeks always to be exact.

Every Saturday morning at eleven he goes to the NBC studios to hear an audition of his program. B. A. Rolfe and his orchestra have been practicing for two hours. When Hill hears an audition he does not see the orchestra, because he thinks the *sight* of the men might disturb his judgment. It is the *sound* in which the Radio audience is interested. How does the music "click" as it comes through the receiving set?

About the table is the Lucky Strike Broadcast Committee: L. Ames Brown, president of Lord & Thomas and Logan, the agency that handles the Lucky Strike account; Bertha Brainerd, NBC program director; Vincent Riggio, vice president in charge of sales of American Tobacco; Rosalie Adele Nelson, "Lucky" girl of poster fame, and others.

Before each member of the committee is a complete continuity of the program, as well as score sheets which give the exact arrangement of the instruments and the number of measures which they play in the various selections. A switch is turned. The orchestra is heard. All listen and look at Hill. Hill just listens. From time to time a member of the committee will get up and dance to some of the numbers to check the orchestra's tempo and vitali

"Too blue," snaps Hill. "I don't li those pianos. Make that rhythm sna pier. Put more pep in it."

Hill is not the only one who works ha to put snappy individuality into the Luc Strike hours. Two hundred and thirty- hours of desk work and rehearsal prec every hour on the air. Rolfe uses eig arrangers, working constantly. A holi is usually just another day of work them. Last summer Rolfe bought a mo boat to take the men off shore for a wh during these rare leisure hours.

The orchestra and soloists have be selected with as much care as the progr itself. Look them over. Here is a cornet who has gained international reputati Here is Ross Gorman, one of the m versatile musicians, who plays twen seven instruments and is busy invent more. Several of the musicians cond orchestras of their own. Andy Sanne Lucien Schmidt, cellist and tenor "sa Frank Banta, and a number of other tists are nearly as well known to American Radio audience as Rolfe hims Thorgersen's method of reading the c tinuity is in itself distinctive—and H was responsible for developing that t

When former Ambassador James Gerard a few months ago issued a list the sixty-four "Rulers of America," mentioned only one man from the toba industry. That man was George Wa ington Hill. In some respects Hill i more "powerful" ruler than any of others, because he is probably a bet showman. He rules by persuasion. knows how to make people enjoy things which he has to offer.

A Dash of Discontent

(*Continued from page 75*)

woman's discontent with her appeara that we owe many past and reign beauties.

Greta Garbo, to take a contempor example, was once dissatisfied, and ju so, with her inherent gaucherie; Mar Davies with her snub nose and we of freckles; Dolores Del Rio with figure (strange as it seems now she once the typical Mexican housew over-weight, with no distinction and chic); Gloria Swanson with her pro nent and unbeautiful nose; and No Shearer with her deep-set, too-small —to name only a few of the beauties started their film careers under ac handicaps. Had they been deficient the constructive discontent which l to fame and fortune not one of th would now be glittering in the crow galaxy of screen stars.

Yes, to women the world owes much its beauty and its progress. In spite the belligerent gentleman of the lunch table, woman has within her deep v of that divine discontent which is very germ of the first upgrowth of virtue".

Good-Bye, Gloom

(*Continued from page 51*)

noted for his vocal imitations of Coolidge and Lindbergh, and can make up to look exactly like President Hoover. During the last Presidential campaign Taylor's imitation of Coolidge was stopped by the Federal Radio Commission. They allowed him to resume after the campaign.

Eggs, from ostrich up or down, are his preferred dish. He likes 'em any style but old.

Railroad timetables and the minutes of City Council are his favorite reading matter. The sport in which he likes to participate above all others is going to fires. The sport he likes to watch is someone making out checks (good checks) to him.

Taylor has a younger brother, Horace, Jr., who resembles him so closely people take them for twins. Horace, Jr., attended Dartmouth, where he was captain of the swimming team in 1922-23. He now is secretary of his father's lumber firm and of Sunflower Plantation, Inc., and is president of the Clipper Oil Corporation.

"Stoopnagle" is married and has a son, F. Chase Taylor, Jr. eight. His wife is the former Lois Ruth De Ridder, daughter of a prominent Rochester shoe manufacturer.

Hulick, the "Budd" of this act, is a fair-haired boy of twenty-six. He actually intended to follow a musical career. As a boy he sang in the choir of St. Mark's Cathedral, Asbury Park, N. J. At the age of twelve he was winner of a school-children's singing contest.

At Georgetown University Hulick enrolled for a music course and spent much of his time with the glee club and the instrumental club, singing and playing the saxophone. He also played football. During his undergraduate days Budd always nursed the desire to enter show business or its cousin, Radio.

After his graduation Hulick tooted and crooned with Johnny Jones' recording orchestra. In Buffalo he made his inauspicious debut behind the spigots of a soda fountain. One day an executive of WEBR saw him cutting up for the customers, and Budd was placed before the microphone and told to talk. Three months later the Buffalo Broadcasting Company signed him as an announcer, actor and continuity writer.

Previous to his successful rôle on the "Gloom Chasers" act, Hulick was famed chiefly as the "Don" of the "Happiness House" program. He appeared also in the "Major Bullmore Expedition" episodes and as "Elisha" in the "Plain Folks" act. He also crooned on several programs.

One night Hulick was announcing a program from the Palais Royal, a Buffalo night club. Helen Lewis and her girl band, appearing at a motion picture house that week, were guests at the club on this particular night. During the evening Budd met Wanda Hart, an entertainer appearing with the band. Two weeks later they were married. Since then Mrs. Hulick has been on a number of programs with her husband.

PUTTING

"RED LETTER DAYS"

on the radio calendar

The world's first broadcast, consisting of the Harding election returns, came over Westinghouse Station KDKA, November 2, 1920. The first church service, the first broadcast of a theatrical production was presented over a Westinghouse Station. Time and again, Westinghouse has blazed the radio trail with achievements that today have become commonplace at the nation's firesides.

The same story of Westinghouse radio leadership holds true today. Westinghouse Radio technique . . . Westinghouse broadcasting facilities . . . Westinghouse reputation . . . have made thousands and thousands of loyal listeners who turn their dials to a Westinghouse Station the moment they switch on their radios. 980—990—1020 kilocycles! Remember those numbers when you're tuning in!

Betty's Big Thrill

(*Continued from page 32*)

slopes were covered with adobe huts as diminutive as dolls' houses. Gleaming under that brilliant Oriental sun, it all took on the aspect of unreality—a stage setting of a toy village.

A few hours' rest in the Pasha's house, and I was trundling over dusty roads to the royal palace. My escort was the son of the Prime Minister, who warned me to wear the longest dress I had, and to be sure my neck and arms were covered. "It's bad enough you approach him with a bare face . . ." he said. "No woman has ever been seen on our streets with an uncovered face before."

A large, white house with many pillars was the glittering palace on the hill. Eunuchs in flowing robes were standing on the wide steps. Long black braids of hair fell over their shoulders. Bowing low, they led us inside where the Emir sat on his royal dais. My escort fell at the Emir's feet and fervently kissed the hem of his garments as he repeated an invocation to Allah.

Was this the way to greet an Oriental potentate? Frankly, I was a bit nonplussed. Then I remembered America's democratic greeting for everyone and extended my hand.

The ruler shook it warmly.

"Kief Hallec!" (How do you do?) I exclaimed.

"Ah, the lady-with-the-white-face speaks Arabic!" exclaimed the Emir.

"Only about ten words," I laughingly answered.

"Learn ten more and you'll know the language!" he laughed.

Emir Abdullah might have stepped forth from the covers of a story-book as he sat there that never-to-be-forgotten afternoon in his palace at Amaan, the desert capital. Surprisingly young; slightly above medium height, pleasantly plump, his brown eyes hold the clue to his personality. They constantly smiled. His heavy mustache drooped over full red lips and patch of black beard.

His Highness began the interview by remarking: "The advancement of the world is in the hands of women. The development of a country is simultaneous with the growth of its women."

Was civilization leaving any mark on his feminine subjects, I wondered. So, citing Mustapha Kemal, who had permitted the women of Turkey to unveil, I asked Abdullah whether he would allow his women subjects to do likewise.

"Never!" he shouted. "Never! My women will never unveil!"

"But," I persisted. "It's progress."

"What has a woman's uncovered face to do with progress?" he demanded. "I help my feminine subjects. I established schools for them, so that now, for the first time in history, women of the desert receive an education. They learn the history of our country and housework. But ah," the ruler of Transjordania shook his head sadly: "Our women are changing."

"For the better?" I asked.

"No." He was sad again. "For the worse. They're becoming civilized."

"But why is that worse?" I asked in surprise.

"Because our women are becoming fond of pretty dresses with low necks and short sleeves!" he gasped. "But worst of all—they love to ride in motor cars!"

"Is that a terrible vice?" I asked.

He became stern again. "It encourages the men to buy motor-cars. Just think," he wailed, "eight years ago, when I came here to rule, there wasn't a single automobile in Transjordania. Now our capital has eighty-five cars! Think of that heavy traffic in our city!" he demanded. "Doesn't that show luxury is creeping in here?"

"And why do you blame that on your women?" I asked.

"Because," he said sternly. "The women encourage men to buy cars! These women! The next thing, they'll be wanting to wear gowns without sleeves!"

"Your Highness, how many wives do your subjects have?" was my next question.

"Four, the Koran allows them," he answered (the Koran is their Bible). "But I make them prove they can support their wives before they take on extra ones, so the average man here can afford only two or three wives. I have two queens," he said proudly.

"Only two?" I asked.

"But I'm a young man . . . only thirty-five," he said apologetically. "I've got plenty of time yet to fill out my quota."

"Why are American women so opposed to polygamy?" he suddenly demanded. "Why wouldn't you, for instance, join a harem?"

"Never!" I replied. "I could never share the man I loved with other women. There's something possessive about real love."

As we discussed love, as interpreted in the Orient and the Occident, the retinue of eunuchs filed in and prostrated themselves at Abdullah's feet. Again the Prime Minister's son began kissing the hem of the Emir's robe.

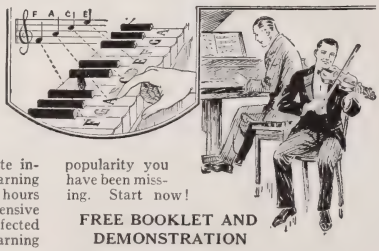
My time was up.

The Emir rose.

"Has the lady-with-the-white-face any more questions?" he asked.

I nodded.

"Your Highness, what do you, a desert ruler with a harem of queens, really think of women—in your private life?"



Emir Abdullah, ruler of Transjordania, descendant of the Prophet Mohammed, smiled as he answered:

"Even with a King, a woman gets full attention in everything. Ah, she is his greatest pleasure—and his greatest worry!"

Half a Million People
have learned music this easy way

You, too, Can Learn to Play Your Favorite Instrument Without a Teacher

Easy as A-B-C

MANY of this half million didn't know one note from another—yet in half the usual time they learned to play their favorite instrument. Best of all they found learning music *amazingly easy*. No monotonous hours of exercises—no tedious scales—no expensive teachers. This simplified method, perfected by the U. S. School of Music, made learning music as easy as A-B-C!

From the very start you are playing *real* tunes perfectly, by *note*. Every step from beginning to end, is right before your eyes in print and picture. First you are *told* how to do a thing, then a picture *shows* you how, then you do it yourself and *hear* it. And almost before you know it, you are playing your favorite pieces—jazz, ballads, classics. No private teacher could make it clearer. The cost is surprisingly low—averaging only a few cents a day—and the price is the same for whatever instrument you choose.

LEARN TO PLAY BY NOTE

Mandolin	Saxophone
Piano	'Cello
Organ	Ukulele
Violin	Cornet
Banjo	Trombone

Or any other instrument

Learn now to play your favorite instrument and surprise all your friends. Change from a wall-flower to the center of attraction. Musicians are invited everywhere. Enjoy the popularity you have been missing. Start now!

FREE BOOKLET AND DEMONSTRATION LESSON

If you really *do* want to play your favorite instrument, fill out and mail the coupon asking for our Free Booklet and Free Demonstration Lesson. These explain our wonderful method fully and show you how easily and quickly you can learn to play at little expense. Instruments are supplied when needed—cash or credit. U. S. School of Music, 1837 Brunswick Bldg., New York City.

U. S. SCHOOL OF MUSIC,
1837 Brunswick Bldg., New York City

Send me your amazing free book, "Music Lessons in Your Own Home," with introduction by Dr. Frank Crane; also Free Demonstration Lesson. This does not put me under any obligation.

Fight That Wave Grab

(*Continued from page 30*)

masquerading its real motive behind a thick wall of discreet propaganda a "little group of self-promoters", who unquestionably hope to occupy "high-chair" positions in the future dictatorship of Radio broadcasting, placed the ammunition for its original broadside in the hands of an unsuspecting senator. And when, on January 27, 1931, Simeon D. Fess, Republican, senator from Ohio, introduced bill "S. 5589" in the United States Senate he became the innocent dummy for the "little army of self-promoters."

I can state frankly that the Fess bill is one of the most vicious pieces of legislation ever introduced in Congress. It should never be permitted to become a law. I only now those of our readers who have accepted the Fess bill at its face value have jumped to a conclusion. Do you say, "This is being written at the instigation of the commercial broadcaster?" Allow the writer to deny this charge once and for all.

I AM not writing this at the request of, or in behalf of, any person or persons connected with commercial broadcasting. I am affiliated in no way with, nor receiving pay from, any commercial broadcaster. The editors of RADIO DIGEST are not subsidized by any commercial broadcaster. The editorial policy of this magazine favors constructive promotion of education in Radio. The Fess bill does not constructively promote education in Radio. RADIO DIGEST published in the interest of the listener and every user of a receiving set is endeavored to know the truth about any attempt to place Radio in jeopardy.

In telling the truth about the Fess bill RADIO DIGEST hopes not only to enlighten the listener and the public at large but sincerely desires to remove the blindfold from the eyes of every individual member of the several educational groups so unwittingly drawn into a liberty-throttling political scheme.

Now let us consider the ammunition with which the listener can successfully combat the present attack on his intelligence and *his pocketbook*.

Do you enjoy the editorial policy of your favorite newspaper? You must, or you would not purchase it. Let us assume that your favorite newspaper consists of twenty pages. Suppose there one a day when you discover that three pages of every issue are filled with political propaganda, or what have you?, in direct opposition to the editorial policies of the paper.

Of course, you say, these three pages must be nothing more than paid advertisements. But are they? You are told that the publisher of your favorite newspaper was forced, *by law* to accept and print the subject matter which fills these three pages. How could he be forced to do this against his will? How, indeed! By order of the Federal authorities! It *might* happen.

If the Fess bill, confiscating 15 per cent of all the allocations now being used by privately owned broadcasting stations in the United States, should become a law it is just as reasonable to assume that a similar attempt to confiscate one and one-half pages out of every ten in all privately owned publications might be tried.

But, you say, that will never happen. Granted. The press is not asleep. Nor would a congressman, in his right mind, dare propose a bill which would tend to establish a dictatorship of the American newspaper. The press is an old established institution which knows full well the rights to which it is entitled. The boys of "the fourth estate" are on the job. They would meet any attempted confiscation of those rights with the most powerful weapon — *Truthful Publicity*.

Radio is an infant alongside the press. I do not say that Radio is asleep, but I do claim that it has not learned as yet to rise up on its own feet and take a definite stand for its rights. Like the press it enjoys freedom of speech. It cannot perform its rightful function and keep faith with the public, no more than could the press, if freedom of speech is throttled. The foundation upon which Radio has been built is threatened if the Fess bill is allowed to become a law. The first step has been made toward the *ultimate confiscation of all broadcasting* by the Government.

A MINORITY of educationalists and some politicians in America are continually howling that our broadcasting is monopolized commercially. That is not true.

Let us give a brief comparison of the percentage of advertising on the air with that contained in periodicals.

L. Ames Brown, president of Lord, Thomas and Logan, has made a study of the advertising content of program continuities of 109 advertisers on the National and Columbia chains. He says, "The ten most popular programs have an advertising content of 8 per cent, while three of the first rank programs run about 11 per cent." Often you will find from 60 to 80 per cent of newspaper space devoted to advertising. Or, as Mr. Brown goes on to say, "One of our national magazines last year carried nearly twice as much advertising in its fifty-two issues as the two great chain systems did in 365 days."

"But," says an objector, "where one does not have to read the ads. in a magazine or newspaper he is forced to listen to the advertising announcements on the air or miss the entertainment features of a commercially sponsored program."

Very true, but the reader *pays* for his magazine or newspaper while the air programs cost the listener nothing.

"All right," is the objector's reply, "if the air advertiser were eliminated I would be willing to pay for my Radio entertainment, educational and otherwise, just as I do for the reading matter in magazines and newspapers."

The only way that could be managed in Radio would be by monopoly control under government supervision with a direct method of taxation.

"Why not?" The objector wants to be consistent. "I'm willing to be taxed to be rid of the air advertiser."

Yes? What price magazines and newspapers without advertisers? What price Radio without advertisers?

AND who do you imagine will be established as the mentor of your air programs then? You don't know? You'll find out. A bureaucratic politician. You may not think so now but in the event of government control of Radio the manipulating type of politician will be the absolute power "behind the microphone."

Now let me quote from the address of a former member of the Federal Radio Commission given before the National Advisory Council on Radio in Education (an organization not affiliated with the sponsor of the Fess bill or any commercial broadcaster) on May twenty-first: "Most stations have more unsold time on their hands than they know what to do with. They offer to turn it over, *without charge*, to educational institutions in the vain hope that they will make sensible use of it. I have no hesitation in saying that the state universities could have, without cost to them, *five times* as many hours on commercial stations as they are now using if only they were equipped to put on reasonably interesting programs. Even our regional governing bodies, garrulous as they usually are, turn suddenly shy when it comes to making use of free Radio; the task of utilizing as much as fifteen minutes a week taxes their facilities to the utmost!"

And there you are.

Commercial broadcasters are sponsoring their own educational programs because educational institutions and regional governing bodies *refuse* to accept free time on preferable allocations from studios using the best possible modern mechanical equipment.

Further revelations concerning the BIG Wave Grab will be presented by Mr. Hobart in the next RADIO DIGEST.

Mr. Jones Tunes In!

Lem Misses a Million Dollar Program and Discovers That Tubes Wear Out

By Robert L. Kent

LEMUEL JONES sighed as he arose from the table. He was tired. It had been a prodigious day at the office and a quiet evening in the big chair beside the radio looked mighty good.

"Ann," he said to his pretty wife, "Ann, I read today about a wonderful new program that is to go on the air tonight. A million dollars is being spent on it and the piece in the paper said that there's a big surprise for listeners. I sure want to listen to that program. Seems as though the radio is getting better every day."

"Well, Lem," replied Ann, neatly folding her napkin, "I hope you do hear it but I have my doubts. Our set has been acting queer lately. It seems to die down to a whisper and when it does come in stronger there's a funny sound and you just can't hear a thing. I'm tired of the exasperating thing."

"Don't tell me those kids have been fooling with the radio again, Ann."

"Now Lem, you always say that, but I know they haven't because I have kept them out of that room."

"Well, we'll see," and Lem stalked from the room, into the sun parlor, and let himself wearily down into the cushioned easy chair. "Boy that feels good," he murmured, reaching for the dial on the radio. He threw the switch and whirled the dial to his favorite station.

He waited. A droning sound issued from the speaker and, faintly at first, then louder, came a noise that certainly was not music. Nor was it the velvet voice of the announcer.

Mr. Jones fidgeted, but waited. Two creases appeared between his eyes. His sensitive ears were offended. He twisted the dial to another station. The result was exactly the same.

"Darn," growled the head of the Jones family, raising his lanky form from the chair. He was angry. His face was diffused with blood—a characteristic of the Jones clan when aroused or embarrassed. Lem noisily pried off the top of the radio and his body bent in the middle like a jackknife. He peered closely at the conglomeration of tubes, wires and whatnots. He pushed each of the tubes to make certain they were firmly in their sockets. He gently pulled a wire here and tentatively touched a gadget there, but if there was any improvement it was not apparent. Now Lemuel Jones had not the least conception of the inner workings of a radio set. No, Lem knew nothing about radio and his pushing and pulling was a desperate and forlorn hope that perhaps some mir would happen. But not did happen and after min of fussing with the work finally desisted.

Ordinarily he was a mannered individual, bu the end of that fifteen min he was in much the same as the golfer who has hooking and slicing thr eighteen holes of golf. gritted his teeth and things half under his br that Ann would have beer tremely shocked to hear. banged the top on the r and sulkily picked up the ning paper—a perfectly evening wasted—and he wanted to hear that wond new program.

The rattling of dishes i kitchen finally ceased and entered. Lem looked at over the top of his p "It's no use, Ann," he said. thing won't work and I don't what's wrong with it. Better service man to look it over tomo and have him put it in shape."

MR. SMITH, of Radio Shoppe, grinned as he t from the 'phone. "Hey, Al," he sh to a young man in the rear of the who was busily tinkering with a battery model, "wrap up a set of for a Sweetone set. Mrs. Jones is ing trouble. It's the tubes. 'Sf but people wait until the last min call a service man and then they service in a hurry. And how!"

"Yeah, that's right," replied Al an answering grin on his freckled and walking forward with the pac of tubes. "They forget that tubes out!"

Sweet Six-ty

(*Continued from page 73*)

mote from the subject of youth," ex-imed Miss Hopper, who all this while d been emphasizing her points with de-rmined and expressive gestures of her nds, "but worry and self-pity are the ost subtle destroyers of years. They aw at the very foundation of life.

Was it possible that this pretty, young oking creature who expressed vivacity every limb, who flitted across the room ke a little girl, and who spoke with such imation—was it humanly possible that ie had journeyed sixty-odd years over ie Highway of Time. Those who know liss Hopper say that she has been "Over ixty" for several years, which would lead s to believe without any complicated eckoning that Seventy was close at hand. ut for Miss Hopper's purposes, "Over ixty" is plenty. "I hate figures any-ay," she said.

"You know, the thing that surprises me ost is that people *get* old. I don't know ow they do it. I can't understand their ental processes. It amazes me.

"I for one have no criticism to make f my young friends, and I have a host of em. I associate constantly with young eople for I enjoy being with them.

"The youth of today is just the same s it was in grandmother's day—full of fe, joy and freedom. I have one criti-ism to make among American girls and omen. There is not enough individuality dress. If a new fashion is decreed by stylist they all thoughtlessly accept it ithout considering their own particular daptation for it. Here again, is where ourage is needed. They are afraid to arry out the courage of their convic-ions.

"Perhaps another reason for the lack of inquiry in personal dress is that in this ge when everything is running at top-peed and people are spinning around like ong-wound tops, they haven't the time to tudy themselves. They take the best hing that comes along and ask no ques-ions.

"As for myself, I believe I'm the only ne in New York who still wears short skirts—party or no party."

Miss Hopper was dressed in a pretty ailored two-piece frock which reached to ner knees. But anyone with a pair of egs like Miss Hopper's should have no difficulty in carrying out convictions about abbreviated frocks.

Miss Hopper is essentially a creature of the theatre. The stage has been sort of a home for her for many years.—it makes no difference if it's just a small house in Hicksville. The applause to an actress is the "Good and well-done faithful serv-ant."

"Give me the footlights and an audi-ence," exclaimed Miss Hopper as she stretched out her arms to an imaginary crowd of people, "and I am the happiest person in the world. There is nothing to compare with it."

Petite Miss Hopper has never had a sensation of fear in her life, but she con-fessed to feeling afraid the first few times she approached the unresponsive micro-phone.

There was no applause—nothing to tell her that she pleased the audience. Just the cold stiff shoulder of a black micro-phone. But when the letters came pour-ing in from all parts of the country to the number of 300,000 during the first twelve weeks, Miss Hopper began to realize that she was making "a hit" with her listeners.

Miss Hopper like most of us has many theories and ideals, but she differs from us in that she is able to prove each and every one of them.

Last year in the face of the keen opposition of her friends and acquaint-ances she attempted one of the most difficult tasks that is known to the stage. Her purpose in taking up acrobatic adagio, one of the most dangerous and compli-cated forms of dancing, was to prove to the world that she was young in body, that she was supple of limb and flexible of muscle. She was told that she was in-sane even to think of anything like that. But Miss Hopper wanted to disprove the age-old law that the body is limited in activity after a certain age, and she did it. She played to packed audiences whom she astounded by her grace, vigor and suppleness.

There is no monopoly on youth. Miss Hopper insists that everyone can follow her example. Start now, she advises. Eat the right kind of foods, exercise and don't fret. Take a mixture of these ingredients in the right proportion and you have con-quered Elusive Youth.

Harry Glick

(*Continued from page 63*)

while I take a fling at the 'World of Lit-erature'—you know, articles on physical culture and health.

"Then broadcasting opened its doors to me. Do I like it? Say, those morn-ing gym classes put pep into me for the rest of the day.

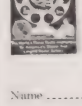
"What are my hobbies? Well, believe it or not, I have a real passion for row-ing. It's the most marvelous exercise in the world. And when I can't get to a boat and do the real stuff, I take a ride in my little 15-pound rowing ma-chine. Why, that's what keeps me fit! Every time I get a chance I take my classes down to the beach during this fine summer weather and we all have a grand time! Come on over the next time we go. I'm going to break a bottle of salt water over this little do-hickey and give it a title—think it'll be—what's that? No better name than the one it has—'The Seat of Health?' So you like that? O. K., buddy. See you again sometime. So long!"

RUDOLPH L. DUNCAN, President, RCA Institutes, Inc., Member, Institute of Radio Engineers; Member, Radio Club of America; Member, Veteran Wireless Operators Association; Captain, SCR, United States Army.

A Radio message

To men who are looking ahead!

by **R. L. DUNCAN**



ONLY a few men will read this message . . . but they will be the type of men in whom I am personally interested. For such men . . . I want to open the door to thorough training in radio. And the coupon below is the first step!

RCA Institutes, Inc., (formerly the Marconi Institute) was founded 22 years ago for one purpose. To produce graduates who will be of *value* to the radio industry. If our Institute never made a penny . . . but did succeed in lifting the standard of radio technicians, engineers, and merchandisers, we would consider our work a success!

Naturally, we want our message to reach as many men as possible. So we founded resident schools in four metropolitan cities. Then we opened our courses to men all over the world who cannot afford to give up their positions. Thousands of our students study at home in their spare time. With the equip-ment we furnish, they have their own radio laboratory right at home! You, too, can start your course at home *any time!*

Our courses cover the entire radio field. We train beginners who have had no pre-vious knowledge of radio. Advanced stu-dents take our more technical courses. But whatever branch of radio interests you . . . is all ready for you to study. The cost is sur-prisingly low for the training you get.

As the oldest radio school in America, we have given training to nearly 20,000 men. Many of these are now executives and engi-neers in the largest broadcasting and manu-facturing companies. But none of these arrived overnight. Nor will you. Your suc-cess depends on how well you train yourself . . . how hard you work. But we will help you. I personally invite you to write to me for our free book that gives you the complete story.

RCA INSTITUTES, Inc.

RCA INSTITUTES, Inc.
Dept. DR-7

Aunt and Uncle Mike

(*Continued from page 49*)

came under the latter group in his plan.

The same basic idea is still carried out by his NBC commercial program, heard each Sunday night, as well as his local broadcasts from WEEI, Boston, and the club has a huge membership.

Bob Pierce, the original "Old Man Sunshine" of NBC network fame, was "imported" for WLW's young listeners last February when the Cincinnati station's executives went to New York City to gather in talent for the station. His daily Sunshine Club is on the air every week day at 5:30 p.m. amusing children of school age. His programs combine the qualities that made him famous as Old Man Sunshine and "Uncle Bob" to thousands of children in the NBC and WOR audiences. He makes his act something more than a bedtime story period by mingling with it music, literature in light doses, comedy, little lessons in hygiene, and safety talks.

So successful has he been that one national (note) woman's magazine commented on his work and influence on children in an editorial, pointing out that children's entertainment programs like his could be classed with education by Radio. Other critics have been as generous and never accuse him of being oversentimental or silly.

Every child who writes to Old Man Sunshine gets a Sunshine Club button with Pierce's picture on it. The club has a pledge and a song that has to do with making other people happy and doing a daily good turn. Among the thousands of letters he receives, every now and then a truly pathetic one turns up. His latest was written in Braille by five little girls in a school for the blind. They listen to him every day and are planning to learn the club song when they get it rewritten in Braille!

Hopping back from the shores of the Ohio River and over to the rock-ribbed coast of Maine, we find another new youngster's club, "The Caravan". This has been in existence at WCSH, Portland, a month less than a year, yet, within its first eight months it gathered over eleven thousand members. The Caravan is a Radio-newspaper club sponsored by the Portland Press Herald, Evening Express and Sunday Telegram for pupils of primary, grammar and junior high schools everywhere. Already its enrollment includes children from 400 New England cities and towns, Canada and the British West Indies.

Encouraging youngsters in self-expression by the medium of a broadcast each Tuesday evening during the school term, and through the club news which is published daily in the sponsoring newspapers, is the main object of the club, whose director, incidentally, is Uncle Dan (Daniel A.) Hegarty. The children make the program. Original musical and mystery sketches are presented solely by the members with no outside professional aid except Howard Reiche, club pianist.

Of course, Uncle Dan writes the skits, conducts tryouts and stages the rehearsals, but otherwise the show is one staged by and for the youngsters. Half a thousand young performers have already been given an opportunity to display their talents which range from singing, reading and acting to playing instruments. Some of the volunteer broadcasters have traveled distances of 200 miles in order to appear before the microphone.

And now, dear children, as it's two o'clock in the morning, this finishes our bed-time story. Next month at the same time through these pages Uncle Ev promises to continue this Radio fairy tale.

Charm

(*Continued from page 25*)

or hectic or excited. We easily lose our heads.

"In order to give our friends that undefinable, subtle quality which is our charm, we must have a complete repose. For this perfect physical control and calm nerves are necessary. We must learn how to relax. This helps us to give forth a calmness and quiet serenity that soothes and rests other people. They find it comforting to be with us.

"Since dancing gives one this bodily control and grace of movement, make it a practice to turn on the Radio or the victrola and to dance at home. I have had awkward, self-conscious girls come to my studio and a few months of dancing improved the ease and grace of their manner and their bearing so greatly that their personalities were transformed.

"It is the development of these womanly graces which hold charm for everyone."

Now we come to one who has won the hearts of people in every part of the world and whose name has become a synonym for charm—Mary Pickford. It was an amazingly youthful person that greeted us in her hotel suite during her brief stay in New York. She has an engaging smile and a manner that is exceedingly gracious. But what one particularly notices is the her face is illumined by a rare expressio of spirituality.

"It is hard to say just what charm is, she told us. "Barrie speaks of it as ' sort of bloom on a woman.' The dic tionary calls it 'an irresistible power t please and attract.' In either case sounds most desirable, doesn't it?

"I have always been entranced by th title of Alice Duer Miller's book, 'Th Charm School,' and have thought ho much better it would be if some of th beauty parlors on every block could b replaced by charm schools. For char is much more difficult to acquire an certainly much more beautiful than beau ty itself.

"The most precious thing about char is that it is ageless. It is a possession tha remains with one to the last day, un diminished in beauty.

"This subtle quality is a composi of many attributes: daintiness, perfe grooming, joy of living and love of one fellow-beings. One must have a war interest in the problems, in the joys an sorrows of others. It must be an intere that springs from the heart. It canno be simulated or pretended. There must b a sincere desire to know, to sympathiz and to understand."

Radiographs

TELEVISION IS HERE

FALSE TEETH ARE A GREAT INVENTION
BUT KEEP YOUR OWN AS LONG AS YOU CAN

PYORRHEA has no respect for you

PYORRHEA, dread disease of the gums, comes to four people out of five past the age of forty. It is an insidious foe that may infect the mouth of youth and lurk in the gums for years before beginning its real work of havoc.

It starts with tender gums that bleed easily when brushed. As it progresses it spreads dangerous poisons throughout the system, often loosening teeth in their sockets until they fall out or extraction is necessary.

False teeth at best are only a substitute for your own and so often they are only the penalty of thoughtlessness and neglect.

A dentist perfected Forhan's to fight pyorrhea

At the first sign of pyorrhea go right to your dentist for a careful oral diagnosis. Modern dentistry can work wonders and save you untold trouble in your mouth if you rely on it in time.

Between visits to your dentist your teeth are your own responsibility. Therefore choose your dentifrice with utmost care.

Forhan's is the discovery of R. J. Forhan, D. D. S., who for 26 years specialized successfully in the treatment of pyorrhea. It is unique in that it contains the benefits of an ethical preparation developed by Dr. Forhan, which thousands of dentists use in the treatment of pyorrhea.

Don't gamble with pyorrhea

It is really folly to take a chance. Decide now not to gamble any longer.

Visit your dentist regularly and brush your teeth with Forhan's twice a day. You can make no finer investment in the health of your mouth and the safety of your teeth.

Forhan Company, Inc., New York; Forhan's Ltd., Montreal.

FORHAN'S

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

False teeth often follow pyorrhea, which comes to four people out of five past the age of 40

SENSATIONAL VALUE!
SEND NO MONEY

A daily sun bath—a few minutes in the morning or evening—will keep you looking and feeling physically fit.

Invalids confined indoors missing the life-giving, health-bringing power of natural sunlight, find the Health Ray Lamp a boon.

Ultra-violet rays prevent rickets by supplying Vitamin D to the System.

Now the Amazing Benefits of ULTRA-VIOLET RAYS for ONLY $5.95

A $100 Sun lamp can do no more

Now, through the magic of the Health Ray Lamp, artificial sunlight, containing all the rejuvenating and healthful properties of sunshine, is available to all—at any time of the day or night—at any season of the year. Now the great benefits of ultra violet radiation can be yours . . . through this new, full-strength, therapeutic, ultra-violet (and infra-red) lamp at the *lowest* retail *price* in the world . . . $5.95!

Mass production and tremendous sales alone make this possible.

Youthful Vigor and Vitality

A few minutes in the morning or evening will suffice for your daily sun bath . . . will keep you feeling and looking physically fit . . . your body stimulated with Vitamin D . . . your brain alert . . . colds, grippe . . . annoying little aches and pains will pass you by. The whole family will enjoy greater health.

Inexpensive Health Insurance

It costs only a few cents a day to enjoy the relaxing, healthful, vitalising rays of the Health Ray Lamp. By subjecting yourself to these rays, you are building up a reserve of health and strength to withstand disease. You will look and feel vibrant, vigorous, fully alive. You are safeguarding your health in a pleasant, inexpensive way.

Real Sun Tan (the glow of health)

A genuine sun Tan is quickly and easily secured with a Health Ray Lamp. A few minutes a day spent bathing in the rays of this lamp will give you the same kind of tan you get on a Florida beach.

Innumerable Uses Found for Ultra Violet Radiation

These rays are especially effective in destroying germ life and imparting vigor and vitality. They also stimulate glandular function. They are remarkably efficacious in some forms of skin diseases. Strongly antiseptic, they destroy germs and clarify the skin. Pimples and temporary blemishes yield quickly to their purifying action. Children respond rapidly to the beneficent effects. In cases of listlessness and anemia, the rays are unusually effective. An invaluable aid in the treatment of rickets.

Same Benefits as $100 Lamps

The Health Ray Lamp is a remarkable bargain. Users receive the same benefits as with the $100 and $150 lamps. It is two lamps in one. It not only produces ultra violet—those rays that destroy germ life, invigorate physically and mentally and stimulate glandular function—but an especially designed generator produces at the same time the warm infra-red rays which stimulate blood circulation, soothe, comfort and penetrate deeply into living body tissue . . . healing and preventing illness.

Brings These Many Benefits

1. Builds strength and vigor, resistance to sickness. Invigorates the entire system.
2. By activating the cholesterol in the skin, Vitamin D is created which fixes the calcium and phosphorus in the blood, preventing rickets.
3. Prevents colds, grippe, lumbago, stops the annoying little aches and pains of every day.
4. Improves the appearance by imparting the natural ruddy glow of vigorous health. Gives the same kind of Tan you would get from a month on the Florida beaches.
5. Frees the skin from pimples and temporary blemishes.

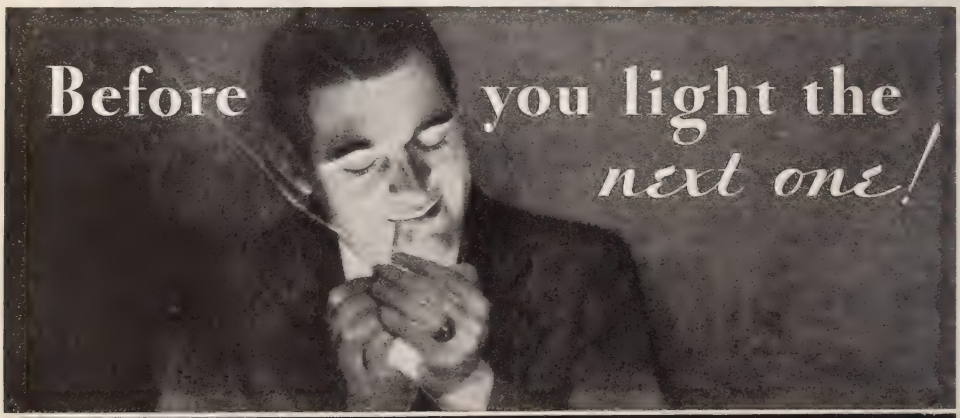
News, Views *and* Comment

By Robert L. Kent

WHAT with television turning the last "corner," old Radio favorites staging a comeback and the boys in the studios and advertising agencies working overtime to build new Radio gems for listeners, there's precious little sign of depression in broadcasting and Radio fans had better sit close to their sets so they won't miss anything.

One of the best that will be with us again over a coast to coast hook-up on the Columbia network is The March of Time—that breath-taking, soul-stirring, mirth-provoking dramatization of world news September 11 at 8:30 P. M. E.S.T. over 36 Coast to Coast stations, the curtain goes up on what is easily one of the best programs on the air. Don't miss that opening night. Get a ringside seat beside your Radio and twist the dial to the right station.

Another program that has been on Summer vacation scheduled for a return to the air is Collier's Radio Hour . . . it's national . . . NBC is the network, the date is September 13. There will be drama, music and talk.

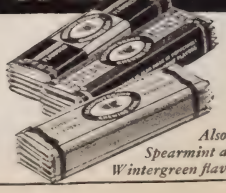


Some of the best Radiactors at NBC get together on Thursday, September 17, when The Adventures of Sherlock Holmes will again be on the air.

Here's a yarn to tax your credulity: A Radio communication sent at noon half way around the globe may reach its destination while the recipient is still in bed . . . not because of slow service but because of the difference in time. It's daytime there when it's nighttime here, if you know what we mean.

Marconi's first commercial wireless station in the United States, near Babylon, Long Island, built, it is said, early in 1901, is being preserved as a historical exhibit. It was purchased by Major Armstrong, Radio inventor, and presented to the Radio Corporation of America.

This is a story of a violin—and an artist who couldn't stand the nerve strain of owning it. You see it was a Stradivarius. David Rubinoff, who is a feature of the Chase and Sanborn Sunday evening programs over NBC, wanted that instrument more than he has desired anything in years. Rubinoff dickered and finally reached the rock-bottom price—$35,000. He was tempted. He lay awake nights thinking about that rare and beautifully-toned violin. He almost fell—and then he began to worry about the risk. He is a dynamic man . . . always rushing about to keep his many engagements . . . danger of damage to the instrument . . . he decided to wait until his life moves in a more quiet groove. . . I'm afraid he'll never own that violin.

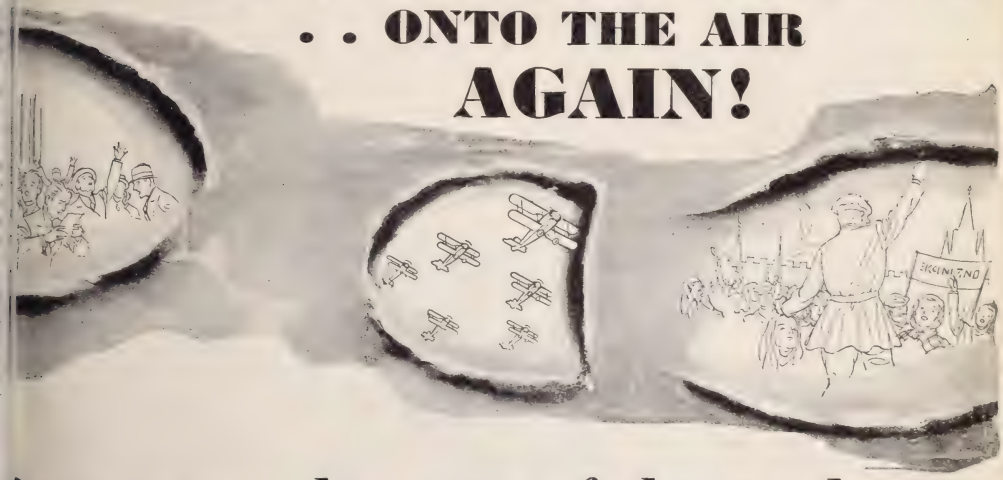


Startling improvements have been made in television reception at Columbia in New York. And the programs are excellent . . . everything from boxing matches staged in the studio to character sketches and musicians. It is a peculiar fact that engineers will not admit that television has reached a state of perfection that should interest the average Radio fan . . . but it has. The images at Columbia are the best we have seen to date . . . facial expressions and movements of the artists are something to write home about. Only fault is that too many artists are permitted to be televised without putting on proper make-up.

Beech-Nut Gum

MAKES THE NEXT SMOKE TASTE BETTER!

Buy a package of Beech-Nut Gum when you buy cigarettes or cigars. Chew it between smokes... It has the same effect as a good meal because it stimulates your taste sense... makes each smoke taste as good as the first one after breakfast... makes your smoking always enjoyable. *REMEMBER, there is no other gum quite so good as Beech-Nut.*



Also in Spearmint and Wintergreen flavors

Made by BEECH-NUT PACKING COMPANY—Also Makers of Beech-Nut Fruit Drops

)ADCAST IS A THRILL" . . . *Walter Winchell* + "MAKING RADIO HISTORY!" . . . *Wendell Hall* + DRAMATIC AS TIME ITSELF" . . . . *Baltimore Sun* + "FOREMOST FEATURE ON THE AIR" . . . . *Frederic William Wile* +

'ches On . .

. . ONTO THE AIR AGAIN!

)nce more the news of the week :OMES ALIVE over your RADIO!

TIME is on the air again—with "The MARCH of TIME."

First curtain, Friday evening, September even.

It's NEW radio . . . new, vivid, absorbing TIME itself!

It's a new kind of reporting of the news *on the air*—the re-enacting of memorable enes from the news of the week.

For a half-hour every Friday evening, the thrilling, significant scenes in the week's news will live again in your living-room—more dramatic than fiction, because compounded of vivid reality and the history-making drive of destiny. It is the *living* story of your lifetime—it is "The MARCH of TIME."

Now it's here again! Tune in!

"THE MARCH OF TIME"

Each Friday evening. Pick up your nearest of 36 coast-to-coast Columbia stations.

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

THIS is our special Television Number. We have been keeping an attentive eye on the subject for a long time, but because we have considered it more of a laboratory proposition than a fan subject we have been content merely to tell you briefly and simply of the developments as they have progressed.

Now, however, we are definitely prepared to take our stand on the proposition that *Television is Here.*

There are twenty-two television broadcasting stations now authorized to function in the United States. As many more applicants are seeking to establish television stations. Several large factories are now at work producing television receivers for the public. The country is aroused from coast-to-coast with television enthusiasm. Good images are produced on receiving screens varying from one inch to six feet high. New inventions are undergoing tests for sensational improvements over systems now in vogue. And as the new systems come in old ones will go—just as it happened in Radio during the crystal age. The Big Chains are vying with each other to lead in this phase of broadcasting. And everything is for the Radio listener and observer.

* * *

AFTER making our bow to Mr. Francis Jenkins who not only was the inventor who gave us the first motion picture projection machine but has also pioneered the way with television inventions, let us give a cheer to our young inventors. Philo Farnsworth of San Francisco, Ulises S. Sanabria of Chicago and Hollis M. Baird of Boston, all among the foremost of inventors in new and successful systems of television, are in their twenties.

* * *

WILLIAM S. PALEY came back from Europe with his pockets full of contracts or agreements from all important countries to exchange programs in transatlantic broadcasts. This will further a suggestion made in Radio Digest a year ago proposing a frequent interchange of good will programs to promote universal peace and understanding between the nations. As a further step to promote good will in his own country Mr. Paley's first policy move on his return was to cut out all commercial religious programs and substituting therefor an hour each to the three leading religious faiths of the country every Sunday.

* * *

"MAIN street has turned the tables on Broadway," reads one naive release from the New York NBC press bureau. It continues: "Country folks who a few years ago were making annual pilgrimages from Gopher Prairie and Sauk Center to be awed by Manhattan's funsters, have gone into the entertainment business themselves and made good . . . more specifically, the figures say that of the 366 programs offered over the NBC networks since January 1 of this year 157 had their origin in Chicago and far-flung corners of the country." Along with Chicago, Gopher Prairie and Sauk Center are mentioned Cleveland, Rochester, Denver and San Francisco as worthy contributors to the nation's Radio entertainment. Har! Har! Who said England was the "tight little isle?"

ALL right! All right! Lay off, please! It's all settled! All you letter writers who hastened to advise this department that you do not want artist scandals in Radio Digest win your point. We only wanted to make sure we were not imposing our own prejudice against such reading matter on our readers. Glad you so emphatically agreed with us. Studio scandals are out.

* * *

M. H. AYLESWORTH, president of the National Broadcasting Company, and considered one of the most conservative authorities, was recently quoted by a news syndicate as saying, "Of one thing we are now certain; the television era has definitely dawned." Mr. Aylesworth and David Sarnoff are also credited with the statement that the RCA will have a "commercial television receiver on the market within the next year."

* * *

SOON we may expect a few loud rips in our sound receivers. Members of the Federal Radio Commission reconvene this month armed with important court decisions with which they doubtless will begin tearing out a number of broadcasting stations, which they believe should be eliminated for the good of the service. Activities along this line should be watched with keen interest, both by listeners and broadcasters, since it is a well known fact that certain elements in Congress have been urging such action for some time and Congressional interest in broadcasting as manifested at the last session is not above suspicion.

* * *

AT LAST we are beginning to find out a few things about the 1930 census as it effects Radio. We are beginning to get reports from the more populous states and as we go to press Connecticut takes top position in the list of 34 states reported. A little better than every other family in the state owns a Radio receiver. The percentage of the total is 54.9. Wisconsin, Michigan and Ohio come next with slightly lower rates. Mississippi is at the bottom with 5.4 per cent.

* * *

WITH this September issue Radio Digest begins its second year of publication under the present management. It has been a good year, and one of positive growth in all directions. Every precedent was broken when the news stand reports showed the highest percentage of sales in July over the whole year. Usually the mid-summer sales of Radio Digest, and most magazines, drop from 25 to 50 per cent. Another indication of the pace that has been set by the *new* Radio Digest is the considerably increased volume of advertising which appears in this issue. Plans have already been outlined for each of the next 12 issues of this magazine. Beginning with this number you will be able to save one dollar by subscribing for a whole year. In other words the annual subscription cost to you goes down from $3 to $2. So it is now distinctly to the reader's advantage to thus make sure of receiving his Radio Digest every month as soon as it is out. The news stand price of 25 cents will remain unchanged.

—H. P. B.

Scott Owners TELL THE WHOLE TRUE STORY OF 'ROUND THE WORLD RECEPTION WITH The Scott All-Wave

PARIS - BERLIN - ROME

"Yesterday between 2 and 4 p. m. I received Paris, Berlin and Rome. The Rome program was very clear with no fading and excellent quality. I held each station half an hour or more. I might also mention that this reception was during a thunderstorm which was so severe as to put WEAF out of commission and absolutely prevented any decent reception on the broadcast band."

D. R. B., New London, Conn.

NEW ZEALAND 50 WATTS

"I have just received one of the most thrilling verifications that I ever received in my time of D. X.ing. It was 2XP of Wairoa, Hawke's Bay, New Zealand, a station on 366 meters with only 50 watts. Boy, this seems to be an impossibility but I did it with my Scott. Also ZL2FC of Wairoa the same station owned by the same man, Mr. Perry. Besides Mr. Perry sent me a three page letter, showing how thrilled he was on receiving a report on his transmission which checked correct. This gives me my 457th verification. Also a number of new ones out waiting for report."

R. A. T., Cresskill, N. J.

AUSTRALIA - JAPAN

"On the short waves which by now you will have surmised I have camped, I have had VK3ME, Melbourne, Australia; KAIXR, Manila; JIAA, Japan; and a most amazing lot of others not too far distant, but they will come in on the speaker (if I want them to) good and clear at that."

J. C. G., Minneapolis, Minn.

CUBA - HOLLAND

"On the broadcast band, stations on the Pacific Coast, Mexico City, Havana, Cuba, and Halifax roll in with the power of locals. On the Short Wave Bands, England, Italy, Germany, Holland, and South America furnish me with daily entertainment. I am particularly pleased with the short wave reception of the operas broadcast from Rome, also the pronouncements from the Vatican Station."

F. L. Y., Queens Village, N. Y.

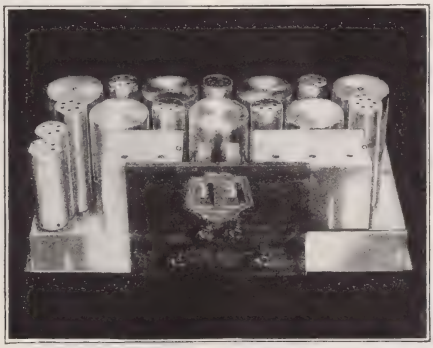
MANY FOREIGN STATIONS

"I can truthfully say it is the only real radio in town. The All Wave Receiver is in perfect condition and bringing in many foreign stations."

R. W., Marion, N. C.

ENGLAND - AUSTRALIA

"Today G5SW, Chelmsford, England, came in, not faintly but with thunderous volume. I also got 12RO Italy, with good reception. Last night I received HKD, Barroquilla, Colombia with volume loud enough to be heard a block away, and I also got HRB, Tegucigalpa, Honduras with loud volume. I also have received VK3ME with perfection."



H. A. M., Yukon, Okla.

FROM ALL DIRECTIONS

"The tone quality is magnificent and I received Canada as far as Montreal, and Mexico City and Reynosh also Japan seven mornings."

A. R. M., East San Diego, Cal.

FOR MONTHS we have modestly described the capacity of the Scott All-Wave Receiver for 15-550 meter, 'round the world reception. We have told the technical story of this laboratory-built receiver and have explained the engineering reasons for its unequalled performance. We have sold the Scott All-Wave on the basis of guaranteed, consistent, perfect reception from London, Rome, Paris and from other equally distant foreign stations, as well as all the U. S. and Canadian stations anyone might care to listen to.

The Scott All-Wave Receiver is guaranteed for 5 years. Any part proving defective within that time will be replaced free of charge.

Now, we are tuning you in on the replies to these promises. We are letting Scott All-Wave users tell you, *in their own words*, that the Scott All-Wave Receiver is even greater than we have described it. Read, in the left and right hand columns, what they say.

Hundreds more equally enthusiastic letters praise the Scott All-Wave Receiver. News and magazine editors likewise give columns and columns of space to the many wonders this receiver does in the way of regular daily duty.

MAIL COUPON FOR FULL PARTICULARS

Clip the coupon now. It will bring you the complete story of the Scott 15-550 meter All-Wave, a full description of the beautiful, chrome plated chassis, and illustrations of the many magnificent consoles made especially for this receiver. Send the coupon at once. You'll be delighted when you learn the low price at which the Scott All-Wave may be obtained.

SCOTT TRANSFORMER CO.
4450 Ravenswood Ave., Dept. E-9, Chicago

SCOTT TRANSFORMER CO.
4450 Ravenswood Ave., Dept. E9, Chicago, Ill.
Send me full particulars of the Scott All-Wave Receiver.

Name .....
Street .....
Town ..... *State* .....

HONDURAS - ENGLAND

"I received my Scott receiver on May 16th. I played it the next day; I tuned in GBS, Rugby, England at 12:30 P. M. and I heard the mayor talk from London. That was the first station I tuned in and it came in very clear. I just tuned in HRB in Honduras; it is now 9:30 P. M. I can get about 10 stations on 38 to 84 meter coils."

C. C. B., Allentown, Pa.

GERMANY AGAIN

"The Short Wave results have been very gratifying. I have heard Chelmsford, England; Holland; France; Germany and several South American countries."

J. Q. S., Washington, D. C.

IRELAND - ROME

"The results on the All-Wave Receiver have been wonderful. I have logged Germany, England and Ireland, and some Islands that I could not get the name clearly. Also, the entire dedication services at dedication of short wave broadcasting station at the Vatican City, Italy. Heard the Pope louder that if I had been one of the vast audience. Cannot be too highly praised."

L. W. B., Davenport, Ia.

EXCEEDS ALL CLAIMS

"In this day of extravagant advertising and claims it is indeed a pleasure to receive an article that surpasses all of the claims made for it, and certainly the SCOTT RECEIVER does that. It is beautifully designed, engineered and constructed; and its performance and tone are of corresponding excellence."

E. W. P., Chevy Chase, Md.

ENGLAND - ITALY

"Yesterday afternoon and this afternoon also, I tuned in Italy and England. They come in with wonderful volume such as I have never heard before. This morning I tuned in Australia. I got it in a minute or so after I worked the dials a little. It came in very good."

W. H. A., New Bedford, Mass.

SOUTH AMERICA, TOO

"I have logged Bogota, S. A., 12RO Rome, Chelmsford England, besides all that I want in U. S. A. and Canada."

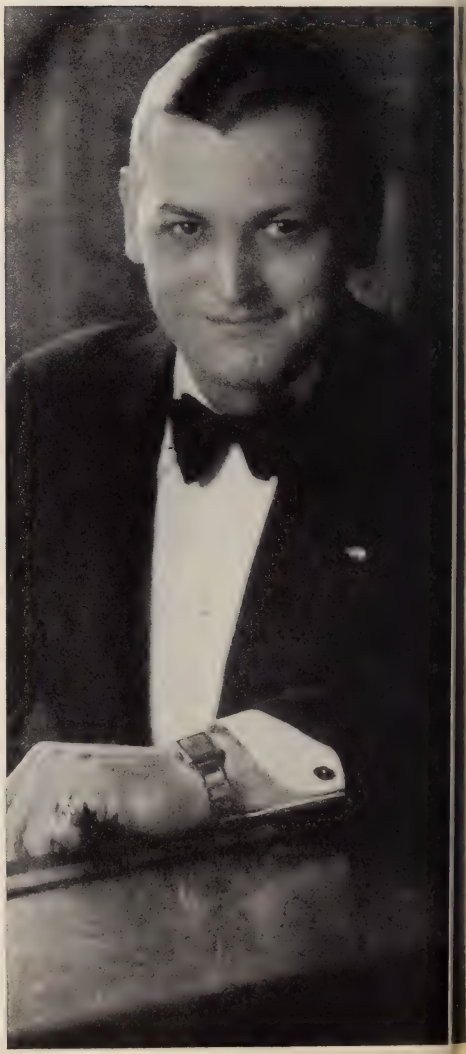
D. T. V., Detroit, Mich.

CHINA

"Indo-China, HSJ, Bankok, Siam, RV15, G5SW, J1AA and others are heard when on the air, as well as the eastern relay stations. This is June but Australian and New Zealand broadcasts are still being received even after daylight in the early morning. June third, from 4 to 5 A. M. I listened to 2V1, 3LO, 4QG Australia and 2YA Wellington, tho it was broad daylight."

T. H. H., Hoquiam, Wash.

ROME LIKE LOCAL



"On the low wave, I find it no trouble to tune in Rome, Buenos Aires. I also received Melbourne, Australia. When I first picked up Rome I thought something wrong and I was getting a New York station, it was so strong. The tone and quality is the finest."

G. N. J., St. Thomas, Ont.

Carleton A. Coon

THESE two gentlemen are the componen parts of America's greatest dance orchestr hyphen. They came up from the Indian countr to the Big Cities and M. G.—just like the stor books. Phil Maxwell tells you about it on th opposite page.

Joe L. Sanders

Indian Rhythm Comes Natural to

Coon-Sanders

Famous Orchestra Leaders Respond to Spark of Red Man's Blood in their Veins—Modern Instruments Convey the Tempo of Beating Tom-toms and Radio Audiences Go Wild in Appreciation

By PHIL MAXWELL

THIS is a story about a couple of Indians.

And their profession is making "Whoopee."

These Indians are none other than Carleton Allyn Coon, 38-year-old snare drummer, and his heap-big good looking pal, Joe L. Sanders, pianist de luxe, former baseball star and a product of the Indian territory which later became Oklahoma. Mr. Coon, as does Mr. Sanders, claims that he is one-sixteenth Indian or at least enough to establish distant relationship to Vice-President Charley Curtis.

These young Redskins have accomplished so much in their short lives, for Sanders is only 33, that it would be impossible to untangle their history in a short paragraph or two. So we'll start with Mr. Coon.

Of course a fellow who was to become one of the leading band directors of America couldn't have just any country doctor bring him into the world so he chose Dr. William Mayo, of the famous Mayo Brothers, in the City of Rochester, Minn., and from all indications Dr. Mayo did a good job as a member of the welcoming committee.

Carleton flourished from the start and his father, who played trumpet in the Thomas Symphony Orchestra in Minneapolis, with the consent of Mrs. Coon, sent C. A. off to the Wentworth Military Academy at Lexington, Mo., just as soon as he began wanting to have a little spending money and took a shine to the girls up around his home town. And it was while saluting his superior officers and playing in Major "Stubby" Day's band that he learned to wield the drum sticks which are now earning him a neat sum of money.

Next we find the ambitious lad at the University of Kansas at Lawrence, Kan., where he became so engrossed with the song, "The Sweetheart of Sigma Chi" that he joined that Greek letter fraternity and between playing right half back on the football team and attempting to catch a little medical education and successfully wooing Eula Virginia Jenkins, a student of the Kansas Agricultural College at Manhattan, he was a busy young man.

"Yes, sir," said Carleton as he recalled those romantic college days. "Kansas Aggies and the University of Kansas were rivals in football but friendly in love."

After three and one-half years in the university the now Mr. and Mrs. Coon moved to Kansas City where Carleton obtained a job on the Kansas City Star.

Then came the World War, enlistment for Carleton and his visit one day on furlough to a Kansas City music store where his path crossed that of the man who is the other half of the Coon-Sanders Corporation today.

Perhaps it would be well now to pick up the life story of Mr. Sanders.

JOE L. (And he won't tell you what L stands for) Sanders was born on what Coon calls a whistle stop on the Missouri Pacific Railway, otherwise known as Thayer, Kansas. His daddy, a pioneer of the west, traded 6,000 acres of citrus fruit land in the Rio Grand Valley for 6,000 head of cattle; the plague took the cattle away and Joe's dad was left without a penny in Indian territory a part of which later became Centralia, Okla. Joe learned much of his early music from an old phonograph machine which his father brought to his home and the first one believed to have been heard in that part of the country. Both his parents had splendid voices and one of Joe's earliest recollections is the harmony as sung by his father and mother. "That is where I got my voice," he said.

He received his early education in Belton, Missouri, and attended high school in Kansas City, Mo. His life wasn't one of roses. His first job as a singer was in the Blue Goose Cabaret in K. C. and he says he'll never forget the first song he sang, "Until the Sands of the Desert Grow Cold." For which he received the stupendous sum of $2.00 everytime there was the slightest reason for the rendition of this number. From the cabaret young Sanders joined the chorus choir of the Linwood Methodist Church where he went through the roles of grand opera arias and the oratorios under the direction of its leader David Grosch, famous baritone teacher. For a while he was a member of the Kansas City Opera Company and the Kansas City Oratorio Society. In them he learned the art of musical arranging.

The William Jewell College Male Quartet next beckoned to this enterprising singer and he toured the Western states with it and the Jones Chautauqua Company at $30 a week, he paying his own expenses. "I had a gorgeous time," said Joe, "but it wasn't such a remarkable financial success."

Next we find him in Detroit, Mich., in a popular quartet named "Us Four" at the Frontenac Cafe, which, says Mr.

(Continued on page 92)

WMAQ — W9XAP presents a play "A Minuet." The actors are, left to right: Vinton Haworth, Alice Hill and Sidney Breese

TELEVISION IS *Here*

By MARK QUEST

LET'S be frank and admit it. Television *is* here.

Forget about the five year plans, and the "round the corners." Acknowledge the existence of the score and some odd television stations now sending out visible programs every day. Recognize the fact that the two great chain systems have their own television stations and production departments. Don't overlook the existence of the 25,000 or more television receiving sets now functioning in America. Take off the blinders and see the truth that television is really here.

In another year you will find not less than 100,000 television receiving sets throughout the country. In that time you also will find that the television of today will appear comparatively crude to the one available then.

Perhaps within the time of this writing and the few weeks of its appearance in print you will have heard all about what young Philo Farnsworth has been secretly developing out in California. And by that time Dr. Vladimir Zworykin of the R.C.A.-Victor Company may also have presented an important demonstration. Farnsworth is said already to have demonstrated a television image of 700 lines to the inch, which, you will admit, is a considerable refinement from the 48 and 60 line images that are being broadcast today.

The 60 line image is about the same as the average half-tone screen in a newspaper. The screen in Radio Digest is 110 lines. A 700 line screen would probably give you a picture smoothness comparable to the photos in the rotogravure section.

At any rate television is here with the 60 line screen and many of the most famous artists of the air have already had their faces flashed out to the Radio audience. In Chicago they have put on specially written television plays. Broadway stage stars have made their bow over the Jenkins-WGBS station, W2XCR on Fifth avenue. The hot and close-packed mob that witnessed first public demonstration of television at the Radio World's Fair in New York in 1928 may now see television in th home. And the same holds true fo those long lines that threaded throug the lanes to the home-made and rebe television demonstration in the Chicag Radio show that same year.

Radio Digest has presented fror time to time the various stages of de velopment, and the history of the ver first ideas on the subject. It has hel a little aloof on the side of the mor conservative elements regarding th actual advent of television. But there i no need for further doubt. Televisio has arrived. Sets are available in mo of the large department stores. And kit for assembling are obtainable in the and 10 cent stores.

It would seem that the time is a hand when the government can cor sistently recognize this situation and as sist in the next phase of growth b permitting sponsored television broac casts. This need has been clearl pointed out by Vinton Haworth, pro duction manager of W9XAP, of th Chicago Daily News.

Columbia Turns the Corner

By

BILL SCHUDT, Jr.
Television Program Director at CBS

SEEING what you hear, has become a popular phrase at the Columbia Broadcasting System's udios in New York.

Television, even though experimental nd limited in scope, has turned that orner, after all.

Its experimental visual programs are alued at more than a million dollars hen one considers the yearly wage of ie regular artists who appear before ie flying spot each night in the week.

W2XAB, that is the identification of ie sight channel of the CBS interest n the Metropolis, has been operating even hours daily, 2 to 6 PM, 8 to 11, nd 8 to 10 Saturdays and Sundays, nce its grand opening on Tuesday uly 21 at which time the Mayor of the ity of New York "opened the eyes" f the station.

Many and varied have been the exeriences of this riter within the mall studio. Veteran nnouncers have embled. Famous peakers have sudenly gone hoarse nd stuttered over cripts they knew by eart; musicians ave been scared ear to death by the flying spot" and ritical Radio editors ave repented all when subjected to he penetrating eyes f visionary broadasting.

But all in all teleision is being taken very seriously up here at the Columbia tudios.

A new art, a new ystem is being worked out. Teleision technique will e vastly different rom that of present lay sound broadcastng.

For example conenuities will probably be taboo; for who wants to look nto his televisor and see an announcer reading his proclamation? Not many, you can bet on that. Of course, they may have to memorize, but that is not likely. This writer personally believes that television will eventually see popular masters of ceremony at the scanner filling in between acts, much the same as your present day revues and musical comedies.

Columbia has been routing its sight programs over W2XAB which operates on 2750-2850 kilocycles (49.02 meters). A short time ago, however, this System inaugurated a series of synchronized programs over WABC and the network.

In such cases, single acts and small group acts are merely televised in the television studio while overhanging microphones pick up the regular sound part of the program.

Thus does everything point to a finer television in the very near future. Experts say that 25,000 American homes are now equipped for reception of visual programs.

During its early weeks of experimental television, Columbia successfully televised dances by Natalie Towers, boxing demonstrations, cartoonists, jugglers, magicians, ballet dances, and miniature musical comedies.

Edwin K. Cohan, Columbia's technical director has studied television for many years. Here's what he said about it in a recent televised program:

"INAUGURATION of television broadcasting undoubtedly marks another step in the wonderful progress of the electronic art, yet how many of you who are within the sight of my face, or the sound of my voice, realize that the basic theory upon which this latest television transmission is now taking place is 47½ years old, having been discovered by a man, Nipkow, who filed a patent thereon in January, 1884.

"And how many of you know that electrical scanning, the next promised advance in this art, and the means by which all mechanically moving parts in both transmitter and receiver will be eliminated was basically discovered 23½ years ago by a man who filed such a patent in December, 1907?

"In these, as well as similar instances, the inventors were truly living ahead of their times, for it necessitated the high development of the vacuum tube, photo-electric cell, and electric amplifier, to form the essential links in the chain necessary to transform their probable theory into a practical reality.

"Television of 1931 is crude. The television of today

Radio Digest participates in its first television program. C. R. Tighe, associate editor, acts as master of ceremony in presenting to lookers-in Kitty Doner, famous vaudevillian and male impersonator at Columbia's W2XAB

is being conducted entirely on an experimental basis, this by the requirement of the Federal Radio Commission, as well as the choice of the majority of the foremost television engineers. The major portion of this work is being done within four ether channels ten kilocycles wide.

"As long as television, even in its crude state, requires a channel separate from the sound channel, for images of a moderate amount of detail and a limited range of coverage, a problem exists to find a suitable band within the Radio spectrum to which can eventually be assigned the number of stations required to satisfactorily serve our population.

"It is this, and many other problems, that today's experimental work will eventually solve or overcome.

"Television of today is perhaps comparable to the phonograph of 1910 and the moving picture of 1905, but upon this pioneering must rest the solid foundation of future progress.

"My words are not intended to sound a note of pessimism, but rather of conservation. Television will advance from now on just as surely as sound broadcasting has, and I believe at no less a pace. It will progressively bring to you the individual and small groups, the larger groups and complete symphonic and stage presentations, the outdoor sporting events, the spot news events. It will eventually bring these things to you in natural color.

"In the future there will be television networks similar to our sound networks of today and functioning much in the same manner. To accomplish this, considerable progress will have to be made, particularly with regard to the width of the transmission band. In addition, pickup flexibility and future program demands call for a suitable method of scanning whose illumination limitations are no greater than those of the present moving picture camera.

"You might be interested to know a few of the experiments we shall conduct during our seven hour daily schedule.

"First of all, what happens to an image being transmitted at this frequency in a heavily built up city such as New York, with its huge masses of steel, its electrical interference in the form of subways, street cars, elevated roads, flashing signs, and elevators?

"What happens to the image at a receiver when the sky wave arrives out of phase with the ground wave?

"What kind of makeup is most suitable for television? Should blue lipstick be used instead of red, or is some other color more suitable?

"What advantages can be taken in television productions of the persistency of vision of the human eye?

"How shall plays be dramatized to accurately portray the author's work?

"To what extent can mechanical and electrical devices assist to make a program more polished and interesting?

"These are but a few of the questions our experiments will attempt to answer, not only for ourselves but for those of the audience already looking in as well.

"The progress made in television during the past year or so has been most encouraging. Regardless of what corner television happens to be just around, the year 1932 holds every promise o being most noteworthy.

"We in Columbia, will endeavor t contribute our share toward the fulfil ment of our prophecies, employing th same measure of conscientiousness tha we continually strive for in our soun broadcasting. How well we succeed wi be governed by the same principle tha has applied in the past four years o our growth—your approval and en couragement. We will continue to d our utmost to warrant and deserve it.

Chicago asks License

By Betty McGee

PROGRESS in television will be slow and halting until television stations can be licensed for commercial sightcasting. This is the opinion of Vinton Haworth, Television production manager for W9XAP which operates in conjunction with WMAQ, the Chicago Daily News station.

WMAQ is said to be the first radio-television station to have an organized television production department and a television production manager. This station has been going ahead by leaps and bounds in the production of ambitious and intricate television programs. All of which makes Mr. Haworth's present attitude the more significant.

"As seen from the production man's angle, the fly-in-the-ointment of better presentation is the hesitation of the authorities to license television stations (that are now operating) for commercial sightcasting," said Mr. Haworth in a recent interview. "Our difficulty at W9XAP is conjoining with WMAQ. Presenting a synchronized program is dependent entirely on WMAQ's schedule. If WMAQ's time is sold, then according to Federal Radio Law, W9XAP must go its own way, transmitting a silent picture. And we do insist that the silent television picture has served its purpose, which is mainly: 'Television is practical and practicable.'

"All the pantomimic actions that can be thought of have been broadcast . . . boxing, fencing, posing, dancing, wrestling, cartoons, ad finitum," he continued. "Adequate time to experiment with synchronization, and watch its effect on the public, is denied us because of this commercial prohibition. Were this ban lifted it would open green pastures in which the production man would run rampant, admittedly, but not obviously, experimenting. But only in this manner can we hope to progress . . . we have the material, it has prove its worth . . . why not let us build wit it?

"Technical facilities for productio are, at present, inelastic due to this fi tile circle in which we are forced run. Our technicians are all eager help, to cooperate in giving a goo show . . . but until we can create show worthy of the name, until we di cover those many little rough-spots th only show in actual work-outs, we a helpless, to explain to them our need No, do not misunderstand—they a making great strides . . . in transmi ting, in clearer definition, in better r ceiving qualities . . . in every gener way except from the studio mechanic Simply because we don't know, have n way of knowing just what we need."

The actual steps of progress in tel vision at the Chicago Daily News st tion are marked by the three synchro ized plays given through this statio since the beginning of the year. Ea was a distinct improvement over i predecessor. In the first play, cut-bac were tried as in the movies. One cha acter would be seen in full length, a the next character that spoke w shown in close-up, then vice versa. A of which meant that the script had be carefully gone over, so, that in mo ing of the characters to the differe scanners, there was no break in the di log. A difficult job, but from the tel vision-production picture standpoint, eminently successful one. The scen flowed along smoothly, and hearkeni back to the early movies, in changi the picture from close-up to full-leng there was never a jerk.

The operators devised an automa relay which cut the picture instantan ously the moment the disc upon whi the various lenses are mounted w turned, then brought the picture ba

mpletely and fully in the new field it the script called for. Automatic cture cuts were possible, too, with the anging from close-up to full-length, just switching the microphone buttons. As there is a distance, in our esent lay-out of the studio, of about n feet between the position of the ll-length picture and the close-up anner, this cut was very valuable.

In this first production, two microones were used for speech pick-up. he one used at the close-up (announcg position) was at normal level, it ing possible to place it close to the erformer without it appearing in the cture. The second mike, placed in rogram position, was more difficult to andle. This mike, suspended from the eiling to keep it out of the picture, reuired an increase in amplification of) decibels over normal because of the istance from the players. At times xtraneous noise found its way into ie scenes, such as the rustling of clothng, ticking of watches, etc. The hard laster wall necessary for clear definon of the full-length picture caused it of echo.

In the two following productions a ifferent picture-presentation was atempted. The only way to describe it s to call to mind the method in the oving-picture technique of the camera oving up on the persons or drawing way from them without a break in the icture. An approximation of this effect was arrived at by having the actors ove to and from the photo-electric ells, as they spoke their lines, as the ction of the script called for. This was ot as successful as it was hoped, beause, due to the inelasticity of the quipment described above, the operator as to keep the actor in focus, and at he same time maintain his object in the iddle of the scanning beam. A change n position means a change in focus and lso a change in the deflection of the irror used in indirect scanning. Conisely, the sought-for effect was to take full length picture, and without any ppreciable change in the sequence of ictures, arrive at a close-up. "This can e done," Mr. Haworth stated, "but not vith present equipment."

Only one microphone was used in hese two productions, this being dirctly in front of the actors, turned at n angle to kill the echo from the wall, poken of above. A little more amplifiation than normal was necessary, the players being about three feet away rom the microphone. In one of these productions, two scenes had musical background accompanying the lines. It was found in the first show that music in the studio with the microphones pitched so high was impractical, overbalancing the speakers, so in the later productions the music was faded in, played from another studio, on cue from the control room of WMAQ.

"It is readily seen that speech-pickup necessitates as much, if not more, thought than the picture, at present," Mr. Haworth explained. "The television equipment being so unadaptable to changes during the course of action of a show eventually will bring about a microphone placed on a movable arm, such as the case in the talking-pictures, to follow the placement of the actors.

"I have an idea (I've had many!) that in time, the principles of stage-lighting positions may well be adapted to the placing of the photo-electric cells. Stage-lights project light to the object, ergo, in television the object reflects the light to the cells! But perhaps before that time arrives, the Merlins of the control rooms and 'labs' will be broadcasting programs made on sound-track film especially for television broadcasting!

"That last statement bears a prophecy? Who knows? All we can do is to wait for our chance to produce something—anything!"

WGBS-W2XCR Television Invades Broadway

"WE propose to do for radio what Warner brothers did for the motion pictures a few years ago—but with reverse English, so to speak. They added sound to sight, thereby bestowing the inestimable advantages of dialog and sound-effects to what for twenty-five years had been simply a pantomime or dumb-show, moving ghostlike upon a screen. We are adding sight to sound on the air."

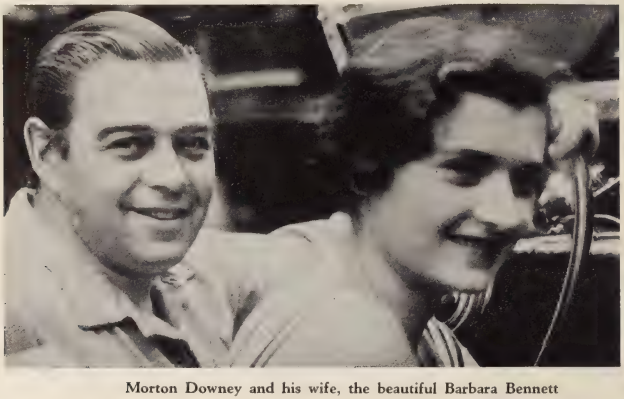
The speaker was Dailey Paskman, president of the General Broadcasting System, Inc., and director of the radio station which it operates, WGBS in New York. Mr. Paskman's snapping black eyes grew dreamy as he gazed, through a wide window of his sky-scraper office across the town to some far horizon which only he could see; perhaps he was gazing with the eyes of television into the future.

He knocked the ash from his cigar as he went on: "For ten years Radio has been a phenomenon of voices and music mysteriously emanating from a magic box in your living-room. Just that and nothing more. As long as Radio was limited to the presentation of entertainment by sound alone, it was even more greatly circumscribed than were the old silent movies, for they at least were able to fall back on 'subtitles' in order to get over certain ideas to their audience; whereas Radio has had to depend entirely upon words or music to convey the impression of action, of plot, and of scene to their much greater audience. . . Audience, by the way, is an accurate term for the Radio public, since it implies the sense of listening rather than seeing; the crowd of spectators in a movie theatre would have been more accurately designated as a 'visience'! This term might well be applied to the present followers of television broadcasting.

"But since our viewers receive both the sight and the sound of our broadcasts, a new nomenclature will have to be coined, and some compound word found to describe the simultaneous Radio-listener and television-viewer, whose numbers are rapidly increasing from day to day.

"WGBS is of course the first station in New York City which is broadcasting a considerable portion of its regular radio programs by television as well as by sound. Our television channel is the short wave length of W2XCR, which is the experimental station of the Jenkins Television Corporation of Passaic, New Jersey. At this date, we are one of only three regular stations in the entire United States broadcasting sight and sound simultaneously, and one of perhaps a half-dozen in the world so engaged—the others being single national stations in European countries.

"We have always pioneered and we hope we always shall. We were a pioneer station of New York and of the United States. We pioneered in the presentation of certain types of Radio entertainment such as plays, minstrel shows, remote control pick-ups, special events, electrical transcription programs, and so on; and now we are really proud to be the pioneer in television in New York.



"Our new special television studio at 655 Fifth Avenue, where is located the transmitter of W2XCR, has been open now for only a little over four months, and we are glad to say that the progress made in television program production technique under the direction of Mortimer Stewart, television expert, has been gratifying so far.

"In the course of our inaugural program, we presented with good results scenes from seven then current Broadway shows, ranging in character from the 'Green Pastures' to the 'Silent Witness'; a score or more of stars of the legitimate stage, musical comedy, vaudeville, the talkies, the Radio, the circus, the prize-ring and other locales of the sports world, and representatives of society and officialdom. . . Since that exciting night we have managed to hang up a few records of various sorts, including several 'firsts', such as our television wedding; fashion parade and selection of Dagmar Perkins as Miss Television. We have shown dances by Maria Gambarelli (Gamby) and Patricia Bowman; boxing and wrestling matches by Jimmy McLarnin, Primo Carnera, Ray Steele, Jim Londos, Hans Kaempfer, and swimming form by

Riding the Crest with Morton Downey

By GRENVILLE RICHARDS

Morton Downey and his wife, the beautiful Barbara Bennett

"RIDING the Crest with Downey" is no job for any one man.

The man must have a vast store of nervous energy and reserve, for when he gets under way he keeps moving—there is never any dead air under his sails.

For instance, Morton Downey recently resumed and completed his contract with the Paramount Theatres in Manhattan and Brooklyn. It was some weeks ahead of the date on which his physician had deemed it advisable, but there was no holding him—the more so in view of the fact that Mrs. Downey, sunk very, very close indeed to the border line between life and death—had just been discharged from the hospital.

When the medical fellows finally said that she was well enough to go her way, Morton had everything all planned. He had secured a place on the shores of Long Island Sound up near the Connecticut line, and there he bustled her away to recuperate.

From then on there was no holding the boy. He cut loose on a round of activity which—though it was only feverish to others—went by for Downey with the ease and smoothness and lack of evident effort of a meandering mill-stream. He was happy, he was gay. Life was rosy and in everything he saw fun and a joke—and I might add here—to the temporary discomfiture of various of his many friends. For when Morton begins to see jokes in things you as well as the next fellow may well be the joke of the moment.

He had just started his new contract as exclusive artist of the new Camel Program on Columbia's air—two broadcasts a day—six days a week—twelve broadcasts a week. He resumed his theater work—two appearances a night—sang for recordings—sang for theatrical producers—sang for himself out of sheer happiness.

He was on the go every minute that he was in the city, and then each night broke all sorts and manners of speed laws to get back to the country and Barbara at the earliest possible moment.

Take this as an example if you will. One night he made his early appearance at the theatre—then to the studio for the first broadcast—heard in the Eastern area—off to a party given by his sponsors in honor of the new and already admittedly successful program—over to the Brooklyn Paramount house again for the second show—back to the studio for the second broadcast, heard on the Pacific Coast and all betwe

Morton and his manager paused breath. They were supposed to go b to the party.

"Gee Jim," Morton said, "I am ab lutely done in—tired as hell—asleep my feet."

"Gosh Mort (though perhaps called him Mr. Klotz, a favorite ps donym) so am I. I'm dead on my fe Think I'll go home and turn in."

"Oh come home with me," Dowr suggested. "I've got to stay in to tonight for that early appointment morrow."

"Okay with me boy," said Jim, a off they went to East 86th street a the guardianship of earlier-mention Astor phalanxes, and the indefini eerie night noises of river traffic.

They were all in, these two, a tumbled into the sheets just as soon they got in.

Now this manager chap, Jim, lik a joke just as well as Morton, and usually the conniving partner in t latter's nefarious schemes leading to momentary and ludicrous discomfit of their friends, but he also likes sleep—and plenty of it.

Jim had just got his nose buried a nice down pillow, and was revelli

sensually in that intermediate state near the border of sleep when the subconscious takes command and floats us away. Another moment — and one good snore—and it would be all over.

"Jim, come here quick!"

The voice was Morton's, and it came not from the other bedroom as it should, but from the living room at the front of the apartment.

HALF-AWAKE, Jim immediately thought of something wrong—a rat, a cat, or a house afire across the street, and jumped out of bed. Full consciousness and a fuller realization, that, knowing the Downey nature, he might expect anything, came as his feet hit the floor. His progress to the living room was wary, silent and stealthy indeed. He had had the forethought to bring along matches, and when there was neither sight nor sound of Downey he lit one of them.

Morton, the chap who was "out on his feet," was crouched behind the piano, clad in pajamas and waiting to spring out on the unwary Jim with a bloodcurdling shriek from the gloom.

The little "joke" having failed they were back to bed again, but sleep did not seem anywhere about—even around the corner.

Downey finally tumbled out again with a pointed comment on where that idea of counting sheep could go, and hunted up some tablets guaranteed to successfully woo the favor of Morpheus.

About this time both felt as if a sandwich was not such a bad idea, and repaired to the kitchen—and there they sat and talked and smoked and drank —milk — on and on to that moment when the cold sullen grey of the first dawn light outside gave way to a faint flush of rose.

Then they yawned, stretched, went back to bed and slept like babes, and without the help of sure-fire sleeping tablets that had failed to "perk."

But do not get the idea Downey spends his hours, sleeping and waking, in thinking up and carrying out pranks on his friends. He did not invite Jim up there for the night because he looked forward to scaring him out of a year's growth, nor even—save in slight degree — because he hated the thought of Jim journeying way out to the wilds of Jersey at such an hour.

Principally it was by reason of the fact that Morton does not like to be alone. One person around him is all right with Downey, but a dozen or so is even better.

There are, perhaps, no parties more enjoyable than those which Morton stages in his home for friends now and again, and as might perhaps be suspected, it is real people they are who come to them. If there should be a misfit at one of these gatherings—by reason of indigestion or a tough day at the office or some such excuse—certain it is that—ere the evening is half spent Morton will have the delinquent kidded into line and will have provided some rare humor for the rest of the assemblage at the same time.

It is an infectious sort of thing, this good nature of his — but whisst and whurrah—does the lad love an argument.

A rare treat it was the other night when the gang was waiting around for the second Camel broadcast of the evening. Everyone in the reception room at the studios seemed concentrated in one corner when I came out of the elevator.

A little elbowing and pushing—wholly politely of course—and as more than half suspected, there was Morton parked in the center of the mass.

The session had evidently graduated from the story-telling stage, for Downey and Jacques Renard, the orchestra leader on the program, were hot in argument.

Things did seem a bit topsy-turvy after I had got the trend of their impassioned statements — for they were boasting—not of what by reason of the fairy wand of Radio they had come to earn—but of the smallest regular salaries they had ever made as entertainers.

MORTON thought he had the set-to clinched when he got down to fifteen dollars a week at the beginning of his days with the Whiteman band, when he sat with the boys and held a French horn to his lips that did not play, and got up once during the program and sang a ballad.

He was really disappointed when Renard countered with the fact that once—oh so many years ago—he had played the fiddle at a Sebago Lake resort in Maine for seven dollars a week and his board.

Not to be squelched, Downey had his final comeback ready:

"Yeah—well the seven bucks was for the wear and tear on the fiddle, and your board must have set them back plenty."

THIS concludes the series on Morton Downey. RADIO DIGEST *has traced the career of this newest of great Radio stars from humble beginnings to his present position of fame and success. Morton Downey is indeed "Riding the Crest," as we predicted he would long before he attained his present popularity as a Radio celebrity.*

Perhaps I can give you a clearer picture of the real Downey than in any other way by detailing an average evening in his company. We set out from the studios after the early broadcast, Downey, Jim and myself—the Three Musketeers—or as Downey insisted on having it—"The Three Mosquito Eaters, Mr. Klotz, Mr. Dooley and Mr. Hymenhauser."

TO THE Tavern for dinner, which Morton identified as the first place he ever had a charge account in New York. In the early days, when money was more welcome than certain, Morton, it seems, could always be sure of a feed at the Tavern, and perhaps the confidence born of being able to sign his meal checks in those lean days was not wholly unrelated to that later and constant confidence in self that has carried him along faithfully ever since.

Always the mimic, Morton talked "American" to the captain, English to the waiter, Fred, and with another old-time friend among the waiters, an oldish chap with his feet solidly on the ground, in an Irish brogue so pure and thick you could cut it with a knife.

Believe it or not, Morton took one look at the menu and said "Lamb Stew"!

For the ensuing half hour, between mouthfuls of lamb and dumplings, he passed the time of day with no less than twenty of as varied an assortment of males of the human species as I ever hope to lay eyes on in New York: men-about-town, aristocrats and actors, has-beens and will-be's, and just plain chiselers. The man has made a vast legion of friends in his short span of years and I for one will take oath that he has never forgotten one of them.

Incidentally, though I have sat with Downey here and there in a variety of places, this was the first time that his far-famed method of calling the attention of a waiter has been fully and adequately demonstrated.

Fred, the waiter, was at the far end of the hundred-foot room when Morton wanted something or other. There were a lot of people there and consequently a lot of talk. Suddenly a blast cut loose right beside the old right ear, my good one, and nearly ruined the thing. Picture a suddenly punctured high-pressure steam pipe, or air escaping through the valve of a heavily-loaded tire—only about one hundred times louder—and you have this waiter signal. And did he run double-quick!

From there it was out on the rounds again. Downey reached over across the dash of the car and suddenly the car was filled with music.

"Don't think that thing is in here for entertainment," Morton apologized

(Continued on page 52)

"JUST A MINUTE—a treat for you—see who wrote the story on the opposite page, 53, then guess who I am. Righto! But, Mr. Ambrose J. Weems (my *nom de prune*) to you, sir!"

Lawyers Attack

Wave Grab!

Standing Committee of Bar Association Vigorously Assails Fess Bill and Calls Attention to Menace in Setting Aside Channels for Special Interests

THEY shall not pass!

Like the embattled Frenchmen at Verdun this will be the watchword of loyal defenders of the American Plan of Broadcasting when the enemy hosts launch their attack to cleave the present order by legislation at the next session of Congress.

There is no doubt but that a new and even more vigorous effort will be made to upset the present order not only by revival of the bills that were left stranded at the last session but by possible new maneuvers.

Backers of the Fess Bill have already announced that it will be reintroduced next December. The Fess bill will endeavor to set aside 15 per cent of all the present broadcasting facilities for use of educational institutions. This in spite of the fact that educational institutions have of their own will surrendered 45 out of 94 stations since 1927, and that those who do operate only use for educational programs 283.85 hours per week out of 3,669.2 hours per week placed at their disposal. And 2,439.92 hours of the precious time available and reserved for them is silent.

It is probable that the Glenn Amendment, which would reserve one of the remaining channels for the exclusive use of labor, will also come up for passage. The Shipstead-Sirovich bill, of similar design, is promised for fresh consideration.

One of the most encouraging moves against this menace of the Wave Grab, which has been so vigorously fought by Radio Digest and its readers, is the detailed exposure presented in the report just issued by the Standing Committee on Communications of the American Bar Association. The report is signed by Louis G. Caldwell, former general counsel of the Federal Radio Commission, who is chairman of the committee; Cassius E. Gates, William C. Green and John C. Kendall.

"No more formidable legislative issue faces the next Congress in the field of Radio regulation than that raised by proposals to require the commission to set aside and reserve broadcasting facilities for particular groups or interests," reads the introduction to this section of the report. It adds that "according to all portents" bills similar to those already enumerated "will be vigorously pressed at the session opening next December.

"THE minimum consequences of enacting the Fess bill into law and appropriating 15 per cent of the total broadcasting facilities (the equivalent of 13.5 channels) for special use can readily be seen," states the report after outlining the engineering problem involved. "At one extreme it would mean putting out of existence about 30 stations on clear channels (most of them of high power representing large investments); at the other extreme it would force the elimination of 240 local stations of 100 watts or less, plus about 50 regional stations of 250 to 1,000 watts. . . It is difficult to calculate the loss both financially to the station owners and in terms of service to the listening public. Many communities that now receive only one program would find themselves without any service (except possibly one of continuous educational matter). Other communities that have a choice of two or three programs would find themselves correspondingly reduced.

"What could be done with the 13.5 channels if devoted to the exclusive use of educational agencies? It is clear that even if they were all put to use by high power stations on clear channels (which, generally speaking, is the only way of covering large areas) they could not be made satisfactory reception to more than a comparatively small fraction of the area of the United States. This fraction would receive the proposed educational service; the rest would not.

"Strangely the sponsors of the Fess bill have no plan or program for putting the proposal into effect, for avoiding or mitigating the havoc it would cause, or for using the 13.5 channels so as to give a country-wide distribution for the material they wish to broadcast.

"Yet, they seem willing that the finest broadcasting system in the world should be wrecked, on the strength of plausible utterances which, if carefully studied would be declared unsound by the departments of physics in every one of the educational institutions in behalf of which they profess to speak."

The report presents a history of the growth of Radio broadcasting into a program service "of sufficient excellence and variety to meet the needs and desires of all substantial groups in the community within its range. Regarding legislation to regulate the amount of advertising to be permitted.

"THE records of the Federal Radio Commission show that in May, 1927, there were 94 educational institutions licensed to broadcast in the United States, out of a total of over 700 stations. On March 9, 1931, the number had diminished to 49 out of a total of about 615 broadcasting stations. Yet to quote from a recent address by a member of the Commission (Commissioner Harold A. Lafount): 'The Commission has never cancelled a single license of an educational institution. The reduction in the number of educational stations since 1927 has occurred by virtue of voluntary assignment or surrender by educational stations of their licenses, because either they were unable for financial reasons to maintain

them, or because they did not have sufficient program material to continue operation.' "

Of the 49 stations now licensed to broadcast from educational institutions Commissioner Lafount found as a result of a questionaire that only one third of the time assiged for their use is being utilized, "out of the precious limited total."

"Of the 1,229.28 hours per week so used only 283.85 hours have been devoted to education. Even this figure does not take into account the fact that many of the 49 stations close down for the summer.

"With respect to commercial stations, the compilation showed that 3,457 out of a total of 33,784 hours, better than 10 per cent, are being used for educational broadcasts, a larger percentage of total time than that of the educational institutions themselves. . .

"THERE is, of course, no general agreement as to what constitutes an 'educational program,' as to what types of educational programs are suitable for broadcasting. . . A program broadcast by an educational institution is not necessarily educational, nor is one broadcast by a commercial station necessarily non-educational, although the contrary is frequently urged. . . There is a fundamental issue as to whether the determining standard is to be the wishes of the majority of the listening public or the beliefs of a few individuals as to what the public ought to listen to. . . Under the auspices of the National Advisory Council on Radio in Education, very constructive work is now being done in the direction of achieving, through study and co-operation of educators, of improved and enlarged educational Radio programs for the use of broadcasting stations."

Concerning the Glenn Amendment and the Shipstead-Sirovich proposal the report states that they differ from the Fess bill "in degree only and not in principle. All three proposals conflict with the conception of a broadcasting station which was announced by the Commission in one of its decisions and which the committee believes to be sound:

" 'Broadcasting stations are licensed to serve the public and not for the purpose of furthering the private or selfish interests of individuals or groups of individuals. The standard of public interest, convenience, or necessity means nothing if it does not mean this. . .

" 'The entire listening public within the service area of a station, or of a group of stations in one community, is entitled to service from that station or stations. If, therefore, all the programs transmitted are intended for, and interesting or valuable to, only a small portion of that public, the rest of the listeners are being discriminated against. . .

" 'There is not room in the broadcast band for every school of thought, religious, political, social and economic, each to have its separate broadcasting station, its mouthpiece in the ether. If franchises are extended to some it gives them an unfair advantage over others, and results in a corresponding cutting down of general public service stations. It favors the interests and desires of a portion of the listening public at the expense of the rest.' "

Members of the committee concur in stating that the American Plan of Broadcasting is the best. They advise that none of the proposals should be enacted into law.

Since the adjournment of the last Congress various notable Radio authorities have studied conditions abroad.

HENRY BELLOWS is right. War has been declared against the American Plan of Broadcasting.

It appears to be a war of attrition to wear down the good will between the Listener and the Broadcaster.

The most desperate pressure is to be brought to bear on Congress to pass the proposed Fess and kindred bills.

Should these bills pass it will be the opening wedge to break up the whole system by diverting clear channels to various group interests.

Watch developments. Talk to your neighbors. Get everybody to write to your Congressman to oppose these bills.

Dr. Julius Klein, assistant secretary of commerce and veteran Radio commentator returned early in the summer from a study of European broadcasting more than ever persuaded that the American Plan of Broadcasting has no equal. He said:

"There is no more warrant for a governmentally-controlled Radio system in the United States than there is for a governmentally-controlled chain of newspapers all over the country.

"In most countries Radio is a government monopoly, sustained usually by some form of special license tax on Radio receivers. The American business genius and the development of advertising an inherent feature of all our commerce has planted an institution which sustains itself, without the sinister influence of bureaucratic control so common elsewhere. . .

"American advertisers must undertake to educate, inform and entertain, and are perpetually under competitive fire which tends to correct errors of all degree," said Dr. Klein, and continued:

"I think the best judgment is in agreement that our free field for Radio broadcasting represents a compliance with American temperament and American requirement, and possesses values in operation that are available nowhere else.

"The income available to Radio broadcasting demonstrates that final point. Sir John Reith, director of the British Broadcasting Corporation, which conducts the English monopoly estimates that he has an annual budget of $7,000,000 to provide Radio entertainment and education for the entire British nation. Compare that with the $150,000,000 which is annually laid out for the American listener.

"I think none of us would desire to see the service in the United States take the form that has been imposed upon Radio abroad. At best the governmental systems lean to heaviness and lack of variety in programs; while at worst, they degenerate to propaganda mechanisms aiming at the rigid enslavement of the popular mind to the particular ideas animating a controlling bureaucracy."

Henry A. Bellows, formerly a member of the Federal Radio Commission, now a vice-president of the Columbia Broadcasting System and chairman of the Legislative Committee of the National Association of Broadcasters, sounded a sharp note of warning against "the chiselling" legislation aimed to cripple the present system of American broadcasting. He spoke at the first regional meeting of the association held in San Francisco a few weeks ago.

"I AM inclined to think," he said, "that we broadcasters are the most guileless, trusting, credulous lot of men in the world. The traditional idiot who lights cigarettes in a powder factory is a marvel of sanity compared to us. And the strangest part of it is that most broadcasters absolutely refuse to look the facts in the face, or to recognize the power and activity of the forces which are fighting for legislation hostile to broadcasting, and quite possibly ruinous to it. . . Broadcasters have in general adopted the ostrich policy of hiding its head in the sand to such a degree that they no longer even see the perils from which they are hiding.

"First there is the danger of legislative inroads on the broadcast band of frequencies. Suppose, as the Glenn Amendment provided, that one channel is set aside for organized labor. Suppose the Fess bill had passed, and 15 per cent of all our broadcasting facilities were turned over to educational institutions. What would happen? Do you think for a moment that Agriculture would sit tamely back without demanding a share of the spoils? How

about the demands of organized and commercialized religion? The moment Congress establishes the legislative principle that wave lengths within the broadcast band are to be dealt out as rewards for political support, broadcasting as we now know it in America is doomed.

"Remember that back of all the efforts of special interests to secure wave lengths for themselves is a tremendous amount of pressure on Congress to destroy commercial broadcasting entirely. I don't think I need to tell you where most of this pressure originates.

"Competing media, having tried vainly to discredit broadcasting as a profitable method of advertising, are now trying to strike deeper, and to create a sentiment in favor of a tax-supported, advertising-free broadcasting system. . . The danger lies not in legislative overturning, but in legislative chiselling. Take away a frequency here; a frequency there; crowd the survivors a little more closely together; put seven stations on a wave length where now there are four: This is the program of the enemies of American broadcasting.

"More than this, disgust and weary the listeners by forcing them to listen to hours of propaganda, dreary lectures, interminable reports—this is the best possible way to kill off public interest in broadcasting, and to lessen its value commercially.

"The first big legislative battle is to keep broadcast allocations out of Congress. In such a battle, a battle for existence, nine-tenths of the broadcasters are content to sit back and do nothing."

Mr. Bellows was one of the first to call the broadcasters' attention to the menace of the Fess bill and created a sensation with his outspoken denunciation of the Fess bill and what it represented during the convention of the National Advisory Council on Radio in Education last May. He is a far seeing and militant defender of the American Plan of Broadcasting.

ONE should not confuse the National Advisory COUNCIL on Radio in Education, which is opposed to the Fess bill, for the National Advisory COMMITTEE on Radio in Education, which is anxiously promoting the Fess bill. Armstrong Perry who has made a specialty of Radio writing for some years now has a job as director of the latter organization and is getting himself quoted a great deal in the newspapers on how terrible broadcasting is in this country. Recently he sailed for Europe. He succeeded in getting an interview through the Martin Codel newspaper syndicate of Radio news as follows:

"Commercial interests appear to be responsible for statements that Europeans are dissatisfied with the programs in their own countries, and that they want the American system which is operated primarily for advertising purposes. *(This comment should be well received by some publications—Editor.)* He said his observations, especially at the recent conventions of the National Education Association in Los Angeles and World Federation of Education Associations in Denver, were directly to the contrary.

"All of the persons interviewed had had an opportunity to hear programs in the United States as well as in their own countries," said Mr. Perry. "Not one of them expressed a preference for the American programs. All were opposed to opening the air in their respective countries to commercial advertising."

Mr. Perry doubtless will have a jolly good time getting similar statements from other people in the 39 countries he is to visit on the other side of the ocean. He possibly may ask a few of the people in the 48 states on this side of the ocean as to their preferences when he comes back, or later, if he happens to think about them.

American Radio For Americans

By William S. Paley

President, Columbia Broadcasting System

AFTER a visit to several European countries, lasting two months, I am more than ever convinced that every nation in the world gets eventually the type of Radio broadcasting best suiting its needs. By that I mean primarily that the temper of a people automatically decides in the long run what type of entertainment the Radio stations or networks will provide, and also what proportion of its programs will be given over to cultural presentations, and in what way this education will be administered.

William S. Paley

In the United States, no one, least of all one in my position who has to deal with the supply of Radio entertainment on a large scale to millions of people over a tremendous area, would claim for one moment that we have attained perfection. The more progress we make, the more defects we are able to remedy, the more are we made to realize that even greater tasks lie before us. Pope's words are as true today as they were two hundred years ago: "Hills peep o'er hills, and Alps on Alps arise!"

That is the case just as much in the countries lying on either side of the Alps as on this side of the Atlantic. European problems in broadcasting are fundamentally different from ours. Since the establishment of the Federal Radio Commission we have been able to evolve order out of chaos, by reducing drastically the number of stations and by rationalizing the distribution of wave lengths and power. It is an amazing thing to see thirty nations on the Continent of Europe working in harmony as well as they do, when each as a sovereign state theoretically could claim absolute jurisdiction over Radio broadcasting within its boundaries. Fortunately they cooperate for the common good, but naturally it is not as easy for them as it is for us to punish delinquency and inefficiency on the part of individual stations.

In that respect we have a natural advantage, as we have also in the matter of a common language, and in the fact that we serve at once as many people

Doris Kenyon contributes her say as to the better things about Hollywood

That HOLLY NEWS

Elite of Film Colony Back George Arliss in Broadcast Series to Tell Truth About Their Town

MORE and more we are beginning to realize the comforts of a home. Radio receivers are coming out with new and added improvements each year. In fact one may listen to a concert through the Radio and obtain a better interpretation than he would in the actual presence of the musicians where he would probably hear the particular instruments nearest to the place where he happened to sit with an emphasis greater than the creator of the theme intended.

But let the musically trained technicians take hold of a concert for broadcasting and they will dope out a proper arrangement of microphones and a proper control of modulation so that you have an advantage of listening with half a dozen ears so placed at correct angles as to get the proper blend of harmony.

And now we have the Hollywood Radio Newsreel. That is bringing the talkies to your home minus only the screen—and even the screen is now possible with the advanced stage of television. The voices that you hear in the Hollywood Radio Newsreel are precisely the same as you hear them in the picture theatre—and that is a big step toward breaking down the prejudice against the so-called electrical transcription, or recorded program.

It is a big idea the proportions of which cannot be fully comprehended at first thought. It came about, we are informed, through a speech made over the air by George Arliss the dean and "Defender of Hollywood." Mr. Arliss resents bitterly the snippy attitude of many self-assumed "superior persons."

"When anyone leans toward me with sorrowful eyes," said Mr. Arliss, "and murmurs, 'But, Mr. Arliss you don't really like Hollywood, do you?' I know that I am in the presence of one of these superior persons; and I answer, 'Yes, I do like Hollywood.'"

In his speech the famous actor pointed out that the people who are in the pictures must keep themselves physically and mentally fit to perform the work required of them.

"Suppose that a star should come along an hour late to the studio," he said, "that hour would cost the management thousands of dollars. . . What are the actual facts? The men and the women of the stage have to reach the studio at eight in the morning, often earlier. They have to look bright and sparkling, and have to be prepared to memorize and speak lines at a moment's notice. They must have every faculty keen and alert. Is it possible that they could maintain this physical fitness if they did not lead reasonably quiet and sober lives?

"Of course there are black sheep; of course there are scandals. But remember there are 30,000 actors and actresses in Hollywood and every one of them is potential copy for the newspapers. To keep out of print you have to be not only respectable but lucky."

This speech was the apparent inspiration for the Hollywood Radio Newsreel which you may hear, and by closing your eyes "see," sitting quietly at your home near your Radio set.

THE editor of the fabled Daily Press had listened to the Arliss program and heard him say in conclusion, "I wish some honest person would come to Hollywood and write about it . . . somebody who hasn't any axe to grind . . . so that the public might be told the truth about life here as it really is."

The managing editor called in his star reporter, Don Kelly.

"How would you like to go to H lywood?" he asked.

"Hollywood! Oh Boy!"

At that instant the Arliss prayer in process of being answered. D listens carefully to his instructions.

"Dig up new stuff. Get a fresh sla on personalities and things."

There are other hints and suggestio before Don boards the train for H lywood. He meets a girl on the tr also Hollywood bound. She becomes elusive creature and through her t young reporter runs into many a st ring adventure.

So there is a thread of a story as t Radio Newsreel unwinds from week week. Among the notables who a flashed across the scene are such p sonalities as Dorothy Mackail, Doug Fairbanks, Jr., Winnie Lightner, E lyn Knapp and in the course of t month of September will come a lease with John Barrymore as the st

Dorothy Mackail does not think the capital is at all bad and tells the world o

WOOD *Radio* REEL

Don Kelly, the reporter who goes to Hollywood to get the facts and give the world a better opinion of the Land of Picture Dreams

The question has often been asked as to why famous movie stars do not have a more conspicuous part in Radio. Their work has required their presence in the studios at times when the greatest Radio audiences were listening. But with the perfection of the massive 16 inch recording discs that are used in talking pictures and their adaptability to Radio transcription this problem has been solved. The Hollywood Radio Newsreel is produced just the same as the sounds are recorded for a sound picture film. Every precaution is taken to prevent the taking of extraneous noises. The result is a broadcast that can not be distinguished from the original voices should they happen to be in the studio at the time of the broadcast.

In this way the producers of the Radio Newsreel can acquire the cooperation of the film celebrities who may go to the Warner studios where the Hollywood Radio Newsreel is produced, or, to make the scene even more realistic, the record may be made right on the stage where they have been at work. This makes it possible for the Radio Newsreel producers to acquire the star at his or her most suitable convenience, whether it be at 4 o'clock in the afternoon or 6 o'clock in the morning. To hold the star for a personal appearance at a certain studio at some specific period on the day's broadcast program would be inordinately expensive, either for the star or for the producer. When you hear a film celebrity—a real one—on a special sponsored program for some special gala event you may know that this notable is being well compensated.

This month, if you have not already done so, you will hear the great John Barrymore. To get John Barrymore on the Hollywood Radio Newsreel was no simple matter even for such a resourceful and astute newspaper reporter as Mr. Don Kelly. Don needed a friend, and whom should he find but Mr. Wilson Mizner, the playwright and producer who knew John Barrymore way back when they stumbled together over the hot ruins of the San Francisco fire (earthquake). Together they approached the unapproachable. The miracle was performed.

Jaaan-ette? Janet Gordon, where are you? This is the elusive miss who disappeared

WE HAVE heard the play-back on this edition of the Radio newsreel and it really is a gem. It will doubtless be conceded as one of the greatest single shorts ever to have been broadcast. King John the Great is at his best playing the part of Svengali. But there's a touch to his lines as you hear them through the amplifier that you can get in no other way. Your imagination paints a picture that you do not see on the screen—a mingling of John Barrymore and a mysterious creature of fiction.

You are standing beside Kelly, Mizner and John as they exchange casual pleasantries and then John goes into his act. He is no longer Barrymore but a weird and dominating creature with a voice that chills and thrills. You are hypnotized as you sit in the dim penumbra of the lighted stage. And when it ends you are still straining your ears for that penetrating voice. But you hear only the voice of Mizner who says, "This man doesn't act *Svengali*, he *is Svengali*."

The spell is broken. *Svengali* has vanished into the nothingness from whence he came. And it is John Barrymore who takes up the answer to Mizner's comment. He says: "I heard what you said, Wilson. It's a left handed compliment. This fellow *Svengali* was the dirtiest old swine in the world, with gravy all over his vest."

Then Don Kelly comes out of his trance. He doesn't seem to know exactly what to say. But Barrymore does not linger long, and the reel snaps to a close leaving you impressed with the feeling that something has come to you out of your Radio that is big and unique.

Barrymore is the feature of this particular edition but all the time you are kept intrigued by the running thread of the story. You are anxious to hear the next installment.

Don Kelly, the reporter, is portrayed by Frederick MacKaye of the Warner Brothers—First National Studios. Radio listeners will recognize Miss Evalyn Knapp, who is featured with him throughout the series, as the little beauty frequently identified with the George Arliss productions. No one expects to find a throbbing love story in a newsreel and this Radio newsreel is no exception. But there is a distinct strain of romance. Janet Gordon whom Kelly meets on the train as he is whirling toward Hollywood has inspired him with something more than curiosity. There had been one glorious night on the observation platform as the train rolled over a moon-lit trail toward the Pacific. In the morning he had hoped to greet her before she could leave the train. But he discovered that she had already departed. The young woman, he learned was Janet Gordon. She had told him she had a contract to act in the movies with Warner Brothers. But he could

find no one at Warner Brothers who had ever heard of her.

True to its name the Radio newsreel picks up its recording devices and goes out after the news. So it happens that as Radio Digest goes to press the real reporters back of the production are getting ready to meet a new European cinema star scheduled to arrive on the Ile de France. Hollywood has called and beautiful Lil Dagovar has kissed Paris good-bye. (See picture in rotogravure section.)

Along side of the sound film cameras will be seen the Radio newsreel apparatus as the ship on which Dagovar is a passenger comes into New York harbor. She will be interviewed, and photographed. Later, as you sit in your easy chair with the Radio newsreel tuned in you will be able to hear and visualize the whole incident. You will recall the scene of many other similar incidents you have seen in moving pictures and you will be able to fill in the background to suit yourself.

And it will be real news for the release will not be stored away for some future time but will be put on the air immediately. In doing this the Radio Newsreel of Hollywood doubtless will initiate a precedent that may eventually evolve into a significant feature of future broadcasting when a similar news service will be furnished regularly to those more remote stations not now hooked up with the big chains for such events; or news events may be syndicated by transcriptions which are not covered by the big chains—the kind of news which newspapers call "features."

For more reasons than one you will find it well worth your while to tune in the Radio Newsreel of Hollywood.

In fact it may not be too presumptuous to hope that this form of broadcast may eventually prove the connecting link between the present order and that of the ultimate combination of vision and sound—a parallel of the talking picture.

Motion picture film has been and still is being transmitted by the Jenkins laboratories. The complaint has been that the scan lines are too conspicuous. Within a few months the 48 line screen has given way to the 60 line screen. There has been published at various times a report that the Radio Corporation of America is manufacturing equipment that will transmit and receive an image with the refinement of 120 lines to the inch. Some conception of that effectiveness may be gained from a study of the half-tone photographs in Radio Digest which are made on a screen 110 lines to the inch.

The Warner Brothers, who manufacture the discs for the Radio newsreel were the first to produce sound pictures. They used the large disc record, which they still use. But sound pictures are also well produced by R. C. A. on motion picture film through use of the photo electric cell which makes a record of sound produced in a track running on the film beside the picture as it is photographed.

One of the big national newsreels, recognizing the fact that advertising can really be entertaining, has already begun producing what is frankly called an "advertising newsreel." The fact that an oil company sponsors the Hollywood Radio Newsreel does not detract in the least from the interest shown in this feature. If the same oil company should find it practical to present a Hollywood scene at the same time it presents a story will the Radio fans become alarmed?

It's not likely they will. And the Hollywood Newsreel a la sound and television will have solved the problem of cost for production and distribution for the ultimate consumer—the Radio fan who sits at home, looks and listens

To Select Radio Queen

ALL that is new in Radio and television will be exhibited this month at the annual Radio Fair at Madison Square Garden in New York. Also, radio stations all over the country are photographing their most pulchritudinous damsels to contest for the coveted title "Radio Queen of America." It looks as though the judges are in for a tough time of it because there's more feminine beauty in Radio than ever . . . it seems as if broadcast studios are selecting their artists with an eye to television . . . Several freely admit that it is just what they are doing. We'll tell you all about it next month and our pages will be graced with pictures of the leading contestants. A similar "show" will be staged at the Coliseum in Chicago, October 19 to 25. If you can get to either exhibition it will be very much worth your time and trouble.

Hollywood Newsreel artists putting on makeup

Gangling Hill-Billy at 19, he "got religion" and started schooling. Now, College-bred, Bradley and his "hound-dawg guitar" win baskets of fan mail

Bradley Kincaid, Mountaineer

By NATALIE GIDDINGS

WHEN a star shoots into the Radio firmament to burn with a continued bright radiance, it is well to inquire into the reason for its brilliance. What makes it shine more brightly than others in the constellation?

Let us not continue the celestial metaphor, however. It would embarrass Bradley Kincaid. For all his success on the air, he is as simple as the mountain people from whom he came. Let us rather inquire into the reasons for his particular success as a Radio entertainer. That success is phenomenal. At station WLS he received more than 100,000 letters a year for four years. At WLW in *four weeks*, 50,000 people wrote to him. His song books, published only because thousands of his listeners have demanded copies of his songs, have sold to the number of more than 200,000.

And why? Probably because Bradley Kincaid is one of the most sincere entertainers in America. Everyone who meets him is impressed with his absolute true-blueness. There is no "hokum" about his singing. His songs he learned as a child, and since then by going back to his people in the summer to live among them and to write down the things they sing that are new to him. He does not, as many other entertainers do, sing pioneer ballads because he knows there is a current taste for them. It was his good fortune to discover that the music he knows has that elusive quality of being "what the people want."

"Those old mountain ballads are as much a part of me as my hands and feet. I was raised on them," he explains.

Where was he "raised"? In Garrard County, Kentucky, where the Cumberland chain is a blue haze on the horizon, and rock-sprouting foothills give promise of towering mountains just beyond, Bradley Kincaid was born three years before the turn of the century.

He was the fourth child of William and Elizabeth Hurt Kincaid, who had gone to house-keeping in the little warehouse across the road from Grandfather Hurt's four-room house.

Bradley's great-grandfather on the Kincaid side was born in Virginia, a single generation removed from the Scotland that sired his family. But the Virginia Kincaid migrated to Kentucky by foot and by flat boat and settled in Breathitt County. Elizabeth Hurt, Bradley's mother, also was Kentuckian by birth. She could trace her ancestry back to the Hanks family, whose illustrious descendant was Abraham Lincoln, son of Nancy Hanks and Tom Lincoln. Thus Bradley Kincaid was born a true son of Kentucky in a county that lies midway between the Cumberlands and the Blue Grass.

WHEN Bradley made his first appearance, Garrard County had progressed in some degree beyond its wild frontier aspect of the time of Lincoln's birth when the chief habitations were little more than log huts in a wilderness clearing. But the mountain folk who were Bradley's people, the mountain folk who sang the songs Bradley later was to make famous all over the country, were as simple in heart and in manner as those earliest pioneers who carved the Kentucky frontier out of forest and grasslands.

Their wants are few: a clapboarded house strong enough to keep out the wind, with a generous fireplace that is furnace to warm the house, and oven to bake the corn pone and 'taters that are the basis of their daily fare. A little

When Bradley went home to learn new ballads, men women and children flocked to hear him

tobacco growing in the fields sparsely scratched out of the grasp of the stony hill sides, a few chickens ranging the grass, and some fat shoats in the barn yard, with corn to piece out their earnings are enough to take care of their frugal needs.

It was into this atmosphere of simplicity that Bradley Kincaid was born. Six children came after him in the Kincaid family. In the Kentucky foothills they consider it their "bounden duty" to obey the Biblical injunction to "be fruitful and multiply."

"If you find a family down home that has only four or five children, they'll apologize and tell you that the chimney fell down and killed six of them, or that they died of the small pox," Bradley says.

Bradley, of all the family, was the most studious, although in all his youth he went to school no more than three terms. These terms were only three months each, in the heat of summer, when the boys could best be spared between the planting and the harvest. But Bradley read everything he could get his hands on. Like Abraham Lincoln he spent many evenings on his stomach before the fireplace, elbows on the floor to prop up his chin while he pored over the Bible by the light of the fire. There were few books, to be sure, but what there were, Bradley read. He walked miles to borrow almanacs, Berkley's "The Principals of Human Knowledge," dime novels, histories, even copies of old newspapers and the iniquitous *Police Gazette*. He could outspell anyone in the county. Later, when he went to school in earnest, he outdistanced all his classes in spelling and in grammar.

The story has been told before of how music came to the Kincaid family; of how Bradley's father, a fox hunting farmer, traded one of his hounds to a negro for the guitar which Bradley learned to play, and which to this day is called "the hound dawg guitar" after its manner of acquisition. Although his brothers and sisters wouldn't part with the "hound dawg guitar" when Bradley went away to school, and the guitar he plays on the air is a fine one, he still owns that first instrument. Those he plays now, automatically become "hound dawg guitars".

In spite of his early bookishness, Bradley showed little promise of being anything other than the run-of-mine Kentucky boy, lazy, ambitionless, and a little too easily tempted by the jug of moonshine that was part of the housekeeping equipment of every home in his neighborhood. At the age of nineteen he was a big, good natured, good for nothing boy, content to help his father in the fields, and to gang up at night with the other boys in the neighborhood to drink a little "likker" and play his guitar.

Then one of those things happened that religious people call the work of God, and unbelievers credit to Circumstance. At the age of nineteen, Bradley "got religion". It changed his whole life. There was a revival meeting at Point Levell, the town nearest his home. Bradley and the other boys made life miserable for the minister in every way boys could think of to create commotion.

The night before the last meeting, Jimmy Ralston, an older boy, whom Bradley respected, urged him to come into the revival meeting the next day. Bradley was tired of mischief, tired of hanging around outside the meeting house while all his friends and "relations" were in side, so he agreed to go in.

What the preacher said in the meet ing, with Bradley sitting in the fron row, is forgotten. What Bradley remem bers is that he went forward with th "converts" at the end of the meeting, an while the minister prayed over him, i his mind and heart was born a grea craving for education. Still kneeling a the altar, he determined that he woul graduate from college no matter ho much hardship that might mean for hin

That September found Bradley Kin caid starting out to walk to Berea Colleg twenty miles from his home where h could go to school and work at the sam time. He entered the sixth grade in th grammar school. At night he "hoppe bells" in the local hotel to pay his ex penses, for he had no money of his own nor any from home. One can imagin the struggle it must have been for hin to complete the eighth grade of schoo He was of course much older than th children in the grades with him. He wa in fact, a grown man. He was out o the habit of studying. Precocious young sters outdistanced him in classes. Onl in spelling and in grammar he outshon all his classmates. This adeptness an his insuperable determination to have college education helped him to strugg on and complete his grade school educa tion, he says.

Finishing the eighth grade at the ag of 21, Bradley immediately enlisted i the United States army and went t France. One asks if he took his guita to France with him. Strange to say the answer is that the guitar had no even gone with him to Berea, for th Kincaid family wouldn't part with i Naturally, he had no money to buy an other. Too, Bradley wouldn't think o singing the mountain songs. Instead h sang in church choirs, and went abou the community in the summer as soloi with a circuit rider in revival service In the army, he sang lead tenor with a impromptu quartet. Even then, it didn occur to him that outsiders might lik his Kentucky songs.

After the war, he went back to Ber and entered high school. He was 2 years old. During his three years ther he fell in love with Irma Foreman, graduate of Oberlin Conservatory, wh was teaching music in the high schoo Bradley graduated from high school June of his twenty-sixth year. In Augu he and Irma were married. In Septemb he went to work for the Kentucky sta Y. M. C. A.

"Bradley, if you still want to go college, I can take care of myself," Irm told him at the end of their second ye of marriage. The idea of the colle education for him was still paramount the minds of both of them. According they took the $400 they had saved an moved to Chicago so that he could ent the Y. M. C. A college there. Irma we

(*Continued on page 95*)

They Called Ted Lewis Circleville's

Bad Boy

By Phil Stong

TED LEWIS. The name will inspire a dozen associations for vaudeville, movie, Radio, revue and night club audiences — "The High-Hatted Tragedian of Song," "Is Everybody Happy?" "When My Baby Smiles At Me," "St. Louis Blues," a battered but perfectly-trained silk topper tumbling down a straight arm to a deft toe which whirls it back with impossible precision to a dark curly head.

In Circleville, Ohio, where Ted's mother listened to his first chain broadcast, over WEAF and 42 other stations on a Saturday evening of last March the occasion must have aroused somewhat different associations. Mrs. Friedman—for Ted was born Theodore Friedman — must have thought at once of that noisy, busy little instrument the telegraph. It played a large part in the beginning of Ted's career. At least four times it saved him from starving to death and returned him from theatrical ventures to his father's clothing store, the largest ladies' ready-to-wear shop in Circleville.

There are still enough of Ted's old playmates left about Circleville to recall that twenty-five years ago this month Ted fell through the ice on the old Ohio Canal, and that except for good-luck and some fast rescue work he would not now be troubled by the St. Louis Blues. There are others who remember the circumstances of his departure from the Circleville Boys' Band. Ted's entire musical education had come from "Cricket" Smith, the town's colored barber and banjo player. When the Boys' Band gave Ted a clarinet cadenza in "The Holy City" he applied some of the then revolutionary theories of syncopation he had learned from Smith, thus terminating his connection with one of Circleville's most respected musical organizations.

Ted Lewis and his famous hat

Ted's escapades and his frequent runaways made him an undesirable character to the mothers of Circleville. His first flight was with a band which played for the "hoochie-koochie" girls at county fairs through central Ohio. He also got up at five in the morning to blow up the balloon vendors' supply of toy balloons. These occupations, though they seemed romantic to Ted, seemed unsuitable to his parents. He was brought home and under painful persuasion promised not to run away again.

Almost immediately afterward he joined a burlesque troupe—Gus Sun time—at $20 a week, but the $20 turned out to be stage money. For the second time he was rescued by telegraph. His third flight was to the big city of Columbus. He passed out circulars for a clothing company for $7 a week, at first, then worked in his uncle's music store. He lasted three weeks, but learned to blow "Taps" on a cornet. This was a useful acquirement, for the next two runaways were to shows which died either shortly before or shortly after he joined them, to the enrichment of the telegraph companies and the dismay of Circleville's best families.

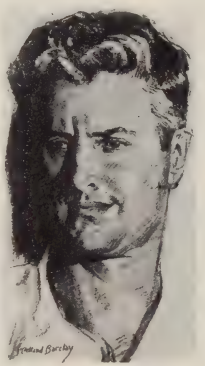
Carveth Wells

Twists *the* Lion's "Tale"

Celebrated Explorer Debunks the Terrors of Darkest Africa -- Says Lions Are Lazy Cats and Had to Feed Them Red Pepper to Make 'em Roar



By Don A. Higgins

EVER since Carveth Wells was frost-bitten on the equator he has been a skeptic. This skepticism was increased when he discovered he had to feed red pepper to wild African lions to make them roar. It warped his life to such an extent that any day now he may broadcast to the world that Little Red Riding Hood ate the wolf instead of vice versa.

Most likely Wells would discover that grandmother ate both of them. He has a habit of establishing unusual facts. Some of his stories are so amazing that they provoke mild expressions of disbelief, such as "Liar!"

That appellation has hounded him from Hoboken to the home of the Hottentots, or wherever his work as adventurer and author has taken him. "For instance," he recalled, "when I was telling some natives in Malay about America, I said I had seen some ice coming out of the sky in lumps big enough to break windows. 'Bohong' exclaimed my native audience, meaning 'liar.'"

Wells recently has dared to reveal his natural facts in a series of talks over a network of the National Broadcasting Company. It was a success. Not one listener wired in questioning his accuracy, although he told how he braved a snowstorm in equatorial Africa, perspired in the heat of Arctic Lapland, discovered fish bouncing on the Malay beach and viewed a flock of telegraph poles dashing along the African horizon.

Carveth Wells

The latter turned out to be giraffes.

A day fled by, and NBC failed to receive a single protest against this prevaricator. Then the letters rolled in. "They are the most surprising and intelligent lot," said Wells as he fingered one asking him to mail back an elephant. None maligned him. A lady wrote, "I am one of those people who never applaud—not even when a trapeze performer breaks a leg." She sent regards.

"You are the only Britisher who speaks clearly enough for we Connecticut Yankees to understand," advised another. Hundreds wrote that his Sunday talks kept them from church. Wells beamed boyishly. At last, truth was being understood for the first time since he wrote, "In Coldest Africa," and compiled his film, "Hell Below Zero."

HE became apprehensive however, on receipt of a letter from a California listener, suggesting "A horseback ride on a gentle, unbridled rhinoceros sounds novel—we are taking Africa into consideration for this summer's vacation." Wells had suggested no such thing.

On the other hand, he has hunted lions armed with hardly more than a pair of binoculars and a feather duster —Wells, not the lions. He had to bump them with the fender of his car to get action for his pictures. The adventurer says lions are lazy. They would rather sleep than eat. So he always went out to look at them while they were sleeping.

He rescued one

Milwaukee Public Museum Photo

Enjoying a friendly romp with a pet bottle-fed lion

A group of Masai . . . These people live entirely on blood and milk

orched cub from an African bush fire, sed it on a bottle and a nanny goat, ipped it by stateroom and pullman r to the Milwaukee zoo. There, the n, now full grown, gets playful moods d pulls Wells' hair by its teeth.

The wildest sight he saw in the Af- an jungle—which isn't a jungle at —was a group of high school boys d girls making whoopee as they rode miles an hour through the African ldt. They sang Rudy Vallee's latest ne.

WELLS' penchant for e peculiar things in nature started hen he went to the Malay Peninsula a railroad engineer. He began an lventurous six years when, on the first ght in his hotel, insects as big as bsters dived from the ceiling into his up.

"What is carrying on here?" he in- ired of the waiter. "What is this orrible creature?" The waiter assured m it was harmless. Wells looked gain and saw the monster turn at the lge of the table, place its forelegs in meditative position and beg forgive- ess. It was a praying mantis.

So the author wasn't startled when e saw fish bounce up on the beaches r wink at him from tree tops, not to ention monkeys that picked their teeth fter eating, or deer that grew only even inches tall.

Life in the midst of this sort of thing lus malaria fever brought Wells to merica in search of health. He was old he would die, but he lived to head n expedition to the Mountains of the Mfoon—a mysterious range lost in the ists of central Africa.

"The climate of equatorial Africa is s delightful as that of Bermuda," Wells aid, "It is temperate the year round. The greatest discomfort we had was rom snow and hailstorms. But when ur feet were being chilled by the snow, ve were compelled to wear sun helmets nd spine pads to avoid sunstroke."

Wells also has traveled in search of queer truths in northern Lapland, the Caribbean, Morocco, Syria, Palestine and Egypt. He saw the inexplicable migration of millions of rodents, called the lemming, in their mad dash from Lapland to death by drowning in the sea. It happens every 21 years.

Wells today is a good-natured adventurer of forty-four years, sweltering over a new book in his musty workshop fronting Madison Avenue, New York. There he was found, handsome and pink-cheeked, dictating his latest work in his best Cornish accent.

"You have said a lot about the freaks of nature," he was reminded, "now tell us a bit about yourself."

"I'm an 1887 Jubilee baby," he began, "I weighed eight and one half pounds when born, and my mother was fifty-one years of age. My father was a Bermudian and my mother a Cornish woman. I am a combination of pirate and Celt. I believe that St. Patrick came over from Ireland to Cornwall on a millstone.

"At four, I went to the village school, and by six I could knit, sew, crochet, make baskets and play the piano, but my hobbies were the breeding of silk worms and white mice. At the age of thirteen, I was at the bottom of St. Paul's School, London.

"Love entered my life when I was fourteen, but ultimately I eloped with my fiancee's younger sister and married her with $30 in my pocket. For two years we lived in the wilds of Saskatchewan on the survey of the Grand Trunk Pacific Railway. We then drifted home to London where I built flip-flaps, wiggle-woggles and scenic railways for White City, London's Coney Island.

"My railway experience stood me in good stead when I next secured a teaching job in the Central Technical College, London's 'Boston Tech.'

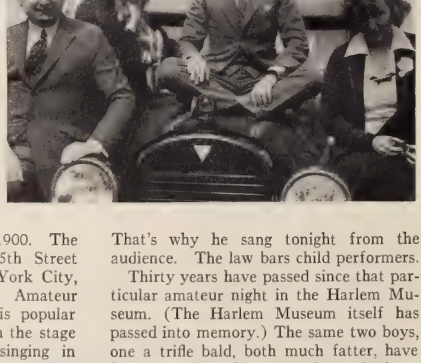
"I was now the father of a beautiful boy, but as my responsibility increased, my salary seemed to diminish. I began to quarrel with my wife. Finally, I decided to seek a job in as dangerous a place as I could in order to get more money and at the same time, make my wife miserable and conscious of my martyrdom for her sake.

I SAILED for the Malay Peninsula and as soon as I arrived began imploring my wife to join me. Eventually she did, and we lived in the jungle until, broken in health, I came to America to die. A diet of liver and strawberries, combined with work as a laborer in a shipyard, restored my good health, and I discovered that it was far more practical to lecture about engineering than to practice it."

Wells is a fellow of the Royal Geographic Society and member of similar groups. He is not a newcomer to Radio. Ten years ago he talked over WEAF before the days of networks. He also participated in the early day fun of the Hoot Owl club of KGW at Portland, Ore.

One of Wells' unusual Radio stunts was the broadcasting of his travel talks to school children while, in different schools, they viewed his films perfectly synchronized to his studio remarks. That was before the days of the sound film. Radio editors viewing these films by Mr. Wells were convinced he had performed a great public service. In fact he had untwisted a badly twisted tale of the African lion's ferocity and proved him a gentle but lazy beast.

Milwaukee Public Museum Photo



Watchful waiting

The h*oofing* Howards

By Leona

Above: Trouping in the old days. Willie and Eugene Howard toured the vaudeville circuits with one act which was so good it held out for three long years.

Right: Willie Howard, Mrs. Willie, Eugene and Mrs. Eugene. Taken in San Francisco when they made the Orpheum theatre electric lights.

IT IS the early winter of 1900. The Harlem Museum, at 115th Street and Third Avenue, New York City, is packed to the doors. Amateur night, a weekly feature at this popular music hall, is in full swing. On the stage a boy, just past sixteen, is singing in smooth, though untrained, tenor voice, one of the popular ballads of the day. A boy, much younger, in the audience joins in, his rich soprano voice blending perfectly with the tenor on the stage.

The song is finished. The audience shouts, stamps its feet, whistles for more. (Mere applauding with the hands would have been considered too effeminate in that audience.) The tenor and his boy partner sing their song four more times before the audience will let the remainder of the show go on.

The evening is over. Two boys go to their homes, enriched by $10. They have won first prize in the amateur contest. They are more determined than ever upon having a theatrical career. The larger boy has his heart set on success in the opera. The smaller boy knows he must wait several years yet, because he is too young to be permitted upon the stage. That's why he sang tonight from the audience. The law bars child performers.

Thirty years have passed since that particular amateur night in the Harlem Museum. (The Harlem Museum itself has passed into memory.) The same two boys, one a trifle bald, both much fatter, have just finished working ten minutes in front of a microphone in the WABC studio of the Columbia Broadcasting System.* They will receive approximately $1,500 for their work from the A. S. Beck Shoe Company, sponsors of the program.

The Harlem Museum was the first and the Columbia Studio broadcast was one of the most recent of many thrills in the careers of Willie and Eugene Howard, who for almost thirty years have been favorite entertainers of America's vaudeville, burlesque, musical comedy and talking picture patrons, and who have now established themselves as great favorites in the hearts of the Radio audie

It would not be fair to Willie Eugene to say that the Radio has bro them a new audience. It would be truthful to say that the Radio has g to them a new way to reach their mill of admirers, for there is hardly a men of their Radio audience that has not them in person. Since the Harlem seum days the Howard Brothers have peared in every city and town in country that boasted a theater. And a safe gamble that if that theater fortunate enough to have an electric the lights at one time or another sp their names. In the vernacular of theater, the names of Willie and Eu Howard have had a longer, susta place in lights than those of any American comedy team. And they still going strong!

THE older folks, flocked to Proctor's in New York to and see Anna Held, Louise Dressler, the movie commedienne, Jack Norw and other stars of that day, will prob remember Willie as the handsome haired boy, who sang popular ballad he carried water up and down the a during intermission. Let him tell about that:

"I was too young to go on the st he said, "The children's society was too strict. So Harry Witmark, the m publisher, devised a way to get by t restrictions. He put me to work water boy and it was my job to sing songs he published as I passed out water to the audience. Anna Held liked my singing very much, and it sure gave me a thrill when she told Mr. Witmark that she wanted me to sing at every theater she played in. So for more than a year I traveled from one New York theater to another with Anna Held. I was too young to go on the road, so I was limited to New York."

It was Eugene who had his heart set on an operatic career. The closest he ever got to this ideal was a hearing

* This article was written at the time the Howard Brothers were broadcasting from CBS, New York.

They're Thousand-Dollar-A-Throw Radio and Stage Headliners Now, but It Was a Long Climb and a Hard One From the Music Halls of Thirty Years Ago to Stardom for Willie and Eugene

Stewart Smith

A rare pose (because it's serious and not clowning) of the two Howard brothers, who are inseparable.

Left: Willie impersonates Al Jolson in the kneeling throes of *Mammy*, while Gene obligingly holds the mike in a convenient position.

ne American Opera House, shortly after ne first amateur night victory.

"I wrote about a dozen letters to the ite Henry W. Savage, manager of the merican Opera," Gene told me. "One f the biggest thrills I ever got was when received a letter from him asking me o come in for a voice test. He told me I ad possibilities but that my voice needed raining. Of course that was out of the uestion. Money was very scarce in our amily. So I got a job in the chorus of *1 Million Dollars,* which was to be a uper-operetta, starring Cora Tanner, oseph M. Sparks, Natio Martinetti and 'hil Ott.

"THAT gave me a big hrill. At last I was in a show. We re-ehearsed for twelve weeks. There was no Actors' Equity Association in those days nd managers could rehearse shows with-ut pay as long as they wanted to. Well ve opened, and within two weeks I was ut of a job. The show closed. My ather at that time wanted me to give up he idea of being a singer and stick to tenography, at which I was very adept. But it only increased my determination o go on. By the way, Pat Rooney, the much-imitated dancer and singer was in hat show, too. He also was far from being a star at that time. His job in the show was to play the hind legs of an elephant.

"I wasn't long out of a job, however. The manager of *A Million Dollars* liked my work and gave me my first part on the stage, a small role in *Quo Vadis,* which ran for more than a year. Wilton Lackaye, Ledo Otis Procter and Carlotta Neilson were the stars in that show. I had to speak about four lines in the show, but it was enough to get my name in the program, and that too was a thrill. I believe I took more programs than they gave out to audiences. I kept hundreds of copies of the programs for years."

"Programs were all over the house," Willie added. "Gene's name was next to the last one. But you would have thought he was the star in the show the way he showed programs around."

Willie's first appearance on the stage was with a burlesque company—Lizzie Evans in *Cozy Corners.* He was a member of the *Cozy Corners Quartet*—all shows in those days, particularly burlesque shows, had to have a quartet—and he stayed with that show during almost an entire season in New York. When it came time for the show to go on the road, Willie, still too young to travel, had to quit.

Gene had returned from a road tour with *The Belle of New York,* and he and Willie decided to work together. They got a job in Williams' Cabaret at 112th Street and St. Nicholas Avenue, a favorite rendezvous of the New York sporting class. Here's what Willie said:

"We were hired for $18 a week, but the first night our tips exceeded $200. That crowd made money very easily. Gamblers and their sweethearts were, for the most part, the majority of the patrons of the place. These people loved to hear the sentimental songs and Gene could sure sing them. Why, one night a woman gave Gene a hundred-dollar bill to sing *The Palms.* It was the first time we had ever seen a bill of that size and for weeks we were afraid to try and change it for fear it was a counterfeit. But finally we got up enough nerve to give it to our father, who took it to the bank and found it was authentic. We sure were thrilled with that. After that you just couldn't get Gene to stop singing *The Palms.* Other songs in his repertoire at that time were *The Rosary,* and *Every Morn I Bring Thee Violets.* My favorites were *When You Were Sweet Sixteen,* and *Absence Makes The Heart Grow Fonder.* The folks liked those songs."

What does it take to make a Radio star? Well, here you have the background, the early beginnings of the Howards. When the Big Moment came to do Big things before the mike it stood them in good stead. They are now ready for Radio or television. They believe that a laugh is always better than a cry.

Maria Georgievskaia

fled from REVOLUTION *to* Fame

By

Maybelle Austin

Maria Georgievskaia, WLWL's Russian Gypsy Contralto

IF you can visualize the peaceful village of Koorsk in central Russia during the early Twentieth Century in "before-the-war" days, surrounded by jutting snow-capped Ural Mountains, nestling in a fertile green valley; if you can imagine eerie, white, moonlit nights, glistening church spires, deep-toned bells calling to vespers, the pounding hoofs of cavalry horses carrying arrogant soldiers of the Tsar clad in brilliant uniforms, and laughing, happy, people who spent their days hunting, fishing, and sleigh-riding—then you have a vivid picture of Maria Georgievskaia's early environment. Had this pre-war mode of existence continued in Russia, Miss Georgievskaia would have had no reason to leave her native soil, and then there would have been no story. Thus does life make playthings of us mortals.

Although her early childhood was spent in this idyllic atmosphere, she was still in her early 'teens when her father entered her in a university. He, himself, was leaving for the United States on an extended business trip and desired to see his daughter settled before his departure. This turned out to be rather fortunate for the young lady, as the Great War broke out shortly after her father left Russia. According to Miss Georgievskaia, in almost breath-taking time, came clamour, confusion, bloodshed, and the red riot of the revolution. All communication with her father had long since ceased; she was practically bereft and alone and almost penniless. So she decided that the only thing to do was to escape from Russia—almost an impossibility under the new regime which had sprung up after the close of the war. Dauntless and unafraid, she packed a few belongings one night, and along with a few other courageous souls, escaped on horseback to the Russian border where she was promptly arrested by Bolshevist authorities. Here was a predicament! According to Miss Georgievskaia, she "made eyes" at the soldiers, cried a little bit, sang a fe of the haunting gypsy songs she h learned as a child, won their sympath and charmed them completely. Aft seeing her in person, it is not diffic to understand their lenient attitude she is an extremely fascinating a beautiful young woman. They help her to a train which took her to t German border, where she again e countered trouble in the form of t Teutonic officials. While holding h under suspicion, they examined her ba gage and were surprised to discover volume of philosophy by Nietsche wr ten in their own native tongue. To fi such profound literature in the posse sion of such a young girl aroused t curiosity of the German lieutenant charge, and he questioned her.

JUST as her beauty a vivid personality won for her the he of her countrymen, here in Germa her intelligence and brilliant mi helped to gain her purpose, and she w permitted to proceed to Berlin. He she got her first position, that of an e tertainer in a cafe. From Berlin, s went to Paris, where for many mont she sang in various cabarets and nigh clubs in the Latin Quarter. The timb and vibrance of her contralto voice, t beauty of her native songs, and her ow appealing personality, won a conside able measure of fame, and so it w that she received an offer of an engag ment from the internationally-famo Cafe Pti-Cant in Constantinople. this city, she appealed to the Americ

(Continued on page 96)

Dorothy Knapp

Lil Dagovar

(Left)

HOLLYWOOD Radio Newsreel scored some kind of a scoop when its representatives boarded the Ile de France in New York harbor and interviewed Miss Dagovar, European movie queen. The interview was recorded like a talkie and broadcast by electrical transcription.

Natalie Towers

(Right)

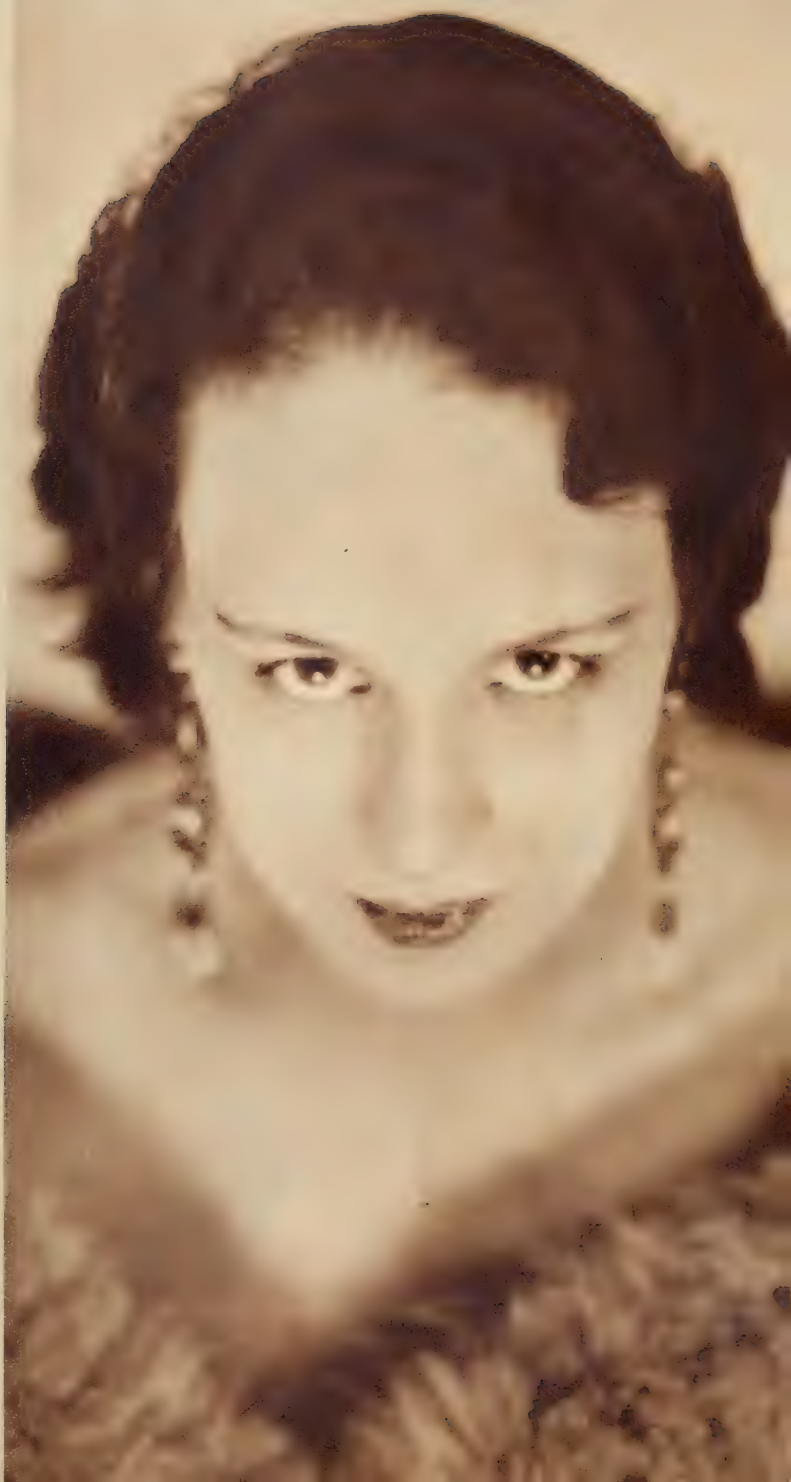
AFTER television h scurried around all the corne and someone suddenly pipes u "Who was the first televisio star?" Columbia will point Natalie. You may have hea and seen her on the openi night of the CBS television st tion W2XAB. Ted Husing i troduced her.

Gamby

ON another page y will see another pictur this great Radio star. At she is to come into her o for she has already beer troduced to the televi audience over W2XCR, N York. Remember way l when Gamby, primere seuse, was called trembl to the microphone for Radio debut? She was a but Roxy teased and so made her debut—and at last she can broadcast real art.

Bernardine Flynn

NOW that the Big Chains have taken up television in a more or less big way the lads and lassies who appear in Radio drama are looking forward to the big chance. And that's where you will find Miss Flynn who is in just about everything that's dramatic that comes over the NBC networks from the Chicago studios. She's all set for the flying spot when they begin shooting scenes from the big Century of Progress fair in 1933.



Ellen

Jane

Frohman

KING PAUL, the sm maestro Paintman, tuned in at Cincinnati one nigh got a thrill. She turned be Miss Ellen Jane—and a heavenly voice! Swee low with a soul! King Pau mands, and now Miss Fr is heard regularly over the network. She was born Louis, 24 years ago and uated with two degrees the University of Miss You'll be seein' her!

Georgia Backus

WHEN they begin staging matic productions over W2-B Miss Backus doubtless will the person appointed to ervise and direct. She has en promoted from one ponsibility to another. Prob- y no other woman is better d by experience to present adio play. This photo of is Backus was taken by rold Stein especially for Ra- Digest readers. Those Tele- on Eyes!

Of course now that radiovision is really here Flo Ziegfeld's Follies will not be overlooked for talent. Miss Brodsley of the 1931 edition recently appeared over the CBS New York station.

Bobbie Brodsley

Virginia Gardiner

MISS Gardiner is a famous star of the NBC dramatic productions in New York. She does all kinds of funny things with the little China dog. And the photo-electric cells pick up every expression.

William Brenton

ALERT, keen and a very lookable young man is Mr. Brenton who recently became a member of the Columbia announcing staff. It is rumored that both of the big chains are paying close attention to personal appearance of new members who are added to the staff these days.

Bill Schudt

FAMOUS as the creator of Bill Schudt's Going to Press program. He recently was appointed director of all television programs for the Columbia station W2XAB in New York. He has brought many notable personages to the mike; now he will probably be bringing them to the Radio camera.

Amos 'n' Andy

FREEMAN F. GOSDEN (left) and Charles J. Correll look like this when they put on their great Amos 'n' Andy broadcast. When they face the electric ray there'll be a job of make-up first, no doubt.

Mary Jo Matthews

THRICE she won the beauty contest while a student at the University of West Virginia. Then she was chosen Queen of the Apple Blossom Festival. Now she sings for CBS listeners.

Helene Carlin

MISS Carlin is versatile in her singing and dramatic talents; she comes to the NBC from Pictureland and the stage. Harry Reser discovered her—looks and talent qualify her for future programs.

Boswell Sisters

SUPERFLUOUS information—you'd know they were the Boswell Sisters whom you hear singing over the CBS system. Connie is at left, then Martha and Vet. Give 'em the Flying Spot, boys, we'll have a look!

Ted White

TED is a Tennessee tenor and has been setting feminine hearts a-flutter with that Southern quality of tone and accent. He comes from the Pacific studios over the National network. You'll be hearing more about him before long—and you may see him.

Transcription

DON'T laugh at the new term "electrical transcription" and say it is "just a phonograph record". On the opposite page you see an electrical transcription in the making. It is a Radio broadcast disc for the Hollywood Radio Newsreel, sponsored by one of the big motor oil and gas concerns. You can read more about it on another page in this issue of Radio Digest.

Captain Dobbsie

ONE of the outstanding programs from the Pacific Coast is that on which Captain Dobbsie serves as the skipper of the Ship of Joy. And here he is in the garden of his Burlingame home. Look sharp in the crystal ball and you'll see the photographer "shooting" himself. (Story on opposite page.)

Hugh Barrett Dobbs

A Radio Sharpshooter Who Finds His Mark

By Fred H. Fidler

WESTERN RADIO, denied the stimulation of the huge expenditures by means of which nerous Eastern and Middle Western sonalities have been brought to ention of listeners, has a record of ny successes and has produced one dio showman who is outstanding in ularity. He is Hugh Barrett Dobbs San Francisco.

Hundreds of thousands of enthusiic fans have acclaimed his work with proximately two million letters durhis six years on the air. And all s has been accomplished by sheer ce of personality and showmanship, ough the medium of a program esitially simple and unsupported by the mour and ballyhoo which has served build acceptance for many elaborate adcasts.

Morning's fretfulness—that momenry rebellion occasioned by a review of day's duties and obligations—was s target. And he has succeeded in attering it for a vast army of regu- listeners. But Hugh Barrett Dobbs more than a good marksman. He has t only dispelled morning aggravation, has substituted an hour of neighrly entertainment and inspiring fun.

This man Dobbs, affectionately own to his followers as "Dobbsie," is one of the West's outstanding dio personalities two years ago. Inead of "backsliding" in the public's teem, he is more popular than ever day. Reviewing his record or listeng to a recitation of the mutual loyalty artist and audience, it is almost cerin that a good percentage of the uninrmed will underestimate his appeal, ciding that his audience is limited to notional idealists. Not so.

Dobbs describes his broadcast as the Happytime" program, representing it be a "Ship of Joy." He and his arsts dispense concentrated good cheer d it is natural—because it is unrearsed. Many of the broadcasts are ntimental. But they touch man, oman and child alike—with a common peal. The atmosphere of the proam is clean, joyous fun. And the dience is quick to respond when a note of pathos is introduced, perhaps by the relation of the troubles of an unfortunate. On more than one occasion an invalid, orphan or other shut-in has received hundreds of cheering messages and gifts as a result of Dobbsie's interest, transmitted to fellow fans over the air.

"Happy Day" is always Dobbsie's closing wish for his audience. "Happy Day" for the majority of his audience, whose morning fretfulness was but momentary, and a happier day for those less fortunate listeners whose very real burdens he attempts to lighten.

THAT the program is more than a promise and a wish, that it is effective and is appreciated, is attested by thousands of replies to almost every undertaking or offer made over the air; by packed houses in San Francisco, Los Angeles, Salt Lake City and elsewhere whenever Dobbsie and his artists make a personal appearance.

Good music, cheerful patter inspired by fan mail, good humored stories about members of the program's crew, anecdotes and a touching poem or letter inspired by the joy some listener gets out of the broadcast are typical ingredients for an average "Happytime" program.

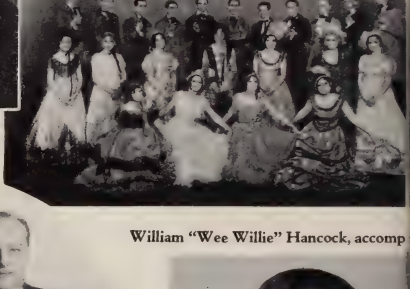
We said that "Happytime" program was a simple one. It is sincere—there is no gaudiness about it, but it makes use of one of the largest "casts" on the air today. In fact, it is doubtful that any other program makes use of as large a group of artists. But because of its popularity, it has become a much sought after "spot" and many artists consider it a privilege and pleasure to appear on the "Happytime" bill.

More than fifty singers, musicians and entertainers are regularly made use of on the program, in addition to the larger orchestra and singing groups. Internationally famous concert artists and nationally known composers and musicians are included in the cast. Obviously, this group of distinguished artists are not affected by the program's "training school" appeal. Residing in San Francisco, most of them keep alive fond memories of the days when they were building their success through their occasional "Happytime" engagements. Many of the program's stars were discovered or developed for Radio by Dobbs. Others whom Dobbs introduced on the air have become highly paid Radio personalities in their own right and several have used the talent developed in "Happytime" Radio appearances to further distinguish themselves on the stage. Briefly, the "Happytime" group includes:

"Sambo and Ed," two of the most popular Happytimers. The team offers novelty entertainment—songs, anecdotes and improvised instrument numbers. "Sambo" is Sam Moore, former vaudeville headliner and the man who introduced "saw playing" and played a saw in several Ziegfeld shows. "Ed" is Ed Evans, also a former vaudeville star. Evans has also made quite a name for himself as a continuity writer and his versatility has established a brisk demand for his services in extra parts. Mrs. Moore as "Mandy" sometimes joins the team and Dixie Marsh plays the piano accompaniment.

MAX DOLIN, violinist and a nationally known record artist, plays for the program weekly and appears elsewhere only under Dobbs' management; the Lindens, comprising Antonio, first flutist of the San Francisco Philharmonic, Emily, composer, and Caesar, violinist—all members of the New York and Chicago Philharmonic Societies, play regularly, and are usually joined by John Faivre, blind cellist; Theodore Strong, musical director; Clarence Tollman, tenor, once a principal in Maritza, is an exclusive artist and, with Curly David forms the popular team known as "The Whispering Cowboys"; Kathryn Thompson, harpist, a pupil of Attl, is one of the most popular Happytimers; Edward Randall, Jr., baritone, was discovered and in-

"Happytimers All"



The Singing Shells—a chorus of fine voices

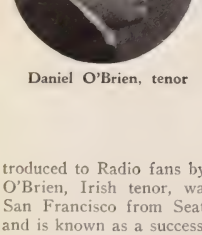
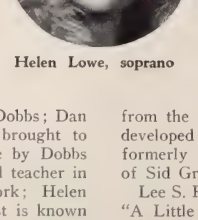
The Fox Theatre—Happytime ensemble

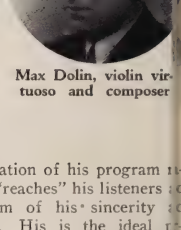
Richard Jose, "Silver Voiced" tenor





"The Lindens" and John Faivre, blind celloist

William "Wee Willie" Hancock, accomp



Daniel O'Brien, tenor

Helen Lowe, soprano

Dixie Marsh, soprano crooner

Max Dolin, violin virtuoso and composer

troduced to Radio fans by Dobbs; Dan O'Brien, Irish tenor, was brought to San Francisco from Seattle by Dobbs and is known as a successful teacher in addition to his Radio work; Helen Lowe, soprano concert artist is known as "The Happytime Girl."

Others include Charles Kellogg, internationally known "bird man" whose extra set of vocal cords enables him to produce perfectly almost all bird songs and calls; Richard Jose, contra-tenor, whose extremely high-pitched voice is internationally known; Annabelle Lee, former vaudeville star, who sings, plays and composes for Dobbs; Emily Hardy, coloratura soprano, who was picked from the chorus of "Blue Moon," and developed by Dobbs; Eleanor Barnard, formerly featured accompanist for all of Sid Grauman's productions.

Lee S. Roberts, composer of "Smiles," "A Little Birch Canoe and You" and many other famous songs, also appears on the program. Tom Mitchell, former musical comedy star, sang and played for Dobbs and became a featured Radio artist; Louise Forham, whom Dobbs found employed as a cabaret entertainer and introduced over the air, is now one of Broadway's most popular sopranos.

Dobbsie manages to drive home his morning barrages of optimism. By the many inflections of his voice and intimate interpretation of his program material, Dobbs "reaches" his listeners and convinces them of his sincerity and understanding. His is the ideal personality for the type of program he directs.

Outside the studio Dobbs is a hea business man. Short and husky, w sparkling eyes and thinning hair, i very unpretentiousness is impress That's why his personal appearan "go over with a bang."

Watching other men in a largely fe inine audience at one of his perso appearances the other day, I could most read their thoughts because I sure mine was the average reacti

This Dobbs is a real guy," they were ying. "He's no Radio sob sister or e sentimental pretender I had thought im to be. His reactions and emotions re typical—only he feels them more eeply and has the ability to prod the est of us into a deeper appreciation nd understanding."

Dobbsie has had a varied career. orn in Kentucky, he laid the founda-ion for his excellent judgment of music stening to negro plantation melodies. here was nothing unusual in his boy-ood. His cousin, Richard Pearson Jobson, had been the hero of the Mer-imac sinking in Santiago harbor. So t was not strange that he entered the Naval Academy at Annapolis. A keen appetite for fun led him into a hazing scrape that resulted in his dismissal. An understanding father sent the chagrined and despairing boy on a world cruise. He formulated new plans for a career and, upon his return, entered Balti-more's Johns Hopkins Medical school to fit himself to be a physical instructor.

After completing a four year course, he taught physical training in several sections of the country. He became in-terested in outdoor playgrounds for children and soon "sold" the idea to officials of New York City, where he built many such playgrounds. His work was outstanding and Judge Ben Lindsey called him to Denver for similar work. He was still supervising playground construction and maintenance in 1905 when, while in Seattle, he was intrigued by the adventure and outdoor features of life in Alaska. He spent four years there, most of the time with the United States Government Boundary Survey.

Returning to Seattle, he became a salesman in the commercial branch of the motion picture industry, married and settled down. But not for long. He soon moved again, this time to San Francisco, where he sold musical in-struments until he financed a small gym-nasium for business men.

(Continued on page 90)

Riding the Crest *with* Morton Downey

(Continued from page 17)

to my rather surprised and perhaps not altogether happy look. "That is the way I catch songs I want to hear. You'd be surprised at the amount of stuff I pick up that way."

It developed later in the evening, for the Radio was used on and off, that this was not altogether true. Downey skipped over the music, both vocal and orchestral, save when he caught a tune he wanted, passed up the drama with equal indifference, but when we caught a really good speaker—Morton was all attention and listened closely to the end.

But to get back to our evening, it was only a few blocks from the Tavern when he shot over to the curb and parked.

"Come on fellows—let's have a drink," was the invitation.

Looked around expectantly for steps leading down to a basement entrance, but nothing met the eye—it being Fifth avenue—save shop windows, some of them lighted, some of them not.

In past one of the latter Morton led us—for a strawberry (fresh) ice cream soda that was nobody's business. (He ought to know where the best sodas are kept for right here and now would state that never in the recollection has there been a man who could consume in the space of a day so many and varied sodas and sandwiches as this fellow Downey. He would save a lot of money if he rigged up a freezer alongside the Radio in his car.)

The next stop was to see a friend in from Connecticut at an uptown hotel. The friend could not come down to see us, so we went up to see him.

It was a good party at that. They had a French renaissance fireplace with a brass guard rail around the bottom and a gas-log inside. You could pull the thing out from the mantle and the fireplace became a bar and the brass a foot-rail. They didn't have it closed up much. Five minutes after we arrived and were introduced they were calling me "Morton" and Morton was "Dick." As for Jim, they couldn't seem to figure by that time what the heck he was doing there at all.

There were two objects of interest there for Morton. One was his old friend, with whom he swapped reminiscent yarns, and a perfect peach of a German shepherd dog. Finally, to prevent mayhem, Morton obliged with a couple of songs and we made our farewells and were off to the studios for the second broadcast—stopping on the way for another soda.

Well—that is one side of Morton—another and equally intimate one is that offered by the man at home—really at home I mean when he does not feel that there is any particular reason for not feeling fully at ease.

Once I asked Downey when and where and how he got his exercise, outside of driving that pet car of his.

"Oh I do all my exercising at home," said he.

Just a picture folks, of Downey exercising. When Downey gets home first thing off comes coat and vest, and then his tie and collar too, if that will come off that day. Next the shoes are shed and a really disgraceful pair of house slippers adopted. About three shirt buttons undone, his hand run through his hair the wrong way, and Morton is ready for exercise.

He subsides into a nice roomy and comfortable chair in his den with all sorts of magazines and books handy at his elbow, props up his feet on a low stool—and—exercises.

His eye roams over the room—he pulls those inevitable and confounded coins from his pocket and starts running them from hand to hand—puts them back—gets up and smoothes a wrinkle out of the couch cover—looks over at the forsaken chair—looks at the couch—lies down and gets it more wrinkled than ever — hums absently while examining the ceiling for a possible crack—spies a picture one one-thousandth of an inch crooked—gets up and makes it more crooked the other way—sits down in the chair again—picks up a book not to read but just to be holding something—then:

"Lover (and no matter what anyone else may tell you that is his real pet name for Mrs. Downey), do you think Charlotte can fix me up a nice meat sandwich—some of that lamb or beef —with mustard?"

He has got a rowing machine or some such contrivance stowed away under the den couch in its case, bought in some moment of weakness or of New Year's resolutions, but to the best of this lad's knowledge and belief that is where it has been since the day he made the purchase—right in its case.

He has a sacred medal of his patron on the dashboard of his car. He has a good luck ring, and if ever the time comes when Morton feels that he has to knock on wood and there is no wood available he is going to pass out right then and there from heart failure. When his manager visited him in the hospital during his recent illness and threw his hat on the bed Morton nearly had a relapse. If they had not been mighty good friends outside of their business associations there might very likely have been one darned good m: ager looking for new connections.

And speaking of illnesses, during more recent and very serious illness Mrs. Downey an incident occur which is typical of the sort of thin chap as much in public favor as he to contend with. Mrs. Downey ca very near to death, and anyone v appreciates the depth of love there in that family can well realize the st Morton was in at that time.

A priest was called in to admini last rites, and three days later wl she had rallied and was out of dan a New York tabloid printed a story her being then at death's door and u their entire front page for a picture her asleep in the hospital bed. It is s to say that had Morton met a cert editor at that time a messy looking tor it would soon have been.

The entire hospital went on the pet to determine responsibility for picture—and no one knew anyth Morton heard later that the editor told a friend he had a camera-r ready with a concealed camera, sneaked into the room via a fire esc when the nurse went out. But Morton:

"There wasn't any fire escape off d—— room!"

The worst of it was that some wit let Mrs. Downey see the art and she promptly staged a perfect lapse. Constance Bennett, her sis was all for leaving a talkie in the m ing and flying East from the Co Richard Bennett, her father, with f and highly combustible fuel adde the permanently smouldering fl within him against newspaperm strode around tearing his hair, an nice time was had by all.

But that is all over now. The s are clear. Mrs. Downey, out in country, is fast blooming back to he That alone is enough to make Mo a mighty happy lad, but as if that not enough he continues, and the diction of this writer is that he continue, to defy all his severest cr and the laws of gravity—and go slipping—up-hill.

He has practically a year ahea him on his Camel contract, as an clusive radio artist, and the offe is meeting with great and widesp popularity. The producers of t legitimate stage presentations, sc uled for fall openings are after hi well. Morton will probably close one of them.

The chart of his course ahead cords no menace to navigation, the is clear, the wind blowing strong free, and Love and Confidence s side by side at the helm. And should it not be thus? For, as a y ing friend of mine said the other when Downey came up for discuss

"He's one mighty swell chap!"

Ambrose J. Weems Wants to Know

Is radio in its infancy? --- Hot debate leads nowhere when the Papa Cuckoo and Mr. and Mrs. Pennyfeather seek answer to vital question

By Raymond Knight

I WAS entertaining Mr. and Mrs. George T. Pennyfeather at tiffin recently and we got to chatting about Radio over a bottle of rare old gingerale. Some one had left the bottle under the table at which we were sitting which is how we happened to be chatting over it.

I think it was Mrs. Pennyfeather who brought the subject up. (She brought it up on the service elevator, as all deliveries have to be made that way.) Soon we were deep in an excited discussion of short waves vs. long waves, what color network a soprano should use who wears a plaid dress, etc., etc. Many a merry laugh was had as we all gave imitations of static and for some time we debated pro and con, (e. g. when does an amateur broadcaster become a "pro," and is "con" better on the cob or distilled). However we seemed to get nowhere and so we dropped the subject, which unfortunately landed on the bottle of gingerale and for several minutes we were all busy mopping up the floor, Mrs. Pennyfeather, in her whimsical way, contributing her dress for that purpose—(It was very amusing to see her bustle around.)

It was at that moment that some one said, "Radio is in its infancy." I do not know who said it and history shall probably never have the true facts. Suffice it to say that the remark was made. Instantly a hush fell over the room. The women paled and the men looked at each other apprehensively. Sensing the tenseness of the situation, I remarked lightly—"Yes, but remember that the infantry won the war."

In a moment the place was a shambles. Commercial announcements flew wildly about the room and blood ran freely in the gutters in gutter abandon. It was fully six months before order was restored and by that time the building had been torn down and a new one erected in its place. There were no traces left as the tracing paper had been destroyed.

I escaped by holding a blanket over my head and being led out as one of the horses.

But let us forget that horrible scene and get down to the bare facts. (Note to Editor: In this article the question is —"Is Radio in Its Infancy?") To this question I reply—yes and no. The affirmative is held by some pedants. (A pedant is a *scholar*, and not as some people believe the word for a flag or banner spoken with a cold in the nose.) They think that Radio is in its infancy because it is constantly changing. Others believe this, because Station KUKU broadcasts on the baby blue network. Both groups are correct and incorrect at the same time. It is all a question of the angle as any sports announcer will testify.

RAYMOND KNIGHT, radiocally known as Ambrose J. Weems, is the Big Papa Cuckoo of Station KUKU on the NBC net. He is also known as Bill Borealis on the Cliquot Club program and is on the Raising Junior program as Tony Pendennis, the poet, and Jasper Blitz. Having attended both Harvard and Yale as a student, he maintains a seat in both sections when the football teams meet. He changes and roots for the side that needs his encouragement least. He deserted the law practice to become a writer, which led to his present predicament as the Ed Wynn of Radio.

I think at this time it is apropos ("apropos" as used here must not be confused with Edgar Allen Poe) to mention the name of Archibald Finch as an example of what Radio can and will do to the people, for the people and by the people.

Archibald Finch was the father of Condensed Milk. You will not find this in your history books. You will not find it in your telephone books—No. It was left to the power of Radio to bring this to the attention of the American public, and I cite this case as an answer to—"Is Infancy In Its Radio?"

A few weeks ago, Station KUKU, of which I am managing director and first to twenty-sixth vice-president inclusive, celebrated Condensed Milk Week and during the preparation of a jubilee program our research experts discovered the following facts.

As you go to the kitchen larder—(with apologies to Ring Larder after whom it was named), take out a can opener and a can of condensed milk, rip the can open and drain the contents at one exhilarating gulp, little do you realize the romance which is behind condensed milk. Behind that can of milk is the story of a poor farmer lad. Behind that farmer lad is a soft-eyed cow, and behind that cow is a barn—no the *cow* is behind the *barn*—well, anyway, behind all this is a background.

ONE quiet summer's day back in 1888, a farmer lad named Archibald Finch, who was known to the country folk as Archibald Finch, sat milking a cow. As he leaned back on the sofa, which he had brought out into the barn to make the milking easier, he thoughtfully regarded the cow, a brown and white one named Henery XIV, and he

The Editor's Chair

Radio Amplifies Happiness

SINCE the early fall of 1929 we have all been watching our whole economic fabric writhe itself through a post-war deflation of major magnitude. For some of us the transition has been personally painful. We have lost stocks. We have lost real estate. We have seen market values of one kind or another literally "shot to pieces."

For others the deflation has been even worse. They have lost jobs and in consequence the means to supply loved ones and themselves with even the bare necessities of life. Willingness to work, hard, long and honestly has not brought a quick and satisfactory answer to their woes. Some of our fellowmen have been denied the right to earn a living and as a result have been torn between alternatives of imposing on friends and relations, of accepting public charity, of turning to racketeer methods or of just plain starving.

For deserving men who are willing to work this is indeed a tragic and threatening period. It is the most significant challenge to the so-called capitalistic system. It must be and will be intelligently and equitably solved or even here in the United States political evolution may give way to political revolution.

Meanwhile there is nothing which can mean more to the American people—or any other people—than contentment of mind and soul. Just plain ordinary happiness can do more to bridge and overcome obstacles and hardships than anything else. It is the accelerator in the victory of mind over matter.

What a marvelous opportunity is therefore presented to Radio! There is no human medium in existence today which can do so much to build happiness among people and at such unbelievably low cost. Think of the places Radio can take you, first hand, in a single month. Think of the famous people and the great events it can bring before you. And add to all this the endless round of music from "low brow" jazz to the very finest symphonic and operatic performances. But why go on? The parade is too imposing and too extensive to begin to enumerate.

Just thinking about it, however, leads to the thought that the manufacturers of the Radio industry are "making no speed rapidly" in arising to the opportunity which is theirs. The Radio industry ought to be advertising and otherwise promoting to the public the bounteous blessings of Radio. Industrial sponsors ought to sell *programs* and what they mean to human happiness. They ought to sell the great economy of Radio as a producer of happiness of many kinds and in many directions for there is no way to spend so little in dollars for so much in pleasure.

If those in the Radio industry were doing the kind of cooperative merchandising job they should be doing, the sale of Radio sets would be rapidly mounting. No matter how much is done by individual manufacturers to sell their individual sets, there should be a master campaign financed by manufacturers, dealers, jobbers and broadcasting stations to merchandise Radio programs as a common prerequisite for selling their individual wares.

The time for such a campaign is *right now,* when many newspapers are shying off (mostly as a matter of necessary economy) from giving the public adequate Radio news and feature service. The public wants to know more about what to look for and where to get it. Supplying this information properly is bound to increase Radio sales, but what of it? The people have never objected, good times or bad, to buying what they want and know can do the most good for them.

Kill the Fess Bill

IT SEEMS incredible that so many of our great army of teachers should permit themselves to fall into the hands of schemers. Capable, earnest, sincere in their noble task of preparing the minds of the generation which will carry the destiny of the nation tomorrow they sometimes follow political leaders who must be either pitifully incompetent or brutally unscrupulous.

They are swayed by the demagogues who picture the "American Radio lost in a growth of commercial weeds." They are told that the money powers have taken away their Radio rights, and they believe it. Knowing this weakness and seizing an extremely potent strategical situation nominal leaders have turned to competitive "advertising media" and are boldly trying to get them to lead the assault, and take all the blame, for as unjustified an attack as ever has been attempted on a great American institution.

Like the young lion, still unaware of its strength, broadcasters are permitting themselves to be cowed and restrained. They should stand erect and look facts squarely in the face.

We believe that American listeners—and that includes the majority of school teachers—who are familiar with the various kinds of broadcasting in other countries would resent bitterly any attempt to break up the American Plan of Broadcasting where twenty times more money is spent for programs than in any other country in the world, and where there is a greater variety by a hundred times to supply all the varied wants in Radio entertainment.

Yet the passage of the Fess bill to set aside 15 per cent of all the wave channels for educational institutions would be one of the most telling blows imaginable to the American Plan. It would be an opening wedge to the complete dissolution of the system. Later other blocks of channels would be trimmed out until nothing worth while would be left.

The passage of the Fess bill would be about as heavy a smash as could be managed at one time without bringing down the entire wrath of the listening public.

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of America's Great Key Stations

Bernardine Flynn

By Marie K. Neff

THE grape arbor in the back yard was the big "white top;" a clothes line stretched from side to side, about three and a half feet high, was the tight rope; and a little girl of ten years, with long black hair that had been braided to make it frizzy, was the tight rope performer. Her skill three and a half feet above the ground was heralded throughout the neighborhood, consequently, she and the rest of the troupers were above the "two pins" admission stage. They charged five cents and took their circus feats seriously.

Even though the kids from one end of Madison, Wisconsin, to the other all turned out, there were no more enthusiastic members of the audience than mother and father Flynn. They had reserved seats at the kitchen window and through that glass pane John Flynn saw the day when his four little girls and two little boys would swing to and from a trapeze under a real white top billed as the "Six Flynns." Natalie Flynn could see her husband's chest swell and a gleam of pride shone in his eyes.

But today tells a different story. While Bernardine Flynn, the little mistress of the tight rope, is not performing under a real white top, she is, nevertheless, in the Radio spotlight, the rays of which are not confined to canvas walls. Her audience stretches from coast to coast.

It was during her sophomore year at the University of Wisconsin that she "took stock" and decided it wasn't so easy for her father to keep five youngsters in school at the same time, so she decided to leave. She went to Chicago where she secured a position in the art sections of one of the department stores. During this time her mother died and it was a toss-up between her sister and herself as to who would keep house for the family. Her sister was well established in Chicago and had an excellent position as secretary. This was too much to lose so Bernardine returned to Madison for the time being.

Bernardine Flynn

(See Roto Section for another picture of Miss Flynn)

After being "homemaker" for a year her father decided she should return to school and finish her work. She enrolled in the School of Speech at the University. The value of her experience in Chicago cropped out at this time. Short as her stay had been, her association with art had left an imprint—she had the desire to know more about it—hence she became a student in sculpture and portrait painting. Due to the fact that her interests were so varied she was permitted to graduate and receive her degree without having to take a course in general education along with her art work, which, up to that time, had been one of the requisites established by the university.

While a pupil of M. C. Trautman, one of the country's best known tutors, she became a leader in student dramatics, playing parts which attracted the favorable comments of many critics. At this time her work was brought to the attention of Zona Gale, author, in whose play, "Miss Lulu Betts," Bernardine was taking part at school. Miss Gale became quite interested and following her graduation gave her a letter of introduction to Brock Pemberton, theatrical producer, in New York City. Contrary to expectations, the young graduate did not wish to go on the stage. However, after much urging from her father, who decided he would be just as well satisfied with the footlights, she went. It was a most peculiar journey—she was going to a city where she was unknown and in search of something in which she wasn't interested.

MR. PEMBERTON was well satisfied with her ability as an actress and secured for her the part of understudy to Miss Muriel Kirkland, the heroine of "Strictly Dishonorable." At the close of this show, he suggested she give up understudying leads and try for a part herself. He was just in the midst of producing another show at the time and remarked that he needed a French maid. She suggested he give her a try at it. He just shook his head. He needed a real French maid, couldn't she understand? She volunteered the information that her French was

"pretty good" so he gave her the trial. Her French was excellent, but "Good Heavens, I can't list the name Flynn across from 'French Maid.'" It was then that "Natalie Boisclair" was made to live again in her daughter.

As all things go, Wall Street crashed and so did the show—in Washington. Miss Flynn returned to New York and, still under the guidance of Mr. Pemberton, she secured a part in George Jessel's play "Joseph." The only difference in the fate of "Joseph" was that it went on the rocks in another city.

By this time the young ingenue was fairly disgusted with plays on wobbly legs and not desiring to go on the stage in the first place, it was an easy matter for her to take a trial balance and close the books so far as the "boards" were concerned.

A relative mentioned Radio. It was food for thought but not so far as New York was concerned. Radio artists had "already arrived" there so she decided Chicago was the place.

Bernardine Flynn came to Chicago with only a letter of recommendation "to whom it may concern" regarding her ability, and made application for an audition at the NBC studios.

And now there comes a coincidence. Frederick G. Ibbett, director of dramatics for the Chicago studios, mentioned the fact that he needed a French girl—not a maid this time, however. He also heard the story about her French being "Pretty good"—it proved to be a good story. In this instance there were no printed programs so "Natalie Boisclair" again became Bernardine Flynn.

She is no longer troubled about deciding upon her career—she's satisfied that it's Radio—and always has been. Since her Radio debut, about a year and a half ago, she has established herself as one of the few outstanding dramatic actresses on the air and is heard in "The Girl Reporter," "Rin Tin Tin Thriller," "The Play's the Thing," and others. She thoroughly enjoys her work and members of the Chicago staff are never surprised to see her come hurrying in anytime from 7:00 o'clock in the morning until 10:00 in the evening. An actress who leads in four or five productions a week has to be on the job but one can see that it's more a pleasure than a job. She always takes time for a smile and a pleasant "good morning," regardless of her hurry.

Even though rushed from morning till night, week in and week out, this pert little "maid" manages to squeeze in time for a few "at homes" to her friends. And those fortunate enough to call at these times are always treated to some sort of rare foreign concoction. Miss Flynn still plays at keeping house and one of her homemaking hobbies is collecting foreign recipes. Another is furnishing her little apartment on the shore of Lake Michigan. She is keenly interested in antiques—real ones, however. The want ad columns hold a fascination for her. She scans them eagerly to see if some old aristocratic home is parting with a few rare pieces.

Regarding romance, she just looks askance—and really did a "pretty good" job of bluffing. But, she had forgotten that in telling about collecting her furniture she had said she wanted only the best so that someday she could use it in her own home.

John L. Fogarty
The latest crush in NBC tenors

Her art work is also quite prominent in the apartment, but she has laid aside her brushes for charcoal. She explained that she doesn't have room for an easel and the many other things one needs. And charcoals are so simple. She still models in clay. "A lump of soft clay, a board on which to work it, a few tools and your own fingers are all that's needed," she said, "and that doesn't take much room."

And her last hobby is public auctions.

So far as father Flynn is concerned —all he says, beaming, is "Well we didn't know anything about Radio in those days."

JOHN L. FOGARTY

Just when it seems a poor girl is already sold heart and soul on one invisible but delightfully audible serenader, along comes another even more appealing than the last. Now comes John L. Fogarty who is nothing less than divine with that devastating tenor voice no fair lady with the slightest touch for the romantic could possibly resist.

If you love those big out door men from the open spaces then Mr. Fogarty —Oh, heck, let's call him John and be done with it—then John is your man. He began singing to the mountain peaks in Montana, with his pony and his dog for companions. The mountains loved him and gave back that indefinable something that becomes fibre and soul of a human being so favored.

He is more fair than dark, broad shoulders, lean limbs and blue eyes that seek points above the horizon. He laughs but never gushes and when he's in a crowd he listens more than he talks. There are no petty artist mannerisms with which so many who have gained the spot of public favor seem to become afflicted. Broadway has not softened him. If you do get him to talking his conversation will go back to Montana, and his mother and dad. That's where his heart is.

Don't you ever think that Montana has forgotten him either. His success as a Radio singer, and an acknowledged favorite from coast to coast over the NBC network, has lessened the claim of his home state to him as one of its beloved sons. During the last session of the legislature when John was unable to get home for a visit they rigged up a Radio receiver at the state capitol. The House formally called a halt in its legislative deliberations and listened for one hour while their wandering boy sang to them from New York.

When it come right down to plain biography John L. Fogarty first saw the light of day at Sioux Falls, South Dakota. But from early boyhood he lived the rancher's life in Montana. He has always been a great lover of horses and when a very little fellow it was not uncommon for him to play hookey just to follow the strings of horses that were exhibited at state and county fairs.

He grew out of his childhood younger than most boys and when the World War boomed along in 1917 John had reached the glamorous age of 16. Just how he managed to get by is known to but a very few people. At any rate he was presently seen swinging a rifle and marching along with other and older boys on the way to France. He en

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

TODDLES is home still autographing copies of our photograph which appeared in last month's column—and as usual the task—pardon me—I mean the pleasure—of writing about things and affairs and whatnots—is mine.

First of all, my dears, there was the NBC picnic a few weeks ago—and everyone in Enbeesee's Pub. Dept. was on the boat. I wish you could have seen Gene Mulholland's pretty blue-eyed wife. She looks like sixteen but I understand that she answers to "Ma" for two little tots at home. Then there was Edythe Jeanne Meserand who arranges interviews between NBC artists and those tireless, patient, worn-out specimens of mankind—called reporters. Bill Thomas salvaged Marcella from the talons of three great big successive waves—and Harold Stein, Prince of Photographers snapped Indi's substantial visage in his magic camera. Everyone is still getting the sand out of their ears—and if you've ever tried to separate spinach from its native soil, you know what a job we're having.

* * *

MR. AND Mrs. Toscha Seidel were driving something like—sixty on their way to the Columbia Broadcasting System when a—motorcop stopped to make their acquaintance. "Say, where the H?xy***l d'ye think ye're goin'," asked the blue-robe, brass-buttoned city official in the King's English. "I'm going to work," replied the famous virtuoso. "What'd'ye do fer a livin'"? questioned this persistent pursuer of Cadillacs, as he eyed Mr. and Mrs. Seidel's evening togs. "Oh, I play the violin," this from CBS' Music Director. "Yeh? I guess ye play this high class music, don'tcha? Well, I like jazz—and ye're goin' te get a ticket, get me!" Standing in a corner of the car was the dear li'l $60,000 Stradivarius just about shivering in its timbers. Came the sweet voice from charming Mrs. Seidel, "Well, of course, you know how it is—Mr. Seidel prefers to play jazz but he has to do the other for a living." "Well, I guess ye're regular folks—go ahead." and the ticket disappeared into a deep cavernous pocket. That's Mrs. Seidel—the right word and always at the right time.

* * *

LOUISE BENNER, I'm surprised at you. John L. Fogarty is not married, thank goodness. It's almost refreshing to find a dashing young person in Radio circles who has escaped from the ravages of wedlock. You'll find his picture and a short history about him a door or so away from this page.

* * *

JIMMIE MERRELL who recently accused Marcella of having a soft heart for down-trodden announcers, writes that he's landed the job as Studio Manager of WNOX, Knoxville,Tenn. May its tribe of listeners increase and flourish under your efficient management, James. "Most of last year," Manager Merrell writes, "I was just another city boy that made good in the country," in parenthesis he adds, WSFA, Montgomery. "Before that I was the hired help at WKBC, in Birmingham." Awfully glad to have heard from you and shall be glad to get anything you have about WNOX. Hope your next stop is New York not New Jersey.

* * *

POOR Lew Conrad! Or I should say poor Mrs. Conrad! Well, probably I should not have let the cat out of the bag so suddenly—but there is a Mrs. Conrad — his wife. Again, I say, poor Mrs. Conrad! Can you imagine, my dears, how difficult it must be for any woman whose husband's voice so beguiles his Radio listeners that they all —blondes, brunettes, married and single—send *him billets doux* weighted with *affaires de coeur*—or to use a more expressive term—mash notes. Now, what would you do—those of you who have a husband under the yoke—if he received letters numbering into the hundreds like this: "I am faithful to you, Lew my beloved. You have the voice of a thrilled soul. I weep to think that others must be writing you the same loving lines as I am writing." If that's the effect his *voice* has on 'em, what would happen if they saw him—simply irresistible—brown eyes—you know with a merry twinkle—wavy black hair—and five foot six. You're welcome, Mrs. Kidwell, come again some time.

Lew Conrad

* * *

SARAH ROBERTS of Wilmington and Mrs. W. N. Crosby of Amesbury are interested in John Mayo, CBS' popular announcer. He's 32 years, my dears, was born in Providence, went to a military school and to Brown University. As an armament officer in the World War he spent fourteen months in the air—and as a Radio announcer he's spent longer than that on it. Don't know which he likes better but he doesn't seem to consider his job a bit tedious even though he has announced over 3,500 programs over WABC—this last year.

John Mayo

* * *

MOST of the stars in whom—you are interested, Mrs. Jenkins, have had pictures and articles in Radio Digest. Jean Paul King was in the May issue and there was a fine article about Horace Heidt in the April number. But here's Curt Peterson for you. He's married, has two children, Stephanie, eight, and Janet, five. Is 33, graduate of the University of Oregon and has a B.S. degree. And talk about getting jobs. I don't think there's another story like it. Way back in the good old days of 1927 when WJZ had its studios on 42nd Street, Curt ambled by that way. There was that mystifying something about the Radio station that "got" him, so in he went, and came out just as quickly with instructions to write the station director. Miss Brainard, and she certainly could have no name that would be more significant of her mental capacity, wrote back this very encouraging note, "Dear Miss Peterson: I gather by intuition, not your letter, that you want a job. I regret to inform you that we have no place for

Curt Peterson

feminine voices on the air." For a moment Curt staggered, but a thought quickly flashed across his mind. He picked up the receiver, and called Miss Brainard on the telephone. "Miss Brainard," said Curt—in his deep baritone voice, "this is Miss Peterson." "I beg your pardon," came from the other end. "This is Miss Peterson," this in a resonant bass. "Well?" was the not-by-any-means-long-drawn-out-reply. "Only it ain't Miss—it's Mister. Does that make a difference?" "Tut, tut, young man, announcers never say ain't. You're going to be announcer, judging by your voice on the telephone, soon as you come in here and let us see that you're not a bearded lady." And that Curt Peterson did not turn out to be a side show at the circus is proved by the fact that he is now supervisor of announcers at NBC and has been "doing" some of the most important programs on that chain.

* * *

IT WAS an awfully blue Monday — the ceiling had come down and settled on our jade vase—our Radio lost its voice during a favorite program, the dog had puppies and the cat had kittens — so you can imagine what a joy, it was, Edna, to receive your charming note. I want to share it with the rest of the Marcellians. Here it is:

"Tweet, tweet, Marcella!

"What under the sun *is* the matter with the office inmates of our fair Radio Digest? First Indi-Gest, whose smiling effigy has haunted my nightmares since it first sprang at us from the pages of an otherwise domesticated magazine. And now Marcella and Toddles. I had few doubts about Toddles — but Marcella was something of a shock! However, I was gradually adjusting myself to a painfully sudden optical illusion, and in a frantic effort to fit the new Marcella into the empty corner of my heart so recently bereft, I am forcing myself to appreciate her manifestly good points.

"Hummmmm . . . yes, you have good reason to be proud of your legs, Marcella. (You're a darlin' Edna.) Never since legs wuz legs have I seen such legs!! I can't see why you let Toddles out-do you in the matter of fancy headdress, but I can see that you beat her to the dressing table and carried off the family heirloom—real pearls, too, aren't they? And that ducky parasol with the hand-made lace—not to mention the paisley opera wrap . . . would you mind telling me how much Radio Digest pays you and Toddles for knowing everything? Not that I care . . . but you are both SO extravagant! (Well, the next time you come to New York, Edna, drop in and I'll tell you all about it over an ice-cream sody.)

"Please don't forget to send me that autographed copy, will you? Thank you so much.

"No, I don't seem to have any 'burning questions' on my mind. Other people get them first, and your soothing, Unguentine (that word really should be censored—sounds like advertising) responses answer all queries before they have time to disturb me.

"But can't I think of something . . . just to be sociable . . . Oh, yes, I'm so glad Nellie Revell made the statement that Lucille Wall is not married . . . What a relief to her host of male admirers!! Her name has been confused with that of her sister Mildred, who is married to Frank Knight. By the way, these sisters' voices are so identical that the keenest ear would have difficulty in distinguishing one from the other. However, the confusion of the two in the minds of "fans" as regards the marriage of Mildred is partly due to the secrecy with which the Knights chose to surround their marriage. Why do people do it? Why keep the fact of a marriage hidden, as—as though it were something to be ashamed of? Intelligent persons who take their Radio in the right spirit won't have their enthusiasm dulled by the knowledge that their favorites are married, and like the old woman in the shoe, "have so many children they don't know what to do"! A Don Juan of Radio, whose name is familiar to everyone having a receiving set, married and kept the fact a secret for many months—in the meantime receiving letters and invitations from lady-friends on whom he had bestowed attention before his marriage and who thought him still single — ungallantly placing them in the unflattering light of trespassers upon another woman's claims. Rather unsporting of the gentleman. There are certain things that the Dear Public has a right to know—and a marriage is as much everybody's business, for obvious reasons as birth and death. Don't you agree? (Ah doe, quoth I.)

"We have taken Radio Digest ever since its advent into the magazine world and have such an affection for it that we can overlook its peculiarities as easily as we appreciate its perfections. "Peculiarities," however, should be singular (and don't shoot me for this unintentional pun!) and not plural—for under this heading is listed but one item, namely that, under your present publishing schedule, and reversing the usual system, a year's subscription to Radio Digest costs more than the yearly sum of the single copy purchased each month at the newsstand. Ain't that the awfullest! Just ask Toddles! (Now, Edna, your 'rithmetic must be suffering from the humidity—now I ask you—how much is 25 times 12—if the product isn't three dollars, you can have my paisley shawl and bonnet.) But if it cost fifty cents a copy and twelve dollars per year, I still subscribe to it, rather than be met with the usual response at the newsstand—'All sold out!!!'

"And now I've had the grandest gab, but I see Toddles is dozing on your

Mr. and Mrs. Percy Grainger

GABALOGUE

Nellie Revell, "The Voice of RADIO DIGEST"

By Nellie Revell

The Voice of RADIO DIGEST

EVERY Wednesday night at 11 o'clock Miss Revell takes her WEAF mike in hand and rattles off a good old fashioned chinfest about the great and near-great of Radio and stage circles. On this page you will read some of the things she broadcast in case you did not hear her on the NBC network.

HOWDY, friends. I'm going to try and square myself with a lot of people whom I've shamefully neglected by not answering their inquiries about their radio favorites. So if you'll please forgive me this time, (I'll probably do much worse in the future). * * *

Since, we're talking about cooking, I guess I might as well begin with the Sisters of the Skillett. * * * No, they're not related to each other. They were both born in Indiana and both are married. Their real names are Eddie East and Ralph Dumke. Eddie has a daughter 15 years old who was just given an audition playing the ukelele. Eddie East was a lawyer, and his first client is still in the penitentiary. Ralph was a designer of plows. That's how he learned how to play the banjo.* * *

Gene and Glenn were both born in Illinois. Both are married and both now reside in Cleveland. Gene Carroll married Mary Stuart, of the Stuart Sisters, vaudeville entertainers. They have three children. Glenn Rowell married a girl who looks enough like him to be his twin sister. They have two children. Gene and Glenn are noted for their fishing ability. Not so good at catching—but awfully good at fishing. * * *

The Tastyeast Jesters were all raised in Connecticut, and are all married. The three couples now live in Jackson Heights, Long Island. Dwight Latham is Pep; Wamp Carleson is Vim; and Guy Bonham is Vigor. * * *

Vincent Lopez is small and dark—specializes in neck-ties. He owns about 100 but uses only about four—and wears them until his valet takes them away from him. He was born in Brooklyn, and was educated for the priest-hood. * * *

Those Goldberg sketches about the Rise of the Goldberg family are written by Mrs. Berg, who plays Molly in them. Mrs. Berg is the wife of a sugar merchant—and had no previous radio or stage experience before she wrote these sketches. She is the mother of two children. The part of Sammy, the son in that sketch, is played by Alfred Corn. * * *

CLARA, Lou and Em are graduates of Northwestern College in Chicago, and their radio sketch is a result of their fun frolics in the dorms. * * * Their names are Louise Starky, Isabelle Carothers and Helen King. The characters of Clara, Lou and Em were conceived by the girls in their efforts to make college life less humdrum. * * *

Paul Whiteman was born in Denver and has been playing the violin since he was six years old. His mother told me a rather amusing incident about Paul's childhood days. One day she was on her way to a luncheon, and driving past a corner fruit-stand, she noticed a crowd gathered there. She heard a violin playing—and driving closer she saw that it was little Paul, then about 7. It seems that the fruit vender had promised Paul all the fruit he could eat if he would play the violin and draw crowds for him. And she learned later that her angel child was known at the corner fruit store as "da kid wid de fid." Well, did she yank him home quick! It's a good thing it wasn't piano lessons Paul was taking. Well, Paul has grown to be quite a big boy since then and quite famous too. But no matter how much fame, how many chins, or how many wives he may acquire, when he goes back to Denver, and passes that corner fruit stand, he is still known as "da kid wid de fid." * * *

PHIL COOK left school because he flunked. He flunked because he spent more time drawing pictures than he did studying. Then he got a job tying up bundles in an advertising agency—where he also got some experience in drawing. Soon he became an expert cartoonist. He has also drawn some very fine pictures, some of which have appeared on the front page of the Saturday Evening Post. He married the only sweetheart he ever had. They have a baby girl named Phyllis,

(Continued on page 74)

Voice of the

TRUE LOYALTY

I AM enjoying your new magazine very much. Glad I am back in the fold again —you see I am an old-timer and I didn't like Radio Digest going to New York, but I'm for you from any town from now on. Don't see how I got along all these years. In mentioning favorite stations I must put WLS at the top of the list with WMAQ a close second. The latter, I think, is the least obtrusive station on the air and even though I have never met the gentleman in person I think much credit should go to that pioneer announcer manager, Bill Hay. Give him a little space some time. (See page 61 of May issue.)—Mrs. J. F. Foster, 4824 Elm Ave., Hammond, Ind.

WHERE ARE YOU EDDY?

I SHOULD like to get some information concerning Eddy Utt, "The Vagabond Poet" of St. Louis. I was fortunate enough to hear one of his programs and I liked it very much indeed. I should like to learn where I can tune in on him, too.—Judy

THUMBS DOWN ON RADIO DIGEST AS STAR-GAZER, EH? SEE P. 57

IN the Radio world there is a star, slowly but surely rising to a prominent position in the hearts of the listeners. The Digest's part in bringing him closer to the people's hearts has not been in keeping with his meteoric rise to fame. When I say that I mean Lew Conrad, how many of your readers can say that they know him? Not many, for on the air he is usually a haunting, unidentified voice, while in your columns he is hardly ever mentioned. Won't you do your part and give us some articles and more pictures about Lew?—Musketeer No. 1—Chicago, Ill.

A COINCIDENCE!

ALL Lew Conrad fans who are interested in joining a club in his honor are cordially invited to write to me. The club has just been organized but we're sure it will be a great success—so c'mon fans! Congratulate you on your thoroughly enjoyable magazine.—Kathryn L. Ellis, 7133 Harvard Avenue, Chicago, Ill.

THESE LOVE R. D. AS IS

MERCY ME! Please let me say a word about an article in "Coming and Going." Please, please don't besmear your lovely magazine with "scandals, divorces, and domestic tribulations" of Radio-ites. I'm sure the Radio-ites get plenty of "dirty publicity" without Radio Digest ruining a perfectly good reputation in order to air Radio scandals. What's more, I don't hesitate to reassure you that the feelings of the artists will no doubt be in keeping with the above quotation. If enlargement of your magazine is necessary let it be for the better instead of the deterioration of it. More columns of the type of Radiographs, Marcella, Tuneful Topics, Gabalogue and Broadcaster-Oil would be more suitable to advance. Of course it is entirely up to yourselves whether or not you run with the goats or the sheep, but I've had my word.—Miss Betty Jamieson, 635 Stibbs St., Wooster, Ohio.

* * *

SORRY there was no August issue. No, don't write any scandal about Radio stars in your magazine. Keep it sweet and clean, and if any morbid-minded readers want a scandal feast let them get their meal from the newspapers. Please put in more pictures of the men stars in the rotogravure section. Doesn't that sound "feminine"—but it should be half and half anyway.—Mrs. Arthur Lueck, Mancelona, Mich.

WOULD FIGHT FESS BILL

JUST read the new issue of your magazine and before I take up the main subject may I say it seemed like a very long wait this month. Your magazine is so interesting I hated to miss the August issue. Now for my real reason for this letter. Read very carefully the article by Mr. Hobart and think I understand the situation as he puts it. What can we do to prevent Senator Fess' bill S5589 from becoming effective? Some programs on the air are not so interesting but I tune out and get another station. But these instances are rare. On a whole the entertainment and educational features provided are good. Only a few days ago I was forced to be without my Radio for forty-eight hours and I realized then just what it meant to me. As far as the advertising talks are concerned I'm sure fair-minded persons do not object to the few minutes devoted to them. And as you pointed out, the advertisers pay for this entertainment so why not be appreciative and generous. PRESERVE US FROM GOVERNMENT CONTROL OF THE RADIO!!! I never cease marveling at the magic of Radio. It's cheering and comforting and instructive. I believe I have at least average good sense and intelligence. I can enjoy the music of the masters and I can also get great pleasure from the popular music played by various orchestras. Heading this wonderful list of programs is Rudy Vallee. Don't tell me he's no extraordinary singer. I know Rudy hasn't a voice for the Metropolitan, but I can honestly say I've listened to all the noted singers starting with Caruso but never felt the tugging at my heart as when Rudy's voice reaches my ears. If the Fess bill means taking Rudy off the air I'm starting for Washington with a bomb in my pocket at once. Let us know as soon as you can just what we can do. We do not want government control.—G. M., Margate City, N. J.

TWO NEW VOL-IANS—WELCOME!

HAVE enjoyed reading your magazine always but more so since devoted exclusively to Radio. We enjoy reading your well-written, interesting articles, and looking at your descriptive and entertaining pictures. We enjoy reading V. O. L. especially, and would like to join. Would appreciate having pictures and articles especially of the following Radio stars: Bob and Jimmy Palmer, the Utah Trail Boys of KFI and KECA, Los Angeles, Cal., of the Beverly Hill Billies of KMPC, the artists of the Happy Go Lucky Hour, KFRC, Shell Happy Time artists of KPO as well as any others particularly in Southern California. Wish the best of luck to Radio Digest and hope for a still bigger magazine.—S. and A. Kovacevich.

WE MERELY ASKED YOU

READING page 4 of the Summer Edition of Radio Digest and can't go any farther without stopping to tell you that the day you start gathering the scandal, i the day I quit reading Radio Digest—an I think there are many others of the sam mind as I. If you find it necessary to prin that kind of "stuff" then quit publishing because that's the beginning of the en There's plenty of interesting material t be had concerning "our friends of the air without dragging in their shortcomings.— Jess Jackson, Apollo, Pa. [We distinctl stated we didn't like scandals for Radi Digest. Editor.]

* * *

HERE'S three emphatic answers to th query, "Should Radio Digest go for scandals?"—NO! NO! NO!—one fo each member of our family—and the puss cat—who looks forward to chewing up eac copy of Radio Digest after we have fi ished with it and considers herself entitl to a vote upon the quality of her foo Radio Digest is unique in the fact that has so far steered clear of everything u clean. Its gossip is of the light, harmle sort which entertains without leaving unpleasant taste in the mouth and I, f one, should be very sorry to see it Walter Winchell. For those who get vicarious delight in learning of the infide ties of the great and near-great of t stage, screen or Radio, there are the mo magazines and metropolitan tabloids to t rescue. Although I have been a regul reader of your magazine since almost first issue, this is my first letter to V. L., and is written in appreciation of t editor's efforts to give us what we real want in the form of a Radio magazi I sincerely hope that other interested rea ers will respond to this important questi and if Bigger and Better Scandals is t order of the day as a result of the po then I make the motion that those in t minority, who may feel like canceling the subscriptions to Radio Digest, instead tu their energies into organizing a Skipp of Pages Association to see who can sk the fastest!—Edna H. Stanbrough, R. D. No. 3, Newburgh, N. Y.

WANTED: DISTANT STATION

JUST a line to tell you that I certain enjoy reading your fine magazine. I sho like to hear from listeners about the d tant stations they can get or about th locals—or anything about Radio.—Flo Smith, R. R. No. 6, Box 52, Greenvil Ill.

RUDY'S CORNER

IT IS rumored in Canadian as well American circles that Rudy Vallee, idol of America, is about to sign a co tract for an enormous sum, and depart for Elstree, the Hollywood of England several British films. This will surely a loss for America.—L. Fahey, Toron Ont. ..... May we soon have an arti devoted to Rudy Vallee's famous Conne cut Yankees? And a little picture of e

Listener

the boys? This particular orchestra ssesses so much individual personality, at such an article would be more than preciated. Wish you would also publish article about John S. Young and Lew onrad. (Lew is in Marcella's column is issue—and John Young in May).

* * *

HAVE always said I would never miss such an interesting magazine as Radio igest. I can't wait each month for it to me out. Since Rudy Vallee is so happily arried, here's hoping it doesn't hurt his opularity and that Radio listeners will ways have Rudy's interesting programs listen to. As Rudy Vallee is my favorite, re's hoping he will always be on the air id in Radio Digest.—Mrs. Maria Jones, Vashington, D. C. ..... After reading udy Vallee's *Tuneful Topics* one cannot oubt that he has a magnetic personality. stead of all or the majority of the men ing jealous of his charming voice, good oks, lovely orchestra, wonderful athletic gure and pleasing personality, I should ink they would admire him like most of e women do. I'd stay up all night to sten to him. Another young man whose oice bubbles with boyish enthusiasm, amely Ozzie Neslon. Please print a picure of him. Three cheers for Smith Balw and Julian Woodworth and needless to ention for the one and only Rudy Vallee. -Peggy Wood, 219 Pine Street, Peekskill, . Y.

TRY R. D. BINDERS

I THINK every "listener-in" was delighted to see the picture of "This is ouglas Gilbert Speaking" in the last edion of your magazine, and write to ask ou if there is not some way you can secure n intimate interview of Gilbert's life. Such wonderful voice and we hope he receives fine salary! Can you not print some more f his broadcasts on men of note? Buy our magazine and file in a folder.—A Listener-In."

SEE APRIL R. D.

HAS Radio Digest forgotten that the charming Jessica Dragonette is one of the finest and one of the most popular ingers on the air? Do let us have some nore pictures and articles about this fasinating star. She certainly has no equal on or off the air.—Marjorie Goetschins, 28 Ray Street, Manchester, N. H.

A FLOYD FAN

YOU asked for suggestions from readers about what they'd like to read and what pictures they'd like to see. Well—I read the Digest and enjoy it very much—and here goes for what I personally would like—I'd like more nice full page pictures of Floyd Gibbons and interviews and articles about him—in fact you can fill the book about him and I'm satisfied—but not where he travelled with Pershing or about Pancho Villa or the Laconia sinking, etc. I've read that fifty times in every paper, book and magazine. What I want to know is—does he really like lemon pie and ice cream—is he grouchy or jolly—serious or silly—as talkative off the air as on—and does he like riding, golf or flying—or just plain hiking—does he ever smoke a pipe—does he ever listen to the Radio himself—does he like music and jazz or the classics, etc.—that's the kind of interview I like. Maybe he doesn't—anyhow—that's what I'd like to hear about him. And about another hero of mine—of course he's really not a Radio star but he was master of ceremonies on the Chevrolet program for a long time —Col. Eddie Rickenbacker. These are my two heroes and it's sure hard to get a squint at a picture of or a word about either. Once again may I say how very much I enjoy this magazine and hope to find what I'm looking for in it one of these months.—Betty of Boston.

DX'S OWN DEPARTMENT

IN YOUR recent issue the most interesting article was the write-up by Charles J. Gilchrist on DX-ing, in my estimation. Undoubtedly, all DX'ers and Radio bugs will be your constant boosters if you succeed in getting Mr. Gilchrist to continue his articles through the coming winter months. I'm also glad to see more letters in V. O. L. from the "ether hunters," the "rubber ears," etc. The article in your May issue on a new station in Algiers using native entertainers was very, very interesting. You might give us a few more similar stories. While writing, I want to urge you to give us soon, in your dandy magazine, a good write-up on "Billy Sunshine," (Jack Owens), the boy who pulls in such a load of fan mail at KFH. Although he's but 18 years old, his voice is exceptional among crooners and his impersonations range from Henry Burbig to Morton Downey.—Paul K. C. McAfee, R. 4, Salina, Kans.

* * *

I WOULD like to say a few words in regard to DX. I have been DX-ing for nearly four years. While I have not set the woods on fire and made any records I have had lots of fun. My log runs between 425 and 450 stations. The best catches are as follows: (I am only giving those that are verified) 2LO London, England; JOGK, Kuamoto, Japan; KGMB, Honolulu, Hawaii; KGBU, Ketchikan, Alaska; WKAQ, Porto Rico; CKMO, Vancouver, B. C.; CFCY, Charlottetown, P. E. I.; VAS, Glace Bay, N. S.; Dudeleutscher Rundfunk at Stuttgart, Germany. I have 21 stations in California verified, 3 in Oregon, 5 in Washington. I also have several Mexican, Cuban and Canadian. I have every state in the Union with the exception of N. H., N. D. and Vermont. I have several more good catches that are not verified as yet. Will be glad to give any information that I can on any of my stations listed above. Also have numerous verifications from low-powered stations all over the country ranging from 7½ watts to 100 watts.—Clyde Ham, 1002 S. Lafayette St., Shelby, N. C.

TCK! TCK! JOHN!

I DISLIKE your magazine more and more every month, as you gradually fill it with fashion notes, what the bride will wear and all that sort of junk. Who cares what people think about the women of America being happy? I like the way you logged the stations in your April or May issues, but your idea in the June issue was all wet, considering the many mistakes you made. Now what about something in your magazine that pertains a little at least to Radio, also some pictures of some of the good orchestras.—John Drake, 1920 Athol Street, Regina, Sask.

SOME SOFT ANSWERS

THE Radio Digest gets better and better every month. I really can't tell you what I like the best. I think Marcella is first and then the V. O. L.—when I read the letters from listeners who are always knocking the Radio Digest or some artist, I boil. I do not see how anyone can find a single fault with the Radio Digest. When they say the Radio Digest is "punk" and nothing but "junk" I fear they do not get very much out of life—they are too quick to criticize and not quick enough to give the Radio Digest or the artists some appreciation. As for orchestras I think I like them all—Vincent Lopez, Ben Bernie, Bernie Cummins, Henry Theis, Guy Lombardo, Rudy Vallee and heaps of others. Please forgive me if I have seemed a bit pointed in my accusations to some of your readers. But life is too short to always be criticizing and when anyone says a single word against Radio Digest, I'm ready to fight right back. More power to the Radio Digest.—Virginia "Jinny" Peters, 3021 Fairfield Avenue No. 14, Cincinnati, Ohio.

* * *

MAY I express my appreciation of a magazine so well-rounded as Radio Digest. I read it with great avidity each month. There are some of us—and our name is legion—who appreciate the simplicity, lack of affectation, and charming presentation of the incomparable Vallee's particular line. It seems to me the facts prove what the majority of listeners think of him. Success is not granted to mediocrity. More power to your publication.—R. M. Walker, Sunnycrest, Seymour, Ind.

* * *

I WANT to express my appreciation for your magazine. To me it is the answer to a Radio fan's prayer. You can't please everyone but you're doing a mighty good job. Keep up *Broadcaster Oil* by Ray Perkins. He has the most spontaneous humor I have read in a long time. Also enjoyed Jean Paul King's article on the *Sisters of the Skillet*. I like your pictures. Here's luck.—Maurine Sanderman, Marion, Ind.

TRUE WISDOM

I'D LIKE to say a few words to the men who seem to resent the ladies' adoration of Rudy Vallee. I'd buy my wife a gold statue of Rudy if she would be content to stay home and adore him. You are mighty lucky if your wife is content to worship at the shrine of the Radio. Suppose she *stepped out* with any Tom, Dick or Harry who happened along.—Just Another Listener Who Thinks Rudy is Not So Bad, Norwich, N. Y.

* * *

I JUST bought my first Radio Digest today, and I had to write to tell you how I enjoyed reading the magazine. I have heard a lot about it but I haven't bought it before. Why? I don't know. I would like to hear from more Lombardo fans. I think that Guy Lombardo and the Royal Canadians have the cream of the slow tempo music. Jack Denny and his Orchestra from Montreal is also a headliner on the CBS and his type of music is also inimitable. Hope to hear from Lombardo fans.—L. C. Braddock, 14 West New York Avenue, Somers Point, N. J.

Out of the AIR

HITS—QUIPS—SLIPS

By INDI-GEST

Cash for Humor!

IT WILL pay you to keep your ears open and your funny bone oiled for action. Radio Digest will pay $5.00 for the first selected humorous incident heard on a broadcast program, $3.00 for second preferred amusing incident and $1.00 for each amusing incident accepted and printed.

It may be something planned as part of the Radio entertainment, or it may be one of those little accidents that pop up in the best regulated stations. Write on one side of the paper only, put name and address on each sheet, and send your contribution to Indi-Gest, Radio Digest.

TOLD you about the Little Black Book last month. Well sir. (please 'scuse for stealin' your stuff, Floyd) one of my ver' best friends writes to know if the Little Black Book isn't a Indi-rubber Book—don't we stretch things sometimes? You're wrong, Sylvia, it's a book of concrete facts. Not sayin' that the concrete might not be a bit cracked in places.

You'd be surprised at the Limericksters. Here are a couple of fresh ones which Robert G. Wyatt of Bakersville, Tenn., got 'em off his own limerick tree.

WHATCHA MEAN "RAW"?

There was a young couple from Arkansaw
Who were not aware of the parking law,
And with their bathing suits on
They were told to be gone
By an old cop who thought they were sparking raw.

PRESSING ENGAGEMENT

There was a nice girlie from Butte
Who turned down a neighbor galoot
Because he was dumber
Than the smart city drummer
Who found joy in pressing his suit.

Stop that! Don't you throw that tomato! Maybe you'd like this one from Nellie Foster Seibert, 3451 W. 30th ave., Denver, Colo., who swears she found it in her own cellar.

Oh, Lady Moon, so frail and slim,
At first I hardly knew you;
Last week you were so round and fat—
Now, I look right through you.

Pray tell me, did you exercise,
Or follow some strict diet?
If I but knew your recipe,
I certainly would try it.

CUTE THING

Oh Edna O'Keefe, of KFRC
I love the little dimple
In each little knee
Please think me not simple
And wink at me so
For loving each wrinkle
In each little toe.

IS THAT NICE?

Imagine the scandalized housewives who dote on Col. Goodbody's food talks! John Myatt Napier, 2627 Texas Street, Vernon, Tex., sends this indiscreed clipped, as he says, from the Dallas Morning News. It's from the Radio program listing:

Colonel Goodbody, fool talk (NBC network), WFAA.

Song titles connected with announcements are an invariable source of amusement. Rolf George, 6153 Catin st., New Orleans, La., writes:

While listening to the dance progra from the Trianon ball room, 62nd ar Cottage Grove Ave., Chicago, Ill., ar broadcast thru WGN, at ten P. M (Cent. Time) to-night, I heard the a nouncer say that the next number wou be "I'm dancing in the Dark, by Sp cial permission of the copyrigh owners."

Hubert Colombe, 44 Albion s Houghton, Mich., writes:

"I heard this over WHDF; 'You a again reminded that at the Calum theatre tonight "Strangers may Kis with Norma Shearer'."

O. M. Crosby, 272 Elm st., Ame bury, Mass., heard the announcer WNAC, Boston, say, "Ninety-nine c of a Hundred Want to be Kissed Ben Selvin and his orchestra."

Sue Dickerson, 329 Clifton av Lexington, Ky., reports Phil Coo funny: "Well he will have to buy new license for his dog." "Nope, n this dog," replies Crackles. "Why not "Because he is just covered with already."

Don't know whether you heard t one. Vincent Sorey, Columbia orch tra leader, gives this as an experie he once had with a dictatorial spon who rushed up to him mad and all of breath:

"You're playing too loud. . . TO LOUD, I say!"

"The score says forte," Sorey plied.

"Then, for heaven's sake, play TH TY!" snorted the sponsor.

The Tastyeast Gloom Chasers h aroused a great deal of curiosity ab the mysterious Schultz for whom t frequently weep. A fan sent Colo Stoopnagle a handkerchief for

tears. Various legends were inscribed on the linen. This was one:

The Colonel stood at the microphone,
Whence all but him had fled;
He laughed and then broke down and cried,
Because our Schultz was dead.

FAR-FLUNG is the fame of this whirlwind of Radioscapes or what-chamacallums. Two letters come to Indi, on the same day from the opposite side of the world. First we have this bit from O. B. Ward, P. O. Box 2181, Honolulu, Hawaii.

SCULPTOR?

Listening to the police news
Our interest was intense
Until the radionouncer said,
"A *statuary* offense—"

I would like to print the letter and verses sent in by G. C. Tollenton of Auckland, New Zealand. It's all good, but gotta snap off too quick. We want MORE space! (We WANT more space! We want more SPACE!) You can reach Mr. Tollenton at Box 83. And sezze, sez he—

"Only came across Radio Digest just a few weeks ago and am delighted with its contents. Have just sent subscription for 12 months and am keenly looking forward to their arrival. Your own particular department is most diverting and I get a lot of laughs out of it." He tells about an Orange Trick performed by a broadcasting magician. This is his Indi-script:

"An artist over IYA, Auckland, New Zealand, caught all his listeners very nicely a few weeks ago. They were requested to take out their pocket handkerchiefs and follow the moves as they were given through the air. He got them to fold the hankys first one way and then another until the hanky was in a shapeless mass about the size of an egg. Then he asked them to close their fingers around it and hold it above their heads for one moment. 'Don't forget,' he said, 'this is the Orange trick so just for effect I want you to hold the handkerchief in the air and gently squeeze it. That's right, all squeeze the hanky, now. That's right, squeeze a little harder; harder still. That's right keep on squeezing, squeezing until you get the pip.' Then he went off the air. The mail which poured in immediately showed very effectively how many people had fallen for the hoax." Very funny, what?

GENEROUS RIVAL

Who said the gals would all drift away from Rudy now that he has got himself a bride? Miss Mapel of Denver perhaps voices the sentiment of many others who are seventeen. She writes her *bon voyage:*

The echo of his wedding bells—
And seventeen am I;
Deep, black despair has filled my heart—
My knight has passed me by!

And then upon a newsreel film
Their pictures flashed one day;
I saw my lovely rival there—
And now I hope and pray
That this romance down through the years,
Sincere and true will stay.

A Vallee fan I've always been,
A Vallee fan I stay.
Not his alone, but also her's.
May joy be theirs always.

Frank Watanabe (Eddie Holden) at KNX, Hollywood

FAN SONG

A Vallee Fan I've always been,
Since first he took my eye,
I heard the beat of courser's feet
My knight was riding by!

ROSIN DID IT

Now we know what put the kibosh on Firpo when Jack Dempsey quit laughing, climbed back up in the ring and got down to serious work. It came out during a Radio interview between Ed. Sullivan and Jack (Doc) Kearns over WOR, New York.

Sullivan: "I've often wondered, Doc, what Dempsey whispered to you after the first round in the Firpo fight? Can it be told now?"

Kearns: "Dempsey said, 'Doc, I can't get started. I'm slipping all over the ring.' And I said, "No wonder you're slipping, you chump; put some rosin on your feet."

So Dempsey squshed his dogs in a rosin box and that was the end of Firpo. (Fred Morgan shows how Ed and Doc looked during the mike bout at WOR in the drawing here.)

Aunt and Uncle Mike

By Evans E. Plummer

NOW let's travel down to At-lan-tahh Georgia, where, I've been told, we'll find a couple who are going to run Gus Edwards out of business if they continue with their present success of finding and starting off young theatrical protegees.

Technically speaking, they don't call themselves "aunt" and "uncle," and they purposely avoid the gushiness that often is found present in the Radio feature supposed to attract the juvenile. But — they already have more than 30,000 children tuning in their daily broadcasts, and they've only been on WSB since last September.

"They," of the above paragraph, are Janet and Lou Zoeller, directors of the Atlanta Journal's "Sunset Club for Girls and Boys." Up to Radio the Zoellers were in vaudeville, playing the RKO, Loew and Pantages circuits. They were billed as "Souls o' Sunshine," and the name has remained with them on the air.

Since joining WSB last Fall, the Zoellers have been appearing over the station every weekday afternoon except Saturdays at 4:30 (CST) p. m. with their young protegees selected from among aspiring tiny listeners. On Saturdays they carry the youngsters down to one of the larger motion picture houses on Peachtree street where they present their coming stars in the fastest-moving juvenile revues Atlanta has ever known. Do the listeners like the idea? Well, an average of 3,000 boys and girls jam the theater for each of these special matinees.

The Zoeller broadcasts are adult in every detail—except the talent. Bedtime stories, recitations and the like are forgotten as the youngsters, hundreds of them, face the microphone to mimic the songs and dances they've heard on their Radios and at the movie and vaudeville houses.

Just see what Uncle Television is bringing to the Little Listeners and Lookers around New York! Here you see Big Brother Mortimer Stewart, director of television for W2XCR, the eyes of WGBS, presenting Gamby, the dancing fairy; Little Billy, the midget, and Felix the Clown

ONE outstanding star is 12-year-old Frances Marie Bess, a crooner who, it is whispered about the studios, is slated for the talking movies and may be in Hollywood when this appears in print. Another is William Blue McKay, three-year-old master of ceremonies, whose claim to being the youngest announcer in America regularly on the air, is apt to go unchallenged.

Another Sunset Club protege, Maurice Wager, was signed by RKO several months ago and is now touring the country with "Scooter" Kelly, one time Our Gang screen comedy star.

Chicago has three more children's hours besides Uncle Bob Wilson's over KYW. At WMAQ there's the "Topsy Turvy Time Man"; at WENR, Everett and Irma's Air Junior and at WGN you hear Uncle Quin.

Russell Pratt, known more widely to the adult audience as one of WMAQ's "Three Doctors," is the originator of the Topsy Turvy Time Club. Daily except Sunday for the past five and a half years, the program has been heard without fail over WMAQ, and the membership of the club is now well over the 400,000 mark.

With the aid of his rather mysterious helpers, Tommy and Harry, Pratt has built an informal, leisurely and conversational situation, where, by for the distances separating, the listening child might put in his word. Songs, stories, recitations and little talks find a place on each program. Puzzling and beguiling actions are the contributions of Tommy, alias Dr. T. Thomas Tofins, "plain and fancy reciter of T.T.T. and Harry H. Hoozis, the singer of T.T.T. and the official mail man. Strange to say that Tommy and Harry, while ever crowding the mike on the air, are always bashfully absent whenever there are visitors at the studio.

The three T's on the red and gold

microphone pin which is given free to each member signify two things—Topsy Turvy Time and The Club Secret. The latter, I'm told, is so sacred that I must not divulge what it is, but I may say, at least, that the secret is a motto expressing an ideal of behaviour. The club has other ideals, civic services, and activities, too, and is always busy on some seasonal enterprise.

Well, Russell Pratt should make a good director of a children's hour. He has five of his own of assorted ages at home. Another boast of his is that he has never, in all of the five and a half years, used the word "kiddies." This news, I trust, will reach the ears of the Carnegie Foundation, or some other live-wire medal-awarding group, and be taken into immediate consideration.

The five-year-old Air Juniors Club of WENR, Chicago, started by Everett Mitchell, announcer, and Irma Glenn, staff organist, still waves under the banner of NBC, and at present its enrollment is near the 150,000 mark.

Don't tell the children, as they'd probably be off of it for life, but the Air Juniors programs are ninety per cent educational with heavy sugar-coating to insure listening young ears. But there are no long talks or lectures. The education is purveyed by means of stories that bring out educational points. One broadcast, for instance, will deal with health, another with nature stories, another with safety, the next with pets and birds. This year a garden contest is being staged. The Air Juniors have been told how to plant their gardens and take pictures of them as they grow. Next Fall the boy and girl with the best garden will be awarded a prize. Other civic enterprises of various kinds are conducted.

One night each week children selected by regular auditions take their places before the WENR microphone and supply the talent for the program. The queer part of these amateur talent nights is that they draw as many adults to the loud speaker as children.

THE slogan of the Air Juniors Club is: "The Air Juniors Club—A Club for Happy Boys and Happy Girls." And every night the program is closed by a child's prayer sent in by one of the members.

Quin Ryan, manager of WGN and "Uncle Quin" to the tots of that station's audience, is responsible for the "Punch and Judy Show" heard nightly from WGN.

"I have never tried to be edifying," Ryan replied when asked of the program's activities. "Neither was Tom, the piper's son, nor the unconventional cow that jumped over the moon. I never preach, nor moralize, nor goo-goo, nor strive to ingratiate myself. Clowning is enough."

Radio has brought a new interval into the public's everyday, he points out—the period of the bedtime story. It is time to confuse images, images to sweeten dreams. Peter Pan hops into the window and Tinker Bell whisks through the room. The magic quality of the Radio enhances its imaginative appeal to the children. Turn a dial and from the set darts music, and voices, and stories, and animals. Such is Ryan's vision.

Uncle Quin started his menagerie oddly. One evening he was inadvertently toying with a kit of whistles and bells that a trap-drummer had left behind in the studio. He proceeded to name each one of them for some animal or bird, and his tiny audience believed him! Out of his bewildered hat they had pulled a cuckoo bird, a wabbly calf, an Airedale, a lumbering baby elephant, a kindly lion, a frisky frog, and a garrulous duck who never goes without her galoshes.

"I never allow any children in the studio," Uncle Quin concluded, "because for them the show would be ruined by disillusionment and for me by self-consciousness. In their presence I am just a wooden Indian, but miles away from them—they almost engulf me with their letters, their love and

(Continued on page 70)

Three Beautiful Jay-birds of the Air

Joan Colburn

Jane Houston

Joan Danton

Joan Colburn, called "The Girl of a Thousand Personalities" will appear under the direction of Sterling Program Corp. in a new series to be announced soon. She is well known for her excellent work in "Dracula," Horace Liveright's stage success in which she played the leading feminine role.

Jane Houston, well known to all radio listeners for her long, long portrayal of the character "Vi" in Graybar's "Mr. and Mrs." sketches over Columbia, is seen here creating a new character in which it is planned to present her under the banner of a prominent national broadcaster, shortly.

Stage audiences know the remarkable versatility of this beautiful actress. Besides playing the part of "Azuri" in the Desert Song, dancing her way into the heart of drama and music lovers over the U. S. she has played highly emotional and sweetly demure ingenue parts, as well. Her character delineations are making her a favorite.

Station Parade

Pageant of Personalities and Programs as they Appear Across the Continent for the Biggest Show on Earth

FALL programs are leaning more toward dramatic presentations this year. But vocalists who can both sing and act will doubtless find themselves to a better than usual advantage.

Television is sweeping the country like wildfire. Stations in every community are making preparation for television equipment. This new phase will prove a special boon to the community broadcaster because it is not possible to hook television through a series of stations with the present wire equipment of the telephone and telegraph companies.

* * *

And now let's see what they are thinking about in the various studios scattered across the continent.

* * *

NINE YEARS OLD

OLD WNAC, Boston, is celebrating its ninth anniversary. That puts it in the same anniversary class as Radio Digest.

The celebration held at WNAC came to its climax the night of July 31st. To make an extraordinary occasion of the event Linus Travers, production manager, arranged to bring from various parts of the country some of their former entertainers. It was a particularly happy event for John Shepard, 3rd, who founded the station and who since that time has been actively identified with almost every phase of Radio development.

Station WEAN is now one of the two key stations for the Yankee Network. New studios and transmitting equipment have recently been installed so that it is possible to send out six programs over the system at one time.

* * *

GONDOLERIOUS

WILL television interfere with some of those fine delusions we now enjoy? What about those jolly Gondoliers at WGY, Schenectady? As you hear them now you fancy a moonlight scene in Venice. It is so easy when you can't see to imagine a barrel stave swishing around in a tub to be a long, slim paddle dripping and rippling through a glancing moonbeam.

But here are the real Gondoliers in this tower of masculinity just below. Not a Venetian in a boatload! Just read the names in the list below the picture!

The Gondoliers of WGY, Schenectady. Top, down: John Danduarnd, Clyde Kittel and A. O. Coggeshall (Tenors) and John Finke (accompanist)

PASKMAN'S PROGRESS

SPEAKING of television of course you know that WGBS has it in New York. Dailey Paskman, the guiding genius, of this independent station in the heart of Manhattan simply took the bull by the horns and set his station right down at 655 Fifth avenue, about a stone's throw from the formidable NBC where it has been rather stoutly maintained that television, after all, is more "tell" than vision.

Recent announcements state that Mme. Mariska Aldrich, formerly of the Metropolitan opera, is now one of Paskman's regular television artists. She is presenting a series of programs with associate artists, all made up in costume for the characters they represent. They portray different nationalities. Some of the programs already presented which have been notably successful were Hungarian, Russian and Spanish in theme.

On the Golden Hour you hear organ selections from the studios of Miss Marcia Stewart. Of course Miss Stewart also may be seen through W2XCR, the WGBS television station.

* * *

THE CYNIC SPEAKS

By Muriel Allen

IT WAS after one of his peppiest evening broadcasts that I interviewed WPCH'S incognito misanthrope (yes, they're both in the dictionary). He calls himself "The Old Cynic," and he's a member of the tribe of scribes.

But no newspaper man, present or ex, can be comfortable enough to answer personal questions about himself in the formal atmosphere of an open-to-the-public reception room. It requires a swivel chair and a desk for the victim's feet to rest on. We found it in the press office, and then the fun began.

"How did you come to do it—this cynical sort of a program? (I guess that's the best way to start, isn't it?)"

"H-m-m-m," grunted the Old Cynic. "Good as any. I don't really see what difference it makes to anybody, but here's the answer. Experience! My

forbears couldn't boast of a single divorce in their entire history. I had to break that jinx, so to do a really good job I had two before I was 26. That's how I learned about women. And when you figure a *pair* of alimony checks on the first of every month, you can judge the expense of *that* lesson!"

"Do the women like your program?"

The answer to this one came with a chuckle. "Be yourself, lady, would you? But they get so infuriated that they have to let off steam, and so they write to me and tell me what *they* think of *me!* And here's another funny thing about the one—or I should really say—two-track mindedness of the 'dear ladies' in my audience. My feminine 'fans' either assail me for overlooking all the romantic elements of marriage, or else they pounce on me for not revering my mother. Now as far as I am concerned, neither one of these accusations shows any indication of common sense reasoning. In the first place, a man who doesn't revere his mother is no man at all. And in the second place, it is romance that is the matter with marriage. When romance wears thin for a man, he's disillusioned. When it wears thin for a woman, the old shopping instinct comes to the surface, and she goes out into the matrimonial market again looking for a better bargain, or buy, than the one she has. And Reno is the exchange desk!"

"And what about the men? What do they say about your program? Anything?"

There was a twinkle in the Old Cynic's eyes and a smile turned up the corners of his straight mouth (cynics always have straight mouths, you know). He almost laughed.

Anita Cheney, dramatic soprano with the Stamford Players at WCHI, the "Voice of Chicago"

"If I should tell you women about some of the letters I get from the men, the male population of this great and glorious country would have to unite in self defense. To a man, they give me a verbal 'pat on the back,' and tell me I'm telling you 'dear ladies'

Fred Hoey who scores highest batting average for baseball announcers

exactly what they've wanted to tell you for years, and haven't had the—well, nerve—to do it!"

A long pull on the glowing pipe as the Old Cynic pondered a while in silence. I asked him if he didn't feel a little ashamed—or, was it fun?

"Fun? You bet it's fun. But you needn't tell them that!" And he wandered out into the jungles of Broadway, leaving me wondering if I didn't see him shift his tongue into his cheek as he turned his back on the inquisition.

* * *

THAT MAN HOEY

BEFORE the baseball season of 1931 becomes one of those things that have already come and entirely gone let's have a look at that Boston man, Fred Hoey. It is the sports announcer who has the chance to make a name for himself these days. Fred Hoey, of the WNAC staff, acclaimed by his great army of admirers "King of Baseball Announcers." His whole career has been curved around a baseball, it seems, and began back when Frank Selee's Boston Nationals played Ned Hanlon's Baltimore Orioles in the 1897 Temple Cup series. From years of baseball writing on Boston newspapers he turned to baseball Radio reporting five years ago. People who had hitherto been indifferent to baseball became ardent fans by listening to his dramatic and accurate word portrayal of the games as they were being played. He knows everybody in every team, knows them so well he can just about foretell what they are going to do before they do it from what he has seen them do in the past.

The fans thought so well of Hoey's batting at the microphone last spring that they took a day off and made quite an ado for him. They called it Fred Hoey Day and gave him a lot of presents including a certificate of deposit for $3,000; a purse of gold from the Boston Braves and a whole truck full of gifts from other players and admirers.

Being a baseball specialist does not prevent Hoey from being good at other sports as the Wnacians will readily testify.

* * *

ETHIOPIA HEARS KDKA

WESTINGHOUSE stations have always gone after the distant listener—to the Arctic or the Antipodes. Letters from delighted fans from these far points are their reward. Not long ago a special program was broadcast to the United Presbyterian Missionary colony, 8,000 miles away at Gorei, Ethiopia. Many letters have been received from the colonists stating they were able to hear their friends at home clearly and distinctly. "It was like Christmas all over again," wrote Mrs. Ruth L. Walker.

* * *

DOT AND DICK AT WMAZ

LET'S tune in Dot and Dick who do that intriguing drawl from stations Georgiaward. They're at WMAZ, Macon, for the present although they are very well known to the WBZ listeners at Atlanta. There's a quaint naturalness to their skit which savors of the same dramatic quality that has put Amos 'n' Andy over so successfully. Just a couple of young American Newlyweds being themselves.

It's no secret that the skits are written and presented by Mr. and Mrs. Malcom Jones, Jr., of Macon. It was a matter of tradition that this family of Jones should follow the legal profession. But nobody before had anticipated the advent of Radio. Mal simply did not like law. He went to war and eventually became a Radio dealer. Mrs. Jones was formerly a newspaper woman. She teaches speech and dramatic art at Wesleyan Conservatory. They have been married five years and have a little daughter in kindergarten.

ENGLISHMAN SHOWS US

IT TAKES the perspective of an Englishman to get the real slant at Americans, some folks say. That may account for Norman MacDonald, English born and graduate of Cambridge, being able to come to this country and portray American historic characters over WGN, Chicago. He is doing a series of famous men there. The skits are written by Miss Jean Conover. Among the impersonations already broadcast are those of Gen. Gage, Nathan Hale, George Washington, Gen. Custer and Alexander Hamilton.

* * *

McCORMICK FIDDLERS

SOME of these so-called "old time fiddlers," "mountaineers," and "hill-billies" are only Big City tuba players filling in time. They live in hall bedrooms in the tenement districts and never saw the mountains this side of the ocean.

But you can't say that about the McCormick Fiddlers at WLW, Cincinnatti. Pa and Ma McCormick come from Owenton; Frank Mills was "bawn 'n' brung up in Mt. Zion; Ohmar Castleman, who tweaks the five-string banjo, came up from Folson and Jerry Foy, guitarist, calls Harrodsburg his native town. They have all just rounded out three years at WLW.

* * *

MAY MAKE KMA PAY

CONSIDERING investment and returns you probably wont find a town anywhere in the world that has earned more money by Radio than Shenandoah, Ia. Last year 250,000 people visited the town which has a population of only 6,500. There are two broadcasting stations.

EARL MAY, owner of KMA, Shenandoah, is entertaining at two stations these days since he became owner of KFOR at Lincoln, Nebr. He is a busy commuter between Shenandoah and Lincoln and depends on his big Buick de luxe sedan to speed him back and forth.

Last year he spent $120,000 for talent on KMA alone. And he gave away $40,000 in premiums. He sells everything over his station. In one sales drive he sold $82,000 in dress goods last year.

The Burlington railroad just put in a new $50,000 stockyard to handle the livestock business developed by KMA.

* * *

NEWSBOY ON KFNF

IT WAS Henry Field who launched the first Radio station in Shenandoah. He is said to have cleared as much as one million dollars net in one year through sales made over his station, KFNF.

Mr. Field opens each day with religious service for the farmer listeners. About six years ago James Pearson, an employee of the Field Seed House, began broadcasting news from the papers. This proved a very popular feature and he now enjoys a national reputation as the KFNF Newsboy. He is also known as the Newsboy-Pastor because of Radio church services he conducts.

* * *

Full Length Plays

EVEN though she now has four jobs to perform instead of one, Patricia O'Hearn, former Broadway leading lady, finds Radio much less tiring and much more interesting than stage work.

Returning to Chicago, her home town, after playing a prominent part in the New York cast of Frank Craven's "Salt Water," which followed her engagement playing opposite Glen Hunter in "Behold This Dreamer," Miss O'Hearn joined the Goodman Theatre Repertory company. At the close of the Goodman season, during which she played several important roles, she turned to Radio drama.

It was Miss O'Hearn's idea to apply the Goodman laboratory of the theatre methods to broadcast drama and with this in mind she became associated with John Stamford, director of WCHI and a member of the faculty of the Chicago Conservatory.

The Stamford Players, one of the first groups to regularly present full length plays on the air, under the combined direction of Mr. Stamford and Miss O'Hearn is now broadcasting high class dramatic productions over WCHI each week.

* * *

ART MAKES WILians CRY

SALT water showers and blubber-weather are predicted for St. Louis and vicinity. The handkerchief business is picking up. Art Gillham, whispering pianist, and arch apostle of "Syncopated Pessimism," is now wringing tears from the WILians. In presenting his lugubrious hoakum at WIL Art is a successful comedian. He has made the circuit of practically all the broadcasting stations in Uncle Sam's domain. Recently he was heard over the Columbia System. In returning to St. Louis Art has meandered back to settle down in his home town. But, ah there you California—.

(Continued on page 70)

Victor Rodman Entertains KPO Artists

KPO entertainers were entertained a few nights ago when Victor Rodman gathered the boys around the grand for a little fun. Left to right: Raymond Marlowe, Victor Rodman, Marsden Argall, Cy Trobbe, Baldwin McGaw. Rear: Hans Neiderhofer and Henry Thompson.

Watanabe Kids a Cop

IT WAS such a pleasant evening. The borrowed automobile spun along the wide and cheerfully lighted boulevards of Los Angeles and Hollywood, with a hardly perceptible purr while the tall, slim young man at the steering wheel called attention to the various and sundry sights.

For Frank Watanabe (Eddie Holden) of the team of "Frank Watanabe and the Honorable Archie," popular nightly broadcasters from the Paramount Pictures-Los Angeles Evening Express station KNX, Hollywood, was showing his visiting aunt and uncle about the purlieus of the allegedly "wicked film capitol."

"Now over there are the famous La Brea pits from which they have taken so many dinasaurs and pterodactyls and . . . er . . . all those things that lived so many thousand years ago," Watanabe explained. "And not far from here we come to Beverly Hills where I'll show you the homes of the famous movie stars."

However, just then a long-drawn shriek of a siren caused Frank to waggle an apprehensive ear. A shiny, radio-equipped automobile pulled up alongside the sight-see-ers. "Pull over, buddy, pull over,"

Hon. Archibald Chissellberry (right) and Frank Watanabe

came the command. One look at the red lights and Watanabe hastened to obey, wondering what was wrong.

"Where's the fire? Are ya in a hurry?" the officer queried as he got out of the scout car and began to pull a packet of "tickets" from his pocket.

"No," meekly replied Watanabe. He quivered a bit and cast a side-long glance at his visiting aunt and uncle. They were apprehensive but brave.

"Well, how come you rode through the red light at the last crossing?" the cop wanted to know.

"Oh, did I?" whimpered Frank.

"Saaaaaay! Tryin' to kid me? Where's your driver's license?"

A sinking feeling came over Watanabe. He remembered that in his hurry he had not taken his license, or, in fact, any of his papers from his "other" suit.

"Well, let's see your 'Pink Slip'," continued the glowering officer.

Be it explained that the "Pink Slip" is the certificate of ownership California drivers are expected to carry with them all the time—that is, when the last payment has been made and the car belongs to them.

"Th-th—this is a b-b-b-orrowed car," Watanabe tried to explain.

"Oh, it is, is it?" and gruff is no name for the growing suspicion in the policeman's voice.

"Well, why aren't your lights on, buddy, trying to make a sneak?"

Aghast, Frank saw that he had forgotten to turn on the headlights.

"Well, I guess I'm in wrong, officer," he explained. "But I'm Frank Watanabe of the 'Watanabe and Honorable Archie' skits over KNX," he added.

"Yeah," said the cop, reflectively, eyeing Frank as if about to measure him for a shroud. "Well, I'm George Washington. Anything to identify yourself?"

Watanabe suddenly saw a bright light. In his hip pocket reposed the script for that evening's broadcast.

"Look," he said brightly, "here's our continuity for tonight." He pulled out the typewritten pages.

"Gimme," said the cops. Together they read them over. "Sounds all right but does it belong to you? You don't look like a Japanese."

"No, please. I not looking too Japanese. But I feeling just like five, sicks Chinamen. Ah, yes mam."

Hopefully, Frank looked up at the cops. "Gowan!" they commanded.

"But we coulda give you five tickets, young feller, me lad," said the m. c. as the car put-putted away.

Station Parade

(Continued from page 68)

MODEL HOME

DON'T talk, do something! Give the unemployed jobs! And in answer to that demand Radio Station KSTP started doing something by building a model home, costing $20,000. It has just been completed. Some 40 building firms sponsored the undertaking. Daily progress was reported in a special program. The project proved successful.

* * *

REGINALD MARTIN, smart young announcer at WGN, Chicago is off the list, girls. Married Miss Jane Neilson of Evanston on July 11th. He was only twenty but he won a nice girl.

* * *

VISITORS are always welcome at KHJ, Los Angeles. To keep faith with that policy the studios recently were enlarged to accommodate audiences of about 500. The studios occupy the entire second floor of the Don Lee building. Permission has been obtained for the installation of television, and Hollywood beauties soon will be seen from here through this medium.

* * *

PRUDY AND ANN are making singing history over WJR, Detroit.

* * *

HAROLD TURNER is being announced as poet of the organ at Lincoln, Nebr. Don't let Jesse Crawford hear about this.

* * *

FREDERICK O'BRIEN, author, lecturer and traveler has been taking KPO listeners for some long jaunts into wild places lately.

* * *

WALTER BUNKER, JR., KFRC chief announcer, is getting ambitious to do a little warbling himself. He has been taking vocal lessons several months and may be expected to burst forth into song almost any time now. It sounds baritone.

* * *

MEREDITH WILLSON will have no salt on his eggs but makes up by sprinkling it liberally on his grapefruit and so the KFRC, San Francisco, musical features are normally savoured.

* * *

FREDERICK BITTKE, KFRC baritone, resigned as a swimming and diving champion after he had an argument with a springboard that wouldn't get out of the way of his head when he was making a "Flying Dutchman." He was unconscious for 36 hours. He finds singing for KFRC less dangerous.

* * *

HAPPY GO LUCKY GANG COMES TO KFRC FROM SEATTLE SEPTEMBER 12.

KENNETH NILES and bride doubtless have heard by this time of the sad state of affairs at their rabbitery. After leaving KHJ in Los Angeles for a trip to Seattle the rabbits were supposed to be in the care of Paul Rickenbacker, announcer-actor. Rabbit dinners have been thrown right and left. The well known rabbit fecundity has been unable to keep up.

* * *

ELVA ALLMANN at KHJ hasn't hasn't had a wreck for several weeks. Our correspondent says that traffic has learned to move over on the nearest sidewalk and leave her alone. Ken Allen went away and left his new Chevvy on top of the Bixel street hill. When he came back it was a hunk of junk at the bottom.

Hits, Quips and Slips

(Continued from page 63)

Talk about being embarrassed—and what would you do about that? Imagine those know-all Sisters of Skillet thinking up things to sound funny over a mike and then discovering that all the time they had been carrying on Mike had his face turned the other way and they were talking into the back of his neck. Engineers and officials were running around frantic trying to locate the cause of their voices sounding so distant! Now what would you do crawl under it or get a ladder and go over the top?

A lot of Indi-scribes sent in this one from WGY, Schenectady:

Announcer: "I Left My Girl in the Mountains, with Otto Gray and his Oklahoma cowboys."

One fair listener comments at the end of her letter, "Oh! Oh!"

Mrs. Eugene B. Tinker of Creswell, Ore., writes:

"Little three year old Jane had listened to the new Radio all day. That evening she ended her prayer, 'And tomorrow evening at this same time there will be another prayer.'"

Jasper B. Sinclair, 318 20th ave., San Francisco, quotes Monroe Upton over KFRC where he sometimes works under the alias of Lord Bilgewater. Quoth His Ludship: "Why does an Indian wear a hat?" (And you dern well know he doesn't.) Hearing no answer from the Radio audience and thinking they are totally flabbergasted the lord replies, "To keep his wigwam, of course."

SETTING UP, ETC.

B. V. Bloom, 945 Delaware ave., Toledo, O., writes: "My wife has her breakfast by remote control. Every morning at 7 she takes her coffee and rolls in front of the Radio."

W-INDI is now signing off by special permission of the right copy owner on 2,943,852.211149 icicles.

Aunt and Uncle Mike

(Continued from page 65)

their kisses, till I think of the Bishop of Bingen in his Mouse-Tower on the Rhine.

"What would you give," he asked, "to be the confidant of an army of children? What would you give to hold the pop-eyed attention of an exacting audience between the ages of one and ten? Well, I wouldn't trade it for whatever you would give!"

In St. Louis at KMOX these days is the "Once Upon a Time" lady Georgia McAdams Clifford occupies a unique position among story tellers. Her stories for children are the accumulation of twenty-five years and include folk tales, fairy tales, stories with morals, and story cycles. "Aunt" Georgia has developed her own system of technique and story pattern, and is frank to say that her recent (less than a year old) connection with KMOX is her first attempt at the microphone.

That she is watching the results there and of other stations' children's features, goes without saying. She has her theories—and why not? For isn't she the president of the American Association of Story Tellers, which has its headquarters in St. Louis?

She says that it seems that she has been telling stories all of her life. She began her career at Chautauqua, New York, a quarter of a century ago. During the war her thrift stories were immensely popular and helped Uncle Sam a great deal. Mrs. Clifford is a St. Louis woman and a member of the faculty of Washington University there.

Incidentally, one of her astonishing discoveries is that fairy tales are universally popular! Even the adults go for them.

KDKA, Pittsburgh, has "Uncle Ralph" (R. P.) Griffith on the job, assisted by Purves Pullen, animal mimic, and George Preach, pianist. Based on the juvenile love for animals and our

The real Raymond Knight and his family. Mrs. Knight is the girl in the center. The other girl is Betty Lou. That man on the left is John.

of-door life, Uncle Ralph keeps his programs educational in effect but never so that his young listeners can detect it.

Pullen's imitations of various animals are so realistic that they even bring delight to fathers and mothers as well as to the younger members of the radio audience. And Uncle Ralph's stories likewise draw mail from the grownups.

As I conclude this review of the air's aunts and uncles, who by the way, number entirely too many to be covered in so short a space, my eye is attracted to a chapter, "Programs for Children," in Peter Dixon's new book entitled "Radio Writing." Dixon, a continuity and script author of some years' experience, and who creates and enacts, with his wife's help, NBC's "Raising Junior," writes:

"The worst mistake any writer can make is to attempt to write 'down' to children. They not only resent it but they develop a positive dislike for the writer. Children like simple stories, but they will not tolerate slush. . . They are mainly interested in what it is all about. . . A good way to antagonize ninety per cent of your child listeners is to make it clear to them that you are going to tell them in very simple words and phrases, calculated to appeal to their childish understandings, just what you are going to tell them. They will promptly desert your program and tune in on the weather reports."

Does this help you to understand little Annie and Willie a bit better? If not, just sit down and write a letter to your favorite radio uncle or aunt. He or she will tell you more things, probably, about your own offspring than you yourself had even suspected!

THIS is the second and concluding installment of the Aunt and Uncle Mike story by Uncle Ev Plummer. It was impossible to tell the story of all of these splendid Radio entertainers, but Radio Digest will keep telling you something about some of them from month to month.

—EDITOR.

Ambrose J. Weems

(Continued from page 53)

also regarded a nearby milk can, whose name escapes me at the moment.

Now Archibald Finch was cross-eyed and as he regarded Henery XIV and the milk can, whose name still escapes me, they blended into one and the same thing. As they crossed his vision Archibald leaped up and shouted, "Eureka." At this, his sister, who was named Eureka, came running out of the house, fell into the well and was never heard from again.

But Archibald Finch was not a man easily daunted. "If only I could get that cow into the can," he exclaimed, and forthwith he set to work on the problem.

For days he labored trying to get the cow into the can. At first the cow, whose name had meanwhile been changed to Edith, protested but after a while she entered into the spirit of the thing better, and also into the can, and after a week she was into the can up to her neck. You see the difficulty lay in her ears. The rent was in arrears, but that's neither here nor there.

However, Archibald Finch came of sturdy stock and when two more weeks had passed, the cow whose name had again been changed, this time to Smith, was entirely inside the can all except her tail—but that's another tale.

The world was quick to see the practical value of combining the cow with the can and in a few years Finch became wealthy, was elected to Congress and disappeared from the sight of man.

If it had not been for Radio these facts would never have been known. (Incidentally this above account can be used in later programs as the story of the invention of canned corn beef hash. It will probably appear the week after the broadcast of how Eustace Winterbottom, the flypaper king, invented blueberry pie.) (Advt.)

AND so in conclusion, in answer to those who ask me whether or not Radio is in its infancy, I reply—"You can fool some of the people some of the time, and you can fool some of the people some of the time, but you can't fool some of the people some of the time."

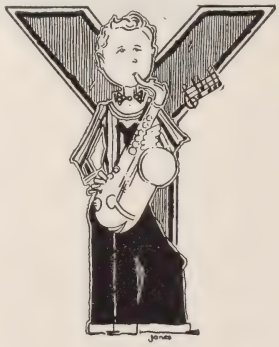
Tuneful Topics

By RUDY VALLEE

AS I begin the dictation for this issue of "Tuneful Topics," Evelyn, my stenographer, and I are sitting back-stage of the "Scandals," with the opening less than two weeks away. Rehearsals are still conducted with a nonchalance and a laissez-faire attitude, indicating that we are still far from the scenes of feverish activity that next week will bring to us.

So far there has been no complete rehearsal from start to finish; in fact, the chorus girls are rehearsing next door in the Apollo Theatre, while we, the principals, rehearse afternoons and nights back-stage of the Selwyn Theatre which the Selwyns seem kind enough to permit Mr. White to use.

Little by little we are polishing up the various odds and ends of our songs and sketches. But it is of the songs I intend to speak in this month's issue.



The triumvirate of DeSylva, Brown and Henderson is no more. Following the making of that stellar production, "Indiscreet," starring Gloria Swanson, in which were featured the two songs "Come to Me," and "If You Haven't Got Love," Ray Henderson and Lew Brown returned to New York while, as Lew Brown puts it, DeSylva "treads among the gold" of Hollywood.

IT IS such genuine, spontaneous and truly remarkable witticisms as these that have established Lew Brown in the foremost ranks of writers. One of his sly witticisms, which he dropped before leaving the Coast, has been used all over the Hollywood lots—"There's gold in them heels!" Brown is one of the fastest and most brilliant thinkers of lyrics, situations, and ideas; while Ray Henderson, a thorough student of harmony, counter-point, and a most prolific originator of musical ideas, is an ideal mate for Brown.

Ray plays piano beautifully, and from his nimble fingers have sprung many of the beautiful melodies that have come from the DeSylva, Brown & Henderson firm ever since it began its million dollar career several years ago—January 1st, 1927, to be exact.

I can early remember Ray Henderson's "Just a Memory," before the trio was formed, which he wrote for Harms, Inc., and which was one of the most lovely compositions ever written.

Under the direction of Bobby Crawford the boys wrote the music for "Good News," "Hold Everything," "Follow Thru," and the "Scandals of 1926," from which came "Birth of the Blues," "Lucky Day," and "Black Bottom." For Jolson they wrote, in a hurry, at his special order, while they were writing a show in Atlantic City, a simple little tune which, three or four months later, filled all their pockets with gold. That was "Sonny Boy." They wrote it more as a gag than anything else, and no one was more surprised than they when they found it turned out to be a hit.

When I learned that Brown and Henderson were going to write the book and music for the "Scandals," I knew that I was in the best of hands, and that I would have some fine songs to sing. And as song after song was played to me by the two boys long before rehearsals began, I felt that my belief was justified. Certainly few shows have had as unusual a score, and there is little doubt in my mind but that within several months nearly everyone will be humming and whistling at least two or three of the hits from the show. When it comes to picking tunes one person's guess is about as good as another's, and I would say, in my humble opinion, that the most popular song in the show, from a standpoint of country-wide popularity, urchins whistling in the street, hurdy-gurdies, phonographs and radio, will be "This Is the Mrs."

This Is the Mrs.

THE reasons for my belief in it popularity are simply that it is th type of song that may be played ex ceedingly fast with no damage to it lyric or melody. It is a lilting type o song, with a new thought. The melo dy is of a novel twist, and will mak great "dansapation." I believe I am go ing to sing this song to a young lad whom I pull away from a group of ad miring boys, and the song simply be speaks the fact that she is mine—he lips, her eyes, every bit of her—in fac she belongs to me.

Urban has devised a beautiful littl church background from which issu a train of girls in bridal costumes, an so forth, which will be extremely colo ful and lovely. The song itself, from melodic and lyrical standpoint, shoul be extremely popular.

We will play it at about 40 second to the chorus. It will be published, c course, by DeSylva, Brown and Hen derson.

Life Is Just a Bowl of Cherries

THIS is one of the comedy songs a rather odd, humorous and dari thought from the brain of Lew Brow and if treated in schottische tempo carries one along in an extremely d lightful fashion.

It is introduced in the show by t Loomis Twins, who sing it with vi and vigor, and much exaggeration facial expression, but whose delive of it will certainly plant it and put well over before the rest of the ch acters each sing a chorus specially fitt to their own character.

The idea of the song is that nothi is worth worrying about—that life a er all is "just a bowl of cherries." R Bolger does a chorus about a cop s up by gangsters, who, after seve months in bed, gets the $10 "New award.

Barbara Blair, the delightful come enne does a chorus of a beautiful l dumb girl who gets nothing else but beauty cup after being man-handled a kicked around the place.

Willie Howard, whose comedy is

ays so refreshing and laugh-provok-ng, does a chorus at the end of which e makes me the butt of his joke, his ob being a daily plunge off the Em-ire State Bldg., for which he receives ttle, whereas, as he says, "there's a uy in the show who gets thousands or singing like this!"

Eugene Howard is discovered in the it as a musician who, after studying ne fiddle for years finds himself noth-ng but a pit violinist.

I predict that everyone will leave the neatre humming LIFE IS JUST A BOWL OF CHERRIES—it's that type f song. We will play it in the schot-sche tempo, taking about one minute or the chorus, in order to give it the ight swing.

My Song

THIS is the pet song of Ray Hen-derson and Lew Brown. Both of nem feel it should be the hit song of he show, but I am not so optimistic s to its hit possibilities. Again it is ny good fortune to introduce it. I sing t to Ethel Barrymore Colt, daughter f the first lady of the stage, Ethel Barrymore, the idea being that after nding everything else a failure in my ffort to win her, the best I can do is simple song, which I call MY SONG.

It is a lovely musical thought, men-ioning Franz Schubert and Berlin, whose touch I cannot seem to acquire. t provides the opportunity for Franz Schubert later, with lovely glimpses of cenes from the days of Schubert, and he Berlin likewise exemplified. The ong will probably be very popular.

We will play it, taking one minute nd ten seconds for the chorus.

The Thrill Is Gone

THIS is the type of song I do best —a song that I will get a great deal f pleasure out of singing in the "Scan-lals," because of its unusually poignant nd rich melodic qualities, which offers me an opportunity to really get a kick ut of singing something. There is really nothing specifically or intrinsi-cally unusual about this except that it will be presented in the usual George White fashion, with a real reason for its rendition.

I believe it will be first sung by Ev-erett Marshall, the delightful tenor of the Atwater Kent Hour, and later by two or three other voices, before the final rendition is mine.

That's Why Darkies Were Born

THE mention of Everett Marshall brings me to the description of per-haps the most unusual song in the show, from a standpoint of grandeur of pres-entation—THAT'S WHY DARKIES WERE BORN. Ever since the success of "Birth of the Blues," Brown and Henderson have been seeking its proto-type. I imagine it will be presented in somewhat the same style, with a caval-cade of negro folk, as "Yaller" was pre-sented in "Three's A Crowd." Everett Marshall will certainly be in his glory in the rendition of this stirring compo-sition. He has a big chorus made up of the best voices in the cast to answer him with "Hallelujahs" and "ayes" and "noes," but he will really be in his prime when he sings the phrase "Some-one had to pick the cotton." The song builds toward the end, and there are terrific passages in triple F, as loud as Everett can sing them. The audience should certainly rise to its feet at this place, if they don't previously.

Henderson has conceived some of the most beautiful descending harmony against the melody of the composition, and since the scoring of the music is in the hands of the finest of arrangers, there is every reason to believe that this song, which depends on the orchestral arrangement, the chorus and the full rich quality of a voice like Everett Marshall's, will be sensational.

In October Radio Digest

YOU enthusiastic radio listeners who have urged Radio Digest to publish a new picture of Rudy Vallee will have your wishes gratified. There will be a new picture of this popular radio star and it will come to you in the next issue. So, Rudy Vallee rooters, make sure of that October Radio Digest. Visit your newsstand early.

I'd Die

WRITTEN along the idea of the songs sung in the synagogue by the Jewish cantors, Brown and Hender-son have evolved a song which four girls will sing, and the fifth rendition of which may possibly be mine. It has the very odd title of I'D DIE. The idea of the song is that the fellow or the girl goes on to express the many things that he or she might do, but would not do were he or she to lose the one they love.

Paradoxically, most of the lines are like this: "If I thought I could laugh over losing you, I'd cry," but it is such subtle paradoxical touches that make Lew Brown the lyricist he is.

While the orchestra sustains the beau-tiful low chords, the singer utters a phrase as rapidly as possible. It is in a minor vein, and should be an exceed-ingly captivating number in the show.

I believe that the four girls are going to be spotted in four different spots of a large curtain, each being lit up as they sing their spot, while yours truly is to be in the middle, in a sort of mi-crophone setting, not being lit up until the fifth chorus.

You Don't Live to Love

MARSHALL has another song in the show which he does with Ethel Barrymore Colt—a very dramat-ic type of song again, one which only his strong type of voice would carry through, a song in which he utters his contempt and loathing for a gold-digging girl who, finally shown how little she really cares for him, and the final blackout ends as he shoots her with a pistol which he has pointed at her through his coat pocket all through the song.

Like all musical comedies there are several other songs of the incidental character, songs that will probably nev-er reach the public ear to any extent, but the above are the outstanding songs of this year's "Scandals."

Begging for Love

NOT since "Reaching for the Moon" has Irving Berlin written any-thing really worth while. Now he seems to be in a writing streak again; two songs have followed one another in quick succession. The first, BEGGING FOR LOVE, is one which I recorded last Saturday, and which I think is a very lovely song. It may not assume hit proportions, but for those of us who enjoy the pathetic, really beautiful type of song, just a little bit different and unusual, BEGGING FOR LOVE is this.

It is unusual in the number of meas-ures in its chorus, of which there are 22; the verse is one of the loveliest I have ever heard. Our record of it, in-cidentally, is the first on which I have ever sung a song in ad lib style, (that is, singing both the verse and chorus ad lib, and not in any strict dance tempo; I am very curious to hear the master, which should come back from Camden tomorrow.)

BEGGING FOR LOVE is published by Irving Berlin, and we play it at about 50 seconds to the chorus.

It's the Girl

I FIND it always a pleasure to dis-cuss songs that are really unusual in one way or another, because it is an unusual type of song that attracts atten-tion. This one is certainly unusual be-cause of the number of measures, hav-ing 51, though I sometimes wonder if it is improved by its extra length.

It is written by two of Tin Pan Al-ley's best liked boys, one of them, Dave

ROMANCE of Jewels

Olga Tritt, famous Expert on Precious Stones, Says Her Happiest Moment Comes when She Brings Together Right Person and Right Jewel

●

By Ida Bailey Allen

SINCE the beginning of time man has made things with which to adorn himself—and his wife. And we of the twentieth century have no less an appreciation of these things. In fact, there is only one danger accompanying the jewelry of this age—and that is that people often come to value it merely because it spells riches and success to own a jeweled bracelet or a cameo rather than because of any really artistic value. To many the enormity of a diamond is more important than the way it is set, or its appropriateness for the wearer. The semi-precious stones, which are often infinitely beautiful, if worked into designs by the appreciative hands of a real artist in the craft, are often disregarded by women because they are not educated to their beauty.

To many people gems mean no more than glitter. If a setting of a stone does not bring out the maximum illumination, it is considered a loss. But how pathetic that is—and in what poor taste!

Because I feel so strongly that this art of jewelry making is not half understood, I asked Miss Olga Tritt, who is one of the most distinguished women in this field—and has pulled herself up to her present authoritative position by her own bootstraps, as the saying goes, to broadcast for the National Radio Home-Makers Club.

Miss Tritt was born in Russia and comes from a family of goldsmiths. But in her youth, there was no opportunity as a goldsmith or jewelry maker for a woman in Russia—and so, when she was still quite young, she came to our country. Here she started quite at the bottom of the ladder. A good artist, she was also a fine craftsman, with a great respect for acquiring a definite working knowledge in her chosen field. And so no detail was too small or too hard to be fascinating to her. To gain knowledge, she worked on the bench in a factory, but as soon as she felt sure that she had learned all she could, she stepped out, with little or no capital—but with that enormous courage that some people have—and started in business for herself.

Because she knew her field, and because she had something real to offer the world—original work and authoritative advice and appraisal on antique jewelry—she has been a success. She has become, as well, one of those rare figures—a person who makes few gestures to attract people to her, but to whom connoisseurs, as well as every sort of person who loves beauty, nevertheless find their way. She not only makes lovely jewelry herself, but she has been responsible for bringing into being the famous jewelry collections of several wealthy people.

Miss Tritt has a theory which seems very right—even very important to me—and that is, that jewelry is entirely individual. In most cases it should be made especially for the one who is to wear it. Some people, for instance, cannot wear rubies well; for others they become a part of their natural color scheme and personality.

ALTHOUGH Miss Tritt is one of the leading authorities on pearls and diamonds, she nevertheless honestly feels that there are quite inexpensive jewels that are just as beautiful. She has told me that she enjoys making a little ring that almost any woman can afford just as much as she does making the most cos

When Miss Tritt spoke on the N tional Radio Home-Makers Club per d she said: "Women in this generat n have to make or help make a living in so very many cases. Many of them h e real talents for various kinds of wo but they are often too shy, too fearfu to attempt to follow out their careers these things independently.

"But you can accomplish almost a thing—there are only two requisi s First, you must *know* the work you w to engage in—from every point, anc every detail. And then you must *not afraid* to venture to compete with th who are already established.

(*Continued on page 95*)

7 *Thrilling* Branches of Radio you can easily learn!

THE world's most thrilling industry—Radio—is just on the brink of even greater achievements. You can, if you start now, become part of Radio's future!

Aircraft Radio

Broadcast Station or Studio

Direction Finder or Radio Compass

Disc and Film Recording

Talking Pictures

Servicing of Home Entertainment Equipment

Television

Learn Radio at RCA Institutes

It is easy to learn these interesting branches of radio. Study is made simple at the RCA Institutes, through advanced methods and association with the largest, most complete research laboratory in the radio industry. The four resident schools—at New York, Boston, Philadelphia and Chicago—offer elementary and advanced courses in practical radio. Courses based on 22 years experience, constantly revised, to include latest developments.

Win Radio Scholarship

If you cannot attend the resident schools, RCA Institutes Extension Courses enable you to study at home. Special laboratory equipment furnished. Outstanding graduates of extension courses become eligible for free scholarship at nearest resident school. All tuition costs moderate. This may be the chance you've been seeking. So write today for free book, full details. The coupon makes it easy. RCA Institutes, Inc., 75 Varick Street, New York City.

HER MASTER'S EYES

Faithful Shepherd Sees Way to Studios and About City for Blinded Veteran

Reginald D. White and Wickee

WICKEE is a lady. Her best boy friend is her ma[ster] Mr. Reginald D. White, a war-blinded veteran, [who] is heard regularly on the Pacific coast from t[he] NBC studios in San Francisco.

"She freed me forever from the prison of blindness," he explained recently to the Radio audience. They met about a year ago, became pals immediately, and have been inseparable ever since. Wickee leads him safely through traffic, [to] chairs, door-knobs, stairs, and even elevator buttons for [the] Sailor White says she has human intelligence and, watching her tender and watchful care over him, you are forced to admit he's right.

She even laughs, cries and speaks in his act at the microphone where he tells dog stories for a dog food program—you know, she has a voice as well as eyes. Wickee is a Belgian shepherd. White was an engineer and blinded in an accident aboard a vessel during the war.

Stations Alphabetically Listed

The following list of stations has been corrected from the latest authentic sources. However, station managers are invited to report any inaccuracies.—EDITOR

To Ambitious Men and Young Men who are awake to the Opportunities in RADIO

This book tells you where the GOOD JOBS are what they PAY how to GET one

Send for your Free Copy Today

I start many in Radio at two and three times what they were making before

Seldom under $100 a Week

"My earnings seldom fall under $100 a week. My profits for the past three months were $97, $95, $85. If your course cost 4 or 5 times more I would still consider it a good investment."—E. E. Winborne, 1267 W. 48th Street, Norfolk, Va.

From $35 to $100 a Week

"I had the pleasure of earning $110 last week servicing and selling sets. I have made as high as $241 in two weeks. Before I entered Radio I was making $35 a week."—J. A. Vaughn, 4075 S. Grand Boulevard, St. Louis, Mo.

I Help You Specialize Through My Five New Advanced Courses

My training not only gives you a thorough knowledge of Radio—all you need to get and hold a good job—but, in addition, you may take any one of my new advanced courses, without extra charge. They are:

TELEVISION

AIRCRAFT RADIO

BROADCASTING
Commercial and Ship Radio Stations

SOUND PICTURES AND PUBLIC ADDRESS SYSTEMS

ADVANCED RADIO SERVICING AND MERCHANDISING

"Rich Rewards in Radio" gives you an outline of these courses. Get a copy. See for yourself how valuable this new idea in Home Study Training can be to you.

400% Increase

"My income now is about $400 per month, which is 400% increase over my income at the beginning of my enrollment with N. R. I."—J. W. Sessums, 5239 Richards Ave., Dallas, Texas.

$800 in Spare Time

"Dear Mr. Smith: I did not know a single thing about Radio before I enrolled, but I have made $800 in my spare time."—Milton I. Leiby, Jr., Topton, Pa.

EVER so often a new business is started. You have seen how the men who hooked up with the automobile, motion picture and other industries at the right time are now the $5,000, $10,000, $15,000 a year men—independent, satisfied. The same opportunities they had in those industries—the chances that made them rich, are now being offered you in Radio. Radio's growth has already made hundreds of men wealthy. Many more will become rich and independent in the future. Get one of these fine jobs for yourself.

Radio's big growth making hundreds of fine jobs every year

I am doubling and tripling the salaries of men and young men by training them for Radio's good jobs. My training fits you for Radio factories, broadcasting stations, a spare time or full time business of your own, operating on board ship—which gives you world-wide travel without expense, commercial land stations, research laboratories and many other branches. Talking Movies, Public Address Systems, Radio in Aviation, Television, Advanced Servicing and Merchandising and other valuable subjects are covered in my course.

Opportunities so great that many make $10 to $25 a week extra almost at once

The day you enroll I will show you how to do 28 Radio jobs common in almost every neighborhood. Throughout your course I'll show you how to do many other jobs for extra money. G. W. Page, 2210 Eighth Ave., S., Nashville, Tenn., made $935 in his spare time while taking his course. Joseph Skrivanek, 20 Telegram Ave., Elmont, L. I., N. Y., says: "My total earnings since my enrollment amount to $2,892 for spare time work in evenings."

I will train you at home in your spare time

Hold your present job. My 50-50 method of training, half from lesson books and half from

I Give You Extensive Practical Experience with My Home Experimental Outfits

Shown here is one of the many circuits you can build with the eight big home experimental outfits I give you. These outfits are real Radio parts and the 100 experiments you make with them, explain clearly the basic principles of whatever branch of Radio you choose—and give you practical experience in servicing practically every type of receiving set made.

Broadcasting Stations need trained men continually for jobs paying $1,200 to $5,000 a year.

Aviation is needing more and more trained Radio men. Operators employed through Civil Service Commission earn $2,000 to $2,800 a year.

Spare time set servicing is paying N. R. I. men $200 to $1,000 a year. Full time men are making as much as $65, $75, $100 a week.

Talking Movies—an invention made possible only by Radio—offers many fine jobs to well-trained Radio men, paying $75 to $200 a week.

practical experiments using eight Big Outfits of Radio Parts given without extra charge, makes learning at home easy, fascinating. It is unequalled. It gives you practical Radio experience while learning. You don't have to be a high school or college graduate. Many of my most successful graduates didn't finish the grades.

Your money back if not satisfied

That is the agreement I make with you. I am so sure that I can satisfy you that I will agree to return every penny of your money if, after completion, you are not satisfied with the Lesson and Instruction Service I give you. Could anything be fairer?

ACT NOW—
Find out what Radio offers you for success and bigger pay

My book gives you the facts, what your prospects are for a job and quick promotions, how you can get in without delay, what you can make. It explains my practical method of training with my home experimental laboratory, what my Employment Department does to help you find a job upon graduation and many other features that have made N. R. I. training unequalled. There is no obligation. Simply fill out the coupon below and mail it. Do it today.

J. E. SMITH, President
Dept. 1 JR 3
National Radio Institute
Washington, D. C.

On thousands of cellar shelves you can find the results of

BALL BROS.' CANNING TIME

on

WLS THE PRAIRIE FARMER STATION
CHICAGO

For the information Martha Crane has been giving twice every week at 1 o'clock standard time, is practical and her talks smell of the preserving kettle and the savory chili sauce. Starting with strawberries, Ball Brothers' Canning Time has followed the garden and orchard season straight through, with an occasional glimpse away from fruit and vegetables to the fascinating subject of meat canning. The reason Martha Crane has such a large audience for this program is simple enough. She is talking facts and experience, telling things that the women of the WLS audience want to hear.

Martha Crane

Here at WLS we like to build programs like that—programs that serve—and we find that our vast audience on farms, in small towns, and in the city of Chicago, like them too. In building a program we study to make it truly serve its purpose.

Probably you have been listening to Ball Brothers' Canning Time, on WLS, and you understand why it makes the housewife want to reach for the stew-kettle and the paring knife and start filling up the cellar shelves with good things for winter.

WLS, The PRAIRIE FARMER Station

(Continued from page 15)

Eleanor Holm, all under the guidance of Jack Norman, television sports announcer; marionette shows by Remo Bufano; songs of the 'Gay Nineties' by Dr. Sigmund Spaeth in fearful and wondrous costume; Little Billy the midget, and Felix the Clown; international song periods in typical costume by Suzanne Kenyon; piano lessons showing technique of fingering and so forth by Professor G. Aldo Randegger; elaborate theatrical presentations by Chamberlain Brown and his guest stars; Samuel's 'Protegées' period, the Fanchon and Marco 'Radio Idea' and others.

"Noted operatic virtuosos such as Vladimir Radeef, Mme. Mariska Aldrich, Mme. Herma Menthe and Dorothy Edwards have also enjoyed the advantages of television as well as sound representation.

"We have had magicians, jugglers, tap dancers, character analysts, cartoonists, and we have even tried the stunt of putting on a man who plays tunes on ordinary tree leaves, which is one jump ahead of the old tissue paper and comb instrumentation!

"And we are only beginning. In the near future, as we are able to extend our facilities for television broadcasting, we plan to do regularly complete Broadway plays, both musical and dramatic; remote control pick-ups of baseball games, prize-fights and the like; and to stage presentations in our Fifth Avenue studio which will be designed and produced by Mr. Stewart especially for television. The technique of television program production, according to him, is already different from that of radio, screen, or the stage; and we are developing as rapidly as possible the particular style of acting, script, make-up, costume and lighting peculiar to the needs of visual broadcasting. But that, as Kipling, says, is another story."

National Broadcasting Co.'s Television Plans

TELEVISION remains the great mystery of Radio broadcasting. Despite research and experimental work conducted for years by engineers in all parts of the world, image transmission has not progressed beyond the laboratory stage. Engineers of the National Broadcasting Company hope, however, that television will be available to the public in the near future.

As the most significant step taken in this -direction for some time, M. H. Aylesworth, president of NBC, announced recently that space had been leased on the eighty-fifth floor of the Empire State Building, the world's tallest structure, for an experimental television broadcasting studio. The antenna will be placed atop the dirigible mooring mast, twelve hundred and fifty feet above Fifth Avenue. In the studios will be installed the most advanced and complete image broadcasting equipment, combining all latest developments. The studios will suggest elaborately equipped experimental laboratories rather than points of origin for actual broadcasts, sight or sound.

NBC experimental television broadcasting has been carried on in co-operation with RCA Victor Company and dates back to April 14, 1928, when the RCA technical and test department received a permit to construct station W2XBS, the first of the present group of stations in the metropolitan area. The station began experimental operation a few days later. W2XBS was turned over to NBC in July, 1930, and moved from 411 Fifth Avenue to the NBC Times Square Studio over the New Amsterdam Theatre. NBC engineers continued experimental broadcasting on a regular schedule.

NBC has not attempted to broadcast actual programs, projecting only small images, a man's face, for example, or the now famous "Felix," a black toy cat. A person could pose before the camera at full length but the image received at the other end would lack detail, so that only "close ups" are used at present.

In further cooperation with RCA Victor, NBC installed an experimental shortwave transmitter at the top of the RCA Building tower at Fiftieth Street and Lexington Avenue, and conducted extensive experiments, studying the influences steel buildings have on the propagation of waves within the television band. Engineers have known for some time that large buildings reflect shortwaves in much the same way as light is affected. The waves bounce about like light rays after striking a group of mirrors.

As a result of these and other tests, C. W. Horn, NBC general engineer, and other scientists, reached the conclusion that television waves cannot be projected successfully through buildings but might travel over them. For this reason NBC is building the Empire State transmitter and will attempt to thrust waves down into New York from that elevated point.

NBC's program and engineering departments are cooperating in the study of program technique with the view to anticipating the requirements of television program broadcasting by devising methods of program presentation suitable for the camera as well as the microphone. A great deal of work is ahead of them in this respect, for many problems still require solution. As an example—it is known that photo-electric cells, the television eyes, are selective as to color—some cells will not transmit red and others will not handle blue, and so on through the spectrum.

STERLING ARTISTS SERVICE

AN ORGANIZATION OF RADIO TALENT SPECIALISTS SERVING THE INTERESTS OF ARTISTS, BROADCASTERS AND ADVERTISING AGENCIES

Artists are invited to apply for Registration and *Certified* Audition—Free

Each Artist or Feature is Auditioned Free.

A Record-O-Graph Instantaneous Transcription of each Artist or Feature is made available to Artist Bureaus of Advertising Agencies and Radio Stations without charge —together with *Certified* Audition Report.

AMERICA'S PREMIERE REGIONAL STATION

WMCA

NEW YORK CITY

570 K.C. 100% Modulation 500 Watts

13,000 square feet of modern broadcasting facilities . . . . . 7 perfect studios . . . . . the WMCA THEATRE, first Radio Theatre of the Air with auditorium comfortably seating two hundred . . . . . studios overlooking the Great White Way . . . . . a staff of more than one hundred experts to prepare and present your programs . . . . . a truly modern broadcasting plant.

THE AIRLINE TO THE NEW YORK MARKET

Twelve million people live within the trading area of New York. Nowhere else in the world is there a greater concentration of buying power. The yearly consumption of luxuries and necessities of these New Yorkers reaches a staggering total.

New York is the world's richest, most compact market for every kind of product and service that human ingenuity can devise. The New York market *alone* has made millionaires of men. Because of its size—the many-sided angles of its life—the cosmopolitan character of its population—some advertisers believe that the New York market is difficult to sell successfully.

But radio broadcasting through WMCA has shattered this prejudice; has proven through actual *results* for a varied clientele of advertisers, that New York is *now* one of the *easiest* markets in the world in which to gain a firm foothold.

NEW YORK'S OWN STATION

WMCA covers practically *every* event—*every* happening that is of *interest to New Yorkers.* If there is an important New York news story WMCA broadcasts it. Banquets of local importance and significance, outstanding ring and sport events, theatrical performances, the smarter night clubs—these are a few of the things that New Yorkers expect WMCA to cover.

We believe that no station has more friendly and personal relations with its army of listeners than WMCA. Because they are always sure of finding something of immediate and local interest on its program, New Yorkers have an exceptionally warm regard for WMCA.

Knickerbocker Broadcasting Co. Inc.

He *didn't* count sheep jumping a fence

NO SIR! The guest we have in mind had his own cure for insomnia! He asked us to furnish a thermos bottle full of hot milk, so that he could have it by his bed, in case he woke up at night, take a drink ...and then get to sleep again! Thermos bottles and hot milk aren't part of the standard equipment of United Hotels... but we do have large, airy high-ceiling rooms, with a feeling of pleasant freedom... and the beds... well, if you've ever slept in one of our hotels you know how good they are! So there's very rarely occasion for insomnia at any of the 25 United Hotels listed below.

Extra service at these 25

Paul Dumont, little big NBC-M.C.

Ted Lewis—Bad Boy

(Continued from page 27)

Finally he played at Coney Island and the resort somehow survived. So did the Caprice Club and Rector's, the "Greenwich Village Follies," the Columbia Phonograph Company, the Kit Kat Club in London, "Artists and Models," the talkie company for which Ted made "Is Everybody Happy?" and the great vaudeville circuits which bid for Ted's orchestra and Ted. The money-wire days were over with almost miraculous abruptness.

Several times since 1925 Ted has made special Radio appearances but years ago he set his price for sponsored appearances and he told me, when I interviewed him for Radio Digest, that he had not been particularly anxious to have the price met. Why not?

"It's been a real problem," said Ted. "Radio builds reputations so rapidly and on such a grand scale today that it's perfectly obvious one can't neglect it if he expects to remain a real headliner. Yet here I am—I've spent twenty years developing a style and attack which depends in some measure on my own prancings and gesturings. I've spent fourteen years teaching that hat to sit up and beg—it looks like it, doesn't it?" He pointed to the famous piece of headgear, borrowed from a doorman at Rector's in 1917 and not yet returned, looking every day of its age.

"I don't feel that I'm doing my Radio audience justice unless I substitute something audible for the tricks vaudeville audiences have applauded all these years. So I've worked harder on the monologue and orchestra effects in my first series of chain broadcasts than I've ever worked on script in my life.

"I feel completely easy with a stage audience. If something unexpected happens it's easy to ad lib or to fill up with a minute of juggling my hat or clarinet, or with a step or two. In fact, in my first broadcast, when it became apparent that we hadn't made our program long enough by almost a minute, I reached

Auditions and Broadcasting Courses

CERTIFIED AUDITIONS

An audition, preparatory coaching, including Test Recording, *Certification of your talent qualifications and ratings, Registration in Audition-Report Service Available to Artists Bureaus of Radio Stations and Advertising Agencies, DURING SEPTEMBER SPECIAL THRIFT RATE $3.00.

INDIVIDUAL COURSES

Broadcasting Institute, Inc., will teach you to express your personality—your individual talent—under actual broadcasting conditions.

SPECIAL COURSES

Training in script reading, personality projection, character portrayals, dialects, dramatic delineation, orchestral balance, radio writing and merchandising courses are given by recognized broadcasting authorities.

COACHING COURSES

Dramatic artists, groups and speakers will find the courses in dramatic projection, enunciation, diction, dialects and character delineation invaluable. Courses in Broadcasting Technique, radio showmanship, etc., have been designed especially for vocal artists and ensembles. For instrumentalists and musical organizations there is instruction in radio development, novelty technique, tone valuation, etc.

EXPERIENCED DIRECTORS

Directors of the various courses are experienced in every phase of radio production, dramatic or musical—assuring expert advice and help.

***Record-O-graph *Instantaneous* Transcriptions are used to test the talents of each artist applicant without extra charge.**

THRIFT RATE--THIS MONTH

Single periods, each, $5.00—Ten periods, complete, $45.00—Twenty periods, complete, $85.00—Fifty periods, complete, $200.00.

TERMS: Tuition payable in advance of each period. Deposit of first and last periods required with application. 5% discount for FULL Payment in Advance.

for my hat. It wasn't until I'd had time for a second thought that I got really worried; then I signalled the boys and we filled out by repeating our last chorus.

"In some ways Radio work demands more of you than any other form of entertainment. Appearing in person, applause and laughter give you time to catch your breath. On the air you have to be clicking every minute."

For years Ted has opened his appearances with the question he forced into popular slang, "Is Everybody Happy?" In Pittsburgh, while Ted was traveling with the "Greenwich Village Follies" in 1922 his father came to see him. Two minutes before Ted's appearance on the stage at one performance his father had a heart attack and died. Ted walked out on the stage and asked. "Is Everybody Happy?"

Hugh Barrett Dobbs

(Continued from page 51)

He first went on the air in 1925, giving a series of morning exercises over KGO, San Francisco. Later he tried KFI, Los Angeles, for a time, but finally returned to San Francisco and joined KPO in September, 1926. He has been there ever since.

Dobbs' success with his exercise programs and the possibilities of his idea for mythical "Ship of Joy" Radio cruises appealed to E. H. Sanders, advertising and sales promotion manager for the Shell Oil Company. Sanders retained him and gave him a free hand to develop a program for the company.

By January, 1929, Sanders was so impressed by the success of the program and its promise for the future that he "signed" Dobbs for a period of three years at a salary calculated to net him almost a quarter of a million dollars during that period.

More than a year has passed and Dobbs is even more firmly entrenched as a Western radio success. There have been many impressive evidences of his strong position—proof that his popularity is not waning. Surveys among listeners place the "Happytime" program next to Amos 'n' Andy in point of popularity in the San Francisco Bay area. In Salt Lake City and vicinity, listeners rated Dobbs above the famous Radio taxicab team.

More than 16,000 listeners entered an air mail slogan contest which Dobbs mentioned over the air; Dobbs received 6,000 Christmas and birthday greetings, and 3,000 sympathetic fans wrote him when his father died recently. "Wee Willie" Hancock, the "Ship of Joy's First Mate," received 2,800 letters of condolence following the death of his wife. And there have been innumerable similar evidences of listener interest, loyalty and appreciation. Fan mail received includes more than 1,000,000 letters, postcards, telegrams and other messages.

Dobbsie has demonstrated the therapeutics of a chuckle and good fun, and I'll match his "crew" against any comparable radio audience in America for whole-hearted appreciation and support

(Continued from page 56)

listed with the Second Montana, 163rd infantry and later got to use his rifle at Chateau Thierry, St. Mihiel and Argonne. In spite of his youth he was quickly recognized as more than ordinarily able and promoted to the rank of sergeant. After three months in the trenches he was again promoted and at the time of the armistice he had become a second lieutenant in an officer's training camp. Having been through three major engagements part of his job during the latter part of the war was in training commissioned officers how to take platoons over the top.

In the summer of 1919, before returning to the United States, John wore the colors of the United States in the Olympics, running the mile against seasoned stars. In the semi-finals at the Colombe Stadium, Paris, he was accidentally spiked in the heel when coming down the final stretch in the lead. Larry Shields, University of Pennsylvania star, won the race.

John earned his first reputation as a singer at the age of nine. He began his

TELEVISION
CALLING FOR MEN

Television is here. Sight programs are now being received. Learn quickly to operate the "Eyes of Radio." Trained operators, salesmen, service and repair men are needed now. No one can hope to compete for big-pay jobs without proper training. Under my *personal supervision* you master the essentials of Television in a few short weeks, right here in my shops and practical laboratories. Get into the real money—quick. Thousands of fortunes were made in Radio 10 years ago—now is your opportunity to cash in on the world's greatest future industry.

FREE. Send name and address for fascinating new book, "Practical Television," profusely illustrated; contains a vast fund of valuable information. Don't miss it. It's free. Write for it today.

shoulder (that's nothing new, Edna), so I'll take my departure and give the floor to the next comer. But from a corner of the waste-paper basket, I'm just gonna take a peek around, I *yam* an' see for myself whether I'm in a menagerie or just a pet shop!! Your devoted admirer, regardless, (signed) Edna H. Stanbrough, Newburgh, N. Y."

* * *

MRS. GRAINGER recently made her Radio debut over WGBS and delivered an inspiring talk on the form of art in which she is so interested—painting portraits on tiles. Mrs. Grainger and her famous husband are spending the summer in Europe and are expected to return some time in September. In the meantime the concert-going public in America are whetting their appetites for Mr. Grainger's masterful programs which he will give in the fall.

* * *

MARCELLA hears all, tells all. Write her a letter, ask her any of the burning questions that are bothering your mind.

Who else wants to learn to play....

at home without a teacher, in ½ the usual time and ⅓ the usual cost?

Over 600,000 folks have learned to play their favorite instruments the U. S. School of Music way!

That's a record that proves how *thorough*, how *easy* this famous method is.

Just think! You study in your own home and almost before you realize it you are playing real melodies from actual notes.

You simply can't go wrong. First you are *told* what to do. Then a picture *shows* you how to do it. Then you do it yourself and *hear* it.

LEARN TO PLAY BY NOTE

Mandolin	Saxophone
Piano	'Cello
Organ	Ukulele
Violin	Cornet
Banjo	Trombone

or any other instrument

Fun—Popularity

You'll never know what good times are until you play some musical instrument. If you can play, many invitations come to you.

Never before have you had such a chance to become a musician without the drudgery and expense that were such drawbacks before.

Little theory—plenty of *accomplishment*. That's why students of the U. S. School course get ahead *twice as fast* as those who study by old-fashioned plodding methods.

If you really want to learn to play at home—without a teacher—in one-half the usual time—and at one-third the usual cost—by all means send for the Free Explanation Booklet and Free Demonstration Lesson AT ONCE. No obligation. (Instruments supplied if desired—cash or credit.) U. S. SCHOOL OF MUSIC, 1839 Brunswick Bldg., New York City.

U. S. SCHOOL OF MUSIC,
1839 Brunswick Bldg., New York City

Send me your amazing free book, "Music Lessons in Your Own Home," with introduction by Dr. Frank Crane, also Free Demonstration Lesson. This does not put me under any obligation.

Gabalogue

(Continued from page 59)

and live in Jersey. * * * Phil plays all the characters on his program and can imitate 15 voices. He has a brother, Burr Cook, who is a radio author and who writes the "Harbor Lights" sketches. * * *

Vaughn de Leath, the first lady of radio-land because she was the first American woman to broadcast, was born in Mt. Pulaski, Ill. She is six foot tall and weighs 200 pounds. And is married to Livingston Geer, the painter. * * * They reside in Westport, Conn. * * *

A gentleman from Jersey asks if Olive Palmer speaks any language other than English. I don't know her linguistic attainments, but she certainly knows how to speak music—and that, according to the poets, is the language of the soul. Olive Palmer's real name is Virginia Rea, and she was born in Louisville, Kentucky. She sang in a church choir when she was 12 years old. She took the name of Olive Palmer, just as Frank Munn, took the name of Paul Oliver, when they went on the Palmolive hour, and I understand she has taken steps to legalize the name. Mr. Munn may do the same thing. * * *

I hate to be the bearer of sad news, Evelyn, but—Ray Perkins is married and lives in Scarsdale. His sister is Grace Perkins, the authoress of several best-sellers including: "Night Nurse," "Ex-Mistress," and "Personal Maid." His other sister was on the stage and retired last year. * * *

Yes, Montreal, Jessica Dragonette has appeared on the stage. She was for a short time with Earl Carroll's "Vanities," and also appeared in "The Student Prince." She is unmarried. * * *

Ooh-la-la—smell that! Isn't that nice perfume? It's a letter from a lady who wants to know about John Fogarty, the NBC tenor, and says he is her favorite artist. * * * All right, Theresa, here goes. Mr. Fogarty is a product of Montana. He was 16 when the United States entered the World War—and he ran away from home to enlist in the army. Young Fogarty saw two years of active service in France. His singing career began while there with minstrel shows staged by the men behind the lines. * * *

Hits and bits is played by Helen Board and Edward Lewis Dunham. Mr. Dunham was born in Medford, Mass., has two children, and has been broa casting since 1920. Miss Board, t other half of Hits and Bits, is also be heard on other NBC programs su as "Gems of Melody," "Twilight Hour "Classic Gems," and the "Recitalists Miss Board was born in Louisvil Ky., and went to the public schoo there. * * *

Gladys Rice is no relation to Grar land Rice. Gladys is the daughter John Rice and Sally Cohen, a we known vaudeville team of yesteryea Gladys has been on Radio six yea and is not married. Grantland Ric daughter is Florence, and has never my knowledge been before the micr phone. * * *

Ford Bond is about five foot eleve weights 200 pounds, wears white fla nels, (weather permitting), is alwa immaculately groomed and much b ter looking than any announcer nee to be—since his public can't see h anyway. And he should be very popul in television. * * *

Peter Dixon, who writes and pla Ken Lee in "Raising Junior," is the s of a minister. He had planned to f low in his father's footsteps, when newspaper game beckoned. He w from there to Radio. He is married the Joan of the sketch, and they hav little Junior and (whisper—don't tel soul I told you)—Junior is going have a little playmate real soon. * *

Hear Nellie tell it every Wednesd night at 11 over WEAF and net.

ANOTHER PIONEERING STEP BY

WESTINGHOUSE

RADIO STATIONS

From stations KDKA and WBZ comes another announcement—the kind you expect from stations identified with the company that established the first regularly scheduled broadcasting, put the first church service on the air, first put presidential election returns on the air.

KDKA and WBZ are the first radio stations on the air to offer their listeners Consolidated Press Association service.

Background of daily news events, style and shopping news, financial bulletins, a daily book review, sports features, and dramatic criticism are all included in this new service offered through KDKA and WBZ.

This innovation is one more evidence of the progressive program policy which makes listeners say, "You can always count on the Westinghouse Radio Stations for a good program."

USE

REESONATOR

for

Sharp Tuning
Distance and Power

Now Only $3.95

NO—the Reesonator is not new—it is an instrument which has been on the market for over three years and we have over 40,000 satisfied customers thruout the United States, Canada; in fact, the Reesonator is in use thruout the entire world. Its principle is used in most high powered, modern sets of today. The Reesonator will increase the selectivity and power of your machine to the equivalent of two extra tubes. The Reesonator will enable you to play distant stations with dance volume, that were barely audible without it. It is connected across aerial and ground wires, and can be done by anyone without tools in a minute. The Reesonator is only recommended for sets having an untuned antenna or floating tube, such as: Atwater Kent models 30, 32, 35, 37, 38, 48 and 49; Radiola models 16, 17, 18, 33, 51 and 333; Crosley Bandbox and Jewelbox and many models in Victor, Temple, Silver-Marshall, General Electric, Westinghouse, Apex radios and many others.

F. & H. CAPACITY AERIAL

Price $1.00 Complete

Every Instrument Tested on Actual 1000 Mile Reception

The F. & H. Capacity Aerial Eliminator has the capacity of the average 75 foot aerial 50 feet high. It increases selectivity and full reception on both local and long distance stations and is absolutely guaranteed. It eliminates unsightly poles, guy wires, mutilation of woodwork, etc. It does not connect to the light socket and requires no current for operation. Enables set to be moved into different rooms with practically no inconvenience. We predict this type of aerial will be used practically entirely in the future. Installed in a minute's time by anyone. And is fully concealed within set. Return in three days if not satisfied.

8,000 dealers handle our line. Dealers! Over 80 leading jobbers carry this line; or order sample direct.

Coon-Sanders

(Continued from page 92)

fore Coon, who did the christening, Joe takes a hasty exit for he fears an avalanche of a tuba and flock of saxophones.

Coon and Sanders were the first in the world to start a radio club with their Coon-Sanders Nighthawks Club in the Muehlebach Hotel in K. C. They were the most militant enemies of sleep in America. And their first Radio hit over WDAF of the Kansas City Star was "Does the Spearmint On the Bedpost Lose Its Flavor over Night." My! what a number. They were humming it and singing it in every college fraternity house in the United States. Can you remember back that far?

One day they received a letter postmarked Morton Grove, Ill. It never occurred to them that this was a suburb of Chicago. Jack Huff, the proprietor of the Lincoln Tavern at Morton Grove, offered them $1,250 a week to come with their 9-piece band to the tavern. Coon and Sanders caught the next train out of Kansas City. They saw themselves independently wealthy in a few months. From the tavern in the summer time they went into Chicago to the Congress Hotel balloon room which they opened and there started the Insomnia Club, a sister to the K. C. Nighthawks. They were heard from KYW and then in 1926 they moved bag and baggage to the Blackhawk Restaurant and have played there for five winters, taking the Dells, northwest of Chicago, for summer engagements, their hot rhythm going on the air from WGN, The Chicago Tribune station on the Drake Hotel.

Mr. and Mrs. Coon have four children, namely John Allyn, 18, who is going to the University of Kansas this fall; Nannette, 16; Virginia, 12, and C. A. Jr., 10. Mrs. Sanders formerly was Madeline Baldwin, of Kansas City. They do not have any children and Carleton says he will divide with Joe so that they will both have two.

Both Carleton and Joe are proud of the record made by two of their band members, brothers, John and Harold Thiell, of Joplin, Mo., who have been with the band for seven years. They both play saxophones. Other members are: Floyd Touch Estep, saxophone, of K. C.; Alvin R. Downing, trombone, of Weiner, Ark.; Robert Fritz, trumpet, of Oklahoma City, Okla.; Joe E. Richolson, trumpet, also of Oklahoma City; Clarence Russell Stoub, banjo, of Freemont, O., and Elmer Dinny Krebs, tuba, of Waukesha, Wis. There they are, the two Indians and their whole tribe. And when they get going on their musical warpath—no pale face can stop them. They are "Whoopee" personified, two alive good Indians.

Bradley Kincaid, Mountaineer

(Continued from page 26)

La Porte, Indiana, to work for the W. C. A. For four years, she sup-ted herself while Bradley worked at ery job he could find to pay his way ough college.

One of his jobs was a position in the quartet that sang once a week at tion WLS. One day the director of quartet mentioned to the station icials that Bradley knew some moun-neer ballads. Bradley was asked to g some. However, summer vacation ne along before he had practiced them ough, and he went off to summer camp Lake Geneva, where he had work the vacation season. All through the mmer, the directors of the Chicago tion kept sending word that they nted to hear his mountain songs. But adley didn't like the idea of singing untain songs on the Radio. He nted to be a tenor soloist and go on concert stage. Besides, he was "mike v." The thought of facing a micro-one alone was enough to give him d chills. At the beginning of his ior year in college, he did get the rage to sing for the program editor. mediately that dignitary booked him sing on the WLS National Barn Dance on alternate Saturday nights. Bradley traded his typewriter for a second hand guitar to accompany himself.

After a while, Bradley was put on the air every Saturday night. To him that didn't suggest any possibility of popularity. Radio singing was just another way to earn money to complete his education. In fact, Bradley wasn't aware he was popular until one day, several weeks after he had begun singing mountain songs.

"There's some mail out in the back room for you, Bradley," they told him at the mail desk.

Indeed there was. Clothes baskets full were piled in that back room.

"I was flabbergasted," he said. "I took as many letters home as I could carry that Saturday night. All that week-end Irma and my sister and I read those letters—and believed every word of them. When a letter said, 'We're crazy about your singing,' I really thought they were crazy. And when they said, 'We're dying to hear you sing more songs,' I was afraid they were going to die."

Bradley's popularity continued to increase. Demands for copies of his songs came in such numbers that a printer finally offered to publish a book of them and to wait for his money until enough were sold to pay for them. Bradley announced the book on the air while it was being printed. Before it was off the press he had orders for the first run of 10,000 at 50c each. From that time on, Popularity and Prosperity both have smiled on him and he has been a Radio sensation.

All of his success in Radio he attributes to his wife who, with his three children, is his inspiration. The work of writing down the music for the song books has been her task. In successive summers since he graduated from college, Bradley has gone back to his hill country and has learned new songs from his people. These she has transferred to paper so that they could be published.

Bradley went to station WLW early in 1931 to see how the WLW audience would take to his mountain songs. He "saw" to the extent of 50,000 letters in four weeks, so he returned the first of March to make his permanent Radio home at the Crosley Radio station.

Success has not turned his head in the slightest. He is as unspoiled and as fresh in his viewpoint as he must have been when he was singing ballads as lullabies for Kincaid babies. His ambition beyond Radio entertaining is to be able to retire when he has enough money to support his family.

Jewelry

(Continued from page 74)

"I love the gems themselves. There-re, I endeavor to bring out their auty, warmth and color just in the y that nature endowed it. One of my st famous pieces is made from a tural emerald prism, just the way it me from the mine. I combined its gnified splendor with a visualization the modern skyscraper. I combined arls, and other precious stones to give effect of the setbacks of the modern vering building, and in indicating the a of windows and so on. Finished, it a pendant to be worn at the end of jeweled chain. You see, by using the erald in its untouched condition it s complete individuality—for in na-re, of course, no two things are ever actly alike.

"I think one of the things I love most my work is when I go to the distant arl fisheries myself, to find the treas-es of my art. I work among the men, atching them as they bring up the ells, and picking out the pearls that ok finest to me right there on the spot.

"And I think of all things my favor-is the black pearl. I don't know of y gem with which nature has been so aring in quantity and so generous in auty. And because I have given my pecial interest to this kind of pearl, I ve come to be considered a connois-ur."

What does Television *mean to You?*

$2.50

HERE it is a new book that gives all the facts about this new and amazing offspring of radio. Avoiding technical terms it follows the development of television right up to date, explains principles, methods and apparatus, and weighs for you the problems, possibilities and probabilities of television as a commercial tool and a form of entertainment.

Just Published

TELEVISION

HAS television arrived at last? Can present broadcasting and receiving equipment be adapted to television? Will television of the future come by air or wire? This book from beginning to end was written expressly to supply reliable answers to these and hundreds of other questions you may have asked regarding television. With many explanatory illustrations and diagrams it gives a thorough background of technical facts—then makes plain their importance from the standpoint of the experimenter, the commercial operator, the broadcaster, the "listener-in." See it ten days free; send the coupon now.

WHAT YOU NEED TO SUCCEED IN RADIO

RADIO is a highly specialized business. As it develops it is becoming more exacting in its demands. But radio is the modern field of opportunity for those who keep step with its progress and pioneer in its opportunities!

There is a great demand for *trained* men in the radio industry. There is no place for *untrained* men. Experience must be accompanied by technical knowledge.

A pioneer in radio instruction, the International Correspondence Schools have kept pace with the times and offer courses prepared by authorities, which give practical instruction in fundamentals and latest developments alike. The courses were prepared and are constantly revised by the Who's Who of Radio!

Composed of 24 basic divisions, the Complete Radio Course is designed to give thorough instruction in the whole field of radio. The I. C. S. Radio Servicing Course was prepared specially for men who wish to become service experts. Study of it makes possible leadership over competition. The I. C. S. Radio Operating Course is vital to mastery of operating and transmitting.

We will be pleased to send you details of any or all of these subjects. Just mark and mail the coupon—the information will be forwarded without delay. Why not do it today—*now!*

Flees Revolution

(Continued from page 32)

Consul to help her find her father, whom she knew to be in the United States. It sounds impossible, but within a few months, the Consul had good news for her, and she was aboard an ocean liner, bound for the U. S. A. and her over-joyed parent. That must have been a heart-warming reunion. One can just imagine the surprise of this man, who left a young unformed child in 1915, and now found her to be an experienced young woman, full of life and laughter, warm with the fire of youth and temperament, and glowing with a dark beauty. Miss Georgievskaia speaks beautiful English now, with just enough accent to be enchanting, but she sings in plaintive Russian.

American Radio

(Continued from page 21)

as there are in any two European countries combined.

Moreover, we are a unit in the geographical sense, and for purposes of electrical transmission. That enables us to reach, at very short notice, the great majority of our outstanding personages in statesmanship, politics, business and finance, science, art and education.

By comparison with this, Europe is subdivided into so many separate units, although they are no longer warring among themselves, that each country is obliged to work out its own salvation, with much more limited resources.

We must maintain our present cordial relations with such great musical bodies as the symphony orchestras of New York, Philadelphia, Minneapolis, Detroit, Rochester and so on, which enable us to present, with the minimum of didacticism, the greatest possible quota of musical education to millions of people all over the United States, many of whom never could go to a symphony concert. It is my contention that the prestige of these orchestras greatly enhances their value and power in bringing the great masters of music to the attention of the man on Main Street. Inasmuch as the countries of Europe have not been so successful in persuading their great orchestras to take the air I think there is no doubt that we are more fortunate in this respect.

In the educational field we see probably the clearest example of how each country gets the type of broadcasting best fitted to the character of its people. If one were to transplant the European idea of Radio education to American or vice versa, the result would be incongruous if not chaotic. The foreign practice is to offer education to the people with little or no sugar coating, ... belling the package clearly "Medicin"

I have still to be convinced that ... in this country are not also on the ri... track to reach our own people. Ni... teen per cent of the programs broadc... by the Columbia network come un... the category of education. It would ... difficult to reach that conclusion sim... by glancing through our schedu... Therein lies the secret of our met... —we believe in an indirect approach ... many instances. But we also get ... sults, for the competitive nature ... American Radio would not permit u... survive unless we could show we ... doing a good job.

We shall make countless changes ... method before we reach our goal: ... just as I am sure of that, so also a... sure we are on the right track, ... that with reasonable care we shall ... tain our objective as quickly as ... other nation.

Tuneful Topics

oadcast BEAUTIES PARADE

No one can afford to pay this price of NEGLECT

ALTHOUGH they are still able to chew their food, countless people today find themselves ashamed, even afraid to smile.

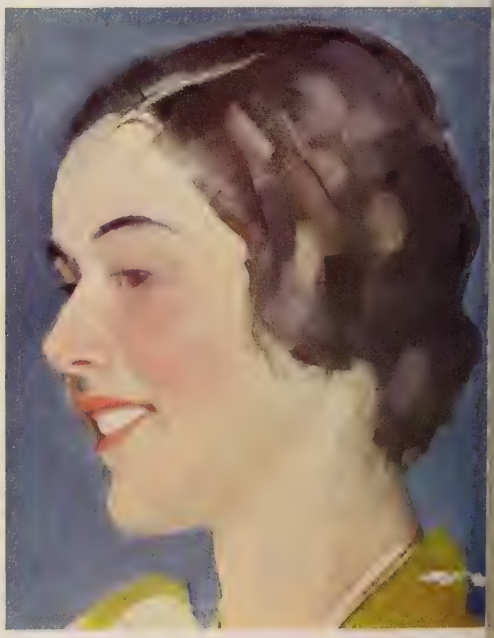
It is a grim yet needless price they pay to wear false teeth, because they can usually blame neglect and resulting pyorrhea for the loss of their own.

An insidious disease of the gums, pyorrhea comes to four people out of five past the age of forty. Hence, it's 4 to 1 you'll lose, if you gamble with this infection.

At first, your gums grow tender and bleed easily when brushed. Later, they become soft and spongy until teeth often loosen in their sockets and either come out or must be extracted.

Start, in time, the use of Forhan's

If you would escape the toll pyorrhea takes in teeth and health, see your dentist twice a year; he can do a lot to prevent needless trouble in your mouth. But in your own home, your teeth are your own responsibility. Nothing but the finest dentifrice is good enough for them.

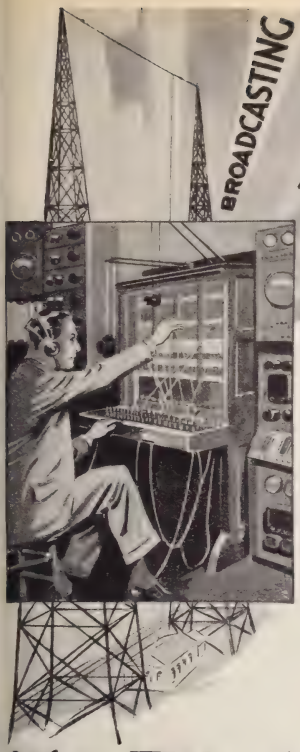


Forhan's is the discovery of a dentist, R. J. Forhan, D.D.S., who for years specialized successfully in the treatment of pyorrhea. It contains Forhan's Pyorrhea Astringent, an ethical preparation widely used by dentists for treating this dread disease.

Don't gamble with pyorrhea

Start today brushing your teeth with Forhan's, morning and night. You can make no finer investment in the health of your mouth and the safety of your teeth.

So fine, so pure, so gentle and mild, Forhan's cannot harm the most delicate tooth enamel of the youngest child. Do not wait for trouble before you start using Forhan's.



Forhan Company, Inc., New York; Forhan's Ltd., Montreal.

Forhan's

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

False teeth often follow pyorrhea, which comes to four people out of five past the age of 40

TELEVISION

TALKING PICTURES

WIRELESS OPERATING

WIN FAME and FORTUNE in RADIO!

Scores of jobs are open to the Trained Man—jobs as Designer, Inspector and Tester—as Radio Salesman and in Service and Installation work—as Operator, Mechanic or Manager of a Broadcasting station—as Wireless Operator on a Ship or Airplane—jobs with Talking Picture Theatres and Manufacturers of Sound Equipment—with Television Laboratories and Studios—fascinating jobs, offering unlimited opportunities to the Trained Man.

Ten Weeks of Shop Training

Come to Coyne in Chicago and prepare for these jobs the QUICK and PRACTICAL way—BY ACTUAL SHOP WORK ON ACTUAL RADIO EQUIPMENT. Some students finish the entire course in 8 weeks. **The average time is only 10 weeks.** But you can stay as long as you please, at no extra cost to you. No previous experience necessary.

TELEVISION and Talking Pictures

In addition to the most modern Radio equipment, we have installed in our shops a complete model Broadcasting Station, with sound-proof Studio and modern Transmitter with 1,000 watt tubes—the Jenkins Television Transmitter with dozens of home-type Television receiving sets—and a complete Talking Picture installation for both "sound on film" and "sound on disk." We have spared no expense in our effort to make your training as COMPLETE and PRACTICAL as possible.

Free Employment Service to Students

After you have finished the course, we will do all we can to help you find the job you want. We employ three men on a full time basis whose sole job is to help our students in finding positions. And should you be a little short of funds, we'll gladly help you in finding part-time work while at school. Some of our students pay a large part of their living expenses in this way.

Coyne Is 32 Years Old

Coyne has been located right here in Chicago since 1899. Coyne Training is tested—proven by hundreds of successful graduates. You can get all the facts—FREE. JUST MAIL THE COUPON FOR A FREE COPY OF OUR BIG RADIO AND TELEVISION BOOK, telling all about jobs . . . salaries . . . opportunities. This does not obligate you. **Just mail the coupon.**

Why be satisfied with less than 'Round the World Reception?

There is a new thrill in Radio—the thrill of actually tuning in the other side of the world—Japan, Indo-China, France, England, Australia, Germany and South America. Not code, but voice, music and song, loud and clear—often so perfect that its quality matches the finest nearby domestic stations. Such is the daily service being given by Scott All-Wave Receivers located in all parts of the country and operating under all sorts of conditions. And the tone of the Scott All-Wave is *naturalness* itself. Think of it! England and Japan, thousands of miles away from each other, yet only a quarter inch apart on the dial of the Scott All-Wave. A fractional turn of the tuning control and either is yours to listen to with an abundance of loud speaker volume. Unbelievable? Read the letters reproduced below. They are but a few of the hundreds received!

The truly amazing performance of which the Scott All-Wave is capable is the natural result of combining advanced design and precision engineering. The system of amplification employed in this receiver is far in advance of any other—and the Scott All-Wave is built in the laboratory, by laboratory experts to laboratory standards so that its advanced design is taken fullest advantage of. Each receiver is tested, before shipment, on reception from either 12RO, Rome, 5SGW, Chelmsford, England, or VK3ME, Melbourne, Australia

Why be satisfied with less than a Scott All-Wave can give you? The price of this receiver is remarkably low. Mail the coupon for full particulars.

Read What Scott All-Wave Owners Say About This Great Receiver

England on an indoor aerial . . .
"London, England, comes in with great volume on an indoor aerial, which I have to use on account of static. Can get all the volume I want with the volume control turned up most of the time only one-quarter."
—*W. J. McD., Intervale, N. H.*

'Round the world . . .
"Have heard 'Big Ben' strike midnight in London; Grand Opera from Rome; the 'Marseillaise' played in France and at 8:30 a. m. have heard the laughing jack-ass from VK2ME at Sydney, Australia."
—*C. L. B., Chicago, Illinois*

China, too . . .
"Static conditions have been extremely bad this Summer. However, we have been getting regular reception on G5SW at Chelmsford, England, 12RO at Rome, Italy, F3ICD, Indo-China, and VK3ME at Melbourne, Australia."—*S. F. S., Lock, Utah.*

Paris for 3 hours . . .
"Yesterday I tuned in station FYA at Paris and received them for three hours with considerably more volume than Rome; El Prado, Ecuador, comes in very clear and loud every Thursday evening."
—*S. O. K., Tuskegee, Alabama*

Records Australia . . .
"Last Saturday night I received VK2ME, Sydney, Australia, loud enough to make a recording on my home recorder. It certainly gave me a great thrill to hear the announcer say, 'The time is now 20 minutes to 4, Sunday afternoon' when it was 20 minutes to 12 Saturday night here."
—*J. R. C., Highland, Mass.*

Germany to Australia . . .
"I hear England, France, Italy, daily while Ecuador, Colombia, Honduras and Germany and Manila come in quite often. VK2ME at Sydney, Australia, comes in very well."
—*J. M. B., Wierton, West Virginia*

Austria . . .
"I have tuned in VK3ME at Melbourne with enough volume to be heard across the street. I listened last evening to France, Italy, Austria, as well as G5SW in England and several other European stations. The SCOTT is all you claim and then some."
—*R. N. B., Fullerton, Penna.*

News, Views *and* Comment

By Robert L. Kent

THE Fall broadcasting season is well under way and listeners as well as lookers have more good things in the way of programs than ever before. . . The opening gun of the March of Time series over the Columbia network was all that anyone could desire. . . This in reality marks a forward step in broadcasting. . . If there is anything better on the air than the March of Time we have not listened to it. Tune in that one on Friday night.

Radio Digest comes close to being the most frequent broadcaster on the air . . . more than seventy stations each week are spreading the Radio Digest message. There are all kinds of programs . . . classical music . . . gossip hours . . . breakfast hour skits and brief announcements. We are doing our part to keep in step with the progress of broadcasting . . . and now Radio Digest is regularly (Thursday nights, W2XAB) staging a television program. . . We intend to study television from the ground up and pledge ourselves to aid in the development of this new art.

The Football season is here and both chains are regularly broadcasting the games. . . Favorite announcers are doing the job in each case . . . thrills galore!

We knew it had to come . . . a course in broadcasting technique. . . There are several available for those who have a desire to find out what it's all about. . . The latest is Floyd Gibbons school of broadcasting. . . Well, Floyd has learned a lot about the microphone during his years on the air. There's another school in New York with instructors and studios, recording facilities, etc. I will be glad to forward inquiries for those interested.

Met a beautiful blond young lady at the television studios operated by Columbia a short time ago. Her name is Harriet Lee . . . she was made up to be televised and she had on deep red rouge, used brown lipstick for lips and eyebrows and she wore a white wrap. She was placed against a dead black background and she came over like a million dollars. Now, I just have been informed that Miss Lee has been named Radio Queen . . . and here's news for you . . . Miss Lee will adorn the November cover of Radio Digest.

Speaking of television, Radio Digest had as guest artist petite Marion Brinn, vaudeville headliner at the age of seven and known to radio fans from Coast to Coast as the soapbox crooner. She's so small that she stands on a box in order to reach the microphone. They put a box under her so she could be televised. We'll tell you more about Miss Brinn next month.

The studios of the National Broadcasting Co. in Chicago are the finest in America. . . They are in the Furniture Mart and they are worth traveling far to see. The lighting arrangements are unusual and the usual studio drapes are conspicuous by their absence. The studios are huge and were designed with an eye to television. If you are in Chicago don't fail to visit these studios.

When you pause to bask in the summer sunshine and enjoy a lazy smoke — make the stolen moments more enjoyable with the cool refreshment of Beech-Nut Gum. Its zestful flavor stimulates your taste sense and makes the next smoke taste like the first one of the day — each smoke a fresh experience. Motorists will find BEECH-NUT GUM especially enjoyable—it keeps the mouth moist and cool while driving. Remember always there is no other gum quite so flavorful as Beech-Nut.

Made by the Beech-Nut Packing Company — Also Makers of Beech-Nut Fruit Drops and Mints

Peppermint, Wintergreen and Spearmint flavors.

Coming *and* Going

Observations on Events and Incidents in the World of Broadcasting

INSIDUOUS efforts to split up and manipulate the limited channels used for broadcasting apparently will be renewed with increased energy as the time draws near for Congress to convene. Besides the Fess bill which was sluffed off at the last session—and which it is promised will be reintroduced at the next session—there are any number of other kindred measures in prospect. On October 16th the Federal Radio Commission will entertain a proposal by C. R. Cummings of Williamsport, Pa., to set aside twenty-five channels "for the exclusive use of local or community broadcasting stations." Walter Birkenhead, writing in the New York *Herald Tribune* of September 13 says, "The application (by Cummings) lists 267 cities and towns in which stations would be erected, and considerable support may be given the plan by some members of Congress." While we have no comment to make as to the merit of Mr. Cummings' plan of operation, it does seem as though any project that contemplates the breaking up of the broadcast spectrum as it now stands for competitive programs will weaken the whole structure for dissolution by its enemies. The field is now open for everybody and it must be kept open.

* * *

ANOTHER radio measure that may have more than casual significance which is expected to be introduced at the next session of Congress will provide for a consolidation of all governmental radio authority in the Federal Radio Commission. This will relieve the Department of Commerce of its radio division. Ultimately, if those who are opposed to the American plan of operation successfully carry through their maneuvers for government operation the commission would have all the lines in its own hands to function as a full fledged bureau. And when the politicians prepare your radio programs, ladies and gentlemen, you'll probably hear things that will irritate more than your Adam's Apple.

One of the interesting exhibits at the Radio World's Fair was the daylight television camera. Instead of putting the subject in a black box and scanning the features with a tiny spot of light the camera works in the open with the sun-lit scene focused on the whirling scanning disk inside the camera like the retina of the eye; it passes thence through the photo-electric cell and the copper "optic nerve" to the "brain" of coils and circuits, off the antenna, through the air, into the "eye" and "brain" of your television receiver and instantaneously to your own eye, which repeats the process thus figuratively described. "Marvelous is the age of radio!"

* * *

WHAT else does the new Radio World's Fair bring to us? The one last year proved a trifle disappointing, not so much for the lack of interesting exhibits as for novelty in the way of entertainment. Perhaps there are no more radio novelties. The sensational surprises of a few seasons ago now have become common place in almost any home. One thing expected sure to attract the crowd is the television exhibit with the promise of images filling a screen ten feet square directly visible to 10,000 visitors.

AT LAST the telephone company has become a subscriber to its best customer—the broadcaster. Programs have been inaugurated over both of the big chain systems. The two networks alone spend $5,000,000 a year with the telephone company and use 40,000 circuit miles of wires. It's fun to buy when you take the money out of your right hand pocket and it comes right back to your left hand pocket.

A gentleman called us up the other day to find out whether it was not a fact that the passion for mysticism as practiced over the radio had not generally subsided. He said there was not one astrologer on the air from any of the New York stations, and he believed the condition was general. So Venus, Neptune, Mars and the other celestial bodies are now feeling the weight of the depression. What do they forecast for themselves? One wonders.

Speaking of Fred Smith of *Time Magazine,* or were we, did you read his new mystery thriller called *The Broadcast Murders?* Mr. Smith and his talented wife live in a remodeled hayloft down in Greenwich Village. George Gershwin said of Mrs. Smith that no other woman had so perfectly translated his Rhapsody in Blue on the piano. Recently the pair returned from Europe where Fred has written a sequel to the enthralling tale of *The Broadcast Murders.* Do your reading of this book in the daytime or you may not sleep when you have finished it.

* * *

AIMEE SEMPLE McPHERSON has really married a radio man at last. On September 13th she stepped into an airplane with David L. Hutton, former manager of two of the smaller broadcasting stations in Los Angeles, and sailed away over the mountains to Yuma, Arizona. A surprised and somewhat disgruntled clerk was aroused from his bed to supply the necessary papers. A double ring ceremony was performed in the plane as the couple returned to Los Angeles. The groom is 30 and a singer in the Angelus choir. The bride is 38. They immediately started out to Oregon together on an evangelistic campaign.

* * *

OBSERVATIONS at the NBC Press Relations Ball at Hotel New Yorker Sept. 22 . . . Nellie Revell, out Nellie, all primped and crimped chatting with Aileen Berry (Mrs. Peter Dixon) about the great scoop when the Voice of Radio Digest broadcast over a WEAF net the news of arrival of Junior No. 2 at the Dixon home just eight minutes after it occurred . . . Philips Carlin busy as the proverbial one-armed paper hanger as he tried to be equally attentive to two fair damosels who sat on either side of him . . . Vaughn de Leath swaying before a microphone and telling everybody how she had thrice that night been forced to deny she was Kate Smith . . . Ray Perkins, with a side-wise glance toward the Aylesworth table, as he explained that his last year's job was being supervisor of the NBC vice-presidents . . . lovely gorgeous Virginia Gardiner nonchalantly appropriating the scribe's chair at Table No. 9 . . . Jean and Glenn from Cleveland making their debut—before a New York audience.

Presented by the Mobilgas *Stations and Dealers of your Neighborhood*

TYPICAL Texan is this popular idol of the NBC fold. A lean six footer with a smile that wins confidence and friends. He got the idea of becoming a musician from hearing a negro street singer. Started out with a 75 cent banjo but found hard picking at the beginning. They put his voice on records and now he's independent.

SMITH BALLEW

Strumming His Way from Texas Came

Smith Ballew

Lone Star Orchestra Leader Plays Course Through University — Meets Adversity — Strikes Gold Note in His Voice — Wins Success from Manhattan to Hollywood — Now a Radio Favorite

By Robert A. Wilkinson

"WHEN you call me that, smile!"

These words from Owen Wister's, "The Virginian," symbolize the character of Smith Ballew, rangy Texas orchestral leader who has been transplanted from the great Southwest to blase restaurants and hilarious night clubs of Manhattan.

His more than six feet, to say nothing of the seriousness of his facial expression, demand respect. Ballew takes life seriously, earnestly, after the manner of old Texas rangers, and ranks loyalty and allegiance as two of the greatest virtues.

Here is an example:

When Ed. Scheuing, NBC orchestral supervisor, asked Ballew in March, 1929, to organize an orchestra and broadcast over NBC networks, at the same time offering him the pick of NBC musicians, Ballew chose to remember a former friend and musician.

"Can your friend play as well as any one of the talent we have at your command?" Scheuing asked.

"He's a musician," Ballew answered, "and a loyal friend. That's enough. I'd sooner have a bunch of good, loyal musicians, willing to cooperate, than a group of fiery geniuses."

But it happens that the man in question, as a musician, is not one to jeer at. He is Dee Orr, now drummer in Ballew's orchestra, who, aside from handling the drumsticks, sings many ballads and popular songs during the orchestra's broadcasts.

The story of Orr's early musical career is an entertaining anecdote but, for the present, this is a story of Ballew.

Ballew was born January 21, 1902, in Palestine, Texas, and when 15 years of age moved to Sherman, Texas, the home of Austin College. In the latter city he first had vague musical aspirations, all of which were to lead him through many troubled and hectic years.

Although Ballew is one of a musical family, his father a violinist and his mother a pianiste, it was an old negro banjo player — known as Ned — who first inspired him to learn to play a musical instrument.

THE colored banjoist used to saunter down a Sherman, Texas, street every night in the year, strumming his banjo and singing quaint Southern songs. His regular route led him by the Ballew home, and there Smith and his playmates often stood in wait.

"'Play for us, Ned,' we used to plead," Ballew now relates.

"Ise can't; Ise gwine to see my gal," was Ned's inevitable excuse. Nevertheless, when the youngsters insisted, Ned often stopped and played and sang several numbers.

Then Ned was killed; shot down by a colored enemy. And Ballew remembers the occurence as one of the tragedies of his youthful days. He stole away from home, against the request of his father, to view Ned's body.

Also there was a negro string band in Sherman which aroused Ballew's musical inclinations. And some of the neighborhood boys used to serenade Ballew's older sisters with their guitars, banjos and mandolins. So Smith finally purchased his first banjo, paying seventy-five cents, and his older brother, Charles Robert Ballew, bought a guitar at the same time from a mail order house for $4.

When seventeen years of age Ballew organized an orchestra in Sherman. His older brother was at the piano and Jimmy Malone, now known as Jimmy Joy, who conducts a nationally known orchestra bearing that name, was another of the original members. They played at Austin College social functions.

The entire personnel of this orchestra, except for one member—Dee Orr, of whom we must tell more later—finally packed their instruments and left Austin College, for Austin, Texas, and the University of Texas. There the band was enlarged from six to nine pieces It was one of those "go-gettem," loud and noisy college bands so popular ten years ago. The boys played everything by ear—orchestrated jazz music had not yet reached the great Southwest—and the blare of trumpets and the roll of drums smothered soft tones of the strings.

In April, 1923, three months before Ballew was due to receive his college degree, he married. Some of his friends tried to dissuade him from matrimony, at that time, arguing that he should wait until he finished school. One of them called him stupid. Ballew's reply embodied the same meaning as Wister's phrase,—more or less:

"When you call me that, smile."

The responsibilities of married life caused Ballew to finish school. And the unfavorable outlook for a musical career in Texas led him to withdraw

(Continued on page 90)

"IN THE radio direction lay much of the credit for the fact that the army flew 672 planes three million miles without a serious crack-up," writes Mr. Lockett. This is a story right out of the cockpit of one of the ships in the twenty-mile long aerial parade.

RADIO

By EDWARD

International News Service Staff

IT is one thing to transport passengers from place to place in one, or several, airplanes. It is a splendid accomplishment to deliver those passengers, day in, day out, safely at their destinations, and in half the time a train would take to cover the same distance.

But compare this, if you will, with the task of moving 672 airplanes—flying nose to tail—in a single formation and loaded with equipment, gasoline and extra parts, hundreds of miles daily for three weeks!

That is the job the army air corps tackled in its spring maneuvers this year. That is the job that piled up three million miles of flying for the corps during the exercises. And that is the job the air corps accomplished without the loss of a single man in a flying accident.

Edward B. Lockett

It was a task begun under clouds of somber predictions and protests at its warlike character. The over-cautious complained dozens of America's youth would die in accidents during the maneuvers. The pacifists protested such an aerial show would stir anxiety in other nations of the world. But the air corps planned the maneuvers, carried them out with half a nation for a stage—and provided space in its big formation for a corps of flying newspaper, press association and photographic correspondents certain to provide full publicity to upwards of thirty million readers.

This latter action marked a new era in the life of the corps whose mission is to portray to the public a written picture of the news of the day. It effected the initiation of the press into the world of flying war correspondence. For nearly three weeks we rode, worked and slept with America's first peacetime army of the skies on the march. We performed to the best of our ability the tasks which would be demanded of us should war come and we be sent to an army airdrome near enemy lines. We lived on an emergency schedule, ate and slept when and where we could, and wrote our stories in all sorts of places and under all conditions.

I wrote one story in pencil on scrap paper sitting in the open cockpit of a jouncing attack plane, enroute from Dayton, Ohio, to Chicago, in the worst weather we had during the trip. We were bucking a forty mile wind which drove a stinging rain in our faces, and bobbing up and down in the worst air I have ever experienced except during storms.

Most of the correspondents assigned to "cover" the maneuvers had done considerable flying, and were writing aviation news regularly for some paper or press association. I don't suppose there was a man in the group of more than a score who had not taken one or more trips in a plane. But none had ever before been given an assignment similar to this. The assignment was like Adam. There hadn't been any before it. There were, therefore, no set rules of coverage to go by. How to handle the story, how to put it before the public, how to move copy from points where the air corps set you down to earth—all were matters which had to be worked out on the march, so to speak.

WHEN I left my home bureau in Washington for Dayton, Ohio, where the big formation was mobilizing, I remember I worked out one of those careful, comprehensive schedules of copy which we like to believe save work in the future. It proved as useful as an Eskimo igloo on this assignment. I would have done much better to have taken a thermos bottle and a sandwich box.

Solution of the various problems came in the end through radio and a

View of the flying army rounding Manhattan with river traffic and the bay below as seen from Lockett's plane. Note at left the S. S. Majestic getting ready to dock—what a target!

AWING

B. LOCKETT
Correspondent.

highly efficient staff of army press relations officers. Without either of these two aids the newspaper corps would have been lost. I was highly impressed by the value of the radio. Not only did it work for the press. It demonstrated thoroughly that it will play a prominent part in any future war, especially insofar as the air corps is concerned.

The hardest job of the trip, as I saw it, however, was not getting the news. It was the task of finding time to write, and finally and most important, presenting a picture of the maneuvers to the public which would in some measure give realization of what we believed to be their tremendous importance. It was no task at all for me to be impressed, watching the wheels go round from the inside of the greatest single air formation ever assembled. I could not help but be impressed. The job was to give some idea of the size of the undertaking, and picture the interest it held for us to the readers who could see the exercises only through our eyes.

It was easy to say an aerial formation of 672 planes would start at Dayton and cover the eastern portion of the country in maneuvers. It was another job entirely to show how much the trip meant to the air corps and aviation in general. Every movement and parade of the maneuvers was an accomplishment. The movement of that giant formation northward to Chicago, back to Dayton, eastward to New York, into New England and then southward to Washington, D. C. was an aerial odyssey comprising the air drama of the age. The work which the 1,400 officers and men who staffed this first air division of the American army performed was almost incredible.

AND the responsibility of those 1,400 lives and millions of dollars worth of equipment, resting on the shoulders of Major General James E. Fechet, chief of the air corps, and Brigadier General Benjamin D. Foulois, commandant of the division, was one which could not be borne lightly. They were confident of success, but there must have been many moments freighted with anxiety for these two officers.

To the news writers who were part of the maneuvers, they were the thrill of a life time. We were away up on the watching public. It was our privilege and job to ride most of the time in that twenty mile long cordon of airplanes roaring away at a hundred mile an hour clip. From the ground the parade formation was an inspiring thing. Flying as part of it afforded a never-to-be-forgotten experience. Assigned to attack, observation or bombing planes, we climbed out of bed in the grey of early morning dozens of times to pull into a sky whipped by a cool wind and streaked with the red and amber of a brilliant sun. Hours on end we would fly in the midst of a sea of planes, rippling up and down the air trails like waves, guy wires singing and motors thundering evenly until sunset, when the formations would drone to earth like homing birds.

FLYING was not the only thrill. There was a dramatic something about the directing of this formation that ran it a close second. We used to watch Major Carl Spatz, one of Foulois' staff officers, fascinated as he sat, a hooded figure in a plane on the ground, and moved the sections of the big formation around in the air by radio like so many checkers. It was the job of the figure in the grounded plane to send the various wings of the division to points a hundred miles or more away, and then start them towards a central rendezvous so each section would drop in behind the others in orderly fashion. Here was where the 672 airplanes of the formation were welded into

a single cohesive, yet highly individualized unit. It was this work which brought the parade roaring by reviewing stands, a single twenty mile column. It was work here, through the medium of the radio, which brought these hundreds of planes to earth in unhurried, safe fashion. In the radio direction lay much of the credit for the fact that the army flew 672 planes three million miles without a serious crackup.

IN the radio, too, lay the medium which supplied the press almost instantly with advice as to the minor crackups which occurred. It was this instrument which enabled the press to "cover" a formation of planes which at night might be staked out in half a dozen fields, miles apart.

We were nervous about the job of covering crackups when the maneuvers began. With the first forced landing this anxiety was dissipated. A Kelly Field flier was forced down 60 miles from Dayton. Five minutes after he landed in a corn field the press room at Dayton was advised by radio that lieutenant so and so had been forced down by motor trouble, landed safely, would repair his plane and come in. This performance was repeated throughout the maneuvers. Whenever anything out of the ordinary occurred, the press was notified by radio—and immediately.

Other than the paramount problem of handling the news correctly and interestingly after we got it, the hardest job I struck was the work of getting copy into the office on time. This was not because of lack of filing facilities. They were excellent. The trouble was that the formation was in the air so much it was all but impossible to get time on the ground for writing and filing. Much of the news story of the 1931 army air corps maneuvers was written in open army planes, on division paper and in pencil.

The press flew from Dayton to Chicago, Dayton to New York, and southward to Washington in commercial transports loaned to the army by the Fokker, United and Ford aircraft companies, and in these ships it was possible to get going on a portable typewriter. But the majority of the time the news writers were flying in army planes, doing parade and patrol. That was when the trouble came.

Many times these army planes did not land, or landed long after parade formation, and hours after the story was to appear in print. Often advance coverage was given through comprehensive schedules issued by the army press relations staff, but this was not always possible, and is never as satisfactory, from a spectacular standpoint, as copy written concerning an actual occurrence. Several times, too, I was listening in on a plane radio and heard a crisp announcement come through that a ship was forced down, and there I was, a mile in the air and no chance to file copy. Luckily, none of these crackups proved serious.

We did some tall date line filing on the maneuvers trip. One morning I wrote an early story out of Chicago, a lead in Dayton, and my late afternoon stuff from Columbus, Ohio. The army kept our copy on the jump sometimes, too. In Dayton when the bad weather which followed us all the way through began, we spent two days of fifteen minute periods, any one of which might bring a weather bulletin which would make a preceding story so much wasted time. It was during the Dayton bad weather period that we got a taste of what waiting for the "zero hour" on the front lines might be like.

The first big parade was to be in Chicago, and when the day came for

FLOYD GIBBONS wrote comprehensively about "Radio in the Next War" in Radio Digest a year ago. His predictions are confirmed by Mr. Lockett who says here that the use of radio in the air maneuvers, "demonstrated thoroughly that it will play a prominent part in any future war, especially insofar as the air corps is concerned."

departure of the formation from Dayton northward, rain was drumming the wings of acres of planes staked out in the Fairfield air depot. That was a hectic day. At first the staff officers got together and decided that maybe we wouldn't go to Chicago at all if bad weather blocked the trip planned for the day. They figured it would throw the whole maneuvers' schedule off. We got that story out. The wires were still hot when another staff conference evolved the somewhat different idea that maybe we would go to Chicago, even if held up for a day. All during this time the whole outfit, planes, fliers and all, were "on the line," ready to leave at a minute's notice if the weather improved. Quarter hourly weather bulletins switched from good to bad and back and added less than no certainty to the situation.

Finally, at half an hour after midnight that night, a last staff conference gave the decision we would move to Chicago the next day, thus moving the schedule up. And then the next morning it rained again.

The weather bulletins were a little better then, however, and after considerable indecision we pulled out for Chicago in a driving rain and a stiff headwind, bouncing through a choppy couple of hundred miles of "soup" to settle thankfully in Chicago several hours later.

IT was not much better flying the next day when a parade was held down Chicago's 31 mile lakefront, but the air corps pulled it off and moored in Dayton that night, ready for the long jump to the eastern coast the following day.

Through all the work, the needs of the correspondents were ministered by a press relations staff which left nothing undone that would help in any way. Always, its personnel was ready and anxious to do everything in its power to smooth the way of the group of men whose job was to cover the movements of the first air division of the army.

Colonel Ira Longanecker, air corps press relations chief, headed the staff, and was assisted by Major Oscar W. Griswold, regularly in charge of war department press relations work, and Lieutenants Roland Birrn and Arthur Ennis, regulars in Longanecker's office.

They provided food at reasonable prices for the press wherever the corps went; they provided beds when they could, and always they provided excellent service.

Both of the major telegraph companies sent men along with the press on the maneuvers, and these men were equally anxious to afford service to the news writers. One of the telegraph companies sent a man who has worked the air races for a number of years, Ben Thelan, of Chicago, and there were many times when he provided transportation accommodations which could not otherwise have been secured. It was his work which in many cases got the copy into offices in time for dead-lines and which in many ways smoothed paths that otherwise might have been rough-going.

Probably the most anxious moments

(Continued on page 89)

Clara, Lu and Em

By JEAN PAUL KING

Jean Paul King, announcer for Clara, Lu and Em

HELLO, radio listeners—

Once upon a time radio advertisers were looking for something different; radio stations were looking for something new; radio listeners were looking for something entertaining.

They all found what they wanted.

It happened this way.

Three college girls entered the Drake Hotel studios of WGN. They were broke. They had just finished an audition at a prominent Chicago station and had been turned down.

"What do you sing?" the audition manager at WGN asked them.

"We don't sing—we talk."

Doubt shadowed the face of the audition manager. Reluctantly—"Well, there's a mike. Go ahead and talk."

And talk they did; talked themselves right into one of the biggest evening acts offered in Chicago; talked themselves into being sponsored by the Palmolive Company, one of radio's largest and oldest advertisers; talked themselves into a five-night-a-week contract with the National Broadcasting Company.

And then it is said that women talk too much—now listen!

All you women who wash dishes know these girls—Clara, Lu and Em, the Super Suds Girls, who go on the air at nine-thirty every night except Sunday and Monday. Their act is simple as is every good thing. Three "girls," getting close to middle age, meet some time each evening and discuss events that happen to themselves, to well known persons, and to the world in general. Those friends have flats in a double house, so you may be sure they miss little that happens in each other's families.

THEIR "chatter" is homely and ungrammatical, but it is intensely human and kindly. That quality of humanness is, probably, the most outstanding characteristic of the act. They are interested in all that goes on, intensely alert, laughably querulous, and—I find I must say it again—human.

Their interest in everything, combined with their lack of knowledge of anything, betrays them into many humorous conclusions. Their humor is unconscious and always wholesome, relished by both banker and baker, peddler and bartender. (Yes, lady, we still have bartenders.)

So we characterize the act as extremely typical of a certain cross section of American life, and entirely natural in its pathos, humor and imagination.

In character, the three friends are Clara Roach, practical, capable and fat. She is married to Charley Roach, who is a plodder and who is steadily employed as a mechanic in a garage. Clara has two sons, Herman, twelve years old and August, six. She is always the sensible one of the trio, and offers a distinct contrast to Lu's giddiness and Em's impractibility.

Lu Casey is a widow with one child, Florabelle, 9. Her love affairs with Ollie Gifford, "C. W." and Gus, the burly truck driver furnish much gossip for the girls as well as Lu's attempts to learn stenography at business school.

Emma Krueger is the most pathetic and the most earnest of the three. She

From left: Louise "Clara" Starkey, Isobel "Lu" Carothers, and Helen "Em" King.

is married to Ernest Krueger, a World War veteran from Peoria's Caterpillar Corps, who chronically is out of a job. Em is the mother of five children—Junior, 11, Esmerelda, 10, Geraldine, 8, Little Em, 6, and Archie the bouncing baby boy. Poor Em—she has her difficulties in trying to manage her housefull of children, her improvident husband and her slippery finances. However, she always remains happy and cheerful.

SINCE the act and its characters are not based upon actual figures in real life, nor upon any personal experiences of the three themselves, the writing of these nightly sketches is difficult. The girls write all their copy and it is interesting to note that to date they have collaborated in turning out over 425,000 words of radio continuity. This is no mean feat, as this number of words, written 1500 at a time as they are for their nightly sketches equals four good length novels. To do their writing they meet each afternoon at two o'clock and work together until they have a sketch that is satisfactory. Sometimes it comes easily but often no ideas materialize (as any writer will agree) and then comes a diligent searching of the newspapers and current periodicals for a topic of conversation. And what with Gandhi in India legislating for free salt; President Hoover going south on a battleship; the Prince of Wales touring South America; and a big league baseball season under way—to mention but a few, there is certainly always a wealth of current news for gossip.

It was in June 1930 that the three girls went to WGN for their audition. For six months they were presented as a feature by that station, then in January, 1931, they joined the network of the National Broadcasting Company. Strange as it may seem the act of Clara, Lu and Em was not evolved as a radio skit; it was not born with any thought of profit or commercialism, but solely as an instrument of amusement.

Let Em tell the story of how the act originated:

"We three were in college several years ago—in fact we were sorority sisters in Zeta Phi Eta in the School of Speech at Northwestern University, and our major interests lay in dramatics and the stage. We had a great deal of fun dramatizing life and characters and from this the individualities of Clara, Lu and Em emerged. We became close friends and began to identify ourselves with these characters to amuse our sorority sisters, and soon we were putting on impromptu skits, much like the chatter of Clara, Lu and Em today. We almost lived the characters."

Lu smiled and continued the story.

"It certainly is interesting to look back and remember how popular Clara, Lu and Em became among our friends. We were being asked constantly to 'do the act" and so thru association the personalities of Clara, Lu and Em developed. They were not women that we had ever known—just characters we made up, and characters we tried to make typical and amusing as well as real."

So well acquainted did the girls become with Clara, Lu and Em that when they finally put the three on the air they felt, to quote Clara, "almost as though we were exposing the private lives of real friends to the public. I felt disloyal."

Even as Clara, Lu and Em had become real persons to their authors, so they have become real to thousands of listeners. The girls receive over four thousand letters a week from the radio audience, and these letters tell them how human and how humorous the lives of the three are, and how much their chatter is enjoyed. These letters come from a high class audience, the girls find—a critical but appreciative audience, and are helpful as well as interesting, the girls say, since many of them contain suggestions which may be incorporated into the act. For helpful criticism and suggestions, any entertainer is grateful, especially any radio entertainer whose audience must remain unseen.

NOT since Amos 'n' Andy commenced their curious daily dialogue has there been such an outstanding character production over national networks as that of these three college girls who play Clara, Lu and Em. Jean Paul King their announcer, has come to know them as Radio entertainers better than anyone else. His story about them therefore has an intimate interest that will appeal to every fan who has become one of the Clara-Lu-and-Em addicts.

The act of Clara, Lu and Em has proved of great popularity particularly to women.

Of course every listener interested in Clara, Lu and Em is interested in the girls behind these characters. They are three well-educated, clever and highly capable young women—all attractive. They are graduates of Northwestern University, all three from the School of Speech.

Clara, who except from nine-thirty to nine-forty-five, Chicago Time, is Louise Starkey, lives at present in Evanston, Illinois, as do Lu and Em. She has had many colorful experiences crowded into her short life. Born in Des Moines, Iowa, where she went through high school, at an early age she was left an orphan and was reared by her guardian who has done everything in the world for her. She tells a story that you may believe or not. Clara says that when she was born she was so large that her father made her mother a present of a mammoth grand piano. But she also wanted me to tell you, her audience, that now she herself, really is much smaller than the "Clara" of the air.

Louise came to Northwestern on a scholarship won in high school and through her pronounced scholastic abilities won two more scholarships, one in her junior year and one which enabled her to take a post-graduate course, finishing in the spring of 1928. Her graduate work as well as regular college work was in the speech department and after finishing college she took a position teaching dramatics in Denton, Texas, at the Texas State College for Women. Finding teaching less enjoyable than she had pictured it she returned to Chicago after a year in Texas. When in college, Louise many times had put on a burlesque of old-time vaudeville as a feature of her work in dramatics. Thinking now that she might book this act as a regular vaudeville skit, she took a position in a Chicago book shop while attempting to make the necessary arrangements. Soon she went touring on the road with a show sponsored by the Allied Arts—a sort of Lyceum show resembling the well known Russian Chauve-Souris. When she returned from this engagement she worked for the Goodman Theatre, doing publicity. Louise still had this position when the girls, reunited, had their audition at WGN.

LU IS Isobel Carothers who was graduated from Northwestern in 1926. She too was born in Des Moines and was the third of four children. When she was born there were already two boys in the family and her mother had been promised a watch if the baby was a girl. Upon Isobel's arrival (on her father's birthday) her mother received the watch and as you may imagine there are many arguments between Louise and Isobel as to the relative merits of a watch and a grand piano. The little girl's early adventures were all in Des Moines and in the fall of 1922 she went away to college in Chicago, where she became friends with

(Continued on page 94)

"Line up! Attention!" SIGNALS! "

Husing, McNamee, Munday, Totten, Hoey, Thompson and All the Other Great Football Announcers are Getting into Action to Give You Those Collegiate Thrills by Air

Mr. Nelson S. Hesse is the first of our Radio Digest reporting scouts to file the story of what is going on in football as it concerns the CBS sports camp. Here 'tis:

WALK around the grounds of any university, college or school these days and you'll hear the thud of cleated shoes against pigskin, the sound of running feet and of harsh, raucous voices bellowing, "Hit 'em low! Hit 'em hard! What do you guys think this is?"

Another football season is under way.

To the football players and coaches the new season means two, three or four weeks of training, after which six or seven games are played. To Ted Husing, sports announcer for the Columbia Broadcasting System, it meant nine months of training and preparation for thirteen games.

Most people believe that all Ted Husing has to do is go to a football game, set up his microphone and describe what goes on.

"Gee! What a break you get being a sports announcer," they say. "What a lucky guy being able to see all the big games. Pretty soft."

They do not know that Ted has been training for this football season ever since the last one ended. As soon as the 1930 season came to a close, Husing began eliminating the names of the players who were scheduled to graduate from the leading elevens in all parts of the country. After that he added to the lists of the players on the various teams the names of last year's freshmen stars who would be eligible for varsity football in 1931.

Then came a more difficult job. The names of players on the squads were written down and their records looked up, catalogued and carefully filed away. Later they were read over and over and memorized. Thus, if Halfback Smith, of Whoozis University, breaks away for a 90-yard run during a game this season, Husing will be able to tell you without a moment's hesitation that this is the same Smith who scored four touchdowns against Whatzis High School during his senior year in school and has scored 149 points as a freshman halfback.

Ted Husing using the latest type of hand microphone.

THIS compilation of facts and figures is but the beginning of Ted's task. He must go over carefully the records made by the leading teams in 1930 and endeavor to predict what their 1931 records will be so that he may select the most important games of the coming season. Finally, after nine months of consideration, Ted and executives of the Columbia Broadcasting System decided that the following thirteen games would be described this season:

Sept. 26—Army vs. Ohio Northern — West Point.
Oct. 10—Northwestern vs. Notre Dame —Chicago.
" 17—Army vs. Harvard — West Point.
" 24—Yale vs. Army—New Haven.
" 31—Illinois vs. Northwestern — Evanston, Ill.
Nov. 7—Navy vs. Ohio State—Columbus, O.
" 14—University of Pittsburgh vs. Army—Pittsburgh.
" 21—Southern California vs. Notre Dame—Chicago.
" 26—University of Pennsylvania vs. Cornell—Philadelphia.
" 28—(Undecided.)
Dec. 8—Penn vs. Navy—Philadelphia.
" 12—Southern California vs. Georgia—Los Angeles.
" 26—Georgia Tech vs. California —Atlanta.

While thirteen dates have been selected for football broadcasts over the Columbia chain, it has not yet been decided definitely what game will be described on one of the dates, November 28, although it is certain that Husing will describe one of three important frays scheduled for that day.

Although the remainder of the schedule appears definitely set, executives of Columbia this season may make some changes if some of the teams fail to live up to expectations or if some other games loom as more important later in the season.

Ted will travel many thousands of miles during the 1931 football season in order to furnish radio listeners with vivid word-pictures of these thirteen gridiron classics. He will journey west to Los Angeles, Chicago, Evanston, Columbus and Pittsburgh; south to Atlanta and north to New Haven.

Another

TELEVISION

AS Radio Digest goes to press with this October issue all television eyes seem focused on the exhibits to be shown at the Radio World's Fair in New York. The exposition is scheduled to open September 21st. By that time all the apparatus will be installed to show the remarkable developments that have taken place since the last exposition.

Various makes of television receivers will be shown, whereas in the past only one has been sufficiently developed to be displayed to prospective buyers.

Almost every fan has heard of the great image produced by young Sanabria of Chicago. It will correspond favorably, according to reports, to a moving picture production. The image will fill a screen ten feet square. Thus it will be possible for visitors to view what is going on from almost any point in the auditorium where it is shown.

An almost continual television performance is planned by the World's Fair officials. More than 600 performers will appear before the televisior, singly and in groups. Carveth Wells, eminent African debunker, will act as master of ceremonies.

First night of the fair will feature Earl Carroll and some of the "Vanities" beauties; Harry Hershfield, cartoonist and monologist, and Patricia Bowman, well known dancer. Madame Mariska Aldrich, former prima donna of the Metropolitan Opera House, will appear Wednesday night. Doug Brinkley, Thursday night master of ceremonies, will interview Nell Brinkley, prominent newspaper illustrator.

WHETHER or not the large radio manufacturing companies, Radio Corporation of America, Victor, Philco and so on who are known to be working on television problems—will exhibit commercial sight receivers is not certain. It's the general opinion among radio experts, however, that these companies will withhold such receivers until next year. Instead, they'll push the sale of their new type radio receivers—the midgets, phonograph-radio combinations, remote tuning outfits, and the like.

Helen Choat who strolled around to W2XAB from her Broadway show for her first experience before the flying spot.

However, Jenkins and the Short Wave and Television Corp. already have announced that they will present models which will be offered to the public.

The show officially will open at 8 o'clock on September 21 and it will be listed as the Radio-Electrical World's Fair, since refrigerators, electric clocks and so on also will be on display. David Sarnoff, president of the Radio Corp. of America, will deliver the greeting to be broadcast by WJZ from the Crystal Studios.

"Miss Radio 1931," the successful entrant in the third annual search for the most beautiful radio artist in America, will receive her title and a loving cup at the opening broadcast ceremonies. Also on the program will be the Radio Prince and Princess. The latter search was open to child radio singers from 6 to 12.

IT is estimated that 300,000 visitors will witness the ceremonies, which will include extensive broadcasts and the annual award made by the Veteran Wireless Operators' Association.

Charles E. Butterfield, radio editor of the Associated Press tells us that when television receivers get down to mass production basis they will cost less than the audio receiver. He goes into a technical description of the sets to show why.

Many of the metropolitan newspapers have given special attention to the development of television. The New York Sun recently offered prizes in a television contest. It is going far to encourage the amateur who likes to build his own sets. In an article published September 12 in the Sun Mr. A. G. Heller says in part:

"No one expects television for the general public entertainment now. But there is a vast army of ingenious citizens who must be busy during their spare time making something. For years now that corner of the home which the mistress of the house has referred to as the radio junk shop has been covered with dust and neglect.

"Manufactured sets are of such quality and inexpensiveness that the home set builder, having performed his function and brought radio from incoherent beginnings to perfection in eight short years, no longer has the urge to attempt to better present reception. But given any cooperation at all on the part of broadcasters and manufacturers, those corners would again become clean and tidy.

"Those home experimenters would again sit up nights to catch television signals. What if the pictures are at

Giant Images Shown at Radio World's Fair

times spotty and blurred? The very imperfections that are held out as bars to the acceptance of television in the home are the spurs which will goad the home mechanic into serious attempts at their elimination.

"Dr. E. F. W. Alexanderson, upon presenting an enlarged television image, remarked that he estimated there were 250,000 home experimenters who would welcome the opportunity to participate in the development of television. And that it was this 250,000 upon whom he placed his confidence for aid in its development.

"If our experience with radio is any criterion, it would be conservative to say that each of these 250,000 is prepared to spend at least fifty dollars a year on parts and equipment for experimentation. In other words, there is available a sum of over $12,000,000 a year to be used for the development of television through the purchase of parts.

"BUT far more important than the money involved is the enormous impetus that these enthusiasts would give to interest in television all over the country. Just as the imperfections of radio would probably have not as yet been greatly reduced were it not for the enormous interest aroused by individual enthusiasts, just as no one organization or individual can claim to have brought radio to its present perfection even though patents running well into the thousands are controlled by different organizations, so there is little hope that there will be an early emergence of television if it is kept entirely in the research laboratory.

"For the research laboratory cannot hope to have the same enthusiasm and interest in speedy results that is present within the ranks of the small manufacturers and inventors. A research worker's salary goes on from year to year and his work is carried on from man to man regardless of how great a period of time is necessary to complete it.

"Pure science and research is interested only in perfection. Manufacturing and business is interested only in practical results. The research laboratory can never really call its work finished. It will not release any results which can by any possible touch of the imagination be improved.

"In the research laboratories it will probably take years to reach the same result that can be achieved by the intelligent cooperation of a number of independent manufacturers working in collaboration with each other and the home enthusiast in one year. For it is only by competition and rivalry that the best in the world is brought out in the quickest time possible.

"The divergent viewpoints of the research and production worker can best be summed up by saying that the research worker is interested in the perfection of a detail. The production man is interested in the production of a working whole.

"From time to time the above arguments will appear in various forms under various headings and promulgated by various individuals and groups. Nevertheless, in this newest battle of television the issues are clear and the paths are well defined.

"Either television must go even more deeply than ever into hiding until it can come from the confines of the research laboratory ready for parlor use, or it will follow the path of its parent radio, urged on and helped by the enthusiasm and ingenuity of that vast throng of mechanically inclined Americans who must have a hobby."

UNDERNEATH the swift current of television development there are two rival forces each working to outpace the other. One is the skilled scientist who is delving into the precisions of the laboratory. The other is the amateur working in the home workshop. Nobody hesitates to give the latter the bulk of the credit for radio as we hear it today.

The boys have gone back to their tools. They have found a new hobby. Will the commercial developers outdistance them? A discussion of the subject by A. G. Heller appears on this page.

Invasion of America by British television apparatus was predicted within the last few weeks by the appearance of Sydney A. Moseley of London. Mr. Moseley is director of the Baird Television Corporation of Great Britain. Branch offices here were established at 145 West Forty-fifth Street, New York.

"WE propose to begin television broadcasting in a few weeks," Mr. Moseley announced, "in cooperation with Station WMCA, as soon as the Federal Radio Commission grants its official sanction." He added that the commission had expressed itself as being in favor of the project and that actual operations would begin as soon as formal notification was received from Washington.

Arrangements also are being made, Mr. Moseley said, for the immediate manufacture in this country of television receiving sets, to market at about $100, for installation in American homes. Many of the existing radio sets, he added, could be hooked up with a television device for receiving purposes.

The first television programs will consist of vaudeville and plays, and use will be made in their sight and sound transmission of the recent eighteen months of daily experimental broadcasts in London. In addition it is also intended to transmit a baseball game, allowing fans to watch their favorite players, at their homes or offices.

Mr. Moseley also announced the perfection in London within the last few days of a portable transmitting set, no larger than a moving picture projector, which marks, he said, a very important development in the art of television, making it possible to "tele-broadcast" events, such as the landing of big airships, prize fights and football games, in the same simple manner as it is now to broadcast them.

with

Bill Schudt, Jr.

TELEVISION is stepping out. Rapidly discarding its swaddling clothes the new experimental broadcasting service of the Columbia Broadcasting System has set a number of records since the last issue of Radio Digest went to the printer.

For example a studio technique unlike any other kind of broadcasting has been inaugurated. Radio performers who came to the sound studios without shaving, and then performed in their shirt sleeves, find it quite the opposite in the visual studio.

The little twelve by twelve room in which Columbia parades its seven and one-half hours worth of sight programs daily is the show window of CBS. The eight dull looking photo-electric cells are the electric eyes of the multitudes just like the black long microphones in the sound studios are the ears. An artist wouldn't think of sneezing or coughing into the microphone!

Artists used to standing or sitting while they broadcast find things different too. Whether you sit or stand before the television camera, it is necessary to animate your program. Motion is important for two reasons in present day visual broadcasting. First it makes the program more interesting. Second, according to Edgar Wallace, chief television engineer for CBS, motion makes far clearer images in your television receiver because, he says, an inanimate object causes black lines to accumulate over the surface, while on the other hand, an object in motion cannot linger long enough to gather these.

Experiments in stage scenery setting and multi-colored back drop screens have also been conducted and are being continued.

Thrills in television? Well, I'll say there are. Let me tell you about the time we broadcast a million dollars worth of rare gems — diamonds and pearls.

A solid million dollars worth of rare jewels and stones. A huge black box filled with gems!

New York just getting over the peak of the super crime wave . . . Police protection, naturally was deemed necessary . . . nine o'clock several squads of cops arrive with two squads of plain clothes men.

Fifty-second street, one of the busiest of the mid-Manhattan thoroughfares, was completely closed for the first time since it was repaved last year. Cops line the sidewalks. Cops lurk in doorways. Cops are looking down at you from over-hanging parts of skyscrapers. Cops are everywhere, in elevators, in corridors, on fire escapes, in studios, behind microphones, under control apparatus. Cops . . . cops . . . cops . . . where there are not cops, there are plain clothes men. Hard looking "dicks," these are, with a right hand lingering in the immediate vicinity of their guns and a pair of keen eyes on everybody at once.

Machine guns are trained on Madison Avenue, on Fifty-first and Fifty-second streets and on adjoining building roofs. Protective measures for a million dollars worth of gems.

"They shall not pass" is on the lips of every copper while his weather eye looks for crooks, crooks, crooks, CROOKS!

It is five minutes to ten. (Ten o'clock is the time for the jewel broadcast. It is the time when the black box will be unbolted and the individual gems will be brought forth and displayed.)

Cops and "dicks" become restless. Announcer David Ross and your columnist begins to feel uncomfortably warm despite the iced air in the studio. It is tense! Very, very tense!

Your columnist introduces the program and presents David Ross. Ross is now trembling. His voice trembles. Confusion reigns as diamonds big as both your thumbs are drawn from the innermost recesses of the big black box. The program is on and before you know it, you're so busy, the half hour is over and a cordon of detectives surround the bearers of the jewels in the big black box and the parade is on once more. As the jewels leave 485 Madison Avenue everybody, including the elevator man especially, breathe huge sighs of relief. There wasn't even the sputter of a machine gun.

Columbia's sound effects department could have made it even more thrilling had they suddenly set off their make believe machine gun contraption which was idly resting in a corner on the floor below, but wisely, they left it there.

We've been broadcasting boxing matches by television. A miniature ring was set up in the little studio and fights are presented weekly. Benny Leonard and Jimmy Martin went three rounds some time ago establishing records for presentation by Columbia of the first big fight by the visual route.

So crowded was the studio during a recent amateur fight that your guest columnist, giving a blow-by-blow account, took two very stiff rights under the left ear and lost a lot of enthusiasm right there and then.

Our puppet shows are creating widespread interest because they give us the opportunity to utilize a stage with screens and curtains and full size puppets.

Speaking of curtains and screens . . . we've been doing a lot of experimental work with black, gray, white and aluminum-tinted screens all of which make far clearer images when certain oppositely tinted objects or persons are set before them. Various kinds of lighting have been tested and an attempt to utilize miniature stage settings are also being made.

The engineers, Edgar Wallace, Spears, Briand and Sachs are doing an admirable job in perfecting new and different types of scanning and lens focusing.

A series of experimental television dramas are being telecast weekly under the direction of Charles Henderson. These are especially written for television and utilize full costume and props.

(Continued on page 60)

ENTERTAINERS contemplating an appearance over W2XAB are asked to consider Mr. Schudt's 14 points in order to obtain the best results. Among the points that may prove useful in any television studio might be mentioned:

"Action is very important . . . an active image comes through more clearly. Use head and shoulders, roll the eyes, shake your finger —keep in motion all the time.

"Keep in the focus range. Look into the light or on either side but never upward at the microphone.

"Don't look amazed and flabbergasted if the director taps or directs you into the picture.

"Avoid talking, whispering or otherwise distracting fellow entertainers while they are in the spot.

"Use costumes or a change of hats whenever possible. Small 'props' of any kind are desirable."

GRACE MOORE has loomed up bright and fair in the radio firmament during the past year—another beauty recruit to the television dawn. She has distinguished herself in the Metropolitan Opera as a singer and with Ziegfeld for her charm.

The Challenge!

Station KNX Seeks Literally to Serve "Public Interest and Convenience" and Meets Opposition from the Press

By Charles H. Gabriel, Jr.

WITH the sensational broadcast of the trial of David H. Clark for the murder of Herbert Spencer, KNX has written a dramatic chapter into the great epic of radio! *(Hollywood, Calif.)*

In one bold stroke, KNX has made a revolutionary addition to radio broadcasting!

Hurling its challenge at political graft and press monopoly, KNX has done what no other station apparently even dreamed of attempting.

With the refusal of Judge Stanley Murray, imported from Madera County to preside over the Clark trial, to permit KNX to place its microphone in the courtroom, the wheels of fortune began to grind. Radio history was in the making!

When the press discovered that it was about to be "scooped" by radio, it succeeded in having KNX excluded from the courtroom.

The radio station countered by setting up a remote control panel in the Hall of Justice, less than 100 feet from the courtroom itself. Radio reporters would rush from the court with transcripts of the testimony, and it would be immediately broadcast in dramatized form by a cast of trained actors almost before the voices of the witnesses themselves had died away.

The newspapers were beaten by at least two hours in bringing the thrilling story of one of the most sensational murder trials in local crime annals to the public.

Sensing defeat, the press struck again!

Then the judge handed down another ruling . . . the court transcripts, public property available to any citizen, were denied KNX by the court! The press enjoyed a moment of triumph. But it was a brief moment!

KNX reporters were undaunted! They took down their own transcripts of the trial in shorthand, and the broadcast continued uninterrupted. Never before in the West had a court trial been broadcast and the attention of radio fans all over the country was riveted upon the heroic efforts of this lone 5,000 watt station to overcome every obstacle to bring them a story which it was their right to hear. Letters, telegrams and telephone calls began to pour into the offices of KNX by the thousands. Radio had clicked! And the public, loving a good fight, was watching with eager interest the struggle of radio to relate the true story of the great trial, ungarnished by political or biased interests.

TWO mighty forces in this Modern World push to the front and knock elbows. Herewith is the unedited story from the KNX public relations department. Last month Radio Digest pointed to the war clouds. Perhaps this is the first gust of the storm. As its final answer to the challenge KNX announces its forthcoming Newspaper of the Air. . . ."leading the way into a new untouched field in radio."

THE press in desperation, summoned together all its forces for one last onslaught against radio. It succeeded in having KNX thrown out of the Hall of Justice! The station was forbidden by "public servants" to use any public property for its broadcast.

It was then that KNX won the admiration and whole-hearted support of the public. The plucky station set up emergency quarters in a musty storeroom of the Paris Inn, a nearby restaurant. Here, among broken bottles, packing cases and cobwebs, the tense scenes of the court drama were re-enacted by KNX staff artists . . . and the broadcast continued despite every attack that its enemies launched to prevent it!

Radios in every public building, on every street corner, and in almost every home in the city were surrounded by tense-faced persons, listening intently to the dramatic presentation of the trial.

Thousands of letters, telegrams and 'phone calls continued to flood KNX. Without exception, the people of Los Angeles were rushing to support the victorious standard of Radio! Cheered on by public encouragement and support, KNX redoubled its efforts, and built what is admitted to be the largest radio audience in local radio history!

The accurate and complete story of this trial created a sensation. The people stormed the Hall of Justice with protests in the form of letters and telegrams against the discrimination of Judge Murray and public officials against radio. They demanded that the court transcripts be given to KNX. And they never faltered for a moment in their support and praise of the first broadcast in Radio of a trial, word for word, as it actually happened.

The terrific, and sometimes almost heart-breaking work of preparing these trial broadcasts was done by Stuart Buchanan with the assistance of every member of the KNX staff.

Among those who took the roles of the prominent figures in this court drama were Tom Brensman, Jack Carter, Tom Wallace, Drury Lane, Naylor Rogers, Mary Duckett, Maxine Elliott, Lois Hunt, Mary Yorke, Michael Kelly, and many others.

Excitement never ceased to reign in the offices of KNX during the hectic days and nights of the trial broadcast. Letters, telephone calls, telegrams kept

(Continued on page 85)

Moonlight Sonata

By Edythe Jeanne Meserand
of National Broadcasting Company

An Impressionistic Prose Poem Inspired by Beethoven's Classic

A ROOM dark save for the flood of pure still moonlight coming in from the window—a light that seemed to center on one object of wood and sparkling ivory that stood by an open window. Outside in the darkness one could distinguish the outlines of stately trees, the figure of the Goddess Diana in the midst of an old Garden. A still pool of water reflected the Lunar Diety and her numerous courtiers. All was quiet, still, even as in the room wherein he entered.

HE was alone, feeling bitterness but no remorse; knowing only an indifference for the horror that had been created around him. Tonight it was no longer an indifference, but a longing to be someone else, to share his beauty, his grace, his ideals and life with one who understood, appreciated and loved.

Nay, alone he would be. Alone, he would live—no life, no love and no understanding.

He gazed around the large dark room and finally let his gaze rest on the piano that was shrouded with the light of the moon.

Like a deadly thing it invited him to come to her—the Goddess of Music—promising him the comfort and love that mortals had denied him—how she called!

STARING hard and long till tears came to his eyes, he finally walked the length of the room and came nearer to the seductive keys that shone like moonstones in the reflected light of the Goddess Luna. Fascinated he touched them with infinite tenderness and found them warm and smooth like the petals of a full blown rose, yielding to his touch like one enamored—grasping his every note, resounding it with the same intensity of pain, of sorrow that he felt.

A CLOUD passing over the moon left him in utter darkness—clasping the keys tighter he let them ring out clear and melodious—a cry of someone crazed by pain, of one crushed by futile effort—and in answer to his prayer, the Goddess once more covered them with her beauty, took them into her embrace and crowned him Knight of Music.

Now fondling the piano, he commenced a moaning plea,

Decoration by Gaspano Ricca

an appeal for salvation of his loneliness. Begging, his soul crying, each note torn from his heart until he could stand no more, then as though raising his voice in rebellion his music cried, "Not forever more, not forever more!"

CRYING out demanding consolation, demanding a balm for his heart, his soul, his body that was being wasted on an incredulous world—alone!

A litany to A God, who knew and understood long and passionate—his heart beats resounding in each note, entreating, demanding, begging in turn. What infinite sorrow he portrayed in his liturgical sonata, expressing in each chord a supplicatory prayer in which his soul responded.

THE moon shone brighter as though anxious to attract the attention of this Dreemer that sought to find solace and could not. And as though in answer to her thoughts, he turned and smiled up at her, changing his music to an offering of love to this bright, shining Goddess of Night.

A tribute to a Goddess, offering to her the very essence of his soul, the breath of his life and the beauty of his love. Compounding these into an immortal melody, he interpreted it for her on ivory keys sparkling with his tears.

THE moon, flattered by his music, and proud to have made him one of her Knights, appeared more luminous in the dark room, and her light shining through the window formed a Halo about her Knight of Music and His Human Instrument.

The playing continued until he had given it his soul completely without a regret, and as his head dropped lower and lower nearly touching the very keys, the tears hitting them sparkled like diamonds strewn on velvet. His fingers striking the keys caused his precious tear drops to spatter into a million more brilliants till the entire instrument resembled a dancing jewel.

HOW gay it looked as its God invited it to dance to the rhythm of the poems of his soul, to the beauty of these odes. It smiled to him, worshipped him, and in turn entreated him to understand and realize that he had at last found what he strived so hard to find.

"STRIKE *up the*

By ARTHUR PRYOR

"Band music has been my life. For fifty-eight years . . . I have played in bands."

TO ME band music has always meant America. Marches—stirring, thrilling, spirited—always have symbolized the soul and spirit of the inhabitants of America, the surging strength and confidence of the increasing people and the growth of the Nation.

Band music has been my life. For fifty-eight years, since I was a mere three years old, I have played in bands. I have traveled across this continent more than a dozen times and have conducted or played in sixteen foreign lands. Throughout these years I have had one primary aim—to make others derive the same joy and meaning from stirring martial airs that I have since childhood.

Of recent years there has been less and less opportunity to hear band music. This is due by no means to a lack of interest in it on the part of the people. There is a logical explanation for this condition.

First, the development of the automobile and the resultant increase in traffic on the streets, coupled with the necessity of obtaining a parade permit, have virtually driven parades out of existence.

Secondly, amusement parks, which in former days flourished during the summer months from coast to coast now are rarities. When they began to disappear, the traveling band began to disappear because of the lack of places to play.

Band!"

Thus, the demand for band music existed, but the means of meeting the demand was lacking.

Mr. George W. Hill, president of the American Tobacco Company, saw this condition. I was laying plans for my annual summer tour a few months ago when I received word that Mr. Hill, believing that band music is closest to the hearts of the American people, wished to know if Arthur Pryor's Band would like to play over the air.

Would they! Through Mr. Hill we were being afforded the opportunity to play every night but Sundays over a coast-to-coast network. We were being offered the chance of meeting the demand for martial music.

Within a few weeks the plans for our nightly concerts had been made and my thirty-two musicians had arrived in New York City. They came from all parts of the country. After several days of rehearsing, Arthur Pryor's Cremo Military Band made its debut over WABC and a nationwide network of the Columbia Broadcasting System on the evening of March 16.

THAT night was one I never shall forget. As I stood before my men and gave them the signal to start the first march I realized that in the next fifteen minutes I could accomplish more than I had in the past fifty-eight years. In fifteen minutes I would carry the message of band music to many more people than I had in all the rest of my life. I experience this same thrill as we begin each of our broadcasts.

It was natural that I should become a musician. My mother was a gifted pianist and my father the head of his own band — "Pryor's Silver Cornet Band." In those days they were all "Silver cornet bands," and it was an unbreakable tradition that every leader should play the cornet.

Back through the generations before my parents you could trace the musical strain, like a silken thread, plain and unmistakable. I could not have mistaken my heritage had I wanted to. The desire to be a musician was with me something of a birthmark.

I was born in St. Joseph, Mo., in 1870. At the age of three I was a full-fledged member of my father's band, playing the bass drum. A year later I was playing the cornet and at seven the alto horn. By the time I was twelve I had mastered the valve trombone, the bass violin, the tuba and the baritone.

The village band still holds an important position in many sections of the country, but before the advent of the automobile and other modern attractions its place in the community life was far more distinctive. When I was a boy the band was a most important factor in the lives of all of us. Age limit was not considered then. Father and son played side-by-side. Of necessity nearly every member could play three instruments and some were proficient on four or five.

FATHER'S band, at its best, had only twenty members and of these only a few were professional musicians. Engagements were few and the pay small Consequently they followed other professions. The bass drummer worked in a cracker factory; the snare drummer was a carpenter, the alto player was a tailor and so on down the line.

One of the chief reasons why so many wanted to belong to the old village bands was the beautiful, gaudy, braided uniform each member wore. It was his proudest possession.

Considerable rivalry existed in St. Joseph between father's band and Winkler's Band, an organization of about the same size. Many times the bands would be parading on the same day and would pass on the main highway. As the bands would approach each other, the musicians of each would blow and play their loudest in an effort to drown out their rivals. The band that was still playing in unison after passing the other was the winner.

Father had a system by which our band nearly always emerged victorious. He always cautioned us to watch the bass drummer and keep in time with him.

My fifteenth year was a momentous one. First of all, I learned to play the piano after taking six lessons. But there was a more important event. A tramp printer, as improvident and addicted to drink as most of them were in those days, came to my father and asked for an engagement, announcing that he was a trombonist and in dire want. Father gave him a try-out, advanced him some money and took him on.

The printer's temperate spell did not last long. When the wanderlust again began itching his feet he was in debt to my father and, being an honest soul, he offered to settle by turning in his slide trombone. I was away on a visit at the time. When I returned my father gave the trombone to me.

I discovered that I was a natural trombonist. The art came to me as naturally as baseball to a natural ball player. I improved rapidly on the instrument, even though I didn't know for three or four months that you were supposed to oil the slide.

Since fortune thrust that old trombone in my lap I have played more than 10,000 trombone solos. I consider the slide trombone the king of all brass instruments, and the most difficult of all instruments to master. When you consider that we have so few real artists on the trombone but have hundreds of violin, 'cello, piano, flute and organ soloists of note, you may agree with me.

The trombone is the one instrument that has received the most abuse. In the hands of an artist the trombone produces tones more nearly like the human voice than any other instrument.

My first solo of importance was played at the St. Louis Exposition with my father's band. This engagement called for a band soloist, and it was my good fortune to be the one selected. The solo I played was "Rocked in the Cradle of the Deep." Thomas Shannon, a member of the famous Gilmore's Band, heard the solo and was so enthusiastic about it he arranged an audience for me with Mr. Gilmore. I played my very best for Mr. Gilmore and so delighted him he offered me a contract to play with his band the following spring. Unfortunately I cancelled that glorious oppor-

HEREIN you will find the great American band master's own story told in his own words for the first time. Some folks say the brass band as it was known a generation ago is passing into the limbo of forgotten joys. Music and other phases of art have developed a new mode of expression. Whether this change is permanent or merely symbolic of a fast tempo period remains to be seen. At any rate we have a few of the great bands left. Arthur Pryor touches the highlights of an active and distinguished career.

tunity to fame and fortune and in so doing committed my greatest mistake.

In 1888 I left St. Joseph to join Alexander Liberati's Band at Kansas City. For two years I remained with this organization as trombonist and soloist, traveling through Texas and up through California to Los Angeles, where we were stranded. Los Angeles had a population of only 42,000 in those days.

After a short visit to St. Joseph I went to Denver, Colo., in 1891, at the age of twenty-one, to become conductor and pianist with the Stanley Opera Company, they touring the country presenting a different light opera at each performance. With the company was a young girl whose destiny it was later to enjoy a long reign of popularity in New York in many of Victor Herbert's shows principally "The Fortune Teller." Her name was Alice Nielsen.

During this engagement I soaked up all sorts of information which was to be of value to me in later years. Everything was new, and it was all interesting. I learned the intricacies of routing, how bookings were made, the temperamentalities of musicians and a hundred other useful things in addition to enlarging my musical horizon and performing my daily work.

WHILE we were playing in Denver, Lillian Russell's opera company stopped there. She and her entire company honored us with their presence at one of our matinee performances. We were giving "The Mikado," and just as our luck would have it, our "Nankipoo" failed to put in an appearance. We struggled through many a laugh without a "Nankipoo" until the final curtain.

After the performance Lillian Russell came back-stage to see us and remarked that it was too bad Gilbert and Sullivan hadn't realized how perfectly "The Mikado" could be given without "Nankipoo."

For three years I traveled with the opera company from coast to coast. Then, in 1894, I came East and joined John Philip Sousa's Band as first trombonist and assistant conductor. During the nine years I was with Mr. Sousa I learned a great deal about a bandmaster's duties, and the hope that some day I would conduct my own band was born and grew steadily.

When I began playing with Sousa's Band I found that Mr. Sousa and the members of his organization had heard something of my reputation as a trombonist. While I was with the band many memorable incidents occurred in connection with my trombone playing. The year I joined the band we went across the country to the Midwinter Fair at San Francisco. I was a feature on this tour and was billed as "The Boy Wonder with the Trombone." En route to California we stopped off at the Broadway Theatre, in Denver, to play a one-night engagement. On his arrival Mr. Sousa received a telegram from Boulder, Colo., which ran something like this:

"Mr. Sousa:—

There are eighty of us who will come to your concert if Arthur Pryor plays a trombone solo."

I played the solo.

At the Midwinter Fair in San Francisco there was some rivalry between Sousa's Band and Schell's Orchestra. This rivalry finally grew so strong Mr. Sousa insisted that the band and orchestra play a joint concert in one of the large buildings on the exposition grounds to prove to the public that a wind band was as entertaining as an orchestra of string instruments, if not more so.

One soloist was to appear from each organization during the concert. Franz Hell, Flegelhorn player, appeared as soloist for the orchestra. He was a superb musician, and in later years I secured his services for Mr. Sousa's band. I was selected to represent the Sousa Band as its soloist. It was one of the greatest moments of my life.

In the audience that day was the late Dave Montgomery, of the famous team of Montgomery and Stone and an old and dear friend of my school days in St. Joseph. As I stepped up to play Dave greeted me in a loud voice with, "Show 'em, Arth! Remember old St. Joe." And believe me, I did my best to show 'em.

In the "nineties" our Sousa Band seasons ran eight or nine months. We opened at Manhattan Beach, N. Y., early in the summer and remained there until Labor Day. Then we went to the St. Louis Exposition for six weeks and later on the road, stopping at two towns a day from the South to San Francisco.

My first trip to Europe was with Sousa's Band in 1900. Much to my surprise I learned soon after my arrival that I had quite a reputation in Europe as a trombone player. While we were playing at the Paris Exposition I met an American musician who told me an interesting story.

"Well, Pryor," he said, "you certainly have made a deep impression on the French trombone players. After you had played several solos at the Exposition, the French Trombone Club sent one of their best performers to watch you and pass judgement on you. They arranged another meeting to get the returns.

"Well, they met, and the judge kept stalling and stalling until the members insisted upon a verdict. Finally he said, 'The only way I can give you my impression is for all of you fellows to get your trombones and come here tomorrow night and all play the best you can all the time.'

"'If we do that, what then?' one of them asked.

"'Why,' replied the judge, 'Pryor, himself, can do what all of you put together can do.'"

AFTER leaving Paris we visited Germany. While we were there I received a letter from a professor at the Conservatory of Music addressed in this manner: "To the Poet of the Trombone." I considered this one of the greatest compliments ever paid me.

An amusing incident occurred at Kroll's Garden, in Berlin. Trombone players from six German regiments attended one of the concerts for the expressed purpose of hearing Arthur Pryor, whose reputation seemed to have preceded him.

In their honor I played a solo, "Air Varie," which I wrote myself. I have been told this solo is possibly the most difficult ever written for the trombone. It calls for the playing of both the air and the bass accompaniment, and necessitates rapid-fire variations. So far as I know it has never been played by another soloist.

The Germans watched with all their eyes and listened with all their ears. After the performance they hunted up a member of our band who spoke German and asked for permission to examine my trombone. They spent fifteen minutes in a meticulous study of the instrument, in the process taking it apart, discussing it the while in gutteral accents. When they had finished I asked the interpreter what they had said.

"They say it is impossible," he replied. "They say it's a 'Yankee trick.'"

In Russia I played several solos for the late Czar Nicholas, in St. Petersburg, and afterwards was shown all

(Continued on page 88)

IN COMPLIANCE with the trend of the times Radio Digest has cut its subscription price to the very lowest in its history. And at the same time it is giving you the best quality magazine in its history. Newsstands are often sold out the same day the new issue is released. It is advisable to make sure of your copy every month by sending in your subscription, which is only $2 for the whole year.

They've Laughed at the Rain

TOGETHER

And Now Frank Luther and Zora Layman are Enjoying the Sunshine

By HAROLD E. TILLOTSON

Zora Layman

FRANK LUTHER was born with a proclivity for mischief and action. Did you ever see one of those big tumbleweed balls that go scurrying along beside a train as you ride across the Kansas prairies? One of them, if you had happened to be passing through Hutchinson of the Sunflower state, a few years ago may have been young Frank Luther on the day he first met Zora Layman. It was a momentous day although there was nothing at all auspicious in the portents according to the usual rules of love. At any rate it was the beginning of one of the sweetest romances of Radioland.

Not a jack rabbit in sight. His dog off on a lone hunting expedition of his own; and eleven-year-old Frank, befreckled and barelegged had tumbled the last tumbleweed ball in sight to a mess of broken bits. Nothing had happened for at least five minutes when suddenly through the brush he heard the beat of hoofs. Indians, cowboys—what? Shucks just a couple of small girls! And ponies—silly, fat little ponies. He'd wake 'em up. You never hunt far for a stone of about the right size to suit any convenience in this part of the country. And Frank could plunk a tin can from a fence post at thirty yards nine times out of ten.

SEEMINGLY from nowhere a tiny pebble lifted itself out of the scrub and bit with a sting at the right foreleg of the leading pony. A snort of equine indignation and surprise. A startled cry from a frightened little girl and then a sudden plunge through the scrub weed at break-neck speed aiming, it seemed, for Chicago and further points East—and directly over the observation post of Master Frank Luther.

Action was what he wanted, eh? Well here was action plus. You never, never could accuse Frank Luther of lacking in courage. So instead of reaching for his hat as the frightened pony came leaping straight at him Frank reached for the bridle—and the girl was saved!

Hero? No sir-eee! He was just a wicked little meany—and nine-year-old

Frank Luther

Zora Layman said it with all the fire she could blaze at him. Furthermore she never wanted him to speak to her again. She hoped she'd never even see him—so there!

Well, ha ha, what did he care! Girls are funny.

So they are, no doubt. Because the time came when that same little girl stood with Frank before a preacher right there in Hutchinson and said the words that have made them the happiest married couple in the present world of radio.

But after this incident they continued living in the same town for a long time, and practically as strangers. Then it happened they began taking vocal lessons at the same time from Roy Campbell, a very famous instructor. As part of his training Campbell gave them practical experience in singing in public by putting them in a church choir. The old feud was buried as Frank, a shy but still mischievous young man now, was properly presented to Miss Layman on the steps of the church where they were to sing.

New Plans Add GRANDEUR *to* RADIO CITY

By E. A. Holland

"WHAT has happened to Radio City and the funny oval sardine can shaped building that was to have been its front-center?" asks a reader from Denver, Colorado.

You would be surprised, Mr. Jameson. Of course the funny looking building that you compared to a sardine can has vanished. It never was anything but paper anyway. We are too conventional a people to stand for such radical departures and it was voted out.

However, Radio City is rapidly taking root. It must go deep down into the ground to go up, you know. So the excavators are digging and blasting and taking every sizable hunk out of the very center of that twenty-four dollar island that grew to be worth a billion or so. When that hole is finished we will know more about a depression in a big way.

And when you consider that $250,000,000 of the Rockefeller money is going into it you must appreciate the fact that a great army of men will be employed and help circulate the cash.

Three of the largest phases are now under way.

The largest of the three units is a sixty-six story office building with a sixteen story wing. This structure will have a gross area, or floor space, of 2,500,000 square feet, nearly half a million square feet in excess of the gross area of any other office building in the world today. It will occupy more than half of the middle block.

A second unit is the International Music Hall, world's largest theatre, to be located on the west half of the block between 50th and 51st Streets, and flanked on the Sixth Avenue side by a 31-story office building. Similarly situated in the block between 48th and 49th Streets will be a capacious sound motion picture theatre, completing the triumvirate with which the contractors are now concerned.

Excavation work has been in progress for several weeks on the sites of the three structures. Their actual construction will start some time in the autumn. The theatres will be completed by October 1, 1932, and the office building by May 1, 1933.

This gives general view of Radio City as it might be seen from a still taller building looking north and west.

Latest plans for the development show seven other building units. They include two office buildings of 4 stories each in the north and south blocks; two six-story office buildings fronting on Fifth Avenue; a 13-story department store facing Fifth Avenue in the northern block, and an office or club building just east of the International Music Hall, the size of which has not yet been determined. A large area in the south block is being left out of the building picture at present while negotiations are continuing with the Metropolitan Opera Company for a new opera house.

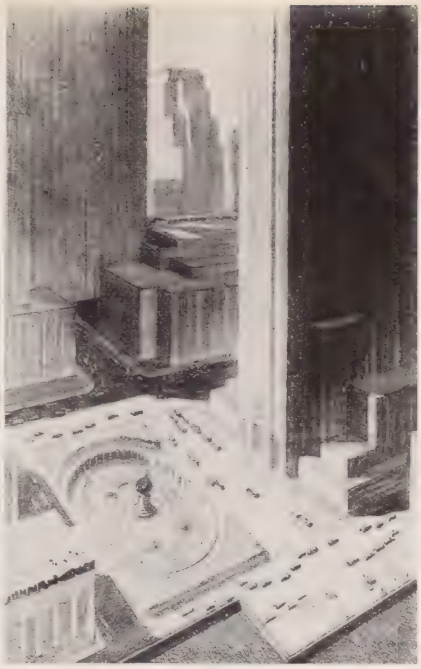
The plans show a radical innovation in architectural city planning. The lower roofs and setbacks of the buildings in the three blocks will be turned into modern and much magnified Hanging Gardens of Babylon. Seven acres of intensive landscaping will be devoted to water falls, fountains, reflecting pools, trees, shrubbery, formal flower beds, multi-colored tile walks, grass plots, and statuary. Plans for covering the outer walls of the buildings with a heavy network of living ivy are also a tentative part of the scenic picture.

AN ACRE of ground space, visible from the street, will be devoted to a Sunken Plaza, studded with a central 30-foot fountain, smaller fountains, statuary, grass, flowers and mosaic pavements. In following out this plan, more than $17,500,000 worth of open land area will be devoted to beautification for the public's benefit, without any revenue to the owners of the development. Between a quarter

illion and a half million dollars ill be spent on the general land-caping.

These three blocks will have wice the garden area, and four r five times the "population" of ne three blocks south of 42nd treet, which are maintained by ne City as Bryant Park.

Forty feet above the roof of the 6-story wing in the center block, curved waterfall, a miniature of ne famous horseshoe falls of Niagara, will send a tumbling orrent through a series of cas-ades to end at the roof level in reflecting pool, from 80 to 100 eet long and 25 or 30 feet wide. he waterfall will have 50 feet f spillway, with approximately a 0-foot radius between the ends f the arch. The water from the pillway will drop about 20 feet nto a ribbon pool, thence about 0 feet into another ribbon pool, rom which it will spill into the arge reflecting pool at the roof evel. Fountains will play at each nd of the lower pool.



Thirty-foot trees, shrubbery, rass, flowers, and multichromatic valks will furnish a general back-round for the water effects.

THERE will be two evels of landscaping above the tudios of the National Broad-asting Company, in the lower oof area between the main build-ng and the main east wall of the 16-tory wing. These areas will be at the hirteenth and eleventh floor levels and onnected by stairways. They will have erraces, formal flower gardens, benches nd geometric grass plots, with at least wo small fountains. The general ap-earance will be that of a formal gar-len.

Extensive landscaping will be worked ut on the roofs of the International Music Hall and of the sound motion icture theatre. On the north side of he Music Hall and the south side of he sound theatre there will be 30-foot edges of beech, hemlock or linden, so hat as one gazes at gardens the hedges will form a frame for the picture. The rest of these two roofs will be devoted to formal gardens, with hedges, grass plots, flower beds, fountains and reflecting pools.

Trees rising to a height of 30 or 35 feet, planted in at least three feet of earth and ingeniously anchored to the roof will be prominent features of the general scheme.

All the roofs and setbacks beneath the 16-story level will be fully landscaped. A complete piping and sprinkling system, underneath the earth, will water the entire landscaped area.

See below the great sunken garden as explained in the article.

On the roof of the 66-story office building will be arranged the most capacious and varied observation space ever designed for a skyscraper. At the very top, 835 feet in the air, there will be an open esplanade about 30 by 50 feet, above the water reservoir for the building. This will offer an unobstructed view of lower Manhattan. The esplanade will have a 3-foot railing.

Twenty feet below there will be an open terrace about seventy feet wide and one hundred feet long. A terrace at the roof level will be open on three sides and the fourth side will lead into an observation gallery, which will be a shelter in windy weather. Plans are being considered for a dance floor on the roof, about seventy by a hundred feet.

PART of the 66th floor will be used as a roof cafe or club. This will be glassed in with no pillars to obscure the view.

Practically all of the office tenants above the ten-story level will look from their windows into a vista of gardens. Since the floors below this level will be filled in the main with shops, display space for national merchandisers, and the windowless, air-conditioned studios of the National Broadcasting Company, the big majority of the office workers will have roof gardens at the West or the Sunken Plaza at the East as a visual relief.

The areas of bare roofs, capped with smoke stacks and ventilators, which are seen from the windows of most skyscrapers, will be conspicuously missing. So far as this building creation is concerned, the opprobrious term "chimney-pots" will have lost its meaning.

"We are lifting New York up into the air," say the builders. "Instead of thinking primarily of the harassed pedestrian in the street, who is so busy elbowing his fellows and dodging taxicabs that he seldom sees above the ground floor of an office building, we are putting our most intensive efforts at beautification where they will do the most good to the greatest number of people."

The location of the buildings in the Development follow the "stagger plan," which leading city planners have been urging for years as the perfect architectural solution for the placing of skyscrapers in a modern city. The central "tower," with lower "towers" across open areas at diagonal angles, follows the mass composition of the Taj Mahal. This arrangement offers a maximum of light. There will be from 200 to 300 feet between any corner of the bigger buildings and the nearest diagonal corner of the building most closely adjacent.

APPROXIMATELY one-quarter of the space in the entire development will be used as offices, studios, and theatres by the Radio Corporation of America, the National Broadcasting Company, Radio-Keith-Orpheum Corporation, and their affiliates. The latter company will occupy practically the entire 31-story office building on the Sixth Avenue side of the block between 50th and 51st Streets.

The very heart of Radio City,—as is implied by the name of the vast development for the promotion of the entertainment and cultural arts now rising in midtown Manhattan,—will be the studios of the NBC.

With the dedication of the radio citadel still two years off, it is too soon to give a detailed picture of what those studios will be like except to say that they will surpass in extent and perfection of detail any broadcasting center ever before envisioned.

O. B. Hanson, manager of Plant Op-

SOCONYLAND SKETCH

The TENT SHOW

From an NBC Broadcast

By CARLTON *and* MANLEY

EXCITEMENT comes rare enough in .Snow Village an' there ain't been nothin' thet's stirred the town up like it was when Hoaker and Huntley's big tent show played Uncle Tom's Cabin up there last May.

'Twant the show that het things up so much as it was the way Uncle Dan'l Dickey hornswoggled Hirum Neville—but guess I'm getting ahead of my story. There ain't nothin' so pervokin' to a New Englander as to have a next door neighbor dicker ye out o' somethin' ye think ye got closed in yer hand. An' the wust of it was Neville kinda figgered he had Uncle Dan'l beat from the start.

Dan'l was so tarnation mad when he hitched his chair up to the supper table he spilled gravy all around his plate on the red and white checkered table cloth Hattie an' little Margie had spread before puttin' on the vittles.

Margie was teasin' him an' he got plumb exasperated.

"Now you quit pesterin' me, Margie —" he dropped his fork on the floor, an' stopped to pick it up. Then he banged his fist down on the table—"I said NO, ain't I; an' you heard me didn't ye? Now it ain't goin' to do no good to keep on teasin' cause I ain't goin to—"

"Dan'l I kin't see why you wunt let the young 'un go. It only costs fifty cents," Hattie argued. An' she gave Margie a nudge with her knee under the table.

"No, no, no—" The fork fell off on the floor agin as Dan'l pounded the edge of the table with both fists.

"Bu-but I've never seen Uncle Tom's Cabin," pleaded the girl as two tears began to roll down either cheek.

"Stop snifflin'! It ain't nothin' I seen it once—thuty year ago. All I got for my money was settin' there watchin' a mangy dog thet they called a bloodhound scratch etself fer fleas. An' then some sharper in the crowd snook my watch an' four dollars. There ain't nothin' in et. Pass the pickles, an' don't say nothin' more about et."

"Everybody's goin' in Show Village but us—" urged Margie.

"Whut of it? It's jest a waste of money. Anyway, them actors should have come to me as select-man afore they went plast'rin' all the barns in the township!"

Margie began to cry an' got up from the table. There was a slight softening in the wrinkles at Dan'l's eyes.

"Where's their tent goin' up?" he asked.

"I think et's over in Neville's back pasture by the bridge," said Hattie as she began scrapin' Margie's plate on her own.

"WHY in tarnation they go'n pick out thet place—off'n the road 'n all swampy 'n alive with mosquitoes?" Dan'l bit the end off a toothpick and nibbled it between his teeth.

Hattie continued to clear up the dishes while Dan'l relieved his mind.

"'N I got the best—the best place in town. I s'pose they think Neville's runnin' this here town. They seem to forgit I'm alive. Jest wait. We'll see ef they're goin' to run me off'n the ditch—"

You see how Dan'l felt, cal'latin' he was sort of leadin' citizen of Snow Village. So Hattie lit into him 'bout bein' mean an' cussed.

When Hattie finally let it out as how she heard from Pearl at the store that Neville not only got four dollars rent for the pasture but had also got two dollars for haulin from the depot Dan was pacin' back 'n forth across th floor.

"Well I'm village clerk an' they ain got permission from me to put on th show. If I re'lect there was some song 'tween the acts 'twant decent for ou wimmen folks to hear."

Now anybody knowin' Dan'l wouldn say 'twas anythin' 'bout the morals the was a-worryin' him. It was the money Finally, like he biled over, he grabbe up his hat 'n went out.

Guess it must've been about five min utes an' a rap came to the door ar Hattie seen a stranger there. She aske him in an' lo 'n behold it was thet Mr Hoaker the head of the show himself He was a slick lookin' feller like mos of these show people are. An' he say he come to talk to Dan'l. Margie ru out to the barn. But Dan'l wunt in n hurry. He figgered the man was peddler. When he come in he says ab rupt like:

"No sir, my kidneys are all right Don't want no pills, nor reversible cell loyd collars. Don't want no book needles nor pins. Glad ye called. Goo day, sir."

It took quite a spell for Dan'l to reall believe who Hoaker was. Then Hoake told him he wanted to rent a lot fo his show in Dan'l's place.

"Thought ye was goin' to be over a Neville's?"

"Unfortunately, Mr. Neville and can't agree."

"I'm not surprised 'bout thet any."

"I won't pay any $6.50."

"Why the old skinflint! What ca you pay?"

"How about ten passes to the show?

"Guess not. Money is the best passe at the store."

Well, Dan'l finally agreed to hat the show over from Hi Neville's plac for four dollars. They shook hand and Mr. Hoaker went away. But h wunt hardly out o' sight when Nevill come along an' wanted to talk busines to Dan'l. He was whittlin' a piece o ol' clothes pin.

"Hev these show people been up here o see you 'bout gettin' permission?" ie asked.

"Oh, I dunno—why do ye ask?" asks)an'l holdin' down a chuckle.

"Well I think we ought to keep 'em)ut," says Neville. "They're just a hievin' lot. An' I ain't so sure 'bout heir morals neither. Wunt do the town 10 good."

Dan'l said he wouldn't jedge the show till he seen it. An' while Neville was antin' along 'bout shows who should come bouncin' in but this feller Hoaker gin'! Of course he let the cat out the)ag right away an' Neville was mad-der'n hops.

You see the shoe was on the other foot now. So Dan'l was answerin' his own arguments on the other side from Hirum Neville an' Hirum stomped away swearin' he'd prevent the show from ever goin' on in Snow Village. But all the while he was threatenin' you could hear 'em drivin' stakes and hammerin' the stage together before they had the tent moved from Neville's on the other side.

It didn't take Dan'l long to get the heavy stuff moved. Just as he was rollin 'out the last bundle of canvas from the tail of the wagon he heard a woman sobbin' an' moanin'. Then Hoaker came over all excitement.

"Oh Mr. Dickey!" he wailed. "Reginald's dead."

"Dead! Well, goodness me, wa—was et an accident or sudden?"

"Not exactly unexpected. But he was part of our big act. Reginald was the blood-hound that chased 'Liza over the ice."

"Well ain't thet too bad! Looks like you'll have to get another dog. Don't s'pose a cow'd do you any good?"

"This is serious, Mr. Dickey. We got to get a dog some way."

"Humm-um. Got an idee mebbe I kin help yu."

"You've got to help us. The tickets are going like hot cakes. We got to give the show but we can't get along at all without a blood-hound to chase 'Liza."

So there was Dan'l with his four dollars dependin' on the show, an Ol' Neville up to mischief to stop it, an' he had to go an' get a dog yet. But leave it to Dan'l in a fix like that. Besides he was just gettin' out from takin' one lickin' an' he wunt goin' to take another. The only dog he could think of thet would do at all was ol' Mose belongin' to Neville. So 'long 'bout four o'clock he goes strollin' casual like over to Neville's house an' calls out to him quite regretful for hard words spoken.

"Neville," he says, hangin' his head, "I think mebbe you're right about them people I've let onto my land. I should have took your advice. I've got a lot of stuff layin' around loose an' it would be easy for a prowler—what I'm gettin' at is I'd like to borry your dog, Mose, to watch the premises."

"Heh! Heh! So you've changed your tune, but ain't no need to worry I'll hev 'em all out of town 'fore it gits very dark." Neville swelled his chest with pride and self confidence.

"All right, all right, we'll let that pass," said Dan'l. "But they're on there now an' I was thinkin' mebbe ef I had that mutt of yours to yip out when he seen anybody comin' round they wouldn't bother much."

"No, sir." Neville stuck up his nose

Dan'l, Hattie and Margie in their Snow Village home

"If You're Fat and Healthy, Stay Healthy"

says

KATE *Smith*

By HILDA COLE

MEET a very unusual young woman called Kate Smith. There are as many sides to her character as there are lights in prisms. There is the Kate Smith who beguiles her radio audience with Swanee music and wistful memory songs; there is the stout person with the merry laugh and hearty voice who casts a solemn spell over the cynical Broadway audience, dealing them laughter and tears; then there is an affectionate, half-motherly individual who finds time midst the delirium of theatrical appearances, her La Palina program, and varied rehearsals, to escort bus-loads of war veterans to ball games, and sing them the songs they love.

Although she has been on the stage since babyhood and pinafores, this girl has never deemed it necessary to practice "girth control," and has spent all of twenty-three years making that old adage about "nobody loves a fat girl" look like two cents. She has her own ideas on the subject. If you're healthy the way you are, you might just as well remain that way. She is bubbling over with good spirits and has a gay and grand sense of humor.

"Hello everybody, this is Kate Smith," is her La Palina greeting over the Columbia Broadcasting System, and immediately that diabolically cold microphone becomes alive, and over the ether travels something unusually warm and friendly.

Her career has been a triumphant succession of appearances. Since childhood she has been the possessor of a rich voice, which became truer and lovelier as she grew up from a small tomboy in Washington to one of the stars of *Honeymoon Lane* and *Flying High*. Back in the days when she was a child prodigy in socks at benefits in the District of Columbia, she coaxed compliments out of Nicholas Longworth. And of course you remember her last Broadway success, *Flying High*—the big girl with the grand voice and exaggerated dimensions who sang *Without Love* and had them all applauding for encores?

Late this summer Kate made a personal appearance at the Ambassador, Atlantic City. *Please Don't Talk About Me When I'm Gone*, she sang, jigging and jazzing about. But they did. After it was all over Kate sat down with some friends, and jubilantly ordered a chocolate parfait. The waiter, no doubt a bit flustered, spilled it all over her dress. She accepted his abject apologies quite cheerfully, "but" she added, shaking her finger at him, "I will have my sweet revenge." And forthwith ordered four more parfaits on the house.

KATE buys chiffon by the bolt, wears her hair in a simple, straight bob, and is just immense. She lives in a cozy, homelike apartment on Park Avenue with a stucco balcony where she harbors a few of her beloved plants. Inside there is a living room with a grand piano, of course, and a radio. Her favorite colors are lavender and green, and these are manifest in the Chinese rugs, and in the drapery. There is a comfortable, deep easy chair in which she occasionally re laxes, and a desk which is perpetuall cluttered with fan mail. Her two par rots, Ben and Al, sit gravely in thei gilded cages, bursting out frequentl into Kate's familiar songs, and neve failing to accompany her as she sing about the house. Whenever she come into the room they greet her cheerfull in their parrot voices, "Hello baby. And when she is away, broadcastin from the CBS studios, they listen i and squawk parrot harmony when the hear *When the Moon Comes Over th Mountain*—which particular song tho birds have down pat.

"This song," smiles Kate, "will be dedicated to the boys at the Speedway Hospital in Chicago."

Kate is a whale of a cook and ca concoct culinary delicacies that—wel just look at her. She inherited the re secret of Southern cooking, the formul of which seems never to have bee efficiently put in words. Ask her ho she makes one of her special pala teasers, and she'll vaguely answer- "Oh, I put a little of this into it—ar stir in a little bit of that—Really, can't tell you just *how* I do it!"

Kate has a snappy roadster and lik to go FAST. Out driving in one her Barney Oldfield moods, she wer zipping down a hill too fast to be lav abiding. A red-faced, irate, and puffi policeman eventually greeted her. H took all the joy out of the atmosphe with one baleful glower. Kate wilte but not visibly.

"WELL, Well, Well roared the policeman according to fo mula, "Where do you think you' goin'—HUH?"

What could our Katie say?

He exhausted all her alibis efficientl Kate shook her head.

"WELL, this is JUST ONE TIM you're not going to get away with young lady!"

Kate desperately began to hu *Mother Machree*. She noticed a slig response around the corners of h mouth.

Singing for vets at Brooklyn Naval hospital.—N. Y.

Born in Virginia She Grew up in Heart of Nation at Washington . . . Now a BIG Radio Success

"Say," said the officer of the law, "are you Irish?"

Kate pleaded not guilty on the charge of being Irish.

"Well, if you aren't you ought to be," he assured her, "singing *Mother Machree* that way."

Kate smiled up at him pepsodently. The ticket was only half-written. He never finished it.

And Kate's present life is like zipping down a hill. Precipitate.

"Don't you believe that all of it is fun," she admonishes. "Because it isn't. I won't forget this summer for a long time—coming onto an icy stage from a hot dressing room, and having a stiff neck by the time I got off again."

However, Kate is far from resigning. She loves her work, and, if one may count on fan mail, and wild applause she probably will, like Tennyson's brook, just go on forever.

And now let's go back to a small town in Virginia, "Greenville"—"Down in God's country" as the Johnnyrebs will tell you, where Kate first drew breath of life. As a matter of fact, the lady has no definite recollection of Greenville, for the family moved to Washington when she was very small, and it is around her home there that her earliest memories are centered. This chubby, vital piece of humanity known as "Katherine" (Kate to *you*, Mister) was the second daughter of the Smith family. Of the two Smith sisters, Helene was always the studious one. Books were her life, and her reason for existing. With Kate it was always the theatre. Consequently there evolved quite a span between them.

At the age of seven, our Katie was monarch of a small gang of boys near her Washington home. She reminisces, with a giggle in her throat, "We had a club called the Midnight Riders. Goodness only knows why, because we were put to bed at eight o'clock. I was the president, the secretary, the treasurer, and the initiator. Whenever a new member was brought into our club I'd drag him out to the clubhouse in the back yard, sterilize a pin, jab it in his thumb and put his thumb-prints in blood at the top of our law book."

There was a large pear tree in Kate's back yard. The small villain, having always had a desire to slip away, would drag a rustic chair into the tree and sit by herself, quite unperturbed. (Oh—that tree-sitting impulse). Her family would search diligently for her, and the air would be rent with cries for "Katherine," but her refuge was quite intact. They never guessed where it was, and she was safe with her dreams.

THE family had definite ambitions for Kate. There were many doctors in the Smith family, and they wanted her to follow up the profession by becoming a nurse. Little Kate wanted to be an actress. However, since it was not a question to be decided immediately, they all supposed she would grow out of it. You know how families are.

The first day Kate was led to school and put at her desk, she ran away four times. Each time she vanished, she was led persuasively back by her mother, planted at the desk, and told to be a good girl. They finally decoyed her with some caramel candy and she became resigned to her fate. But she always played hookey whenever there was a chance. Kate was a tease, and a born cut-up and she vows to this day that the only reason the teachers ever let her through was out of kind-heartedness.

KATE SMITH thinks people who seem over-blessed with adipose tissue make a regrettable mistake in trying to get rid of it, provided they also have good health. She eats whatever and whenever she pleases and doesn't give a hoot. Furthermore she can cook the things she likes best herself. There is danger, however, that she may get thin from running back and forth between studios, theatres and her Good Samaritan visits to the hospitals. Next month we will tell you something more about her

"There was a girl at school," Kate told us, "who had two long braids of hair, and she used to tease me by throwing them over my desk so that they would get in my way. One day I got mad as a hatter, fastened her braids between the desks, and when she leaned forward again there was a terrific yank. The little girl let out a yell that sounded like the finish of a Sioux massacre! And who do you suppose graced the school-room after hours? Why, Miss Kate Smith. In person."

She laughed spontaneously.

"I used to shock everybody," she went on, "by riding around to fires on the fire-engines. The chief was an old pal of mine. Mother couldn't break me of the habit. I just grew out of it."

"And then," she continued breathlessly, "we all had skate trucks."

"What?"

"Skate trucks," replied Kate in amazement, "don't you know what they are? Where were you brought up—anyway? Why, you make them out of skates and soap-boxes and *are they speedy!*"

Yeah. They must have been.

"I had every kind of pet imaginable," Kate went on, "rabbits, guinea-pigs, chickens, pigeons, dogs—cats. The family finally renigued because I insisted on keeping all the babies. Father had to get rid of them. Our yard looked like a branch of the S. P. C. A."

Kate, for some obscure reason or another, was very fond of running away. On one occasion, while she was hiding from "the kids," she took refuge in a Standard Oil truck and, as she was about to creep out again, discovered that she had been locked in.

(Concluded in the November issue)

Lucky Bing!

By Aline Nelson

When the Good Breaks Came for Young Crosby he Was Set to Go

WHAT is luck? How does a man get ahead in life? What mysterious fate seems to rule that one fellow will get all the breaks while the other fellow gets all the bumps?

Of course you may see this happen: A chap thinks he has the stuff in him, works hard, tries to deliver and flops. Maybe he will get along a little way, and just as the world begins to look sort of rosy, wham! And the whole works go upside down again.

Take for instance a couple of young fellows who answered the beckon of the golden finger from New York. They burned up the road all the way from the Pacific Coast together—now they are getting their pockets full, and living the life of Riley.

You know who I mean—Bing Crosby is one of them. Now Bing isn't much different so far as talent and ability are concerned than he was a year ago. But how many of you readers had ever heard of him then? Not many. I never even heard the name. Today you hear people talking about him and his great baritone voice everywhere you go. Why he seems to have blossomed out just over night.

Where do you suppose he would be now if William S. Paley, that smart young president of the Columbia Broadcasting System, had not just happened to be near a certain stateroom two days out on the S. S. Bremen when the person in the stateroom just happened to put on a record Bing had made some time ago? And suppose it hadn't just happened to be that particular song, *I Surrender, Dear?* See what I mean?

Bing had made hundreds of other records—good ones too. But there was Paley *in the middle of the Atlantic* outside that stateroom door hearing that particular record and Bing was off in California probably lolling away a hot afternoon in some shady spot without the slightest glimmer of an idea he was getting a swell audition from the president of the CBS.

Now it would have to be Paley the man who knows what he wants pronto and goes after it even prontoer. Some of these big fellows would say, "That's a darn fine voice and I'll have to hunt the chap up when I get back home." Then they would forget it and that would be the end of it. But Bing got another one of those fine breaks when Paley promptly goes to the wireless and tells his office in New York to hunt up this man Crosby who sang *I Surrender Dear.*

SO Bing gets a big surprise out in California. Would he go to New York to broadcast nightly on a nation-wide chain at a fat salary? Listen in at one of these CBS stations any night at 11 o'clock and let Bing tell you himself that he did.

But the point is, Bing was good all the time before this happened. Who knows but Paley might start out across the ocean tomorrow or next day and pick up another voice from a phonograph record—some crackerjack good singer who never got the right kind of a break?

Now don't get the idea Bing has always had things break for him that way. The truth is Bing feels inside himself he is just about the same as he always was.

He's always lived West—born in Tacoma May 2, 1904. He's quite well known up and down the Pacific coast where he has been in and out with different outfits where a voice and a good trap drummer were needed. He got the name Bing when he was a little shaver playing cowboy at battle with the Indians. "Bing! Bing!" Even then his voice leaped out over that of his companions and they commenced calling him Bing.

See Art Portrait of Bing Crosby in Roto Section

His parents moved to Spokane where he finished his grammar grades. He went to high school in Seattle and later went to Gonzaga College. He was active in all athletics although too light for the first football team. He discovered he had a good voice and he liked to sing.

He had made up his mind that law was the right profession for him to follow. But making a living while he attended college was rather precarious. Besides that he didn't get time enough to sing. And finally it occurred to him that some people actually make a good living from their vocal ability.

There was another chap in the school who thought along the same line. His name was Al Rinker. The two of them put their heads and talents together and organized a seven-piece dance orchestra. Bing played the traps and sang with Rinker. They became very popular and had plenty to do filling engagements at all the hops and fraternity dances.

Before they could get around to it to graduate they signed up to appear at the Clemmer theatre. And that put an end to the book grind. From then on they were to be professional musicians. From Seattle they went directly to Los Angeles. Al took Bing to the home of his sister, Mildred Bailey, who was then singing at a night club but who since has become famous by singing with Paul Whiteman's band. Mildred was enthusiastic and secured an engagement for them at the Tent Cafe, which was owned and operated by Mike Lyman brother of Abe Lyman who has distinguished himself as an orchestra leader on the Columbia chain and in theatres everywhere.

You see how the breaks were coming for Bing. He had to do it. Sup

Irene Taylor

GO AHEAD, bring
on your blondes. And
then meet Miss Taylor of
WENR, Chicago. Either
somebody lied or you're
no gentleman. Certainly
such dark-eyed beauty
must be a supreme pref-
erence. Irene has a soft
beguiling voice and you
hear her on many of the
programs that emanate
from this popular station
through the NBC studios
in the City-by-the-Lake.

Juilia Sanderson

(Right)

OH WHAT luxurious loveliness! Here you see the glorious Julia in the morning splendor of the garden of her home, Dunrovin, near Springfield, Mass. Miss Sanderson is not entered in the Queen tournament. She has a little kingdom all her own. Besides what station could claim her exclusively? Miss Sanderson, teamed with her husband, Frank Crummit, is heard on programs from both of the leading chain stations—and that's a rare distinction in itself! "Yoo-hooo!" That's Frank calling. She'll have to get up now and hurry away to New York to entertain you on her next program.

Harriet Lee

LET'S turn the spot on Harriet Lee for a minute, even if she is not entered in the race for regal honors. Remember when we had her on a Radio Digest cover? She's been getting prettier every day since. That's the smile she sends out over the television waves at W2XAB, and of course you hear her sing over WABC and the CBS system.

Katherine Krug

BEING a charming and talented actress and the wife of one of America's most brilliant dramatic critics is the true life role of Miss Krug, who in private life is Mrs. Ashton Stevens. One may wonder if she paraphrases the familiar bromide about the severest critic. She is considered one of the leading lights of the Goodman theatre, and is now heard over an NBC network in the Miniature Theatre productions from the Chicago studios.

Vicki Johnson

BLONDE beauty is perhaps more in evidence in the vicinity of the Twin Cities of St. Paul and Minneapolis than in any other part of the country. So here comes Vicki as a Princess from the North, representing KSTP. She still is very young and who can tell but eventually her soprano voice may bring her the crown of a Jenny Lind. Keep your eye on Vicki—likewise an attentive ear. She'll make the name of Johnson famous.

Jane Green

Rayhuff-Richter Photo

ALMOST like a fluffy little sprite is this fair maiden who is known for her beauty from London, England, to San Francisco, where she is now on the studio staff of KFRC. She was formerly with the Ziegfeld and the Greenwich Village Follies. Besides looking pretty Miss Green sings, and there's a come-hither in the blue coloring of her voice.

Aileen Clarl

(Right)

FEW indeed are the amb tious radio artists who achiev instantaneous success. Mis Clark stands as one preemine example of those very few She applied and was grante an audition. Within 24 hou she was put on a progra When she had finished the offic was flooded with calls—30 of them—everybody wantin to know who, how and where come the new wonder voice A representative of the Clu Valspar Variety program, listen ing in, at once negotiated an closed a deal to make Mis Clark a part of their progra over the NBC network.

Audrey Farncroft

(Right)

ONLY 22 and taking the part of Musetta in La Boheme just as you see her in the picture on the opposite page. Carl T. Nunan who speaks for KPO says in a note attached to the picture, "Miss Farncroft is one of the finest and most beautiful singers we have ever had on the Pacific Coast, and I can back this up with the words of the critics." The picture says more than any of the critics, Carl, and the mere fact that she has sung leading roles in many of the great operas in famous companies should convice anyone that her voice is exceptional. You may have heard her last season as Oscar in The Masked Ball, or Gilda in Rigoletto. Following her triumphs with the Pacific Opera Company she was engaged by the San Francisco Opera Company, and that was where she scored as Musetta. Her latest success was in the role of Lucia in Lucia de Lamermoor. KPO listeners know her best as the featured artist in The Bostonians of the Air. Thursday nights she is heard in a special concert of Grand Opera selections.

Olive Palmer

(Left)

CHARACTER, integrity and a certain amount of dignity are written into the voice and radio personality of Olive Palmer. She lives simply and never fails to costume herself becomingly. Clothes influence her mood and in preparing for her regular Wednesday night program she plans her gown for the occasion. She shuns the fast night life, riotous dinner parties and unholy hours. She demands the sleep necessary to keep her alert and in good health—and she gets it. Mr. Mark A. Stevens tells you more about Miss Palmer in another part of this issue. But you must admit she well deserves a place in this Revue of radio beauties. Right? Right!

Mr. and Mrs.

(Right)

NOBODY needs to tell you who those two happy souls are over on the next page. Could anyone appear more serenely happy than this very joyous looking bridegroom—the one and only Rudy Vallee? They did not look so happy the day this picture was given to Radio Digest, for it was a day of parting. The bride took a train for California. Many weeks of separation were in prospect before they were to meet and be happily united once again.

Bing Crosby

RELAXING from business worries and leaning back in a deck chair for a care-free journey across the Atlantic William S. Paley, president of the CBS was about to take a nap when he heard someone singing "I Surrender Dear." A great voice, he thought. Who was broadcasting? He investigated and found that a fellow passenger was playing a record by Bing Crosby. Mr. Paley promptly communicated with his office to look up this man Crosby. Bing was discovered in California. But he is in New York now and singing nightly over the CBS.

The Valentino of Song

By EDWARD THORNTON INGLE

"ONE—two—three—four! One—two—three—four! Ach! You must learn to play it so! Or, you will never be the great violinist. Now—play! One—two—three—four—"

It is a long jump from the stuffy parlor of a little house in Calistoga, California, where a pale, dark-eyed boy underwent the ordeal of a weekly violin lesson under the guidance of a squat, floor-pacing, Teutonic teacher, to the glamorous role of newest singing sensation with the National Broadcasting Company in New York.

It was always so in those boyhood days! The slender youth frozen to his task—the teacher walking, walking! The boy dared not relax even for a moment lest he bring down the wrath of his master. When aroused by some heinous mistake, John Czech would raise his hands above his head and wring them in a tempest of rage. The boy would then bite his lips, lean limply on one foot and then on the other until the outburst subsided. And as the boy took up his bow the pacing began again . . . and the voice resumed. . . "One—two—three—four—" until one hour, sometimes two and sometimes three had gone by.

John Czech, no matter how much he thundered, never dismissed this pupil after the usual half-hour of drilling. This boy—Russell Columbo—was the apple of his eye. Secretly he was convinced the lad had talent, real talent—genius perhaps. He would see. It was enough now to make him work very hard.

At the Columbo home on the outskirts of the village, where there were twelve children, Czech often stopped. He would lean over the picket fence and talk earnestly with Russell's mother.

WHEN Russell Columbo was trying to get his start as a boy he was fortunate enough to acquire the friendship of the late Rudolph Valentino. He idealized this great hero of the screen so much his friends declared he had come to look like Valentino. Judge for yourself from the picture on the opposite page. Columbo has now become a singing and playing hero of the air for the National Broadcasting Company.

The conversation inevitably ran something like this:

"Good-day Mrs. Columbo. You always are so busy, yes? Vell, I think it would be fine if you would let me have dot boy Russell. P-s-s-t! He vill be a great violinist already yet! I have no boy and I vill take him to Chermany and give him the wonderful opportunity to be the vorld's greatest violinist."

"No, no! Mr. Czech. That would be too wonderful—but Russell is my baby! Remember that! I could not give him up, even to let him go back to the old country. . . You must forget it, please!"

A few days later the little scene would be reenacted and the heavy-set Czech would shrug his shoulders and amble off down the street muttering unspeakable imprecations.

RUSSELL did well. He was soon playing difficult pieces and he was only thirteen. His father had moved to the little town from San Francisco on account of his wife's health. Calistoga was drier than San Francisco, yet it was only a few miles to the north.

One day a wonderful thing happened. Russell read in a San Francisco newspaper that the Imperial Theater in San Francisco needed violinists. He got permission from his father to apply. Nicholas, the father, had been a musician in his native Naples. Not only that, he had had his own orchestra when he was twenty. How could he refuse the boy! He still played the guitar divinely. Therefore he'd go along to 'Frisco.

Russell got a job. It was vacation time and he appeared in a fantastic production called "The Land of Make Believe." He even played in the prologue as violin soloist. Later he was playing at the Granada Theater, where Paul Ash was first introduced, when a dreadful thing happened to him. He fell in love!

He was only fourteen, but the girl, a lithe-limbed blonde dancer at the Granada dazzled him. And whenever his dark eyes fell upon her as she whirled before the footlights in the climax of her act he experienced a strange commotion within his chest. Yet, during that whole summer he never dared tell anyone. So, it was no wonder that on the day his father took him back to school at Calistoga his head was so full

(Continued on page 91)

Tuneful Topics

By RUDY VALLEE

Sweet and Lovely

MOST of the popular songs today seem to run in the same vein. There was a time when "nutty" songs and topical songs occupied at least 35 per cent of song production each month. Possibly the fault, if one could call it that, for the trend toward the romantic lyric and the sweet melody, can be laid at my own door. Most song-writers, when trying to impress me today with the fact that they have written a new song which I should broadcast, try to impress upon me that it is a "Vallee type" of song, a song they feel was written especially for me.

Frankly, I am looking for songs which are great songs, whether they fit me or not, songs such as *When Yuba Does the Rumba on the Tuba*, and *Sing Something Simple*. A hundred percentage of sameness is bound to become monotonous, and we must have songs which are not romantic and sweet in thought and melody. Frankly, that is what I am looking for these days—songs with an original idea, with a thought that is radically new and different.

Monte Segal, who wrote *When the Pussy Willow Whispers to the Catnips*, is perhaps the only dyed-in-the-wool song-writer who is constantly pestering me with crazy ideas for songs. He has songs about firemen, about bull frogs, about prohibition, and everything that might be made into a humorous or "nut" song.

Byron Gay, with whom I am collaborating on several songs, is also an originator of funny ideas for songs, and I hope to have a couple of really clever ones to present the publishers in the near future.

In the meantime, this issue of "Tuneful Topics" will deal mainly with songs that are really "sweet and lovely."

Out on the Pacific Coast one of the Tobias brothers is doing well. Charlie, you remember, is most famous for *When Your Hair Has Turned to Silver*. All three brothers collaborated on *Miss You*, when I first began my Paramount engagement two years ago. Harry has been out on the coast ever since we were out there making our picture. Together with Jules LeMare, and that great orchestra leader, Gus Arnheim, he has written one of the oddest songs of the day, a song which, though not lyrically outstanding is melodically so; one of the most difficult songs to sing, due to the quaintness of its tonality, the sudden changing of the key, and the general construction of the piece. It makes a lovely broadcasting tune, one whose melody steals hauntingly over the radio, especially at night.

It has been my pleasure to be driving from Newark to the Pennsylvania Roof in a car equipped with a radio, and no

melody has sounded any sweeter than *Sweet and Lovely*, even when played by some of the most mediocre of bands.

We take about a minute and ten seconds for the chorus, and it is published by Robbins Music, Inc.

Blues In My Heart

IRVING MILLS who, with his brother Jack Mills, constitute the firm of Mills Music, Inc., has to his credit the booking of more successful orchestras than any other music publisher today. Irving was responsible for my first Victor recording test, of which nothing came. The fact that my first test did not convince the Victor people that I was good recording material was no fault of Irving's; politics was involved, and it remained for us at a later date to begin our Victor contract, but I have never forgotten the very fine and dignified way Irving Mills, together with Jimmy McHugh, arranged for Cliff Burwell and me to take a Victor test on *Sweet Lorraine*, and *Georgie Porgy*.

Irving has been a collaborator on several popular hits, *Minnie the Moocher* one of the most recent, but none of them are more lovely than this one, *Blues in My Heart*. I imagine that Duke Ellington, who is Mills' greatest protege, can more than do justice to this type of number, as it resembles, in a great many aspects, Duke's lovely composition *Mood Indigo*.

We play it at about one minute to the chorus, and it is published by Mills Music.

If I Didn't Have You

DIMINUTIVE, cultured, quiet, unobtrusive, but very clever, Milton Ager comes forth with a lovely melody to which E. Y. Harburg has coupled a lovely lyric. I have never met Harburg, though he and Ager are doing fine things together. From their pens have come *It Looks Like Rain* and some very clever songs, none more delightful to listen to than this one, which had a feature place on our Thursday program last week.

We take about one minute and five seconds for a chorus, and it is published by Ager, Yellen and Bornstein.

I Apologize

IN KEEPING with the original type of title to catch the eye, is a new one, authored by Al Hoffman, Al Goodheart, and Ed Nelson. It was my good fortune the other night to meet young Goodheart, who seems to be one of our newest and most promising song writers.

We are doing the song this Thursday for the first time, and although the song is in the rhythm and vein of many others of its type, it is a mighty good song, and one of the best things of which the firm of DeSylva, Brown and Henderson can boast at the present moment.

We play it at about one minute and ten seconds to the chorus.

Goodnight Sweetheart

I REALLY should have started "Tuneful Topics" with *Goodnight Sweetheart*, not because of my own contribution to it, but because I sin-

cerely feel it is going to be one of our outstanding popular songs of the fall season.

Fresh from London, where it was the most popular song at Buckingham Palace during the days of spring court spectacles, requested by both the King and Queen at command performances, and at great functions, the craze of the entire city of London, the song bids fair to duplicate that success here, though whether the White House will request it is another matter.

It has fallen to my happy lot to write the American version of the song and present it. Even though our English cousins write in the same spirit as does Tin Pan Alley, there are slight differences, especially in lyric writing, and melodic structure, too, which generally result in an American version. Ever since this task was allotted to me I have felt that this would be the ideal song for my final signature at the Pennsylvania Grill for the coming winter season. We are going into the Grill on October 1st, and although I had hoped to begin an initial broadcast with that song on that evening, there have been so many requests by American orchestra leaders who have heard the song in one way or another, or who have been requested to play it by Americans returning from abroad, that the firm of Robbins, Inc., who are the lucky disbursers of the song, have requested me to present it for the first time on any radio program, earlier than I had first intended. It will be a pleasure for me to do so, as few songs have intrigued me to the extent that *Goodnight Sweetheart* has done.

We will play it at about one minute to the chorus. By the time this article appears the song should be well on its way to hitdom.

Kiss Me Goodnight But Not Goodbye

GOOD waltzes are scarcer than hens' teeth, and believe me I am serious when I say this. I feel that a radio program, especially of an hour's duration, should have as a lovely contrast from the strict tempo of 4/4 or 2/4, the lovely swing of 3/4; that is why our radio programs always have at least one waltz.

Sam Fox personally wrote me asking me to introduce this song for the first time on the evening the picture in which the song is featured was to see its premier in Chicago. A new Gaynor-Farrell picture, *Merely Mary Ann*, has as its theme song this lovely waltz written by Jules Furthman and James F. Hanley. Hanley will be remembered as the composer of *Little White House In the Lane, Just a Cottage Small, I'm In the Market for You*, and too many other hits to mention.

On the Thursday we broadcast the song, just as the celebrities were filing into the theatre in Chicago for the premier of the picture, we were playing *Kiss Me Goodnight But Not Goodbye*.

It is published by Sam Fox.

What Are You Thinking About, Baby?

SHAPIRO-BERNSTEIN sent me a song a few weeks ago which appealed to me instantly. It is rather unusual for a song to be instantly obviously catchy, as most of them require constant repetition before their attractiveness becomes apparent. "Pardon Me Pretty Baby" was another type of song whose possibilities became quite apparent to me as I glanced at the opening two phrases of the chorus.

The trio who composed *I Apologize* are also the writers of this song. Shortly after our introduction of it on the Fleischmann Hour, I was pleased to find our guest artist, Aileen Stanley, using it as one of her feature songs.

She has been a picker of hit songs for many years, and that is an encouraging sign.

The song is cute, and must absolutely be played slowly. We take about one minute and five seconds for the chorus.

ARE you saving these reviews by Rudy Vallee? They may be found only in Radio Digest from month to month. Mr. Vallee is without doubt the best authority and most able writer on his chosen theme in the United States. Whether or not you are a fan it will be well worth your while to meet and know the real human beings and the stories back of the songs that become nationally known over night. The editors of Radio Digest are proud to present to you Mr. Vallee as your guide. An excellent picture of Rudy and Mrs. Vallee appears in the roto section this month.—Editor.

"Third Little Show" Tunes

FROM the "Third Little Show," the same show that sponsors *When Yuba Does the Rumba on the Tuba*, come three or four songs, all of the same musical comedy type of vein, but extremely catchy and agreeable to listen to. While the composers of the songs are many and varied, the outstanding ones were written by Earle Crooker and Henry Sullivan, who wrote *Falling in Love;* Harold Adamson and Burton Lane, who wrote *Say the Word;* and Edward Eliscu and Ned Lehak, who wrote *You Forgot Your Gloves*. Noel Coward contributed Beatrice Lillie's comedy song, *Mad Dogs and Englishmen*.

The crowd goes out of the theatre humming or whistling *Falling in Love, You Forgot Your Gloves*, or *Say the Word*. These are all to be played brightly, though not too fast. One of the finest recordings I have ever listened to in my life is the Brunswick record of *Gloves* and *Falling In Love* by Vic Young's orchestra; the arrangements are extremely beautiful, and Frank Munn does a beautiful vocal job with Helen Rowland. The songs are published by Robbins, Inc.

Love Letters In the Sand

THE radio critic of the N. Y. Daily Mirror, Nick Kenny, has for some time aspired to a place with recognition in Tin Pan Alley. This should be comparatively easy for him as his poetry, at least in my humble opinion, is the best thing in his column!

Nick is a rough and ready sort of fellow, being an old sailor of the two-fisted, rough and tumble type. Still, from such a rough exterior comes some of the finest poetry of its kind that I have ever read; so it is quite natural that he should eventually turn to song writing, though it is quite humorous at times to see the way he plugs his own songs in his column.

His first successful song was *Laughing at Life*, but his latest, and perhaps his best, is one which he claims was inspired by my trip to Maine last summer, and my subsequent bathing in the ocean at Old Orchard Beach. Some wag reporter is credited with a story that some young lady and I sat on the beach writing love letters in the sand, where the waves washed them away. Whether or not this was true, Kenny seized upon the idea for his song, and did a very creditable job.

One hears the song a great deal on the air, due no doubt, to a desire on the part of aspiring radio artists to secure recognition from Mr. Kenny in his column of the next day, which recognition is usually forthcoming after the song has been rendered.

I can truthfully say my own rendition of the song on several occasions has been because of an appreciation of good song-writing, which opinion I would maintain even though Mr. Kenny should berate me in his column for any reason whatsoever.

The song is published by Irving Berlin, Inc.

Dream Girl of Mine

AN OLD friend of mine, Arthur Daly by name, writer of *When Its Cotton Picking Time In Georgia* and *Gunner Jim*, who was one of my early Heigh Ho supporters, made me

GABALOGUE

By Nellie Revell

The Voice of RADIO DIGEST

Sid Grauman (left) presents Nellie Revell with a life pass to the Grauman Theatres in California. Harold B. Franklin (right).

EVERY Wednesday night at 11 o'clock Miss Revell takes her WEAF mike in hand and rattles off a good old fashioned chinfest about the great and near-great of Radio and stage circles. On this page you will read some of the things she broadcast in case you did not hear her on the NBC network.

"HOWDY, friends. Radio Digest tells us that television is no longer right around the corner . . . but is here. I hope it's brought its makeup box along because it's certainly going to be tough on some of us whose chins have found us out . . . and who have lived all our lives on the theory of eat, drink and be merry, for tomorrow we diet . . . and that these new dresses will never fit on a waist line that has past . . . (or one that has a past, either). I could think of a good theme song for television. I'd like to call it . . . 'When Television Starts to Tell.'

These big fat heart-breakers who can croon like a twenty-year-old juvenile or these gymnastic directors who tell us over the air when and how to bend, while they themselves are stretched out reading the sports news, will have to go to work now that television is here. It's all right for Dorothy Knapp, Bernardine Flynn, Ellen Jane Frohman and those raving beauties whose pictures are to be found in the television number of Radio Digest published for September. But there are those among us who still like the old-fashioned radio which helped us keep our secrets. Oh . . . and there's also a nice new picture of Amos 'n' Andy in September Radio Digest. Ain't dat somethin'?

My goodness . . . didn't it get hot last week? And I know why, too. It's because Sophie Tucker arrived back in this country after a year abroad where she's been playing in London and teaching the nobility to sing "Red Hot Mama." And I know why the sun was shining so brightly, too. It's because Ada May Weeks, our own American Pavlova, came back home after playing in London for two years. "You remember Ada May . . . star of *Lollypop, Rio Rita,* and ever so many other musical shows. And I'm sure that with the return of so many prodigals, America should feel like killing the fatted calf. Sophie just reminded me to lay off of that word . . . fatted calf. All right . . . but with Eddie Cantor, Sophie and Ada back in town, it looks like a great season. Well, I guess I had better get started telling about these announcers.

My listeners, no doubt, have observed how many of NBC's announcers are singers. Another soloist is Neel Enslen with a background of operatic and musical comedy experience. Mr. Enslen was born in Delphos, Ohio — sure, that's the name of a place and not a Greek God. And he was graduated from Ohio State University. From Ohio State he went to the University of Rochester and the Eastman School of Music. Degrees in both piano and voice were conferred on Mr. Enslen by the Bush Conservatory in Chicago.

Mr. Enslen was one of the first twelve singers selected by George Eastman for his American Opera Company. He was also schooled in dramatics by Ruben Mamoulian, now of the New York Theatre Guild. While at the University of Rochester, Mr. Enslen met Miss Beatrice Kneale. Later, Miss Kneale became famous in *My Maryland* and in December, 1929, became

s. Enslen. They live at Hempstead, g Island, in the cutest little cottage t ever saw.

HARRY RESER, direc- of the Cliquot Club Eskimos' or- stra, heard weekly on NBC, is a at stringer. No . . . I don't mean at you think I mean. What I started say was . . . Harry Reser is a mas- of string instruments. He plays the tar . . . the banjo . . . the mandolin . the violin . . . the zither . . . and harp and all with equal skill. Yes, l he can toot a Sax, too. Harry's ne town is Piqua, Ohio, and he be- his musical career at the age of 16 violinist in a movie orchestra at yton, Ohio.

guess I've told you before of the uties we have in the NBC New rk studios who serve as hostesses. I haven't . . . any visitor to the th avenue offices will. And we have e very charming women executives, . Among the prettiest is Madge cker, who has charge of the Sunday rning Children's Hour, which, by way, she originated. Miss Tucker o originated the idea for Jolly Bill l Jane, and brought Jolly Bill inke into radio. Although Madge cker is best identified with kid pro- ms, she also produced and directed first radio mystery ever broadcast. at was "The Step on the Stairs," sented five years ago.

Madge Tucker was christened Mar- et Tucker. But when she was 10 nths old, her parents decided Madge ed her better than Margaret, and dge she has been ever since. She s born in Centralia, Illinois, where father ran the biggest store in town. ss Tucker was educated at schools St. Louis, Chicago, Washington and w York. She was an actress on the itimate stage before radio snared . Her aerial debut was made in the ashington NBC studios when she d children's stories. The children ply adore Miss Tucker. One rea- , perhaps, is because she takes the n stand that children shouldn't eat nach unless they like it. And what ild does?

And now, gentle listeners. I have a l Horatio Alger story for you. One those stories about a kid who agged himself up . . . with the aid of lf a dozen orphan asylums. I'm talk- g about Jesse Crawford, marvelous ganist. He is, I believe, the best- own organist in the world. Every e who has ever been to New York s at some time or another been to the ramount Theatre. And, if so, has ard Jesse Crawford at the organ. ou know that great big organ that kes you feel so churchy as it peals forth. You feel so subdued and digni- fied when you get in the Paramount if the organ is on and you sink down in a seat expecting every minute to hear a choir break out singing . . . "Oh Promise Me" or something like that . . . and see a bride come down the aisle. And all of a sudden, Crawford starts in to play "Button Up Your Overcoat," or "Boop-boop-a-doop" or "The Pagan Love Song," knocking all the religion out of you. And then throws colored slides on the curtain and asks you to join in singing. I did . . . and now you know why I can't sing. I'm trying to follow Jesse Crawford's organ.

JESSE CRAWFORD is what is known as a coast defender . . . having been born on the Pacific coast . . . Spokane, to be exact, in 1894. His father died when Jesse was very young . . . leaving the mother impoverished. But she made a brave effort to keep the home together . . . but found Jesse quite a problem. He wouldn't stay home . . . and he wouldn't go to school. The despairing mother conspired with the nearest police captain to give young Jesse the scare of his life. She marched him over to the station. The police captain, a 270 pounder, looked as ferocious as he possibly could at this little mite of seven. He thundered at him like Ed Thorgensen announcing a fight. "Young feller," he roared, "do you want me to send you to a reform school?" Jesse looked at him more interested than frightened and said . . . "Have they got a piano there?"

The officer, an understanding man, and himself a father, realized that he had unconsciously put his finger on the cause of Jesse's insubordination. He dropped his hard-boiled veneer . . . quit woofing the child . . . and got his confidence. And learned that when Jesse was playing hookey he was always at the home of some youngster who had a piano and who would let him thump it. His mother was induced to put him in an orphanage for boys . . . where he would have the supervision of the Order of Catholic Brothers.

Jesse didn't win any scholarships there, either. One day, he went on an exploring expedition in the attic of a rumbling old edifice. It was one of those crumbling buildings with hidden stairs and an attic which no youngster had ever invaded. He found a room filled with dust-covered brass musical instruments of every sort and make . . . and Jesse was sure he was in heaven. He picked one up and tried to blow it. It worked! And he says that to this day no achievement has ever afforded the exquisite thrill that came at finding he could blow it. And at every opportunity, Jesse would steal away to the attic to practice. One day while he was blowing his little head off playing the only tune he knew . . . and that was "The Holy City," . . . he saw standing before him, one of the strictest of the Brothers.

Poor Jesse was so frightened he dropped the cornet and fully expected a good strapping for invading forbidden territory. The Brother, it seems, was a musician, or had been one. "Do you like this instrument so much, my son," he asked the almost petrified boy. "Oh, I just love it," said Jesse, as soon as he could speak. "All right, then, I'll teach you how to play it," replied the Brother.

Well, that was the beginning of Jesse's musical career . . . and he was allowed to practice daily on the cornet. A priest who was visiting from Seattle heard him and had him transferred to his school, because he would just fit in with a band which he was organizing. While there, another Brother undertook to give him lessons on a very dilapidated piano.

BUT Jesse played it . . . and loves to tell of how he used to go and peek into the big parlor of the institution . . . the parlor where they were only allowed to enter when somebody came in to visit them. He saw a baby grand piano there and how he yearned to just touch it. One time he was called in to be shown off to a visiting committee or something . . . (He doesn't know the nature of the visit) . . . and he backed away from them up to the piano and reached his hand behind him just so he could pat the leg of the piano.

One of the priests saw him. "That's no place to pat a piano," he said, and lifted him up to the keyboard. "There's where you pat a piano," he said, pointing to the keys. And Jesse patted it and he must have patted it pretty well, because there was a whispered conference among the priests . . . as Jesse kept on playing the only piece which he knew very well.

The next day, Jesse was taken away again . . . but this time to another school which was not quite an orphanage . . . but which was under the supervision of the Church . . . a Brothers' Prep School . . . where his music was given very respectful consideration.

When he was 14, he left the orphanage and went out on his own . . . and got a job delivering tea and coffee. And roomed in a house where he could have the use of a piano. Some man who roomed there realized the boy could not get much work around unless he belonged to the musicians' union. And as a Christmas present . . . he put

Broadcasting from

The Editor's Chair

Spending Money Most Wisely

RECENTLY a release of the National Broadcasting Company revealed the fact that the booking branch of this organization was responsible in the past year for spending some $10,000,000 for talent. Think of it. No movie or play has ever been produced involving talent cost at anything like this figure, despite the fabulous salaries and famous names of the screen and stage. In the case of "talent of the air," moreover, the resultant programs are FREE, whereas the public is expected to pay veritable fortunes as the price of admission to these other arenas of talent. The fact remains, however, that much of the money spent for broadcasting programs is spent without reasonable advance assurance that the offerings will be well received by the public. Audience getting formulas have been reduced to a more or less exact science in these other fields, because the answer is written in the total of paid admissions.

In the case of programs of the air, however, it is difficult for the most conscientious and lavish creators of programs, be they sponsored or sustaining, to gauge with great rapidity or great accuracy the success of this or that specific program —particularly a new program. Of course, the use of premiums, souvenirs, answers to inquiries, etc., gives an index through the fan mail received, but this process is open to wide errors, as is also the various methods of checking up public interest in specific programs by personal and telephone canvassing. The elapse of time and the introduction of new programs can change so many things so rapidly that it is extremely difficult to keep up with the changing moods and reactions of the public and the immediate popularity of a given program.

With a view to expediting and improving the determining of program popularity, the editors of Radio Digest will welcome letters from our readers relating to (1) types of programs you would like more of (2) new types of programs you would like to see introduced, (3) your suggestions as to the most effective methods by which broadcasters can check program popularity and (4) your ideas on how specific programs now on the air can be improved by certain additions or eliminations.

We will publish as many such letters as space permits. In writing us on one or more of the subjects mentioned, please bear in mind that you will not be helping Radio Digest or the broadcasters (both of whom will be duly grateful) as much as you will be helping yourself. The unique thing about Radio is that *everyone* using time on the air wants to please the public as often and in as large numbers as possible. It is, therefore, imperative that listeners express their opinions about and judgments of programs as freely and as extensively as possible. By so doing the public will assure itself of getting a maximum of what it wants and of cutting down to a minimum what it don't want—and, of course, this means that the fortunes spent on talent will be spent as nearly 100% as possible on the kind of talent that *is* most popular with the people.

Broadcasting the News

WITH the reappearance of the March of Time program Radio Digest again points out that this type of broadcasting with various modifications is going to take hold in tremendous fashion. It may sweep into a scope of far greater trend than its creator ever dreamed.

The idea may become the pivot around which will swing hostile elements of the press and the broadcasters. This is intimated in the report published on page 20 sent to us by Mr. Charles H. Gabriel, Jr., of Radio Station KNX, Hollywood, California.

We are informed that owing to an especially keen local interest in a murder trial there the station attempted to broadcast the hearing directly from the court room. Its efforts were thwarted by the judge who acted, it is claimed, under pressure and influence exerted by the press. Undismayed the broadcasters took their microphone to another room and brought in skilled actors to represent the characters in the court room. From here the action was swept instantly to the KNX 5,000 watt transmitter and out to the whole country side where thousands were anxiously waiting to hear every detail of all that transpired. Nimble fingered court reporters quickly converted the spoken words to written transcription.

Runners carried in the transcripts as fast as they were recorded and the actors spoke the actual lines of witnesses and attorneys. People who never had seen the inside of a court room were getting the thrill of real human drama. But another drama was going on behind the scenes—the drama of getting the news and purveying it. The microphone was finally ordered out of the building. But it was set up again in a nearby restaurant . . . and the report of the trial continued.

The traditional spirit of the newspaper man was there. That may have been because ex-newspaper men were at the controls of this new medium. And now KNX has announced that it will produce regularly a Newspaper of the Air with world happenings when they happen; dramatized in brief crisp action. . . "And Time marches on". . . Meanwhile also we have William Hard to cover the League of Nations meeting at Geneva for the "readers of the air."

Station Parade

Pageant of Personalities and Programs as they Appear Across the Continent for the Biggest Show on Earth

rma Glen Plays n Deserted Studios

[T IS the story of one little girl, who has an entire floor of lavish studio space to herself. She is the sole occupant of the elaborate studio uite built for WENR on the 42nd loor atop the Civic Opera Build- ng in Chicago.

Here from the south window ay be seen the 20 mile stretch f Chicago's famous boulevard ystem along the Lake. Looking est you peer down upon the Daily News Plaza across the riv- r, and from the northeast win- ows you feel the rythm of the many bridges crossing the Chi- ago River, which are elevated ith stately majesty one after the ther to admit steamers from the ake or to give them passage out. When the NBC purchased VENR, everyone and everything with the exception of Irma Glen nd the Mighty Wurlitzer Organ ere moved across the river to heir Merchandise Mart Studio. rma was asked to remain and roadcast all programs wherein he used the organ, until a new rgan was purchased for NBC or he faithful old Wurlitzer could e moved; so there she is, and we onder what haunting emotions ittle Irma Glen feels as she works lone surrounded by the lofty walls and rches, which still vibrate with the ounds of all the music they once knew.

[S SHE ever haunted with ghosts of the past, as she brushes the sleeve f memories and feels again the peek- ng touch of things that are gone? In ter reminiscing does she experience gain the thrills of debuts, children's oices, and all those living things that italize those lengthy halls? When in- errogated about these things, she sur- rises us with the reply that "she adores o be alone." She has the canaries which ou hear every day, to keep her com- pany, besides the comforting music she herself produces. She quotes that well- known phrase "it is an acknowledgment of self-deficiency to be afraid of ones own company." So much more can be accomplished when there are no inter- ruptions.

To manipulate the king of instru- ments requires not only keen judgment,

Very small appears little Miss Irma as she sits at her organ console and muses on a glory that has taken wings.

but nimble fingers, feet and brains, for the organ uses all these faculties simul- taneously. In order to keep fit, Irma Glen attributes her good health to the fact that she arises each morning at 6:30 and walks to the studio. Most of her walking is done on the grass through Lincoln Park and along the Lake front, measuring four and one- half miles by her pedometer.

Irma is at the Studio each morning at 9:30 o'clock, to rehearse and arrange her daily programs. We were surprised to learn of the great amount of re- search work necessary to produce fea- tures, such as Miss Glen's "Among the Poets," "Beautiful Thoughts," "Irma Glen's Flower Garden," "Musical Mo- ments," and last, but not least, "Air Juniors." The Air Juniors Club, which is sponsored by the Commonwealth Edison Company, consists of a mem- bership of over one hundred ten thou- sand happy girls and boys. Quite a happy family we would say.

OF COURSE, Irma misses all her comrades,—the members of the original Smith Family, the vast number of musicians and en- tertainers whom she contacted, but there may be a far-off heaven where radio artists will all meet some day.

So, when you listen to the or- gan recital sent to all corners of the globe, each morning as Irma Glen plays on the NBC network, you may picture a "lone little girl thoroughly enjoying her so-called solitude."

Oh Min, Oh Andy-- They're on WGN!

SIDNEY SMITH'S famous Gump entourage is now on the air over WGN. In spite of many obstacles that seemed to ob- struct their arrival they have at last come to life and may be heard from this powerful station of the Chicago Tribune.

First it was to have been Correll and Gosden who were to do the Gump fam- ily. But at that time neither was mar ried and, in single blessedness, they pleaded they would not know what to do if they were faced with Andy's daily domestic problems. So they turned to the blackface Sam and Henry, which preceded their present Amos 'n' Andy.

Over a hundred actors and imper- sonators were tried out during the sum- mer, while a committee composed of WGN representatives, the advertising men who will sponsor the feature and

Sidney Smith, creator of the Gumps patiently listened to the voices, waiting for the right characters to appear before the microphone. It was most difficult to cast the role of Andy Gump, because most opinions were at variance as to what the talkative gentlemen's voice should be like. One afternoon, however, Andy Gump himself appeared in the radio horn, and there was a unanimity of choice immediately expressed. Like most radio auditions, the selections of the actors and actresses for the parts were made in blindfold tests, and even to this date the committee has never seen the acts. Auditions are conducted through the microphone, with the listeners gathered before a radio horn in another studio, to make the sound illusion complete.

The Gumps, Sidney Smith's comic, is the best selling newspaper strip in the world. It appears in approximately 400 newspapers, one-fourth of them in foreign languages. Among other countries, they appear in France, Spain, Denmark, China, Canada, Mexico, Hawaii and Bermuda, in some places in the native tongue. The daily reader circulation is estimated between 25,000,000 and 30,000,000.

Like WGN's three other newspaper strips now on the air, "The Gumps" will not follow the exact trend of the story in the Tribune. The radio adaptations of the family's doings are being done by Thomas J. Foy, former newspaper reporter and cartoonist, with suggestions from Mr. Smith.

It is predicted that the Gumps on the air will become the radio audience's nightly habit, crowded as it will be with humor, sentiment and adventure. It will be the dinner hour laugh.

* * *

Eight Continuity Writers

THERE is no better example of the growth of the new profession, continuity writing for radio, than at WGN, The Tribune station on the Drake Hotel, which employes more of these experts than any other single broadcaster in America.

Most listeners are unaware of the painstaking effort and research behind the thousands of words spoken every day in announcements, narrative or dialogue.

These are contributed by the WGN continuity department, with its eight regular writers, and two who turn from their other work to produce special manuscripts, who are directly responsible for practically every word spoken from WGN. All in the day's work are complete dramatic works, comic strips, commercial and appropriate remarks for the introduction of musical piece or singer. The volume of words turned out daily is close to 15,000, with this figure increasing with special broadcasts or dramatic shows.

From this continuity department come daily all of the announcements made on WGN, as well as the manuscripts for the station's four comic strips, *Harold Teen, Little Orphan Annie, Gasoline Alley,* and *The Gumps.*

Continuity, incidentally, is a slightly misleading word borrowed by some broadcaster years ago from the movies. It means the script, or schedule which the program follows, and includes the utterances for the announcer. The continuity department also prepares the bulk of the commercial program announcements.

Two or three dramatic shows are presented by the station each week, and these are the work of the continuity department.

Since writing for the radio is recognized as a highly individualized field of work, every member of the continuity staff has received his training at WGN, though they have come from widely separated fields. Three of them turned to radio after newspaper and publicity work, another came to WGN after writing for both stage and screen, and three are only two years removed from the campus. And because radio appeals to both men and women, the department is finely balanced with four men and four women writers.

Oldest of the continuity department in years of service is Frank Dahm, who joined the staff in August, 1925. In that time he estimates that he has written a million words of continuity, narrative, dramatic skits, and special productions.

Dahm first attracted attention with his fifteen thousand word script with working directions for WGN's broadcast of *The Miracle.* In December, 1930, he began the writing and production of the radio version of Harold Gary's comic strip, *Little Orphan Annie,* which is enjoying phenomen success.

After a long period of service as writer for stage and screen, Jean Co over came to WGN from New Yo two and a half years ago. A talente dramatist, she has been responsib since that time for nearly all of t plays and dramatic episodes present from the station. Miss Conover al dramatized the popular series of stori from grand opera which the stati presented last winter and sprin WGN's continuity department boas two members who wear the coveted k of Phi Beta Kappa, honorary schola tic fraternity. They are Kay Chase a Blair Walliser, both of whom came WGN late in 1929, shortly after gra nation from Northwestern universit Miss Chase, while in school, was t editor of the campus literary magazir *The Scrawl.* A few months ago s began writing the script for one WGN's comic strips, *Uncle Walt a Skeezix.*

Blair Walliser's career parallels th of Miss Chase. He joined the staff the summer of 1929, shortly after l graduation from Northwestern, whe he was identified with the campus h morous magazine, the *Purple Parr* and *The Scrawl.* He demonstrated much success with a series of Sund afternoon concerts for children, f which he prepared special continui that he was selected to dramatize t first of the station's attempts at ada ing a newspaper comic strip to the r dio, *Harold Teen,* a year ago. Thc sands of listeners follow Blair's rac adventure of Carl Ed's character night

Mary Afflick, who turns out most f the advertising and commercial a nouncements, came to the station 1930 with a wide background of adv tising experience. She attended Wa ington University, St. Louis, special ing in journalism and advertising. T series of programs entitled *This Th Called Music,* was her work, and she at present occupied with a new set f programs, *Chicago's Yesterday.* Oth who write daily for WGN are Ha Hopkins, best known as the author the new children's program, *The Pun and Judy Symphony* probably the o juvenile program on the air employ twenty musicians.

Erna Phillips, creator of the da serial program, *Painted Dreams,* a the philosophical feature, *Ma Brown,* both of which she enacts roles hers and Thomas J. Foy, former newspa reporter and cartoonist, who is n adapting Sidney Smith's famous *Gu* for radio presentation.

Two other members of the W staff, Quin Ryan and Edward Ba write their own productions. Ba joined the staff in 1926, as a pianist a

THERE is no one who knows better what is going on around the studios than the people who are right there. The editors of Radio Digest welcome news from the station writers or authorized representatives. We like snappy personality paragraphs and the prize jelly roll for such contributions goes this month to Mr. Monroe Upton of KFRC, San Francisco. We would especially like to hear from more stations in the Central and Southern sections.

is now in the program department. It was he who dramatized the series of Chicago's history, with the stories set to original music by Alfred G. Wathall.

"Seckatary Hawkins" Gives Children Drama

THIS idea of coddling the kiddies over the air is "all wet" says they. Dramatize your stuff and they'll come back with new ones day after day.

And that is the theory upon which Robert Franc Schulkers, known as "Seckatary Hawkins" to the youngsters, has built up his juvenile audience at WLW for the past eight years.

A deep long-drawn blast of a steamboat whistle and the soft strains of *Away Down Upon the Swanee River*—each Saturday afternoon at 5 o'clock—call literally thousands of children throughout the United States and Canada to the radio and to WLW for another thrilling adventure of "Seckatary Hawkins" and his chums down on the old river bank.

For more than eight years this chubby youngster—who is as lovable as he is chubby—has been a favorite among American children and grown-ups who have followed the adventures of "Seckatary Hawkins" over WLW since 1923 and through the comics and magazine sections of the newspapers since 1918.

Robert Franc Schulkers, creator of this ever-popular juvenile character, is one of the pioneers in radio broadcasting for children and with "Seck" holds the distinction of keeping the interest of his audience over a longer period of years than any other similar radio feature.

Schulkers began writing stories for youngsters while still a youngster himself. He sold his first manuscript when but 14 years of age and has been writing for Young America ever since. His "Seckatary Hawkins" series was originated in 1918 and is based on some of his own experiences along the banks of the old Ohio, near which he spent his boyhood.

In addition to writing his "storylogues" Schulkers dramatizes them himself over WLW, impersonating each of the many characters interwoven in these inimitable tales. "In this way," says the author, "the never entirely forgotten boyhood ambition of mine to become an actor finds an outlet."

Dick Pavey, WLW announcer, has wrecked three automobiles in learning to drive—and hasn't learned yet.

WKBW Wells was There

WHEN kings are dethroned John D. Wells tells the radio audience about it over WKBW, and he tells them about the time he chatted with the king. Thirty years as a newspaperman, most of them as managing editor at one time or another of the three Buffalo papers, have given him an insight into the news of the day which takes his listeners behind the scenes.

The rich romantic quality of this singer's voice has insinuated itself into the hearts of Detroit radio audiences, men and women alike. Regina Ruth breathes melodies into the mike in such a manner that you just feel that she is curled up beside you and is crooning into your own exclusive ear. Try at the very first Tuesday that comes around on the Red Apple Club program . . . WJR . . . or over WMBC every morning.

It was Wells who met William Jennings Bryan at the station and apologized for the car he was driving. Bryan smiled and informed him that a man who had ridden the Democratic donkey had no fear of automobiles.

The great and the near great—John D. Wells knows them all. There is hardly a news story of national or international importance which he is unable to humanize with some intimate recollection.

Wells was one of the reporters who informed the world that McKinley had died. He was one of the first to greet Roosevelt, and he was a personal friend of The Colonel.

One evening he tells his listeners over WKBW of the time he helped a German prince search for a collar button under the dresser. The next night a news story of the day reminds him of his association with Mark Twain when they worked together on the city desk of the Express.

"The meanest man in the world gave his deaf mute wife a pair of mittens for Christmas." Wells breaks into his comment on the news to illustrate the point with a witticism.

Occasionally he brings news to the radio audience before the newspapers have it. The love of a "scoop" which comes with thirty years of newspaper training makes him dig out many of his own local stories and "break" them before the news agencies do.

A famous old Buffa'o hotel was closed after half a century, and Well's recollection of its palmy days brought him hundreds of letters from every part of the country. They were letters written by men who had remembered the hotel in the "old days."

Not long ago a local politician attempted to give the WKBW news commentator a "job" which would mean very little work and much remuneration. The following evening no mention was made of the interview of the previous night, but the campaign for the correction of political abuses continued.

One of the most popular suggestions was for the establishment of the Oh Hell Club which Wells formed one evening after a particularly glaring bit of political publicity had found its way into the press. The Oh Hell club now numbers among its members most of Buffalo's prominent citizens, and John D. Wells is the official and capable "debunker."

When Chic Sale wrote "The Specialist" he called on John D. Wells to write the foreword because it was in Well's home that he had first recited the piece. Celebrities in every part of the world are catalogued in his remarkably retentive memory, because Wells is something of a celebrity himself in the world of news gathering.

WFAA Musicians Tune Up Golf Clubs

DO YOU know remarkable things happen when musicians get together?

At Dallas, Texas, there is under way a golf tournament on El Tivoli Links for musicians only, and only for musicians in good stance.

The orchestra from WFAA and

others from the station staff who have to contact these persons, entered in a body. Others, from various, separated and diverse sources, entered in solo.

George Chase, General Manager of WFAA, deeply versed in music of Cornell, is one of the stars. Alexander Keese, Musical Director and Production Manager of the station, promised to shine but quickly went into total eclipse in the hazards. Like fate befell Edward Dunn of the Announcing Staff, and James Jefferies, a fellow-spieler, who are musicians by absorption and harmonics. They are "divot-ees" of the clubs.

Mr. Chase caused a brand-new ruling, when a master stroke carried the ball some 250 yards where it struck a stump in such manner as to go deeply into a hole made by rat or rabbit. There it stuck. The stump had to be dynamited to remove the ball.

Lynn B. Henson, Mechanical Supervisor of Station WFAA, has just taken up the game, but with the thoroughness with which he does everything and plenty of experiment. At one point in the game, teeing off, he smote mightily after the manner of seekers for a hole-in-one. But the ball went at almost exactly right angle from the intended line and passing between the feet of a golfer in the midst of a swing from tee, it knocked the ball from that player's tee just in time to escape his club. Both balls bounded merrily away. As it was impossible to tell which was Mr. Henson's sphere, he had it all to do over. Mr. Henson qualifies as a musician, for golf purposes, because he whistles instead of swearing, at times.

The matches are at intervals of several days and will last well into the fall.

Studio Gossip at KFRC

By Monroe Upton

MURRAY and Harris, KFRC's new harmony team, are both from Minneapolis, Minnesota and neither one is of Swedish descent. That's their first claim to fame. They attended military school together and years later met at a radio station in Los Angeles when they formed the Murray-Harris team. Since they have played in musical shows and in RKO vaudeville. They have written a great many songs.

EUGENE HAWES, who lives the character of "Pedro" for the benefit of KFRC audiences, says that he has no desire to play Hamlet, like most comedians. He believes in sticking strictly to his "knitting"—if it isn't funny he can't use it. He's always looking for a laugh.

He writes all of his own acts and someday he expects to devote all of his time and energy to writing. As regards his prejudice against work he says that he didn't invent laziness but he improved upon it.

NORMA SCHILLER, heard on the KFRC Golden State Blue Monday Jamboree lately is a Los Angeles girl. This is her first radio engagement. She has been doing a singing and dancing act in vaudeville for some time, and has also made a number of shorts in Hollywood. Paul Ash featured her in his revues in Chicago.

Walter Bunker, Jr., KFRC's chief announcer, is spending his vacation with the Bohemian Club's annual encampment at Bohemian Grove. Edna Fischer, also away, is at Packer Lake in the High Sierras. Monroe Upton is at Lake Tahoe. (This for the last part of July.)

Add to the list of things girls leave home for the KFRC Happy Go Lucky Hour. Margaret Cantrell and Minnie Robertson, with only a working capital of $2.60 between them, walked all the way from Tulsa, Oklahoma to San Francisco, according to a San Francisco paper. (The Examiner.) They stated they wanted to see the Happy Go Lucky gang at KFRC.

William H. Wright, KFRC's Question and Answer man, recently checked up his weight on one of those scales that tell your fortune on the same card that registers your weight.

Imagine the feelings of the Question and Answer man when his card read: "You have the faculty of making people come to you for advice. You have a great store of knowledge."

Nora Schiller, KFRC staff singer, played the Pantages circuit when she was eight years old. She entered a high school in San Diego when she was eleven—the youngest student ever to enter the institution.

Consternation reigned on KFRC's Feminine Fancies one day recently when a mystery play was scheduled to go on the air and Dick Rickard, who was cast for one of the parts, suddenly disappeared. The show went on as scheduled, however. Dick was discovered in an orchestra chair holding a trumpet—and grinning broadly. He said the idea of disguising himself as a trumpet player was just to get into the spirit of the play.

"You're getting a bit gray about the temples," said Edna O'Keefe, KFRC star, to her fellow artist, Pedro Gonzales recently.

"Leesten," (it was reported to the publicity department Pedro replied), "I don't care eef I am getting purple, what I don' wanna get ees barefooted on the skull."

WHILE on his vacation this year Cal Pearce of KFRC, San Francisco, promoted a golf tournament at Feather River Park. For size and interest it set a record in that part of the country. People came from Reno to participate. Jack Harris was low gross, Jack Sullivan low net. Cal was runner up. Al is an old time fisherman but Cal did his first fishing this year on Grass Lake. He'd heard so much about it he decided to give it a try. And in spite of the fact that he fell in the lake he caught his first fish and got a big thrill out of it.

KFRC's new Estey Minuet is being played by the organist who opened Roxy's famous theatre in New York City, Chauncey Haines. He is a University of Southern California boy, having played football there in 1920 and 1921. He studied music under Rudolph Friml, when that famous man was a teacher in the Los Angeles Public Schools.

Many people wonder how Meredith Willson's continual round of duties at the KFRC studios allow him any time for rest and relaxation. The versatile young musical director even returns to the studios on his day off in order to hear the weekly auditions. On a recent Friday, however, with his wife Peggy, he flew to Los Angeles to visit old friends in Hollywood he knew when he was making pictures. They flew back in time for the Sunday night Cadillac-LaSalle Concert.

Marjorie Lane Truesdale, KFRC Happy Go Lucky favorite, is 12 years old, 4 feet 2½ inches tall and weighs 68 pounds. She is in the 8th grade at Presidio Junior High School. English is her favorite subject, with typing second. Marjorie first performed at her dancing school at the age of 2½. When she was four she was doing a dancing act on West Coast Time. Her dancing is always a feature of the Happy Go Lucky appearances. She fully intends to be a movie star when she grows up.

If his father hadn't fired him, Tommy Harris, KFRC vocalist, would probably still be working in the family wholesale fruit and vegetable business. Papa Harris, however, concluded that Tommy would learn more of life by working for somebody else and so he gave him the blue envelope. Tommy

came up to KFRC for a tryout and was accepted. His first success was on the Happy Go Lucky Hour.

HARDY GIBSON, of the KFRC team of Doakes and Doakes, once had a vaudeville partner named Jimmy Wells who was very proud of his high tenor. One night Gibson slipped a new orchestration into the musicians books with a high note two tones higher than high C. Wells had to screech to make it. But he walked off the stage remarking: "Everybody in that orchestra is playing bass."

News Notes From KFOX

CONSIDERABLE interest has been aroused lately by the dance music played by Charles Gaylord and his orchestra over KFOX and the memory of many recalls Gaylord during the time he was featured with Paul Whiteman and his band and before he came to Long Beach, Calif.

A mandolin teacher came to a little town in West Virginia, offering a mandolin as a prize to the one pupil of his class who could play the best after thirty-six lessons. Charles Gaylord, then a lad of seven entered the contest and won the mandolin, which was possibly the greatest stimulation for his colorful musical career to follow.

The mandolin soon gave place to a new interest in the form of a violin. After six years study, Charles became leader of a Sunday School orchestra, an ambition realized.

At the age of seventeen Charles' parents sent him to West Virginia University to become a doctor of medicine. All thoughts of a musical career had been put aside.

During his third year in college an incident occurred that again started Charles on an unchosen musical career. A train wreck caused the delay of an orchestra engaged to play for the College Junior Prom. The guests were assembled for the much heralded evening, but no music! Charles was asked to hastily form an orchestra from some of his fraternity brothers. In less than an hour this inexperienced group of musical students were furnishing amusement not only for the dancers, but for themselves as well.

Having had so much fun on their impromptu engagement, the boys decided to stay together and play fraternity dances for the balance of the school term. The Mason-Dixon Seven, as the aggregation was named gained in popularity so quickly under the leadership of Charles Gaylord that within a year they were playing the college dances in all large colleges in the East and South, including Cornell, Yale, Harvard,

In television the radio love-scene must necessarily look like the real thing. Kisses have to be planted where they belong, instead of on the back of the hand held before the microphone—so Ann Chase and Carleton Young of the NBC National Players in San Francisco, are doing a bit of rehearsing. Ann was among the leaders in the third annual search for the most beautiful radio artist in America, being conducted by the Radio-Electrical World's Fair in New York. She and Betty Kelly, also an aspirant for the microphone's crown of beauty represent Station KGO San Francisco and Oakland, key-station of the National Broadcasting Company's Pacific network.

Princeton, Syracuse, Carnegie Tech and others.

Gaylord's orchestra soon became a sensation and its members attained individual fame. Skin Young, now a feature with Abe Lyman's Orchestra, Dillon Ober, featured with Ben Bernie, Fuzzy Knight, who later became a sensation in vaudeville, Jack Fulton, now a soloist with Paul Whiteman, all were members of the Gaylord organization. A trio, composed of Charles Gaylord, Skin Young and Jack Fulton, gained fame and were featured on Paul Whiteman's records and concert tour.

During an engagement, playing the Million Dollar Pier in Atlantic City, Gaylord's Orchestra had as a member, Ted Weems and his brother Art, the former who is now a leader in his own right. Later Gaylord and Skin Young formed a night club, Laiglon Cafe in Philadelphia and working for them at the time was Red Nichols.

While appearing with his own orchestra at the Ambassador Hotel in Atlantic City, Paul Whiteman heard Gaylord play and sing and immediately gave him a contract for six years. Gaylord remained with Whiteman until his organization had finished the picture, King of Jazz, at which time he joined several who left the Whiteman Band. Charles organized his own orchestra.

W. B. Anderson; Bob Balch, Guy Dick, Mel Mack, Gus Willy, Wes Hatter, Marvin Butler, Harold Lucas, Mil Ringdahl, Sid Greegield, Art Tynan, and Charles Gaylord all double into several unique combinations.

Tuneful Topics

(Continued from page 51)

his guest on several occasions during my stay in Atlantic City.

Arthur had been carrying for some time, in his head, an idea for a song about a dream girl. There not having been any songs of the dream girl type on the market for some time, I thought it would be a good idea if we worked on it during the hours we were able to spend together. We completed it before I returned to New York, and the following Thursday I was happy to be able to broadcast the song.

Few songs have brought as unusual a response as the first appearance "on any radio program" of *Dream Girl of Mine*. Although the melody is perilously close to many old stand-bys, though none in particular, it is a ballad which I believe fascinates the listener, especially after several renditions.

While it is not especially adapted to "dansapation" still I am hoping that the dance bands will play it. Davis, Coots & Engle appeared very enthusiastic and called up asking me if they might have the song. It reposes in their files, and I have their promise that they are going to do big things with it. For Arthur Daly's sake much more than my own, I am sincerely hoping the song does achieve some prominence, because there is nothing more delightful, after having written a hit, than to come back with another, even after several years intervene between the two writings.

Daly is one of the finest fellows that I have met in the Alley.

Just what tempo it should be played at we ourselves have not discovered, as we have not yet played it for dancing, but as a ballad, especially for three violins, "*devisi*," you will like it.

Radio City

(Continued from page 27)

eration and Engineering of the National Broadcasting Company, interviewed by a representative of Radio Digest, said that every predictable provision is being made in Radio City for probable developments in the radio field. Facilities for both sight and sound broadcasting are being so planned as to allow for forward technical steps which are almost certain to be made before the acres bounded on the North and South by 48th and 51st Streets and on the East and West by 5th Avenue and 6th Avenue have been covered by finished buildings.

"All NBC's plans for its home in Radio City are still tentative in nature," Mr. Hanson said, "but a few matters have been definitely decided upon about which I can tell you.

"To begin with, we will have the world's largest studio there. Its seating capacity will be at least 500 and perhaps considerably more than that. In general aspect this studio will resemble the present NBC Times Square studio; but will be much more elaborately equipped and lavishly decorated. The comfort of visitors to the studio will be considered as carefully as the technical problems affecting broadcasts from it.

"Another unique feature of the NBC accommodations in Radio City will be a studio, or perhaps more than one studio, to be devoted entirely to children's broadcasts. By that I mean programs in which youthful radio stars will be the participants.

"In this studio the playroom atmosphere will be created by decorations, equipment and even by the approaches to it, the idea being to make the child performers feel as much at ease as possible so they will be perfectly natural and unaffected when broadcasting. One of the special features of this studio will be an unusually varied collection of sound devices used in making sounds for which the script of a children's broadcast may call.

"Adjoining the children's studio will be a lounge in which the mothers of the juvenile stars can wait in comfort while their youngsters are on the air. There will also be playrooms for the children themselves where they can find diversion while waiting for rehearsals or for their turns before the microphone.

"Nearly every studio," he said, "will have as an adjunct a glass-enclosed sound-proof observation booth through the walls of which it will be possible for visitors to watch broadcasts in the making and at the same time hear them.

"These booths will be separated both from the studio itself and from the control room so that persons seated in them will be able to talk all they want without fear of disturbing either the performers or the engineer regulating the quality of the broadcast. None of the present NBC studios are thus equipped and it has been found, as a consequence, that monitor engineers are greatly disturbed when visitors are admitted to the control booths."

Television

(Continued from page 17)

Whether this development will do away eventually with the radio broadcaster, or at least limit his usefulness, is a matter that will be watched with great interest by all those interested in the future of the radio industry.

"The situation in London has undergone a big change within the last few days," Mr. Moseley said. "We have begun to transmit from the British Broadcasting Corporation's studios with a portable transmitter, not much bigger than a moving picture projection machine. Yesterday I received a cable from London stating that the first transmission was very successful.

"We propose to bring this new transmitter over here for demonstrations within the next few weeks. We hope to 'televise' a baseball game with this machine. The television spectators will see the players full length, and as much detail of the game as the British saw during the historic transmission this year of the English Derby at Epsom."

The Baird company, Mr. Moseley added, is prepared to share these discoveries with American interests. During the past few days he has been in touch with big banking and broadcasting interests to make the necessary arrangements. Several offers have been made for the American licensing rights, and decision will be made within the next few days as to which of these will be accepted.

Scanning

(Continued from page 18)

The Columbia Broadcasting System receives a comparatively large amount of television fan mail.

Letters come from distant cities and contain more than the average interesting material.

Most unique of all letters, was a proposal to Natalie Towers, Columbia's Miss Television. As far as known, this is the first television romance reported.

Written by an electrical engineer in Baltimore, Md., the letter pleads that the writer's name be held secret and that it be withheld from the press.

"It has been such a pleasure to not only listen to your charming voice each night, but the added delight of actually watching you put over your part of the program, has won my heart," writes the romantic youth. "I do want to know you better. If you will sing 'Lover Come Back to Me' next Sunday at 8:30 P. M., I'll wire you when I can get up to New York.

My television set has been well worth its investment just to know you. Here's hoping I shall see you in real life soon.

I don't care to be laughed at or have this publicized so will withhold all information about myself until we meet personally.

Anxiously awaiting Sunday's program, I am

Signed ————————"

Miss Towers received seven other fan letters. Most of them, however, commented on how well she came over the televisor while another said that her dancing experiment on Tuesday night was received as far away as Boston, Mass.

Radiograms from passengers aboard the S. S. Leviathan reported television reception as good when far out to sea.

O. J. Mills of Hudson Falls, New York writes that despite bad weather conditions television reception of W2XAB and W2XE was good there throughout the week.

"Your clock with the full sweep second hand has aided me greatly in keeping the time up here. We have only a small watch that often stops," he wrote.

Hollis S. Baird, of the Shortwave and television station in Boston wires "Columbia being received regularly at Cohasset with excellent detail stop some fading is usually present especially at sundown."

Other letters comment on the fact that many of the artists acquire a mustache and a beard when they faced the televisor. This, it should be explained, is caused by reflections and shadows and may be entirely eliminated by use of make-up.

Sixty per cent of the fan mail comments on the clarity of images and refers to the reception conditions, also each writer, either describes the equipment or asks questions about other television receptors.

There are others which write that they hear the sound channel but own no television set and others again with televisors and no sound receivers.

The Columbia Broadcasting System is anxious to receive reports on its experimental television programs. Its visual broadcasting is over W2XAB on 2700-2800 kilocycles (107 meters) and its sound is over W2XE on 6120 kilocycles (49.02 meters).

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of America's Great Key Stations

Polly Waters and Clyde Dengler

TWO voices that blend remarkably well . . . two pairs of eyes that meet unusually often . . . two sets of hands that touch so frequently. Tell-tale signs that Cupid is on the job, even in the bewildering maze of "microphonia."

Songbirds Polly Waters and Clyde Dengler are real life sweethearts as well as radio romancers. When you hear these talented youngsters sing on the Bristoleer program on the Columbia Broadcasting System, you are held spellbound by the sincerity and enthusiasm that permeates every word.

But then, their love is infinitely more romantic than any story book tale you know, and that does help to imbue their play-acting with genuine glamour.

It all started a few years ago in Fleetwood, a tiny suburb of Reading, Pennsylvania. Pretty Polly was a high school student. As she hurried to classes one day, her head was full of the new teacher who was coming that very morning. Reaching her room, she carefully smoothed her hair and brushed an imaginary speck of dust from her dress. No one noticed particularly, for each one of the girls was likewise occupied, anxiously awaiting the new hero.

And here he was. Barrie said this about charm, "If you have it, you don't need to have anything else; if you haven't it, it doesn't much matter what else you have." And Clyde Dengler has magnetic charm!

Slowly Polly Waters raised her big brown eyes to his, and from that time on, this little lady has been a believer in love at first sight. Best of all Clyde wasn't much older than she, and what was more important, he singled her out of all the class for attentions.

The excited Polly didn't sleep very much that night, but her eyes were just as bright as ever to greet him in the morning and school took on a new importance.

Then young Clyde discovered that Polly had a voice. He himself, had always been somewhat of a prodigy, and to find the perfect foil for his tenor was an achievement.

Imagine how proud Polly was to receive special lessons in music, and to be selected for the leading roles in scholastic musicals. Mr. Dengler was a much interested teacher and they even had a few "dates." Naturally, in small towns, school-girls are not supposed to "go with" their teachers, and these two had many adventures keeping out of the way of friends and neighbors. That was half the fun, of course!

THEN Clyde Dengler came to Philadelphia to attend the University of Pennsylvania, — and Polly Waters soon followed. Again we find them singing in the Glee Club and the college quartets—always together. In fact, this enterprising young pair worked their way through college by singing on the radio.

Fate seemed determined to play them continually as singing lovers, and their first radio part was *Hon and Dearie.* That was followed in rapid succession by many other roles, in each of which Clyde and Polly were cast as sweethearts or as husband and wife. They were two of the pioneer artists that started at WCAU in the "boiler room" of the Hotel Pennsylvania.

A church choir found the two together every Sunday. More and more they were drawn together and inspired in their singing.

It was inevitable that they were given the leading parts in the college musical operas each year, and again Clyde made ardent love to Polly in *H.M.S. Pinafore* and the *The Mikado.* The next year an operetta called "Hades Inc." was written especially for them and their fame as lovers grew.

Finally, Clyde received his M. A. degree in 1926, but he stayed on at the university as a student director of singing until Polly got her B.S. degree the next year.

By this time,—but you have guessed it—they decided to marry in reality. They made all the arrangements weeks in advance and even had "their song," the one that recurred most often in their lives, *If I Had Known You Dear* by Cadman, sung after the wedding ceremony.

A HONEYMOON was planned, but Clyde and Polly had a singing engagement to fill. Flying to the studio from their home town was thrilling to the adventuresome pair, and after the radio announcer had told the public the news, the two were literally snowed under with congratulations from admirers, which almost made up for missing the wedding trip.

Now, they are a star singing team attracting nation-wide attention. Clyde Dengler is not the usual conception of a radio headliner. He's as boyish as a kid playing marbles, and not much older. He is interested in the scientific side of radio as well as the artistic. Thoroughly acquainted with tonal production, overtones, television, spot recordings, he has a well-grounded backing for his radio singing.

Polly, in her turn, is very lovely and exceptionally sweet. She admits proudly that they sing much better together than apart, and that, of course, isn't hard to believe. Their voices are unusually full of music and have that quality that makes you want to hear them on the air. It probably could be summed

Wallace Butterworth

up as radio personality—for it isn't hard to love a pair of lovers like these.

Nowadays, the happy pair are on several big broadcasts. Their newest one is the Bristoleer program on the Columbia Broadcasting System, sponsored by Brandle and Smith Company.

This charming and real couple, so very much in love, promise much in the way of radio entertainment. To them the world is a garden of songs and life a never ending holiday whose problems can be sung and kissed away. Love's Young Dream Come True!

WALLACE BUTTERWORTH

By Betty McGee

EVERY Radio announcer has a multiple personality.

He's more than his very self—with the phases of an individual personality. He is a hundred different persons—yes, and a thousand—and more. He exists as a different man in the mind of each one, in that vast radio audience, to whom he has become a daily companion. To one he's heavy-set and dark; to another, tall, slim and blond; to another, fat and jolly; and so on ad infinitum, through all the possible combinations — retaining, of course, in every case, the characteristics which are unmistakably his, and his only.

Then, too, the very nature of the work of a versatile announcer requires that he actually *be* a number of persons—that he can adjust himself to different kinds of programs under varying circumstances; that he can switch from broadcasting an exciting sports event to announcing the numbers of a symphony.

So light and shadow in the personality of a radio announcer are more than interesting. They are essential. And here we are reminded that the real purpose of this little story was to disclose something of the man behind the voice of Wallace Butterworth—which voice has made a legion of friends, and belongs to one of the most versatile and popular of the Chicago NBC corps of announcers.

Putting aside the countless Wallace Butterworths that exist in the minds of devoted listeners there are still a number of Wallace Butterworths.

There's the jaunty, good-natured, good looking youth who circulates around the NBC studios like a fresh breeze. There's the artist—who as a little boy saved his money for concerts and opera, and ran for blocks to catch a glimpse of his idol, Caruso. And then there's the business man who never steps before the microphone but with the idea of presenting most effectively the credits of the sponsor of the program.

THE son of a widely known concert pianist, young Butterworth had music appreciation instilled in him from infancy. He was only a little fellow in knee breeches attending grammar school in his home town, Wallingford, Pa., when he obtained a job in a department store selling shoes. In this way the youngster secured funds to train the fine voice that was later to bring him distinction as a singer. With his weekly salary he bought two phonograph records and a seat for the Metropolitan opera, which came to Philadelphia each week. The salary also provided fare to the Quaker City, only twelve miles away from young Butterworth's home town.

After graduating from grammar school Butterworth attended Swarthmore High School. Here he was president of the graduating class in 1920. Following his graduation he studied recording at the Victor Laboratories in Camden, N. J., fitting himself for the managership of the phonograph department of a Chester, Pa., store. During his last two years there he journeyed the twelve miles to Philadelphia each day to study voice.

Then came one of his greatest thrills . . . his appearance on the concert stage. Two successful concert tours through Canada and the eastern section of the United States were followed by a short concert-managerial career in Chester. The youthful manager persuaded Martinelli to sing in Chester for $1,600. When the concert was finished and all accounts rendered Butterworth found himself richer by $20.

There was a more propitious result of this episode, however. Martinelli did a little persuading on his own part and succeeded in getting the young manager again to study voice, and a year in New York under Pasquale Amata resulted.

Butterworth became a radio announcer quite by chance. A business trip to New York led to a visit to the NBC studios where he jocularly asked for an audition. Whereupon he was employed, and has been with that organization since that time. He transferred to Chicago after becoming identified with the Roxy's Gang program, Phil Cook and the Radio Household Institute broadcast. Incidentally, he is now heard regularly on the Pickard Family, the Rin Tin Tin Thrillers, the National Farm and Home Hour and the Chicago Serenade programs.

Mr. Butterworth says that his work as an announcer has not completely taken the place of his musical career, and that he plans at some future date to do musical work on the air. However he insists that nothing in his previous experience has been as interesting as radio. And why shouldn't it be a life full of interest, one asks, when the range of his announcing is recalled. It has fallen to his lot to announce the National Air Races, the British-American International Track and Field Meet, the National corn husking contest, football games and boxing matches, in addition to his regular work on network programs. He also handles Brownbilt Footliters and Yeast Foamers, as well as the Chicago Civic Opera in season.

No matter if the microphone remains a real hazard to many—to Wallace Butterworth it is a source of inspiration. Each approach to it brings a new thrill.

"Before the microphone one never loses the inspiration to be pleasant and happy," said Mr. Butterwork. "One feels a fresh concentration of thought —and in moments of great excitement this concentration is more completely coordinated with the voice."

THE ability to sell a man's merchandise by the manner in which his commercial credits are read is, according to Butterworth, the outstanding qualification of the "ideal" radio announcer. A good, clear voice is, of course, essential, but Mr. Butterworth's advice to the aspiring announcer is to be natural and happy—and above all *smile*. "It's the smile in the voice that people like to hear," he said.

Asked as to the kind of program he likes best to announce, Butterworth expressed a preference for out of doors features or symphonic concerts—with a great artist.

The youth of the breezy ways name

his hobbies—song, women, golf, baseball, poker . . . And although he insists that he likes nothing better than to spend all his spare time in getting sleep, and more sleep, we discovered that he devours books of history and manages to take in the best in drama, his choice in the way of theatre. . . .

Artist—playboy—business man . . . the truly versatile radio announcer.

OLIVE PALMER

By Mark A. Stevens

TELEVISION has no fears for Olive Palmer. She is a treat for the eye as well as the ear as you can see by her photo in the rotogravure section. Petite, dainty and altogether alluring, she has that fresh "school girl complexion" we hear so much about. If her countless admirers could only see her as she stands before the mike, they would be even more charmed.

She even dresses the part. Miss Palmer has always given meticulous care to every detail of her work and she considers dress an important part. Many radio artists wear any old thing and make themselves comfortable before the mike since it has no ears as yet. But not Olive Palmer.

"I select my dresses with as much care as my songs," she said. "It makes no difference that only those in the studio see me. The effect is psychological. If I did not dress my best I feel sure I would not be able to sing my best. There are even certain gowns that match the mood of certain songs."

Miss Palmer dresses with simplicity and taste. She prefers whites and delicate pastel shades, sometimes crisp and again soft flowing and silken, depending upon her mood and the mood of her songs. Certainly dress is a part of personality and the most successful radio stars are those who can get their personalities across.

"IT IS so important," continued Miss Palmer, "to express what you feel in the voice alone. If a song is sad the listener must feel the pathos of it. Longing, a smile, a tear, rollicking good humor, tenderness, a caress; all shades of feeling must carry over to the audience. If the singer is visible, these are easier to convey through facial expression and gestures. But on the radio, the tone takes the whole burden.

"When I sing, I do not think of the vast audience listening in. It would scare me if I did. I forget everything but the song I am singing. And sometimes I try and visualize a friend or two who told me they would listen in, and occasionally someone who has written to me requesting a certain song—and sing to them. Speaking of requests, an old couple from the far West wrote me recently saying their fiftieth anniversary fell upon Wednesday and they were celebrating it during the time of our broadcast, wouldn't I please sing their favorite song—*Silver Threads Among the Gold*, to cap the climax? Such letters as this give me a great thrill and I try to comply with the request whenever possible. That evening I imagined a kindly old couple, sitting hand in hand and surrounded by their friends listening to my song which stirs fond memories in their hearts. It's really wonderful when you realize what radio will do.

"You can't see your audience, but you can use your imagination. Likewise, your audience can't see you, but if they don't send for your picture, they visualize you nevertheless. It is sometimes quite amazing how some of your unseen admirers are able to size you up. I do not know whether it is due to just chance, intuition, or that some quality of your singing actually does indicate the heart and mind of the singer. At any rate, not long ago I got a letter from a woman in Ohio which said; 'I listen to you every week and just know by the way you sing that you must be good. I can't imagine you smoking or drinking or doing any of the things the young people of today think so necessary. My daughter just laughs at this and says; "Moms, you are so old fashioned. She probably goes to night clubs regularly." But I really can't feel you are that sort. Are you?'

"WHILE I certainly do have my faults, I was happy to assure this woman that her appraisal of me was not so far wrong. It is true that I do not smoke, drink or attend night clubs. In fact, I lead quite a simple life. The movies are my major obsession. I like them good or bad. But the daughter of the mother who wrote would probably find me quite dull."

Another letter which Miss Palmer received recently stated. "I wish I had your job, singing once a week and getting the money you get." There is a somewhat general belief that a radio singer leads an easy life. This is far from true. Miss Palmer sang ever since she was five years old and has been studying and preparing herself ever since. She still studies, taking two lessons a week of Douglas Stanley who has given her a range of over three octaves. She must please an audience of millions every week and that's some responsibility, for the public really decided thumbs up or down for the radio singer.

Miss Palmer has sung on the Palm Olive Hour now for over four years and has never missed a performance, nor taken a vacation during that time. She must guard her health constantly for just a common cold might ruin a broadcast. Dissipation, late hours, social life are absolutely taboo. It's the simple life for the singer.

THE story of how Olive Palmer got her first engagement has been much garbled in the press. This is the true account. She was living in Des Moines, Iowa, with her parents, having completed the conservatory course at Drake University and acting as soloist at the University Church of Christ in that city. One day she read in the newspaper that William Wade Henshaw was planning to revive twenty operas in New York. Acting on impulse she put through a telephone call for far off New York and finally got Henshaw on the wire. When Henshaw was able to make out from her excited talk what it was all about, he said.

"Sorry, but the cast is all made up. There is no use of your coming to New York."

Miss Palmer did some quick thinking and then replied, "well just listen to me over the phone."

Soon to the astonished ears of Henshaw came the silvery notes of the famous Shadow Song. He pressed the receiver closer to his ear, for here was unmistakable quality.

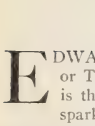
She waited breathlessly after she had finished singing but not for long. Soon came back Henshaw's decisive voice.

"Get the first train you can for New York."

Thus began the career of Olive Palmer. She sang in opera and concert and acquired quite a following through phonograph records.

When the Brunswick Phonograph Company was conducting its star guessing contest, she first became interested in radio. Someone in the recording studio asked her, "Why don't you take up radio, you have all the necessary qualifications?"

Why not indeed?



She did take up radio, was one of its pioneers, and is now one of the highest paid singers and most outstanding personalities of the air.

Miss Palmer is what psychologists might call "air-minded." On a recent week end visit to Lake George, she and a party of friends had wandered to a high promontory overlooking a vast stretch of country three miles from the hotel. Someone suggested seeing how far voices would carry and several of the party, including Miss Palmer, sang. Upon returning to the hotel they found that Miss Palmer's song had been quite audible for a distance of three miles. No doubt one reason why Olive Palmer's voice is so perfect "on the air."

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

EDWARD PEYTON HARRIS, or Ted Harris to you, my dears, is the most vivacious, energetic, sparkling and keen-witted young men around the studios. At an early age he must have been inoculated against nervous prostration—for the episodes of which he is a part every day would cause most people to spend their vacations in sanitarias. As Director of the Continuity Department of the National Radio Home-Makers Club, Mr. Harris spends most of his time writing and acting in sketches and conducting a column of his own on the air. He is a very promising young playwright, and his trunk is bulging out with plays which, according to those who know, will be the *best of the season* on Broadway. Mr. Harris' opinion is that every radio person should have an emergency talk on hand—just in case. . . "I wrote such a talk on the art of criticism, as general a topic as I could think of," said Mr. Harris. "For months I had no occasion to use it, but one morning in a frenzy, Mrs. Allen explained that a speaker was late—and something had to be done. I snatched my talk and placed myself before the mike. Mrs. Allen introduced me, but whispered that if the speaker entered, I was to fade away gracefully. I read with one eye on the manuscript, one eye on the operator, one eye on Mrs. Allen, one eye on the door, and one eye on the stopwatch." It looked as if the eyes had it, but after Mr. Harris delivered his oration for a minute, the speaker entered, and Mrs. Allen signalled "no," and Ted did a fadeout. Ted has very big, round, black flashing eyes which laugh most of the time. His main interest is plays, his work is writing plays, and his hobby is —plays. His most devoted fan is Townsend, the famous photographer.

Ed. P. Harris

* * *

AND now for George Hicks' admirers who are legion. This young announcer's career is a model of what a radio announcer usually goes through before he is acclaimed by the "vast, unseen audience." After he finished high school in Tacoma, Wash., where he was born some 25 years ago—or perhaps after high school finished him he began work in sawmills and in logging and construction camps. Then followed two years at the College of Puget Sound. He tried job after job until a sailor became he, skimming the waters as far north as Kotzebue in the Arctic Circle. In the Washington headquarters of NBC, George Hicks was selected from among 200 aspirants for the position of announcer—just three years ago. If during one of his programs you heard the unfamiliar title of the number —*Jump the Waltz,* and by the way, some people don't have to be instructed to jump or hop during any dance—the following will throw a little light on the subject for you. The end of the program was at hand. There were still two more numbers to be played—a waltz and a march—and the orchestra leader whispered excitedly to George, "Jump the Waltz, we'll take the march," and George obediently announced. "Ladies and gentlemen, we'll next hear *Jump the Waltz,* a march.

George Hicks

* * *

TODDLES, Presiding Pigeon of Graybar Court, and your own Marcella donned our Empress Eugenie chapeaux, alighted into our Victorias drawn by sixty miles per hour horse power, and attended the gala performance of the Majestic Hour over CBS, Sunday night. It was simply magnificent! After we listened to Redferne Hollinshead sing *Danny Boy,* Toddles pushed aside the trailing feather which swept from her hat down one ear and up the other and confided, "Holly is the only tenor I can listen to without having to clutch my chair, as if I were coasting down a scenic railway. I generally have to hold my breath when the rest of the family of tenors try to climb those top notes." I could not help but marvel at Toddles' observations—because that's exactly the way I feel about Holly. Of course, confidentally, Toddles might have heard me say the same thing at some previous concert of Hollinshead—there have been other occasions when I felt that there must be some parrot strains in her ancestry—but with all her faults—I love Toddles just the same. On the same program were Irvin Cobb, more philosophical than humorous, DeWolf Hopper in the drawn-out but clever *Casey at the Bat,* Gus Van, Ruth Etting, Ben Selvin and his band in their clever orchestrations of popular tunes—and of course, Toddles and myself—at the other end. You know there are two ends to everything, but it certainly makes all the difference in the world at which end you're (at)—that last word is what grammaticians, rhetoricians, electricians and others call a redundancy, but we'll just leave it there—it looks so cute! By the way, Toddles is particularly anxious to have *them there* Majestic programs continued—for tucked away in her stockings are fifty shares—bordered handsomely with guilt—of Majestic stock.

Hunter Sawyer

* * *

WHILE those rare public servants columnists and reporters, are vainly trying to escape from the shrapnels aimed at them by CBS and NBC in the might cause of the Bigger and Better Bari tone, with Bing Crosby (Columbia) and Russ Columbo (National) in al most a tie, WOR is modestly standin aside and giving to its listeners th voice of a tenor who would be th proud possession of either network each paused to listen. Hunter Sawyer broadcasts regularly at 5:15 on Sunday and his program, *Favorites—New an Old,* is the delight of the jazzy-wear radio fans. His voice has a deep, ric and almost spiritual quality, and his u usual gift was discovered by the ma ager of the first Amer cana Revue in which h made this theatric debut.

Mary Olds

MRS. Herbert Dreher of Flint, Mich one of Mary Olds' e

Milt Cross

thusiasts, writes a glowing two page letter about the creator of the original Jean Lambert Dale Hour, *Over the Coffee Cups*, but deplores her absence on the ether. Mrs. Olds does broadcast, but via electrical anscriptions. Some of her programs re *Pequot Personalities, Lehn and ink* and there is some good news in ie wind that's blowing in the direction f Mrs. Olds' office where she operates ramatized Radio Merchandising. Not nly that but Leonard Cox who did the lain Street Sketches when they were n WOR, is now under her manageent. And leave it to Mary to place im on a striking feature program. She 43, has had a few short stories pubshed and many more not published—et—has four children, and one grandild. Was Business Manager and rogram Director of KFRC, San Franisco, where she displayed her true gift f showmanship, and now in her Dramtized Radio Merchandising, this same kill is leading her on to great success.

* * *

AT LAST! There is actually another in radio to claim New York as ie city of his birth. Toddles and I ugged this distinction so close to our osoms that we felt ourselves the unrowned rulers of this high-hatted etropolis. So, hail to our ranks, Milon J. Cross—and what a trio we make! filt is 33, looks down from a height f six feet, has a charming disposition —but alas, my dears—sorry to disapoint you—there's a Mrs. Cross in the ross homestead and a Miss Cross—ust five—who gets her blue eyes from daddy. A treasured possession in filt's home is a clock carved into the hape of a microphone from a block of nthracite coal. There is nothing like aving a reminder of one's job at home. Mr. Cross is an alumnus of DeWitt linton High School, and studied music the Damrosch Institute of Musical rt.

* * *

THE Dixon Family has expanded its ast of characters with the addition of eter Dixon, Jr., who is at present exrcising its vocal cords and giving the eighbors plenty of auditions.

Edwin Drillings is a devout exponent f radio romances as an economy durng these dull times. He is at present ourting a young lady in a small town n Ohio via radio—and—well, he saves he cost of meal and theatre tickets. But Edwin is a very jovial person and ot at all prosaic even though he is a adio engineer—up at the Ida Bailey llen studios. Is a member of the Tribe f Israel.

SOPHIE STERN, WMCA's fairest and most attractive soprano, was giving an audition at the station. She walked up to a handsome Indian floor lamp and addressed it in sweet and melodious tones. A. L. Alexander, Chieftain of WMCA's program heralds, rolled up in laughter and for fully five minutes was unable to tell Miss Stern intelligibly through his chuckles that she was not singing through a microphone. She has been guest soloist on Radio Digest's program over WMCA and one would never believe that there was such a skeleton in her closet.

* * *

DEAR Betty Allen of Rosebud, S. D.: Won't you forgive your poor Marcella for having delayed so long with your request? Well, I knew you would, and I thank you. Let's begin with John Sloan. The reason you have not heard him over WNAX is that he is now continuing his musical studies in the Yankton Conservatory of Music. You see he wants to get his Bachelor of Music Degree.

Eddie Dean

But here, I must not forget to introduce you to the Dean Brothers. Here's Eddie and down below is Jimmie. John dePagter, Advertising Manager of WNAX tells me that the boys were born at Sulphur Springs, Texas on a cotton farm which their father is still operating. Eddie is the same Uncle Eddie of the Children's Hour. He has a contagious smile in his voice that attracts his listeners. Life on the cotton farm became dull so Eddie thithered to Dallas where he got himself a job in a machine shop. From that he drifted into a professional quartet and barnstormed around the state, and then into Chicago where he sang in night clubs and vaudeville. He has been with WNAX for three years and his popularity is ever increasing.

Jimmie Dean

Jimmie is the younger of the two boys. He is a fine athlete and has walked away from many contests bearing blue ribbons. When he went through high school he started to work on some Texas oil fields, managed a grocery store in between and helped on his dad's cotton farm in-in-between. More than a year ago Jimmie visited his brother at the station and then and there it was decided that the boys team up—And a mighty fine pair they make.

* * *

WHEN you heard Albert Coates conduct the Lewisohn Stadium Concerts which were broadcast over CBS the last three weeks of August, did you even suspect that he was a descendant of an honest to-goodness pirate chief? Oh, yes, there is a Stevenson-flavored tale of stolen chests of silver of a pirate ancestor who, banished from his country, returned many years later with some thirty ships bearing all kinds of treasures and who gave his king hush money for a safe return to his native land. Little did this hoary-chested pirate ancestor realize that five or six hundred years later a direct descendant would control in part the musical destinies of a nation and that this grand-grand-grand—and more-grand nephew would play so great a role at the Royal Court of Russia. Little did he realize the heartaches he would cause his relatives who were to spend their lives trying to reclaim their rightful inheritance.

Albert Coates

When Mr. Coates was a young boy living in Russia, nothing was said to him about the vast sum of money held in chancery in England. He does remember mysterious trips which his father used to take to England, but it was not until he himself visited an uncle who lived in that country that he heard of this fantastic tale of a pirate ancestor. The youth's imagination was stirred by this vivid account, but fortunately, he had no desire to put in his claim to the fabulous wealth.

Mr. Coates spends about five months of every year conducting the orchestra and opera at Moscow. It was admirable of the present Russian government to have invited Mr. Coates to take up the directorship of the Bolshoi Opera, or Grand Opera, in view of having held the same position under the Czar. Toddles here, of course, has no use for Russia—but then again she was not fortunate enough to have come along with me when I had luncheon with this remarkable man, for to know Mr. Coates is to know the better side of Russia.

* * *

EDYTHE JEANNE MESERAND of NBC had an appointment with Toddles and myself to visit the 15-year old girl prodigy, Sylvia Altman, several weeks ago. As we emerged from NBC's cottage door and got into a cab, Edythe asked us if we had noticed the red rug stretched from the door-step to the curb. "Sure," quoth Toddles and I in unison. "We appreciate NBC's courtesy in welcoming us so royally." Edythe immediately apologized—"We'll have it out for you the next time—but this day it's for the King and Queen of Siam." But after all, who wants the darn thing after royal footsteps have been tatooed on it.

HERE's an unusual story of how a hobby developed into a thriving flourishing business and became the main source of revenue for the man who played with it as a pastime. If you can imagine the oil fields suddenly running dry—in conformity with our country's strong tendencies, hm-hm—or a new invention putting a stop to the automobile turnover and making it necessary for Henry Ford to stand behind a counter and hand out bits of Americana to fanatic collectors—then you can understand the position of Whitman Bennett. When Mr. Bennett had achieved outstanding success during the motion picture industry's childhood, instead of squandering his shekels on race horses, stocks, collections of various-hued cravats or Rolls-Royces, he invested his pin money in a hand bindery for books which he kept in back of his office. Today that bindery and some few sister presses occupy an entire floor on West 23rd Street, N. Y. Here the wealthy and élite of the country bring precious little first editions hundreds of years old to be dressed up in beautiful leather bindings and casings. One little book that has been washed, combed and dressed up in a beautiful leather jacket is Hoyle's whist and it has a price on its head of $6,000. Mr. Bennett is on CBS every Thursday at 11:00 a. m.

Frank Gill, Jr.

* * *

BILL of Kenmore, N. Y. sings paeans of praise to The Phantom Announcer alias The Man About Town alias the Fireman's Child alias Frank Gill, Jr. alias—oh, thank heavens, there *ain't* no more aliases. Mrs. Peterman of Barberton, Ohio, also adds her plaudits to Frank's performances. Well, here he is. And you can tell by that big broad smile of his that he couldn't resist putting humor in the most serious of programs. He is just fresh from college and has a deep interest in stagecraft, coming as he does, from a theatrical family. His station? WJR known as the Goodwill Station.

* * *

I WANT to take this occasion to thank Mrs. Winifred Coplin of Brodhead, Wis., Julia Prince of Lombard, Ill. and others for sending in newspaper clippings bearing pictures of Al Carney. Unfortunately, it is impossible to reproduce photographs from newspapers, otherwise we should be happy to include the picture of the late Mr. Carney in these columns. Mrs. Coplin's clipping is taken from the March, 1928 issue of Radio Digest.

For the benefit of Nina de Martin of Chicago and Norella White of Shelbyville, Lawrence Salerno of WGN was born October 15th (year lost in the mails), is married, had one child who passed on a year ago, enjoys tennis, golf, bowling and baseball. He did not attend the University of Wisconsin, Nina and Lawrence Salerno is his real name, believe it or not.

And this is a good opportunity to announce to readers of Radio Digest that the religious faith of radio announcers, artists and station managers is a delicate subject. The religion of most people on the air is their radio work.

Wallace Butterworth moved over to Radiographs this month, I think, because there was more room for him.—F. McC., Betty G. Langdon, and A. B. N.

* * *

SUPPOSE, for instance, that you were in the midst of winning a very important case involving thousands of dollars—and that as your attorney was

Upper: Chas. Dameron, Ed McConnell
Lower: Frank Vallon, Sydney Ten Eyek

delivering his appealing peroration, he looked at his watch, and said, "Sorry, but I must sing on a radio program." Wouldn't that be just too ducky for words? Well that's exactly what would have eventually happened with Charlie Dameron if he had remained in the practice of law. Every Saturday night before he said good-bye to the noble calling of law, he would motor from Huntington, W. Va. to WLW to sing over that station. It's a far cry from counsel to crooner, but Charlie made it in one leap. And *jedgin'* from his *photygraph* he ain't had no regrets.

Smilin' Ed McConnell—another of WLW'S favorite sons earns something like $100,000 yearly as an entertainer. Whether this income keeps him smiling or his smile earns his income is something for you to decide. But I am convinced it's the latter. Ed was born in Atlanta some 31 years ago. He is the son of a minister, is married and has a frightfully young daughter—somewhere between—well I don't think quite a ye old. He is six feet one and weighs tenth of a ton plus 75 pounds. His o weakness is his inability to resist bu ing cars. He has almost half a doze Natalie Giddings Haburton, former of WLW says that he hates to have h hair cut, wears a hat and tie until th are worn out or his wife sneaks the away, and that he does not know th *worry* is in the dictionary.

* * *

FRANK VALLON is Productio Manager of KGFJ, Los Angeles. H education at the University of Michig was interrupted when he enlisted in t French Foreign Legion. The close the war found him Captain in t French Air Corps with 3,200 flyi hours over the front to his credit. Aft completing his course in journalis when he returned from the other si he became a reporter in Detroit. H traveled to Cuba, acting as free lan correspondent for the Detroit Fr Press, N. Y. World (now World-Tel gram), Brooklyn Daily Times and t Chicago Tribune. Then to WSUN, St Petersburg where he made his rad debut as announcer. NBC soon disco ered him and from announcer took ov the supervision of daytime progra and brother announcers. CBS th won him over as their production exe utive. But now he's with KGFJ a I'm glad I have my finger on him, i his moving around has kept Marcellia quite curious as to his whereabouts.

MARCELLA hears all, tells Write her a letter, ask her any of burning questions that are bother your mind.

Are You Princess Charming--- *Incognito?*

Then bring out your baggage of latent charms and travel in full state, or else the Prince may miss you on the trip of romance

By Frances Ingram

Consultant on Care of the Skin heard on NBC every Tuesday morning.

SEVERAL years ago, I spent my summer vacation in Nova Scotia. Among the passengers on the boat going up was a mouse-like oung woman who was distinctive only ecause she was the wallflower of the rip. The second day out, I managed o be introduced to her, and during our onversation, she gave me her reasons or taking this vacation.

"I don't know why I ever came," she aid. "I've planned and saved and ounted on this vacation for three years. t was silly of me to think things would e different, but somehow I hoped that when I got away from my home town, I'd stop being a wallflower. But I guess it's chronic. It isn't any use. I know now that there never will be any romance in my life. But I had such high hopes when I started out. I guess I saw myself as a Princess Charming, incognito. I know I'm not attractive, but I've daydreamed about this vacation for so long that I made myself believe that some sea-going Prince Charming might see me as I see myself—not as a chronic wallflower. Well, I'm cured. You see what it's like. The men don't even know I'm on this boat!"

This is a real Princess—Princess Chlodwig Hohenlohe-Schillingsfurst—and there is nothing incognito about her!

She stopped and then added in a quieter tone.

"I suppose it's terrible for me to admit that I'd like some man to see me as I wish I were and not as I am. Anyway, I'm all over that foolishness now. You know, I was raised on that quotation of Charles Kingsley's—'Be good sweet maid, and let who will be clever.' I've been good and I've 'let who will be clever,' but it's the clever girls who get what they want out of this life."

The quotation was apt. It's an alibi frequently used by wallflowers who remember only the first line of Mr. Kingsley's advice and who forget the second—"Do noble deeds, not dream them all day long." The wallflowers, like this particular specimen on the Nova Scotia trip, dream of Prince Charming and do nothing to prepare for his coming. They expect the mythical prince to see the "heart of gold" which they keep hidden beneath an unattractive exterior. Unfortunately, the Princes Charming almost invariably see the girl whose virtues are more apparent. And it is the clever girl who has learned to make the most of her appearance who plays the leading role in the fairy tale romance.

There are few natural beauties, you know, few girls who are born with real beauty. The girl whom we acclaim as beautiful is the girl who has imagination enough and initiative enough to make the most of herself.

TODAY there is little excuse for an unattractive girl. By using suggestions found in the national magazines and on radio programs, even the most chronic wallflower can come to achieve an attraction of her own.

In this respect, the golden nugget and the uncut diamond come to mind. Both must be refined, polished and finished off before their beauty is apparent.

All this and more I said to the wallflower who was traveling to Nova Scotia several years ago. She had planned a two months' vacation and so had I, and we arranged to come back on the same boat. For two months I did not see her, and when I got to the boat to come back to New York, I did not see her either. I finally decided that she had changed her plans until suddenly I caught sight of her coming toward me. But this girl was not a wallflower—she was not Princess Charming traveling incognito—she was Princess Charming herself!

The story of her transformation was interesting. More than that, it was proof that unattractive girls do have beauty dormant within them. So it's rather foolish, isn't it, to go through life incognito? After all, there are relatively few people who have a bona fide reason for hiding their identities. People prominent in public life some-

(Continued on page 011)

Here the author is seen at play with one of her three children.

The *ONLY* Child Is a *LONELY* Child

And Creates Greater Problems to Doting Parents Than a Large Brood

By Miriam Finn Scott

IF I were asked to make a decision, I would definitely say that rather than to have only one child, to have none. This may be a very bold statement but I have seen so many tragedies suffered by the only child both in childhood and at maturity—I have so frequently found the only child the victim of the most unjust, almost cruel conditions, that I do not hesitate to urge parents who have but one child to adopt another for the sake of giving the child a fair childhood and a well-balanced maturity.

However wise and well-informed parents are on the subject of child training they cannot avoid certain conditions which the only child creates which are detrimental to the child's finer development. In the first place the only child in a home necessarily becomes and holds the center of the stage; he is invariably the recipient of all adoration and attention. He is usually surrounded with an unwholesome anxiety; he is not allowed to experiment, to adventure, to test his own physical strength and endurance for fear that he might overexert himself—that something might happen to him. Because so much attention is given him he grows to depend upon others and is thus deprived of developing his own mental resources. Because the only child is never compelled to subordinate needs and desires, he becomes self-centered, thoughtless and inconsiderate and endlessly demanding. Because of his constant contact with adults he is apt to become unpleasantly precocious. But the most pathetic side of the only child is that he is in his heart very lonely. With all the attention and affection he receives from his elders, with all the toys and sweets that are showered upon him, he misses the one thing which means most to a child's heart and that is, companionship of his own age, a child who talks his language.

NOT long ago a mother brought to The Children's Garden her only child, Betty, a little girl of ten. "We are all worn out by Betty," her mother frankly admitted. "It is almost impossible to live with her; she has no regard or respect for anyone else's time or needs or comforts. If she wants something, she expects that thing to appear the moment she expresses the wish. If not, there is an outburst of the most nerve-racking temper until her wish is satisfied. How can I help her to be like other children?" the mother asked, and added, "She will n play with children—she wants onl grown-up things and to act grown-up.

I found Betty above the average i telligence for her age. She had read great deal, and she had seen more m tion pictures than I ever hope to se she was thoroughly familiar with a the feature programs on the radio. H conversation was most fluent and pai fully sophisticated. "My Mother," s said, "thinks me abnormal because prefer the association of adults.

From her mother I learned that home Betty took the lead in all conve sation, especially at meal time; s could not be induced to go to sleep b fore ten or eleven o'clock at night; th Betty had very definite opinions clothes for herself. Ordinary simp clothes that suited a ten-year old chi for school and play purposes did n interest her in the least. She preferr dainty hand made dresses of very del cate colors, with silk socks to match a patent leather slippers, and insisted silk underwear! Then, the child's ea ing drove the family frantic. It w practically impossible to get her to e suitable food and enough of it. She a candy by the box and washed it dow with ice cream sodas.

In studying the history of this sm

hild I discovered that from the time of her birth she was the idol not only of her father and mother but of all the elatives; that the family in their anxety to do the best for the child, to exress their love for her, to make her *ompletely* happy, were simply overeeding her with things and thoughts nd affection. She was kept in a state of constant excitement and confusion vhich twisted for her all values espeially that of the child's world. In a vord—she was suffering from the most icious attack of indigestion, physically, nentally, and emotionally.

My treatment of this little girl may e suggestive to parents who have simlar problems to meet. I realized that n this particular case the most importnt first step was to separate Betty, at east for a while, from her own home nvironment since every association with t was connected with her present disorganized condition, and place her in surroundings where there were other hildren and where she would autonatically have to conform to the routine of a child's life. I found an ideal lace out of town, a delightful home vhere there were three healthy, interesting children brought up to do things or themselves; to cooperate with the ousehold and at the same time were given the freedom and the opportunity o lead their own lives fully and joyously. After getting thoroughly acquainted with Betty and gaining her confidence, with the fullest cooperation rom the family, I succeeded in getting he child to visit this delightful home. The first few days Betty resented being eparated from her environment. She was constantly on the defensive; she expected to be treated harshly, to be leprived of all freedom, to be criticized, unished. But to Betty's surprise she found Mrs. X, the mother in the home, very kind, sympathetic, tolerant, full of un and play. Gradually, almost unconsciously, Betty began to take part in the life of the household. During the several weeks that she was there, she learned to eat more normally, she went o bed at a reasonable hour, and learned o play with other children. While this visit in no sense completely changed Betty, it gave her a concrete taste of hild life—and a very definite idea of ow natural children behave. When she returned home she was ready for he next step.

MY FIRST business was to enter Betty in a school where children are required to carry a certain amount of the responsibility in the organization and care of the classroom. The teacher was acquainted with Betty's difficulties at home and was particularly asked to cooperate in socializing Betty. She was asked to pay no attention to her except when it was absolutely necessary—to entirely ignore her precociousness. That school also made it a special point to insist that the children must be dressed sensibly—the simplest clothes, in which they could play comfortably and freely—that helped solve Betty's clothes problem.

At home a regime was established with the help of one of my assistants, Miss Smith, a young woman with sympathy and understanding followed my directions in detail. Betty rose at 7:30; her breakfast was ready for her an the table at 8—cereal, milk, toast, and cooked fruit. After attending to her physical needs, she was taken to school where she remained until three o'clock. After school Betty was expected to play out of doors until 5; at 5:30 she bathed; at 6 o'clock she and Miss Smith had supper served on trays in Betty's own room. After supper, Betty had from thirty to forty minutes in which she could read or play quiet games; at 7:30 she was in bed with the doors closed and the lights out.

THE author of this article, is a widely known child diagnostician and her training in this field has enabled her to discipline the most incorrigible youngsters. Mrs. Scott will be happy to give you of her advice if you will address a letter to her in care of Radio Digest, 420 Lexington Avenue, New York, N. Y. Mrs. Scott is the author of How to Know Your Child and other books dealing with the problem of the child and her broadcasts over NBC were of inestimable service to perplexed mothers.

For the first few weeks Betty resisted this new regime with all the strength of her being. All these resistances were met with quiet, kind, but firm handling. If she refused to eat there was no discussion — she went without her meal. When she realized that it affected no one except herself she stopped fussing and ate her food with enjoyment. If she was unwilling to participate in out of door play, Miss Smith would start a game with the children about her in the park. Betty watching the others play would forget her resentment and find herself playing an exciting game of hide-and-seek. Soon she began to look forward to these afternoons of play. Her bath which was always an experience of long drawn out torture to the household she learned to take within a reasonable length of time, or she lost her play period after supper which she treasured.

During spare hours and on rainy days, Betty was provided with interesting materials—raffia, reed, colored wools, clay. Out of these she made napkin rings, picture frames, purses, mats, trays, etc. These things she saved to be given away as gifts at Christmas or on birthday occasions instead of buying useless trinkets or decorations. Betty was so happy at seeing the results of her efforts that she looked forward to a rainy day when she could make more presents!

ON HALLOWEEN while Betty was taking her bath, Miss Smith decorated their supper table with orange crepe paper; out of a small pumpkin she made a Jack o'Lantern which she placed in the middle of the table, and at Betty's place, put a little paper basket filled with small candies. The shades were drawn and the only lighting was provided by the candles in the Jack o'Lantern. Miss Smith was quietly awaiting Betty's appearance. When Betty entered and found herself in this bit of enchantment into which the room had been transformed for her, her face was a study in surprise and joy. For an instant she was perfectly quiet, then she threw her arms about Miss Smith, kissed her and exclaimed, "How nice of you to give me such a surprise!" her joy seemed endless and to show how deeply that thought had touched her she afterwards said: "Wouldn't it be wonderful to have such a surprise for father and mother when they come home to dinner?" After her supper she made two little orange baskets into which she put candies from her own basket, for covers she drew pictures of pumpkins. On tiptoes she entered the dining room to put a basket beside the place of each parent. She went to bed thrilling with happiness with that joy which comes when you give from your very heart.

All that Betty needed was to get back to a world where she belonged, a child's world where her desires were not stimulated beyond her needs, where she was joyously at peace—where she could function like a child and not like a distracted abnormal adult.

It is natural for parents to give their all to an only child and expect nothing in return. The motive which prompts the generous giving is beautiful—it is that boundless love which every normal parent feels for his child, but to have that love serve the child it must fit the child's needs. What every child needs is a chance to be himself, to experience the riches and joys the child's world holds for him. Parents must not by overdoing and over-giving deprive their only child of his richest heritage.

HITS—QUIPS—SLIPS

By INDI-GEST

WAS IT THE GIRL?

SCOOP! Scoop! Indi personally witnessed and heard the most astounding Slip of the year. And 'twas only last night (as we write) at the splendiferous opening of the Collier's Hour. We had zig-zagged helter skelter through the crowded lanes of homing motorists all the way from North Tarrytown to get there at 8 o'clock. Breathless and tingling, not to say perspiring, we trickled through the doors of the Amerstdam Roof Garden and were quietly ushered by two formally attired gentlemen to our reserved seats.

The radio-perfect voice of John E. Kennedy was then introducing Representative Fiorello H. LaGuardia of New York as spokesman for the wet side of a prohibition debate. The mike was a trifle high for the keg-sized Mr. LaGuardia and the strain of stretching his neck up to it may have drawn the vocal chords a little thin so that the rhetorical thundering challenge to Senator Brookhart for the Drys in the District of Columbia was a trifle weak. However, in spite of a growing desire to release a rhetorically induced hic we waited in eager suspense for Brookhart's answer to the challenge. Could he possibly deny that prohibition was the cause of all our woe? Or what was the trouble?

Light Wines or Beer?

There was a general wriggling in seats as the orchestra twittered through a steaming hot number. Then the suave and polished Mr. Kennedy gravely announced that in a moment we would hear the voice of Senator Brookhart descending from the national capital.

Give, Oh give us the answer . . . why all the crime wave . . . why racketeers . . . why depression . . . with bate breath we waited. Then came the an swer clear and bell-like, yea lyrical . .

"It's the girl, it's the girl!"

Ford Bond, the head-set over his ea dropped his chin into the wings of h collar, his eyebrows turned upsi down; white and then red swept ov his face. Still the melody and lyr lingered on:

"It's the girl." In fact there we even further details, totally unlike an thing we ever had expected to he from the lips of Senator Brookhart a stalwart defender of the drys. W wondered if there was anything to t stories they tell about the wicked g ings-on down in Washington, and cou it be possible that the good Senator . Ah, banish the thought!

Then we remembered that this w the Collier's Hour with the droll an inevitable Professor Lucifer G. But Perhaps he was back of all this. fact there were other voices now.

Catch That Slip!

THERE'S many a slip twixt the lip and the milk Next time you hear a good one jot it down a send it to Indi-Gest, care of Radio Digest. We p contributors from $1 to $5 for material accepted f this department. Indi likes short verses on the sam terms. Suggestions welcomed.

The Dodge Sisters—Boom! Boom!

Beth: "Tell me, who is that tall good looking man beside the girl in the green make-up?"
Betty: "That's Bill Schudt, big gun on CBS television programs."
Beth: "You mean, dear, that's Bill Schudt the big shot?"

Brad Browne: "Just another little Nit Wit friends. She's all bubbling over with . . . no, I can't tell her. Her best friends won't tell. But we'll let you know by our special kind of experimental broadcast . . . Give us the O-do-ray, Watkins . . . Now tell me . . . What? You get it? . . . Right, onions . . . She's been eating an onion sandwich! This program has come to you by the Smellivision Broadcasting company . . ."

Solving the Mystery

"Ah-haa, Meester Editor, you are surprised, Ah-ha-a-a-a?" We get a great kick out of anticipating the lines on a given stage situation and noting how far off we are when the real lines are spoken. So of course Lucifer Butts would soon be explaining how by a great radio invention he was able to convert the stentorian boom of a roaring Senator to the soft lullaby of a croon mamma.

The morning after the New York Times has a lengthy report of the discussion—for Senator Brookhart eventually came through. But we note only those top headlines: "Brookhart Sees a Wet Conspiracy." That explains everything. Lucifer Butts had nothing to do with it. The Wets did it. So! We had been almost too far back to see whether there might have been a sly twinkle in the dark eyes of Mr. Kennedy when he came out on the stage afterward and said: "It must have been at least three of the Four Marx Brothers; you know we are always trying to give you little surprises, and sometimes we have our surprises too."

Later we heard what purported to be the real low-down on this grand and glorious Slip. It wasn't the Wets, it wasn't the Drys, it wasn't even The Girl . . . it was Eddie Cantor JZing from a soap box over in the NBC studios, stealing a plug in the big Collier Hour as one of the opening guns of his radio campaign for President.

Robert G. Wyatt, Bakerfield, Tenn., heard this one from some unidentified station:

Hank: "Gee I ain't got money enough for the big show. Is this the side show?"

Circus Sam: "Side show nothin', young feller, this is a leg show."

Dear Indi: Here's how a program was announced over WOR recently: "Our next group of songs will be; Roamin' thro' the Gloamin I Lost My Heart in the Third Little Show by special permission of the copyright owners, As Long as You're There."—Annette B. Bitterman, 321 Varick St., Jersey City, N. J.

Dear Sir'm: Here's a slip from WJSV. Announcer: "And now we hear Let Me Call You Sweetheart on the Steel Guitar, and then we'll hear from Tom and Bob, When the Work's All Done Next Fall." Say it out loud and say it fast, as he did.—Jack Murchison, Rocky Mount, N. Carolina.

Sit-by-the-Set

Margaret Thelma Carl

I'm going home. The day's been fair
But I'm tired of faces everywhere.
I'm tired of noise and endless chatter
Hark! The rain has begun to patter

I'm going home. It's heaven there
With my radio and an easy chair.
To hear the voice of the falling rain
As it softly beats on the window pane.

I turn the dials and it isn't long
Until I've traveled far on wings of song.
There's static enough, but I could not say
It's as bad as I've listened to all day.

Dear Indi: The most startling thing I ever heard over the Radio was made at the conclusion of the dedication of the Harding Memorial at Marion, Ohio, when I heard the announcer over KFI say: "President and Mrs. Hoover are now leaving the stand and receiving a great ovation. . . . And now Mr. and Mrs. Harding—I mean Mr. and Mrs. Coolidge are leaving—" Well! Villa Knox, 250 N. Union Ave., Los Angeles.

Jim Elderkin announcing over WEBC near the end of a dance program: "Next we'll hear, Please Don't Talk About Me When I'm Gone, Star Dust, and I Surrender Dear, if we have time." And he said the last line without a pause.—Mrs. L. M. Pankhurst, 4612 McCulloch st., Duluth, Minn.

Lady Slipper

Announcer . . . "What, a crimson stained dagger! The print of a bloody thumb . . . and now, where is the body? Another great detective thriller. ladies and gentlemen . . . enthralling mystery . . . you will next hear the voice of Sherlock Holmes . . .

Soprano (cut-in) "Ah sweet mystery of life at last . . ."

Voice of the

58,642! WHO ARE THEY, ESTHER?

CONSIDER the microphone's Adam's apple. Muriel Wilson's voice is endorsed by 58,642 listeners. Let's have pictures and write-ups!—Esther Bergman.

MORE POST SCRIPT

YOUR magazine is wonderful. I wouldn't be without it. Every month it prints pictures and interesting bits about just the ones I like best. Who is my favorite author? None other than the author of "Tuneful Topics"—Rudy Vallee. I wish he'd write other articles every month. His article on "Night Clubs" certainly gives one a bird's eye view of those interesting places.

Emily Post's articles are always good. Just one fault—they're too short. Isn't there room for any longer ones?

"Marcella" always has many interesting bits to add, too.

I think it is a mark of ill-breeding for people to write in such cutting remarks about a magazine on the different stars. Three cheers for "Radio Digest!" Long may it live.—(Miss) Barbara Litchfield, Lyndanville, Vermont.

SCANDAL-LESS

AFTER reading your recent issue, the Summer Number, especially the Coming and Going column, I should say that most emphatically not should you go in for the general run of scandals and divorces as have most of the movie magazines. I admire the reading in the Radio Digest and consider it as one of the highest type of magazines published, but should you go in for the articles mentioned above, it would cheapen it considerably in the public's eyes. There is enough scandal represented in the general run of newspapers and why play follow the leader or copy cat? I know personally I would lose all of my interest in your magazine if you would take a step like that as would most of my friends, and while you might gain hundreds of other patrons, frankly what type of class would you expect to gain? So please don't make any changes in the publishing of your magazine. It is so very interesting as it is.—Therese Meyer.

* * *

ON PAGE 4 of the Summer Edition I note this query "Should we go into scandals, divorces, etc." Here is an emphatic NO and a wish and hope that every reader of your enjoyable magazine will say the same.

So glad that so far no one's personal escapades have been thrust upon us. Yours for the good of all.—H. A. P., Brattleboro, Vermont.

VOTE WANTED

Tastyeast vs. Phil Cook

PLEASE print this letter in your column of Voice of the Listener.

In all the radio magazines and papers on radio news, all talk how wonderful Phil Cook is because he can imitate so many people, but they don't give the Tastyeast Jesters any credit, and they can play and imitate any instrument better than anybody else on the radio, but Phil is not the only one that can imitate anyone. I think Phil Cook is rotten and bet if we take a vote, I bet more people listen to the Tastyeast Jesters than Phil Cook. Come on everyone vote for either and see which is liked the best.

I would like to hear the following Dramatic Sketches come back on the radio: Miss Langworthy with stories about Tiddlewinks; Johnson & Johnson Melodrama, East of Cairo, and Old Curiosity Shop with David Ross, and all the sketches that were on last year.—A Radio Fan.

PRESTO! ONE FOR PHIL

MR. EDITOR permit me please to have a few lines in V. O. L. I would appreciate the answer from all readers to the following question: "Can you name four individuals living today that can present a more varied program, if working together, than Amos 'N' Andy, Phil Cook, and Tony Cabooch?" I hardly think that anyone can imagine another quartette that could do better. Imagine, if you can, what 4 men with about 40 different voices could do if they so desired. They would present all kinds of foolishness.—Harold Mikesell, Box 122, Hollansburg, Ohio.

SEE SEPT. ROTO

I AGREE with J. B. of Belmont, Massachusetts. Let us by all means have pictures of Georgia Backus and Frank Knight. The Radiographs in the May issue were appreciated, but we crave a large photo of Miss Backus in the rotogravure section. Or better still, a picture of the entire "Arabesque" cast, together with one of their scripts re-printed. Since Georgia Backus writes, directs, and acts in this program, is it a wonder it is good?

And let's see a picture of, or read something about Minnie Blauman, who does most of the arranging and a great deal of the accompanying and directing for the Columbia Broadcasting System.

Here's to Backus, Blauman and Knight! How about a write-up on "Gorgeous Georgia" or one of the others?—Julie Gerard.

ABOUT 99% ARE CHAIN

I HAVE been buying Radio Digest now for several months and I think it is a very good magazine. There is only one thing that I find wrong with it. You write too much on artists at stations not everyone can hear. In your June issue you carried a big write-up about Tom Noonan at WMCA. This does the people in the middlewest no good because WMCA cannot be heard out here. I would enjoy reading your magazine much more if you would give more information and pictures of chain artists. You could also improve your program finding service. I would like to make one more request and then I'm through. Will you please put in a photo of some popular chain dance orchestra each month accompanied by a short descriptive article. I will appreciate it very much.—H. H. V.

WHO WANTS WHO'S WHO

I WISH you would start the "Who's Who In Broadcasting" again and print it little at a time in each month's Digest and thus having a list of all popular radio works and entertainers. Hoping to see this and I will continue reading the Radio Digest.—James H. Harrison, P. O. Box No. 112, Otto, Texas.

DOCTOR'S REMEDY FOR WAVE GRAB EPIDEMIC

I AGREE with Mr. Bill in his editorial in July-August issue but what is most needed is some cooperation from the broadcasters.

Just "give a look" at the hash they made of the fine music of the Goldman Band and the Philharmonic, cutting in the middle of fine tonal phrases for some trashy advertising. Why not inquire into what set owners are saying and then estimate what they will do when government control is under consideration?

Think too of the choppy 15 minutes here and 15 there—no continuity—no harmony—and the enormous overplus of blah.

If the broadcasters will not help themselves, why should you ask your very much interested readers to do it?

You will get your support all right if you can persuade the broadcasters to help you.—P. M. Foshay, M. D., 168 Park St, Montclair, N. J.

* * *

REGARDING the "Wave Grab"—Give me the present order of things. I know what I want to hear and can get along without assistance in selecting my entertainment. I like to indulge my moods. Enjoy the magazine immensely.—Mrs. Pearl S. Pettit, Box 364, Neodesha, Kan.

* * *

HAVE been a constant reader of your column in Radio Digest magazine since January and think it a success. I am a "listener of the air" who appreciates all the programs I hear over radio including advertising, cooking recipes, etc. To the "fans" who disapprove of advertising by radio: Heard an announcement from KTAT, Fort Worth, Texas, that the companies whom the radio stations advertise on their programs make it possible for the entertainment we get over the radio every day and night. In England the radio stations do not advertise on the programs, but the people pay for the entertainment they hear over their sets. How many of our Radio Listeners would be willing to pay for entertainment we hear if they would stop advertising?—Mrs. Katie Johnson, Itasca, Texas.

* * *

THREE TIMES AND IN

I READ your invitation to write V. O. L. and although I've written three letters and they've never been published, I'm writing again in hopes this one will be. Why is there never more than one article about Rudy Vallee in your magazine each month? I think Rudy has the most pleasing and most soothing voice on the air, also the best orchestra, plays the saxophone much better than anyone else, and I musn't forget to add, is better looking than any other radio personality I've ever heard! I'm sure there are plenty more who agree with me too. Let's have more pictures, and more stories about Rudy! I know many of us would rather have a story about him than the story about Morton Downey that began in the June issue! It riles me to think of a

Listener

the perfectly good space wasted in Radio Digest on a story about a rather plump young man with a little kid's voice! I'm referring to Morton Downey!—Emma Lloyd Galley, 501 E. Moulton St., Hickman, Ky.

* * *

RUDY'S CORNER

SINCE you asked for our ideas about keeping Radio Digest interesting, we would suggest that you have a picture of Rudy Vallee on the cover of your magazine. We will always welcome more articles and pictures of him in the magazine. This will repay you a hundred fold by an increase in circulation, I am sure.—Mary Krane and Lucile Grahm, Glen Head, N. Y.

I AM a monthly reader of the Radio Digest. My favorite author in this magazine is "Rudy Vallee." To be honest with you, it's the only reason I have for purchasing the Digest. I do wish you would print some nice photos of the following: R. Vallee, J. Crawford, Landt Trio & White and Julia Sanderson & Frank Crumit. In the big photo section (brown sheet) put R. Vallee and Julia Sanderson, not together though.—Miss E. E. Krekell, Plainville, N. J.

I AM writing this note to your column because I am sure it is the only way to reach the greatest number of Vallee fans. I wonder how many Vallee fans would be interested in joining the "Vallee Enthusiasts"—a club formed in honor of Rudy a year ago. The club is still open to real enthusiastic admirers of Rudy Vallee and his Connecticut Yankees. Anyone interested in joining or interested in fuller particulars will receive prompt attention by writing to me.—Evelyn Miller, c/o Caplan, 36 Ludlow Street, N. Y. C.

ONE FOR LOMBARDO

I AM a steady reader of the Radio Digest and I like to be a member of the V. O. L. I am only in this country 4 years, and have heard and seen many orchestras in this country and all over Europe, but I never found a better orchestra than "Guy Lombardo and his Royal Canadians," with the sweetest music this side of heaven!

Can you find a better orchestra that plays all types of music from the Blues to the Fox-Trots and Waltzes? Everyone of their phonograph records is a masterpiece, and can't be beaten.

Give us more about Guy Lombardo and his Royal Canadians "Radio Digest"?—Eugene Steimle, 3858 North 15th St., Philadelphia, Pa.

RADIO DIGEST ROOTERS

OH! What a thrill when one finds a new number of the Radio Digest in the mail box. It is like receiving a letter from the home folks; so dear are the radio people to us. Their voices coming daily into our homes, makes us feel they are really members of our household. The Digest is the most enjoyable magazine that comes into the home, especially do we enjoy the personal Chit Chat and pictures. Our favorite station is WENR. Who can resist the good will and cheer of Everett Mitchell's "Hello Everybody" and his sign off song, "At the End of the Day," a composition by the popular orchestra leader, Frank Westphal. It is a benediction for all of us.—Mrs. S. Laura Matthews, 312 N. Parkside Ave., Chicago, Ill. . . . Enclosed please find check for the amount of Three Dollars ($3.00) for one year's subscription to the Radio Digest, also the information asked for to cast my horoscope. I take quite a few magazines but can truthfully say this, Radio Digest is the most enjoyable and entertaining of them all, because it is such good reading about really live people. Please may my year's subscription begin with the May issue? I would like so much to read Mrs. Graham McNamee's article.—Mabelle Lewis, Foster, Ohio. . . . I have just finished reading the June issue of your magazine and think it is wonderful. I wish you would publish pictures of Milton Cross, Ted Jewett, Wallace Butterworth, announcers, and Lew White, organist, and some more information about them. I also would like to see a picture of the N. B. C.'s New York studios. The full page photographs are especially pleasing and add more interest to your magazine. One of the best articles was "How They Started," by Evans Plummer.—Mary Staley, Frederick, Md.

* * *

JESSICA DRAGONETTE PULLS A POEM

At eventide there comes to me
Thru twilights' magic air,
A voice that might an angel's be,
So sweet with loving care.

Her golden voice comes drifting by
Far-flung thru distant space;
And in the star-lit evening sky,
I have visions of her face.

Dorothy Lee Glass, 113 Alger Ave., Detroit.

* * *

WILL'S BARNSTORMING, WILL RETURN TO CBS

FOR some time I've been wanting to write my opinion of your magazine. It is the best magazine I take. My only regret is that it isn't big enough. For that reason I reread it often from cover to cover just waiting for the next issue. Mrs. Turner in May Radio Digest strikes a clear gong in "Get Wise, Radio Hogs." I'm sure she found many sympathetic souls in other readers. Please answer these questions: Where is Will Osborne? When will he be on the air again?—Betty Jamieson.

* * *

OUR DX DEPARTMENT

PLEASE enter my subscription for Radio Digest for one year, starting with the May number. Enclosed find four dollars to cover cost and postage, together with the coupon taken from one of your issues. It may interest you to know that I hear the N. B. C. program almost every night through the Short Wave station at Schenectady, New York (31.48 metres). Will you kindly tell me, through the "V.O.L." if there are any short wave stations which radiate Columbia System programs? Where can I obtain schedules for stations W2XAF and W2XAD? May I say that the Radio Digest is just the book I have been trying to find. The Chain Calendar has already given me some very useful information.—Arthur Peace, 5 Queen Street, Frodingham, Scunthorpe, Lincolnshire, England.

AS YOU say, in a recent issue of "Radio Digest" the V.O.L. is the readers' page and I hope you may be able to extend this department considerably. It is, in my opinion, the only part of your magazine of much interest to the DX fan. Perhaps you will remember that some time ago you published a letter for me requesting help on certain states which I was desirous of hearing. The generous response from your readers, mainly those in New Jersey, the radio state, has enabled me to increase my log from 180 stations at the time I wrote you to its present mark of 415. Therefore, I feel it is only fitting that I write to thank you for the tremendous help originating through the publication of my letter in V.O.L. Without V.O.L., your magazine would no longer be a "Radio Digest." I am a member of the Newark News Radio Club and would suggest that all DX fans join some radio club if they wish to get a greatly increased pleasure from DX-ing. With the great number of excellent reports on DX-ing, I am greatly surprised that so many writers neglect to give the type of set they operate or the height and length of aerial. Do you consider it anything particularly outstanding for an eastern fan to pick up the coast on a large set with 300 feet of aerial? Here is a summary of my log of 415 stations. About 325 of these are verified, with 35 verifications from stations over 2000 miles away, at least one verification in every one of the 48 states and D. C. except Nevada, all nine Canadian Provinces, Cuba (8) Mexico (10) Costa Rica, Porto Rico, Alaska, Dominica, Argentina, and Japan (2). My best stations are: KGFJ, KXL, KPQ, CKMO, CKWX, TIC, KGBU, LR4, HIX, KDFN, CMBR, JOAK and JOBK. My aerial is 100' long, north and south, about 30-35' high, the set is home-made four tube although all stations are received on loud speaker with four tubes or phones with three tubes. Before I forget, might I suggest that the date of all letters be published?—William Dyson, 72 Cambridge Ave., Hamilton, Ont., Canada

* * *

I HAVE been swamped with letters from my DX friends concerning radio and distance. Try this: Buy 1 square yard of copper window screen. Sodder two edges together. Then sodder a copper bottom on this. Then fill with charcoal. Sodder ground wire to center of copper bottom. Sink four feet into ground. Keep very wet. Pour a pail of water on ground post every day. I hope this answers your desire for distance. I would like to add that I am in favor of having a DX column in Radio Digest. Would like to hear from some DX fans who have reached out more than 2600 miles. I have a 7-tube Majestic radio. I received 125 letters from Radio Digest and am going to write to all of you. Just give me lots of time. Would like to hear from 125 more if they have any dope.—O. L. Case, 403 Clairmont, Port Huron, Mich.

Come on Vol-ians—don't let your ideas get stale. Air them in these columns.—Editor.

Throughout the Week

8:00 a.m.—WEAF—Gene and Glenn. Quaker Early Birds. Comedy songs and cheerful chatter. (Daily ex. Sun.)

9:30 a.m.—WABC—Tony's Scrapbook, provides inexhaustible fund of material for radio programs. (Daily ex. Sun.)

9:45 a.m.—WABC—The Old Dutch Girl still incognito, gives jingles in rhyme and song. (Cudahy Packing Co.) (Mon., Wed. & Fri.)

10:00 a.m.—WABC—Ida Bailey Allen, charming hostess of the Radio Home Makers Club in household hints. (Mon., Wed. & Thurs.)

10:00 a.m.—WJZ—Ray Perkins, genial trail-blazer of comedy doffs silk topper only to goddess of satire. (Libby, McNeil & Libby.) (Thurs. & Fri.)

3:30 p.m.—WABC—The Three Doctors offer panacea for world's ills. Russell, Pratt & Sherman, "M. D.'s" of radio, put you in hysterics and then operate. (Tues., Wed. & Thurs.)

5:45 p.m.—WABC—Edna Wallace Hopper reveals secrets of eternal youth. She approaches Seventy with spirit of seventeen. (Wed. & Fri.)

6:45 p.m.—WABC—Bird and Vash—Another pair of Hoosier gossipers. (Daily ex. Sun.)

6:45 p.m.—WJZ—Lowell Thomas, Voice of Literary Digest, echoes reports of events in the happening. (Daily ex. Sun.)

7:00 p.m.—WJZ—Amos 'n' Andy, still mutilatin' the King's English. (Pepsodent.) (Daily ex. Sun.)

7:30 p.m.—WJZ—Phil Cook, the Quaker Man whose gifted larynx conjures up for you nearly a dozen characters in fifteen minutes. (Quaker Oats Co.) (Daily ex. Sat. & Sun.)

7:30 p.m.—WABC—Miller and Lyles, another vaudeville comedy team gone radio. (Mon. & Wed.)

7:45 p.m.—WEAF—The Goldbergs give you peek into Jewish family life. (The Pepsodent Co.) (Daily ex. Sun.)

7:45 p.m.—WABC—Camel Quarter Hour goes quickly with Mort Downey and Tony Wons at the mike. (Mon. & Sat.)

8:00 p.m.—WEAF—Julia Sanderson and Frank Crumit, in humorous dialogue and song. (Tues.) (Thurs. at 9:00 on WJZ.)

8:00 p.m.—WABC—Arthur Pryor's Cremo Military Band playing those stirring marches in true military style. (Daily ex. Sun.)

8:00 p.m.—WEAF—Rudy Vallee—Radio's busiest crooner—George White's Scandals—Fleischmann, and literary efforts. (7:00 p.m. Sunday, WJZ.)

8:30 p.m.—WABC—Kate Smith, the voice with a million dollar croon—now protege of Congress Cigar Co. (Mon., Wed., Thurs. & Sat.)

8:45 p.m.—WJZ—Eddie East and Ralph Dumke, Sisters of the Skillet and Spinning Wheel. What is your problem. Send it in to these burly, corpulent sisters and let them solve it for you—beyond recognition. (Tues., Thurs. & Fri.) (Procter & Gamble.)

10:00 p.m.—WEAF—B. A. Rolfe and Lucky Strike Orchestra attaining the supreme heights of jazz. (Tues. & Thurs.)

10:30 p.m.—WJZ—Clara, Lu and Em. Three Modern Minervas *settin'* in *jedgment* on universal problems. (Super Suds) (Daily ex. Sun. and Mon.)

11:00 p.m.—WABC—Bing Crosby. The last word in baritones. (Daily ex. Sun.)

11:30 p.m.—WJZ—Russ Columbo. NBC's precious find between the high's and low's on the music scale. Hales from Hollywood. (Daily.)

Sunday

12:30 p.m.—WABC—International Broadcast always brings over something unique from opposite side of Atlantic.

7:15 p.m.—WEAF—Gilbert and Sullivan Gems grow brighter with the passing years—especially as interpreted by Mary McCoy and Ivy Scott, sopranos; Mary Hopple, contralto; Charles Harrison and Harold Branch, tenors; Walter Preston and John Barclay, baritones; and Charles Pearson, bass.

7:15 p.m.—WABC—Fray and Braggiotti. Such a peppery piano pair. Well, one's from France, the other's from Italy.

8:15 p.m.—WJZ—Collier's Radio Hour. Welcome home!

8:00 p.m.—WEAF—Chase & Sanborn support Eddie Cantor's mock campaign for President.

10:15 p.m.—WEAF—Best Sellers with Ted Weems' Orchestra and Ilo May Bailey, vocalist.

10:45 p.m.—WEAF—Sunday at Seth Parker's.

Monday

3:45 p.m.—WABC—Ben and Helen—Mr. Alley and Miss Nugent, of course, in their inimitable song duets.

Features

8:00 p.m.—WJZ—Roxy Symphony Orchestra—straight from one of New York's grandest theatres.

9:00 p.m.—WEAF—A. & P. Gypsies with Harry Horlick's Orchestra and Veronica Wiggins, contralto—Frank Parker, tenor.

9:30 p.m.—WEAF—General Motors—Martha Attwood, soprano; male quartet; Frank Black's orchestra.

10:00 p.m.—WEAF—True Story in which Cecil Secrest and Nora Sterling prove that truth is stranger than fiction.

9:30 p.m.—WJZ—Chesebrough Real Folks. Popular rural sketch with George Frame Brown, G. Underhill Macy, Virginia Farmer, Tommy Brown, Elsie May Gordon, et al.

10:30 p.m.—WABC—Arabesque. Fascinating desert play with alluring lines and strains.

Tuesday

6:45 p.m.—WEAF—Swift Program. A comedy sketch with the Stebbins Boys, Parker Fennelley and Arthur Allen.

7:00 p.m.—WEAF—Mid-Week Federation Hymn Sing, the mixed quartet being: Muriel Savage, Helen Janke, Richard Maxwell, Arthur Billings Hunt, and George Vause at the piano.

9:00 p.m.—WABC—Henry-George, in the parody mart. (Continental Cigar Co.)

10:00 p.m.—WABC—Ben Bernie the old Maestro and his Blue Ribbon Orchestra. (Blue Ribbon Malt.)

8:30 p.m.—WEAF—National Dairy Virtuoso. Alfred Wallenstein's Orchestra and Jubilee Singers.

8:00 p.m.—WJZ—Armstrong Quakers—with Lois Bennett and Mary Hopple supplying the feminine voices.

Wednesday

6:00 p.m.—WABC—Bill Schudt's Going to Press wherein publishers and editors use the spoken word anent the parlance of print.

7:15 p.m.—WEAF—Boscul Moments—with Mme. Frances Alda, prima donna from the Met. and Frank LaForge, well-kown pianist. (Wm. Scull Co.)

8:15 p.m.—WEAF—Snoop and Peep, two cub reporters in the persons of Charles Finan and Paul Winkopp.

8:30 p.m.—WEAF—Mobiloil Concert. Program par excellence with Gladys Rice as the *piece de resistance.*

Selected by the Editors

To provide you with the outstanding features for each day of the week the RADIO DIGEST *program editor has selected the programs indicated as Blue Ribbon. Do you agree with her selections? (For stations taking the programs, see adjoining list.)*

9:00 p.m.—WEAF—Halsey Stuart Program offers semi-classical food for music lovers.

9:30 p.m.—WEAF—Palmolive Hour featuring Olive Palmer and Paul Oliver in their charming delivery of well-loved songs.

11:00 p.m.—WEAF—Nellie Revell, the Voice of Radio Digest gives an earful of what a radio fan should know.

9:00 p.m.—WEAF—Arco Dramatic Musicale offering the delightful male group of singers known as the Rondoliers Quartet.

9:30 p.m.—WJZ—Maxwell House Ensemble with Don Voorhees' orchestra and always a brilliant guest artist.

Friday

7:00 p.m.—WEAF—Major Bowes' Family orchestral portion of which is directed by Yasha Bunchuk.

8:00 p.m.—WEAF—Cities Service featuring the lovable Jessica Dragonette and the Cavaliers.

8:30 p.m.—WABC—March of Time pushes aside all impediments and forges irresistibly ahead with its news dramatizations.

10:00 p.m.—WABC—Pillsbury Pageant with Toscha Seidel, the Houdini of the Violin.

10:00 p.m.—WEAF—Paul Whiteman's Paint Men. A colorful program with Mildred Bailey, blues singer. (Allied Quality Groups.)

10:30 p.m.—WEAF—RKO Theatre of the Air lifts air wave curtain on dazzling performances—just a blinding galaxy of stars always.

Saturday

5:00 p.m.—WABC—Saturday Syncopators presided over by Nat Brusiloff, Clowning Conductor.

9:00 p.m. — WEAF — General Electric Hour and Floyd Gibbons takes you for a little ride in the land of Science.

10:00 p.m.—WABC—Hank Simmons' Show Boat brings you dramatizations of the old-fashioned melodramas where virtue and honesty always win out in the battle of vice and crime. Harry C. Browne and his able cast.

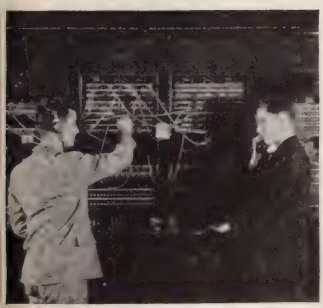
Take your choice

Learn any of these exciting branches of radio—aircraft radio . . . broadcast station or studio . . . direction finder or radio compass . . . disc and film recording . . . talking pictures . . . servicing of home entertainment equipment . . . television.

LOOK! Here [illegible] and airplane!



A SHORT WAVE operation . . . maybe they're sending a program across the ocean to Europe or Asia!

HAVE you real radio talent? If so, there may be a future for you in this thrilling industry. But you'll never know how much talent you possess unless you develop it. So start now. Get the basic training here offered. Be ready for the future . . . by study at RCA Institutes.

Learn Radio at RCA Institutes

Invest your spare time in learning the interesting branches of radio you see listed above. Study is made simple at the RCA Institutes, through advanced methods and association with the largest, most complete research laboratory in the radio industry. The four resident schools—at New York, Chicago, Boston and Philadelphia—offer elementary and advanced courses in practical radio. Courses based on 22 years experience, constantly revised to include latest developments.

HOW WOULD YOU like to be in the main control room of a great broadcasting studio . . . where programs start that entertain millions?

Win Radio Scholarship

If you cannot attend the resident schools, RCA Institutes Extension Courses enable you to study at home. Special laboratory equipment furnished. Outstanding graduates of extension courses become eligible for free scholarship at nearest resident school. All tuition costs moderate. So write today for free catalog, full details. When will you take the opportunity to become a part of a thrilling industry with great future possibilities? Today? The coupon makes it easy.

RCA Institutes, Inc., Dept. DR-10, 75 Varick Street, New York, N. Y.

Gentlemen: Please send me your General Catalog. I am checking below the phase of radio in which I am particularly interested.

- ☐ Aircraft Radio
- ☐ Broadcast Station or Studio
- ☐ Direction Finder or Radio Compass
- ☐ Disc and Film Recording
- ☐ Talking Pictures
- ☐ Servicing Home Entertainment Equipment
- ☐ Television

THE RADIO STATIONS WITH A WORLD-WIDE REPUTATION

The first time presidential election returns were put on the air a Westinghouse station did it. The first church service by radio, the first radio program from a theater stage, first radio addresses by cabinet members, first boxing contest blow-by-blow, the first baseball game play-by-play, the Armistice Day address of Marshall Foch in 1921 . . . all these historic thrills were enjoyed by listeners to the first of the Westinghouse Radio Stations.

Westinghouse Radio Stations broadcasts have flashed halfway around the world to Australia. They have broken the frozen stillness of the South Pole and invaded the icy wastes of the Arctic.

Wherever you go in America you'll find KDKA, WBZ-WBZA, KYW-KFKX, and W-8-XK—either one or all—familiar names to the folks who follow what's new and important in radio. Almost everybody, at one time or another, listens to one or another of the Westinghouse Radio Stations. And 980, 990, or 1020 kilocycles are good numbers to keep in mind when you're in search of interesting programs.

WESTINGHOUSE • RADIO • STATIONS

Lucky Bing!

(Continued from page 32)

pose he had kept on studying law—probably would have starved to death before he finished college.

Now they were definitely in the show business. But it was by no means all sunshine and roses. They made good at the Boulevard theatre in Los Angeles in a skit called *Syncopation.* Had twenty weeks of it touring Fox houses. Then they joined Will Morrissey's co-operative show, *Music Hall Revue* which did well in Los Angeles then flopped in San Francisco. But they met Paul Whiteman here and signed a contract with him by which they joined him later at the Tivoli in Chicago.

They became known as the "Rhythm Boys" and just when they thought they had fully arrived they met disaster at the Paramount theatre in New York. It was a sickening flop for both of them. But later they were joined by Harry Barris and things looked brighter, although they had their ups and downs until finally they left Whiteman in California after they had made the picture, *The King of Jazz.*

Immediately after leaving Whiteman, Bing and his two companions were engaged to make talking and singing motion picture shorts. In all they made ten, working for Pathe, Metro-Goldwyn-Mayer, Paramount and RKO. Then another of Bing's big breaks.

For several years the Cocoanut Grove, in Hollywood, had been the most popular of coast night clubs. Everyone had gathered there. But last fall found it in a terrific slump. The management, anxious to make the place popular once again, started a search for a means to attain this end. Their search led them first to Bing, Barris and Rinker, who had just finished the last of their pictures. Then they found Gus Arnheim, an orchestra leader who was not working at the time. It was decided that "The Rhythm Boys" and Gus Arnheim and his band would work side-by-side in an effort to draw a crowd.

And they did draw a crowd, such a crowd that dozens were turned away nightly. Many elements contributed to the tremendous popularity of the Cocoanut Grove—the singing of "The Rhythm Boys," the playing of Arnheim and his music—but it was due chiefly to the baritone solos of Bing Crosby. Bing's singing soon became the talk of the West Coast. It was not long before he was on the tip of every tongue in the East. The Victor Talking Machine Company, hearing of Bing's popularity, signed him to sing "Just a Gigolo" and "Wrap Your Troubles in Dreams." Then the Brunswick people came along with a fat long-term contract and Bing signed with them. He has made nine discs for them so far, all of which have been best-sellers. Up to September 1 his record of "Just One More Chance" had passed well over the 30,000-mark, which is something of a record.

While working at the Cocoanut Grove Bing found time to collaborate with Harry Barris on another song which later swept the country and which Bing helped to popularize. The song was "I Surrender Dear."

After nine months at the night club, Bing separated from Barris and Rinker for the first time in three years and left the Cocoanut Grove in May to make four motion picture featurettes. The first two, "I Surrender Dear" and "Just One More Chance," are to be released within a few weeks.

Now that you have been shown how Bing Crosby finally stepped into the spot he now occupies you may be interested in a close-up word sketch.

In his wearing apparel Bing favors browns and blues. Several years of residence in sunny California have resulted in his unconsciously dressing as though he were in a warmer climate. He usually appears in the studios with white, gray or light brown flannel trousers and sports coat. He wishes he could wear light-colored summer ties throughout the year.

During all of his rehearsals and all of his broadcasts Bing wears a hat, usually a lightweight felt one. He is never hatless in the studios. This is not a superstition. He always has sung and rehearsed that way when not appearing on the stage or in a night club.

If the weather is fair Bing can be found on the golf links, riding horseback through Central Park or swimming at a nearby beach. He likes all forms of exercise but prefers out-door sports. He retires every evening before midnight and arises at 9 A. M. He never leaves a call or needs an alarm clock to awaken him. He finds time for some form of exercise every day.

The Challenge

(Continued from page 20)

the station at fever heat. Wild dashes in automobiles were made at a moment's notice from the station to the remote control room in Paris Inn.

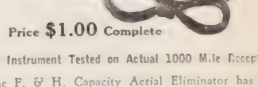
Perhaps there is no better means of illustrating public interest in the broadcast of this murder trial than the poll taken by KNX of its radio audience as

(Continued on page 87)

USE A

REESONATOR

for



Sharp Tuning Distance and Power

Now Only $3.95

NO —the Reesonator is not [illegible] on the market for [illegible] over three years and has [illegible] satisfied customers throughout the United States, Canada and in fact, the Reesonator is in use thruout the entire world. Its principle is used in some high priced modern sets of today. The Reesonator will increase the selectivity and power of your machine to the equivalent of two extra tubes. The Reesonator will enable you to play distant stations with dance volume, that were barely audible without it. It is connected across aerial and ground wires, and can be done by anyone without tools in a minute. The Reesonator is only recommended for sets having an untuned antenna or [illegible] tube such as Atwater Kent models 30, 32, 35, 37, 38, 48 and 49; Radiola models 16, 17, 18, 33, 81 and 82, Crosley Bandbox and Jewelbox and many models in Victor, Temple, Silver-Marshall, General Electric, Westinghouse, Apex radios and many others.

F. & H. CAPACITY AERIAL

Price $1.00 Complete

Every Instrument Tested on Actual 1000 Mile Reception

The F. & H. Capacity Aerial Eliminator has the capacity of the average 75 foot aerial 50 feet high. It increases selectivity and full reception on both local and long distance stations is absolutely guaranteed. It eliminates lightning dangers, unsightly poles, guy wires, mutilation of woodwork, etc. It does not connect to the light socket and requires no current for operation. Enables set to be moved into different rooms with portable use convenience. We predict this type of aerial will be used practically entirely in the future. Installed in a minute's time by anyone. And is fully concealed within set. Return [illegible] if not satisfied.

8,000 dealers handle our line. Dealers! Over 80 leading jobbers carry this line; or order sample direct.

The Tent Show

(Continued from page 29)

an' snapped his gallus. "I need Mose right here to hum."

"I'll hire him an' pay fur et," says Dan'l an' run his hand down his pants pocket and jingled some coins.

"H-mmm! Thet's different — how much?"

"What's it worth to ye?"

"Well, I ain't in the habit of rentin' him out, but considerin' he's got a right good bark I figger two dollars is cheap."

"Why, you ol' skinflint! I ain't buyin' him outright an' payin' a bonus besides. You oughta be glad to let me take him off yer hands an' feed him once. A quarter'd be too much."

"Mose'd consider that a rank insult, Dan'l Dickey."

"Fifty cents then, an' I'm gettin' robbed."

"Nope, but I'll compromise on a dollar an' you give 'im his evenin' meal."

"Ye don't cal'late he'll be insulted do ye, at thet price?"

"I'll bring him back in the mornin'."

"An' ef there ain't nothin' stole I'll pay ye then."

"No sir-eee! Ye pay now, or he don't go et all."

"Can't ye trust me, Hirum?"

"Jest the same as you do me, an' thet's as far as ye can throw an' ol' she bear by the tail."

"Well, to save argyment I'll pay yu now. But I want a receipt fur et. Ye can't be comin' back to ask for et agin in the mornin'."

Hirum chuckled as he received the four quarters Dan'l doled out to him. He pondered over the line Dan'l included in the receipt,—"for such uses as payee may put him to"—but figgered it was jest one of Dan'l's peculiar'ties. Mose looked back in surprise when Dan'l started leadin' him away.

What Hirum woulda thought an hour later to see Mose tryin' to be eddicated to act like a pack o' blood-hounds might be another kind of peculiarity. Hoaker an' Dan'l were tryin' every which way to make him do somethin' besides sit on his haunches in the middle of the stage an' look either tho' he was mighty abused or the world had all suddenly gone loony.

Rigs of all sort was comin' into town bringin' whole families. They had some gasoline torches flarin' out in front of the tent. But Mose jest set thar. Finally Dan'l had an' idee he'd wake up at the smell of a juicy piece of beef an' sent out for some.

In front folks was clappin' their hands an' raggin' the manager to start the show. Right in the middle of all this in walks the sheriff demandin' to see Dan'l. Finally they gits together off in a corner and the sheriff says, "Neville was up to see me an' swore out a warrant against this troupe of actors. Wants me to run 'em outa town. Now what in thunder am I goin' to do?"

"They ain't done nothin' yet to be 'rested for, hev they?"

"But Neville found some old law datin' back to 1784 which makes theatre shows illegal."

After they had gabbed along this way Dan'l got another sudden idee.

"You be somewheres else till about time for the hound to be chasin' 'Liza across the ice. Then ye kin bust in an' stop the show an' we'll see what happens. Think ye kin do that, Sheriff?"

"Don't see no reason why I can't."

The tent was plumb packed full an' everybody was raisin' cane for the curtain to go up. Dan'l got Mose back to one side of the scenery. Somebody rang a little bell, an up went the curtain. They had some real darky banjo players an' some white folks made up to look like darkies. Everybody was havin' a good time laughin' an cryin' accordin' to what was goin' on durin' the show. Mose began to growl an' act mean so Hoaker was afraid he really would bite somebody. When it came time for Liza to start playin' leap frog on the ice Hoaker insisted Dan'l would have to hang onto the dog as he ran across the stage. This was more than Dan'l bargained fer an' he said he wouldn't do it without extra pay. But right then up pops the sheriff an' stops the show with Dan'l in the middle of the stage a Kentucky colonel's hat pulled down over his face. The sheriff stood like one of the actors his hand stretching out toward the performers.

"I declare that you are all under arrest for violatin' the statute of the General Court of 1784," he said.

For a minute the audience gasped and didn't make a sound. Then they hissed an' howled. Dan'l looked pained but resigned.

"Guess you're jest doin' your duty, sheriff," he said. The law is the law—but you don't have to arrest 'em all do ye? Wouldn't just one of 'em be able to answer for the rest?"

"Mebbe one would be enough to fine."

"Then arrest Hirum Neville."

Well, that sure was a surprise. Neville had been hidin' himself around by the door. Now he comes snortin' down the aisle shakin' his fist and demandin' the sheriff to do his duty.

"You arrest Dan'l Dickey. Ain't he actin' right there in front of you? Arrest Dan'l with all the rest of 'em."

"Why Neville, that's no way to act when I jest come up here to save you from gettin' into trouble by breakin' the law."

"Me—ME breakin' the law!"

"I told ye a dozen times not to hire out yer dog for this performance. But here he is an' I caught him jest in time from chasin' that poor gal across the ice. But not too late to save him from actin' in the show."

"That's right Dan'l, you've done your best to protect him," said the sheriff. Mose began to bark an' pull at the chain.

"Why you wicked ol' reprobate—you—you—"

"See here now, 'tain't goin' to do no good for ye to be callin' names like a naughty boy. I hope you ain't denyin' ye hired out this dog fer tonight for such purposes—"

Hirum's jaw fell, and he looked sheepish toward the door.

Then Dan'l read the receipt which Neville had signed. By this time the scene was gettin' more excitin' than Uncle Tom. The sheriff called for a justice of the peace and a minute later court was convened right there on the stage with Dan'l presidin'.

"Et's all a lie"! shouted Neville above the hubub.

"Thet'll just cost you four dollars for contempt," said the Justice Dan'l. "How much did the accused get for haulin' the show?"

"Four dollars," said Mr. Hoaker.

"An' how much for pitchin' the tent on the lot?"

"Another four dollars," responded the show manager.

"Thet's eight dollars. The defendant will pay eight dollars to the sheriff now."

"How about the four dollars for contempt?" asked the sheriff.

"Thet'll go to me fer takin' care of the dog," said Dan'l, "an' now we'll proceed with the show."

The Challenge

(Continued from page 85)

to the innocence or guilt of David H. Clark.

Persons voting for acquittal, numbered 6,122, and 498 for conviction, bearing out the parallel of public opinion to that of the jury, which brought in a vote of 11 for acquittal and 1 for conviction.

KNX has won the greatest battle of its career. But it is not stopping there.

Guy C. Earl, Jr., President of the Western Broadcasting Company, owners of KNX, and Naylor Rogers, Vice-President and General Manager, are looking into the future. The broadcast of the trial of David Clark is just a beginning of the most sensational and revolutionary radio service ever attempted . . . the KNX Newspaper of the Air!

News events from all over the world will be broadcast in dramatic style almost as soon as they happen, and long before word of them ever reaches the public through newspapers. KNX is leading the way into a new untouched field in Radio!

KNX is making radio history!

Gabalogue

(Continued from page 53)

Jesse into the union. And Jesse bought his first pair of long trousers for the occasion. He wasn't 16 years old yet . . . but he hung around the musicians' headquarters and picked up odd jobs playing for local dances. Then he went to Spokane and played the piano in a motion picture house. Then the pipe organ came in and while Jesse had never had a single organ lesson in his life up to that day . . . in fact he's never had one yet . . . he played that organ. And Sid Grauman, great impresario of the coast, engaged him to play the organ in his Million Dollar theatre in Los Angeles. Mr. Grauman, good showman that he is, saw the possibilities of a solo organist and began advertising Crawford, getting out special posters about him . . . and making Crawford's organ playing a feature of the show. Then Sam Katz of the Balaban and Katz interests . . . took him to Chicago where he was also a spectacular feature of their cinema palaces.

ACROSS the street from where Jesse Crawford was playing was a young lady playing the organ in a rival theatre And playing it very well, too. And like all good business men, when the opposition looms up too strong, Jesse proposed a merger. She accepted and the twin organs were installed in the Chicago theatre, with Mr. and Mrs. Jesse Crawford presiding. And Mrs. Crawford plays so well, that when Mr. Crawford wants to go away, she can keep the home organ burning just as well as he can.

Then came the invitation to make records. He's made over 150 records, and believe-it-or-not, there are more of them sold throughout China and the Orient than in the United States. I don't know what the psychology of that is. After five years in Chicago . . . when Mr. Katz had helped Mr. Zukor and Mr. Lasky build the Paramount theatre in New York, Crawford was brought here to open it.

Crawford's rise to popularity since his Paramount debut is theatrical history. And now the most brilliant chapter of all has just been started . . . his connection with the National Broadcasting Company . . . making it possible for the world to hear Crawford play the organ as he has never played before."

Just as EASY as it looks

to become a popular musician this simple as A-B-C way

STOP cheating yourself out of musical good times. Stop thinking that learning music is nothing but one grinding session of monotonous exercises after another . . . days, months and years of difficult technique under the thumb of a private teacher.

Take a look at the above diagram. Looks easy, doesn't it? Well, it's every bit as simple as it looks. First a note, then a letter. Plenty of clear instructions tell you how each bar is played—lots of diagram pictures show you how, then you do it yourself and hear it. Everything to make learning a joy. In fact, the U. S. School of Music has made the reading, and playing of music so simple that you don't have to know one note from another to begin.

Your first thrill comes with your very first lesson. For you are given a piece with a real melody to play by **actual notes.** Dreamy waltzes, stirring marches, sparking sonatas follow in short order. No standing still. You become a capable performer months sooner than you could ever expect to by the old-fashioned way. Besides, you receive all the music you need **at no extra cost.**

Play the "Blues" Away

How can you be content to sit around at party after party and listen to others do all the playing—see them showered with admiration, invitations—when your life-long ambition to become a popular musician is now so easy to realize? Experience the personal satisfaction that comes from being able to play "when", "where," and "what" you like for your own amusement and the entertainment of others. Don't be afraid to begin your lessons at once. Over 600,000 people learned to play this modern way — and found it as easy as A-B-C. Read the list of instruments in the panel, decide which one you want to play and the U. S. School will do the rest. No matter which instrument you choose, the cost in each case will average the same—just a few cents a day.

Strike up the Band

(Continued from page 24)

through the palace. The night of the concert we were told to play the Russian National Air until the lights were turned up brightly, and then to follow it with our own "Star Spangled Banner." We must have played their national anthem for fifteen minutes before the lights were turned up. And then, as we started playing The Star Spangled Banner, a man in the first gallery started waving an American Flag. He had no more than started when a hand came trough the curtain behind him and tried to take the flag away.

Returning from St. Petersburg we stopped at Warsaw. While we were there Leoncavallo sent for me and complimented me highly for my playing of the serenade from "Pagliacci." I was told later that he was greatly surprised to find that it was a trombone that had played his serenade. He said the tone was so beautiful he could hardly believe it had issued from a trombone.

My first appearance in England was at Prince Albert Hall, London. We gave a wonderful concert that night and the London press literally heaped praise upon the band. But when they got to the trombone solo by Pryor they asked their readers to wait for the next issue, as they wished "to consult some of the English trombone players to ascertain whether the instrument Mr. Pryor played was a trombone."

In the next issue they said my instrument was the same sort of trombone that all English trombone players used, and, after much praise for my performance, asked the English players why they didn't play solos like Pryor's instead of "The Death of Nelson" all the time.

I had the distinct honor of playing solos before King Edward VII both at Sandringham and Windsor Castles. Mr. Sousa was decorated at the Sandringham concert. An interesting point in connection with this concert was that of all the music selected for it, the King was most pleased with an arrangement of religious songs of America. Also, the first request of the King was for a number of my own called "The Coon Band Contest." I learned later that the then Duchess of Marborough the former Consuelo Vanderbilt, had heard me play this in New York and told the King about it.

My publishers in the United States had failed to copyright this number in England and all the English publishers pirated it. Some months later one of the publishing houses in London mailed me a ten-pound note, saying they believed I was entitled to something and would I please accept the note. I returned it to them with a letter stating that I could hardly blame them for publishing my stupidity.

There was one thrilling moment during one of our London concerts I never shall forget. The theatre was packed. As the piccolo, trumpets, trombones and drums marched forward to the footlights in the finale to "Stars and Stripes Forever," the entire first row in the gallery arose and waved silk American flags back and forth in tempo with us.

On our return to this country we resumed our touring. My reputation as a trombonist almost brought on disaster during one of these trips. It was twenty-five years ago when Sousa's Band opened the great Kansas City Convention Hall. The auditorium was crowded, and in the great audience were eight or nine thousand Missourians. Missourians are a loyal and clannish lot, and while many of them wanted to hear the band, quite a few of them wanted to hear their fellow Missourian, Arthur Pryor.

The concert proceeded to its closing number. As usual I played my solo. But it appeared that the delegation from my home state still wanted more of me. During a pause some leather-lunged fellow-native yelled:

"Pryor!"

To hundreds of pairs of ears the word came through as "Fire" and was promptly repeated as such. Pandemonium broke loose in different parts of the hall, and people began rushing for the doors. For a few moments it looked like we were going to have a catastrophe of first-class proportions.

Then Sousa raised his baton and signalled the band to play. Only those nearest to him were able to catch the order above the din, but the brasses blared, the drums rolled and we were able, presently, from the rhythm of the baton, to get the idea that "Dixie" was the tune. As the full volume of the stirring strains swelled through the auditorium the audience regained its senses and returned to its seats.

On the rest of the tour the Sousa programs carried a footnote requesting that listeners refrain from calling for Pryor during a concert because of the danger that the word should be mistaken for "Fire."

I remained with Sousa's Band until 1903. I was thirty-three years old when, on the death of my father, I returned to St. Joseph to take over the leadership of the original Pryor Band, organized many years before by my father.

It seemed to me there was room in this great country for two national organizations of the type of Sousa's Band. With this thought in mind I began a busy period of expansion. New players were engaged and, of necessity, some were retired. Rehearsals were inaugurated. We worked many hours and many days before I was satisfied. And then we went East.

On the evening of November 15, 1903, Arthur Pryor's Band made its first New York appearance and played its first big national concert at the Majestic Theatre. Many of the men who played with me that night are still with me in my Cremo Military Band. We were acclaimed by both the public and press.

One important consequence of that concert was an engagement to play a series of concerts at Asbury Park, N. J., the following summer. My band has played there twenty-three summers since then. Winters found us at Miami. Willow Grove Park, near Philadelphia; Luna Park, at Coney Island; the New York State Fair, at Syracuse, and the Rochester Exposition heard us regularly. In addition there were swings from coast to coast and tours in foreign lands. In the five years between 1904 and 1909 we made six coast-to-coast tours of the United States. Foreign countries visited included Mexico, Canada, England, Ireland, Scotland, Wales, France, Germany, Belgium, Russia, Holland and Norway.

In between concerts I have found time to turn out more than 300 compositions, including the light operas "Jingaboo," "On the Eve of Her Wedding Day" and "Uncle Tom's Cabin." This total includes nearly a hundred marches in addition to overtures, character numbers, songs and other pieces.

Perhaps my most popular composition is "The Whistler and His Dog." This piece has an interesting and authentic history. When I was a boy I had a little dog to whom I was greatly attached. He was not very responsive to a spoken command, but he never failed to answer to a whistle, even forsaking the joys of a dog fight at my summons. It was in memory of this little animal that played such a part in my youth that I created this number some years later.

I mentioned earlier that the musical strain ran through our family. It has gone on one generation more. Arthur, Jr., my eldest boy, could, I believe, be the finest band conductor in this country today. Until four years ago he was my assistant conductor and an excellent cornetist. Since leaving my band he has been engaged in advertising and Radio production work. They tell me his staging of "The March of Time"

has created something of a sensation.

Roger, my other boy, has been seen on the stage in many Broadway successes in the last few years. He, too, is an excellent musician, playing the piano, the saxophone and the trombone. He plays jazz when his father isn't home.

Two more Pryors are musicians. They are my brothers, Samuel, Jr., and Walter. Sam came on from Kansas City to drum in the Cremo Military Band, while Walter came from St. Joseph to play the cornet with us.

Right now I'm having the greatest time of my life and so is every member of the band. Many of us have played together for twenty-seven years; some less. But always we have tried to build up the love for band music and the reputation of our band. And now, in fifteen minutes, we can carry a greater message than we did in nearly three decades.

It's a great thing, this Radio!

Radio Awing

the air corps spent during the entire movement were in Washington on Memorial Day. Cloudless skies provided ideal flying weather, but there was a record to maintain. The big formation had piled up nearly 40,000 hours of flying time without a single serious accident. A bad crackup on the last day would wreck irretrievable damage. In Washington the formation was staging the final review, before not only the high command of military America, but of the world at large. There were representatives of every government maintaining a legation or embassy in the nation's capital in the throng that assembled to watch the first air division's last patrol.

Officers stood "on the line" at Bolling field that morning and clenched their fingers, praying silently that no mishaps would mar the exercises. Tense, they glued their eyes to the sky and watched anxiously for any slipup.

And they saw the air corps stage a perfect requiem for its 1931 maneuvers, and bring to a close, without a hitch, the greatest aerial demonstration the world has even seen.

Damrosch Resumes Classes

Walter Damrosch has returned from Hollywood in time to get the term of the NBC Music Appreciation Hour under way by October 9. More than 56,000 instructor manuals have been prepared for distribution to scholastic institutions all over the country. Many new features have been added to the fall manual. Preparations have been made to take care of an increased enrollment.

Smith Ballew

(Continued from page 9)

from orchestral circles. The success of Paul Whiteman, as a dance band conductor, was of little moment to talent in the Lone Star State. So he chose the life of a real estate salesman.

In June, 1925, after spending more than two years boosting Texas real estate, Ballew was lured back to the dance orchestra world. Into the Fort Worth Club, an exclusive millionaire's retreat, he moved with a band of five pieces, later enlarged to ten. Before those days Texas orchestras had no conductors, but touring bands from the East set the new fashion and Ballew took up the baton as a conductor.

His musical ambition soon led him away from Texas and the millionaire's club. For three years he played his banjo and guitar in many states, with many orchestras, at times being doubtful how he would obtain meals for his wife and himself. But always his courage held forth.

In New York he opened with George Olsen in *Good News,* the first pay checks proving to be good news, but once on the road with the company he refused to take a wage cut and subsequently left the company. Prior to that time he had played with Ben Pollock, at the Black Hawk Cafe, Chicago; with Ted Fiorito, at the Sinton Hotel, Cincinnati, and for several months he directed his own orchestra on a tour of Eastern and Middle-West states.

After his break with the *Good News* company, Ballew played with Freddie Rich and Meyer Davis, at the Astor Hotel, and with the Mayhew Brothers-Ballew orchestra at the California Ramblers Inn, in the Pelham Bay section. But sometime during early 1928, before these latter engagements, fate was unexpectedly kind. Ballew, the banjo player, the orchestral leader, found that he could make more money singing for records. He had a "sort of a tenor voice," untrained. Never before had he sung.

Within a year, by reason of his recordings, Ballew had gained a degree of financial independence, aside from proving his musicianship. It was then that Scheuing asked him to organize an orchestra for broadcasting. Ballew, however, was skeptical of his potentialities as a broadcaster, and he paused for many weeks before taking the final step. Then he was heard from Whyte's restaurant.

By this time, many years after Whiteman led the jazz world to orchestrated numbers, jazz music as played by orchestras had altered materially. Now Ballew's orchestra plays soft, sweet music in close harmony. Trumpets and drum no longer blare and roll above the strings, and, in New York restaurants and night clubs, where the orchestra appears, couples dance in a smooth, pleasant manner.

Ballew's orchestra has also played at Harry Richman's Club, Saltzmann's restaurant, and the Villa Vallee night club since he started broadcasting. In the summer of 1930 his orchestra played a six weeks' engagement at the Baker Hotel, Dallas, which marked the first time he visited Texas since his departure early in 1926. Also, on his return from Texas, the band played for a short while at the Willows, near Pittsburgh.

Early in March, 1931, Ballew left the Villa Vallee to fill a vaudeville engagement in Brooklyn and New York theaters, leading to the Palace Theater, the goal of all troupers. The night before his initial appearance, while playing in Saltzmann's restaurant, Ballew was a little worried. Never since his college days had he gone in for theatricals; he secretly wished that he knew a little more about vaudeville showmanship. But all the critics gave him a clear bill of health.

Back in 1919 when Ballew first organized an orchestra, Dee Orr, mentioned earlier, came to him for work. He wanted to play the drums.

"Come out to my home next Sunday," Ballew told him, "and we'll try you out."

Orr kept his promise, but, as Ballew tells the story today, he gave one of the most amateurish performances imaginable. Orr didn't even know how to hold the drumsticks, but he went through the ordeal without flinching. And Ballew and his fellow musicians decided he had potentialities; that he had an instinct for rhythm. So they decided to give him time to learn the drums.

That is how Orr joined the original Ballew band, three members of which, today are playing with Jimmy Joy's orchestra in Denver, Colo. But when all the other members went to the "U" of Texas, Orr declined. He didn't want a college education. Rather, he left his home state and went North in search of work.

When Ballew was starting the tour with his own band, after leaving the millionaire's club, he found Orr playing and singing "like a negro" with Gene Rodemick's orchestra, in St. Louis. He was a featured man, getting $200 a week, a salary which his former boss envied him.

"Give me a job," Orr asked of Ballew at their meeting.

"Don't be foolish," Ballew advised him. "I couldn't afford to pay you nearly as much as you're getting."

"I don't care what you'll pay," Orr said. "I want to go with you." And Orr joined Ballew's orchestra. Since then, he confessed, he wanted to demonstrate his loyalty and appreciation for Ballew's consideration years before in Sherman, Texas.

After they had completed the tour Ballew and Orr parted again. Orr played the drums at several places and Ballew came to New York. Then, when Ballew was organizing his or chestra for NBC, he received a tersc wire from Orr, then in Chicago.

"Would like to play in your new orchestra," the wire said.

How he had heard of Ballew's plans is still a mystery to the latter, but Ballew spoke to Scheuing and subsequently sent for Orr. He is a typical southerner, both his speaking and singing voice betraying his homeland, and he blushes deeply when singing.

Today Ballew has a twelve-piece orchestra, two members of which are sons of Fred Van Eps, the famous banjoist. George Van Eps, only seventeen, is banjoist, and Bob Van Eps, a few years older, the pianist. Both of the youths have had exceptional musical training.

And there is another of the orchestra, who was an original member of Jimmie Joy's band, namely, D. Wade, a cornetist. Wade played with Ballew at Fort Worth and later with Paul Tremaine's orchestra.

Ballew has written lyrics to "We Can Live On Love," "If You Didn't Care for Me," "Dreams," and "Alone In the World." The last two songs are yet unpublished, but are expected on the music counters within a short time. The music of the last number was written by Ray Smyth, a blind freshman student at the University of Pennsylvania. Ballew met a friend of the student-musician in Camden, N. J., and agreed to listen to "Dreams" whenever Smyth came to New York.

One time during Ballew's tour of the Eastern and Middle Western states, after he had left Texas, the company, under whose management he was booked, placed another musician, widely known in dance circles, as head of the orchestra. Ballew didn't mind that; he realized the box office value of the other name. But when the latter attempted to discredit Ballew, with his own orchestral members, including faithful Dee Orr, Ballew became irked.

Ballew's protest embodied the same meaning as Wister's phrase: "When you call me that, smile!"

More or less.

The Valentino of Song

(Continued from page 49)

of thoughts of the girl he even left his beloved violin behind him on the train.

THE months went quickly . . . the years also. Nicholas took his family to live in Los Angeles. Russell went to Belmont High School. There he joined the orchestra as first violinist. . . He also "made" the glee club, and it was the glee club director, a man by the name of Sargent, who discovered that Russell had a voice. He encouraged the boy to lessons. He was only sixteen but possessed a surprisingly mellow baritone.

Then came reverses. Russ was eighteen. His father lost everything and he had to quit school and go to work.

He organized his own little orchestra. One day a man by the name of Eckhardt heard him sing. He told Russ he would give him $75 a week to sing at the Mayfair Hotel in Los Angeles. It sounded too good to be true.

The boy had always played classical music until he was offered a job at the Roosevelt Hotel with "Prof." Moore. There he learned to play the "hot fiddle."

One day he received a call from Gus Arnheim of the famous Cocoanut Grove at the Ambassador Hotel. Arnheim wanted to hear him sing. Russ sang a song called "Broken Hearted" and Arnheim didn't like his "style."

"I was certainly broken hearted," Columbo confesses. "I did so want to make good at the Grove. It meant everything to me then."

In despair he went to the Lasky Studios. A friend, Gino Corrado, told him he ought to find a job there playing "side line" music. Those were pretalkie days. He landed at $90 a week and felt himself rich.

He was overjoyed. Then Pola Negri needed a new violinist. Russ got the job. For two years he walked on air.

The boy got to know Rudolph Valentino, and to this day Valentino is his ideal. Then came a chance to work for Warner Brothers. He met Monte Blue . . . and Blue thought the earnest black-haired boy had the makings of an actor. . . In the meantime he had another call from Arnheim. . . Again they wanted him to sing at the Grove. But, Russ never got along with Arnheim. . . He accepted and sang nightly until Arnheim told him he would have to give up his studio connections. . . Instead, Russ quit the Grove and threw body and soul into screen opening with Paramount. . . He did so well that Paramount called his acting "too Latin." Instead of getting leading roles he doubled and sang his way through "Wolf Song," and other successes. Finally he became disheartened and left the studios.

He tried vaudeville and found that people liked his voice. In fact . . . he began stopping shows on the Pantages circuit.

In the midst of this new success, Arnheim came back from Paris and wanted Russ to return to the Grove. . . After much persuading Columbo left Pantages and went to the Ambassador, expecting to be starred. Arnheim did not feature him, and Russ, disheartened, left the Grove, this time for good, to start his own club—the Club Pyramid. The new venture was successful from the start . . . and made money.

One night a stranger introduced himself. . . "Kid, you've got a great future with that voice . . . radio's your game.

There was something in the stranger's manner that appealed tremendously. Before he had hardly realized the full import of it all . . . he was speeding East with Con Conrad, the song writer who took him to New York.

And now . . . this Valentino of Song from the West has sung his way into the hearts of millions of National Broadcasting Company listeners.

(Continued from page 15)

phase of football in which Husing must be thoroughly versed is the new system of rules and regulations. Since last January Ted has been studying diligently the new rules under the guidance of Coach Dick Hanley, of Northwestern University, with whom he corresponded regularly. During the week he was in Chicago describing the National Amateur Golf Championship, from Monday, August 31, to Sunday, September 6, Ted spent several hours each day with football coaches who came from all parts of the country to attend classes held by Hanley at Northwestern University for the discussion, explanation and interpretation of the new football rules.

After returning to New York to cover the National Singles Tennis Championship, at Forest Hills, L. I., Ted went to West Point and spent a week training with the Army squad under their coach, Major Ralph Sasse. He took part in scrimmages, sat at the training table with the players and kept the same hours as they did. It is almost as essential for a good sports announcer to keep in good physical trim for a football season as it is for a player.

Husing's knowledge of sports is not based on study alone. He has had plenty of actual experience. While a student at Stuyvesant High School, in New York, Ted performed brilliantly in four sports—football, baseball, basketball, and soccer, but it was on the gridiron that he performed most brilliantly. He played a bang-up game at roving center and was all over the field making things as miserable for his opponents as possible. As a result, he was chosen all-scholastic center for two years.

The World War interfered with his pursuance of a college career, but when the conflict was over Ted joined the professional ranks playing with "The Prescotts" against such teams as Jim Thorpe's "Canton Bulldogs," "The Frankfort Yellow Jackets" and other leading pro elevens.

In broadcasting a football game Husing uses a microphone of his own invention. While other sport announcers use a stationary, standing "mike," Ted employs a hand microphone so that he may turn his head from side to side to follow the progress of the play. This microphone is shaped like a small hand-mirror, with a long, narrow handle extending from the small, round microphone into which he speaks.

When once he begins describing a football game Ted feels that he has been more than compensated for the many hours of preparations he has made. The actual broadcasting of a football game is to Ted the supreme thrill of all. Each game packs a myriad of punches and new kicks for him.

So far Ted has described more than seventy major football classics over the coast-to-coast Columbia network, and each has given him dozens of spine-tingling thrills. This, no doubt, accounts for Husing's knack of being able to inject every thrill of every play into his descriptions and sending them through the ether to every radio-listener.

"The greatest kick I've ever gotten in a football broadcast was during the Army-Navy game in 1927. Army had a substantial lead, and, although only a few minutes remained in the closing period, Navy was battling furiously to score," Husing said, in reminiscing recently about the seventy-odd games he has broadcast.

"It was late afternoon, and evening was slowly casting a mantle of darkness over the field. Navy's chances of scoring looked hopeless as they lined up at midfield. Suddenly Lloyd, Navy back, took a pass from center and ran back ten or fifteen yards. It seemed as though he stood there holding the ball for hours. In reality, it was only a few seconds he paused, gripping the ball.

NAVY men were running in all directions. Suddenly, just as the Army ends were closing in on him, Lloyd drew back his arm and hurled a pass that traveled as straight and fast as a bullet more than fifty yards, diagonally across the field.

"Castree, the Navy end, had gotten through the Army secondary defense and had streaked across the field, unobserved, for the goal line. It was to him that Lloyd had thrown the pass. As the ball shot towards the goal line Castree increased his speed. Then, just as he neared the goal line, with the ball nearing him, he lost his balance and fell flat on his back.

"Those in the Navy stands who had risen, cheering, to their feet, sank down, groaning. But only for the fraction of a second, for Castree, lying on his back a short distance from the last white line, stretched out his arms, caught the ball with his finger-tips and rolled over the goal line for a touchdown. It was one of the greatest plays I ever have seen and certainly one of the biggest thrills of my experience."

The essential qualification of a good sports announcer is his ability to keep from letting his excitement show in his voice. Once he lets his excitement run away with him he starts to yell into the microphone, and his words become unintelligible. Ted Husing long ago mastered the art of controlling his feelings.

Although more than qualified to do any sports broadcast alone, Husing virtually always employs the assistance of an expert to compile statistics and cover the technical angles of the various events.

For instance, Bryan Field, well-known turf writer, assists him in his descriptions of horse races; Herbert Reed, sports writer, advises and assists with polo and rowing events; Herbert Stone, editor of "Yachting," aids in the description of boat races; Walter L. Pate and Louis B. Daley, executives of the United States Lawn Tennis Association, give assistance in tennis broadcasts, and Herbert H. Ramsay, of the United States Golf Association, helps with golf broadcasts.

So it is with football. While Ted is giving graphic descriptions of the action, a football expert sits beside him compiling figures on yardage gained and lost, on the total number of first downs and the like. Thus, at the end of each period, Ted is able to give a complete summary of what has taken place.

Some idea of the number of words spoken by Husing during the description of a football game may be gotten from the fact that he speaks at the rate of about 400 words per minute, which means that he totals about 24,000 during a full game. Added to this are the words spoken before and after the games and between the periods, which swell the total to more than 40,000 words.

Husing writes out only one sentence of any of his descriptions of football games and other sports events. That is the opening sentence. This is done so that he may get the proper tempo, and then he is off.

It is a surety that Husing will break all existing records for sports announcing this season. During all of 1930 he traveled 31,650 miles and covered 65 sports events. Up to September 1 of this year, with four months remaining he had described 54 events and had traveled 24,400 miles. The football season, the World Series and a dozen or more other events will swell this total considerably.

In his spare time, if any, Husing is making a series of twenty-six "Sport slants" for Warner Brothers. So far he had completed eight, three of which have been shown in some 1,500 theatres throughout the country.

A busy man, Ted Husing, and a student of sports.

Mr. Robert A. Williamson, writing from the camp of the National Broadcasting company, reports on page 95.

AMERICA'S PREMIER REGIONAL STATION

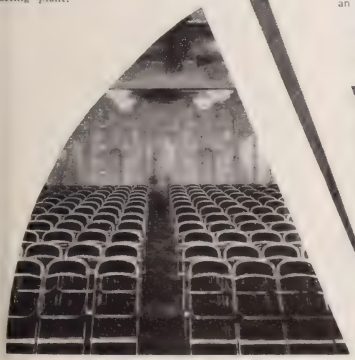
New York **WMCA** New York

570 K.C. 100% MODULATION 500 WATTS

The WMCA Little Theatre of the Air

NEW YORK'S OWN STATION

WMCA covers practically *every* event—*every* happening that is of *interest to New Yorkers*. If there is an important New York news story WMCA broadcasts it. Banquets of local importance and significance, outstanding ring and sport events, theatrical performances, the smarter night clubs —these are a few of the things that New Yorkers expect WMCA to cover.



We believe that no station has more friendly and personal relations with its army of listeners than WMCA. Because they are always sure of finding something of immediate and local interest on its program, New Yorkers have an exceptionally warm regard for WMCA.

Clara, Lu and Em

(Continued from page 14)

"Clara" and "Em." Upon her graduation she went to Boston and for three years taught speech and dramatic courses at the Boston School of Physical Education. In the school year 1929-1930 she returned to Northwestern to teach in the School of Speech there. Isobel Carothers is a pretty, dainty young woman who is extremely fond of dancing, who enjoys being alone, and who is very fond of the tabloids. "Someday," says Isobel, "I'd like to marry a millionaire and enjoy myself modeling in clay and going to the movies."

Helen King (who by the way is not my child as many think) is the "Em" of "The Girls" act. Like the others she is a daughter of the Middle West, having been born in Peoria, Illinois. She was the youngest of five children and says that instead of giving her mother presents at her birth, her whole family tried — vainly, for the young lady had a carrying voice—to pretend that she hadn't arrived among them. As a child, Helen King showed a marked fondness for music, so when she went to college she studied piano and organ and became proficient in both. She played the organ for chapel all during her college days and was well known on the campus for her musical ability. Along with her music, Helen had a love of drama and had the honor of being elected to Theta Alpha Phi, the honorary dramatic society. After her graduation in 1926 from Northwestern Helen had a year of post-graduate work at the University of Colorado and then returned to Evanston, Illinois, to teach "rhythms," or creative dancing and dramatics in the public schools. At the present time she is giving the same course at Northwestern.

Helen still has a strong interest in music. Many evenings when I reach the studios she is in the middle of a chorus of a popular tune and even now she and I are working on some piano duets which you may hear someday if none of the studio engineers shoot us. She had always wanted to play for radio as she was an enthusiastic radio fan herself and hoped that her music would bring pleasure to others. But Chicago is a very hard town on non-union musicians and in those days, which were not so long ago, Helen did not have the money with which to join the local union. Now—well, that's another story, and a personal one at that.

"In the spring of 1930," said Helen, "all three of us were together in Chicago. One day I was speaking about my wish to play the pipe organ on the air and telling the girls that so far I had not been able to find a position. The suggestion was made that we revive our old act and bring Clara, Lu and Em to the air. We all knew that other acts of more or less similar nature were popular so the others enthusiastically agreed to my plan. We spent some time in becoming re-acquainted with our invisible old friends and finally took them out for auditions with the results that you already know."

The choice of the three names Clara, Lu and Em was purely at random. Never before had they seen these three names used together nor did they know any women bearing the names. But evidently the names are popular for one day as the girls were rehearsing their act at WGN before going on the air, a studio page boy announced to them that "Clara, Lu and Em had come to see them." It was a fact: three sisters whose names really were Clara, Lu and Em had come to get acquainted with the radio "Clara, Lu and Em."

Since that time the girls have received letters from two other sets of sisters bearing the same names and they find it quite a coincidence that purely imaginary names should find such concrete backgrounds.

The three girls all agree in saying that the personalities of Clara, Lu and Em have become so real to them that they find these characters intruding into their daily lives. Miss King says "Em is ruining my grammer. She makes me put a 'the' before nearly every noun I use and I am continually saying 'leave her do this or that.'" The girls have been Clara, Lu and Em for almost five years which is much longer than any actress is compelled to identify herself with a fictitious character, so it is not surprising that these make-believe personalities have a very strong influence on their lives.

In the days when Clara, Lu and Em were only used to amuse their friends the girls say they used to lapse into character much more often than they do now. Since Clara, Lu and Em have become a business with them they give more time and thought to what the characters will say and do, of course, and the girls admit that it isn't always easy to find something timely and also funny about which they may gossip.

I have found that like most stage people the girls are in character preceding their nightly broadcasts. They arrive early at our Chicago NBC studios for their rehearsal and it is not until the closing strains of the theme song, "Somewhere In the World" have died away that they become again the Misses Starkey, Carothers and King—three modern maids, and to me—"regular fellows." In the studio during the broadcast each has an eccentric characteristic. They "act" their roles in front of the mike—Clara always speaking with arms folded across her chest, her fingers nervously toying with a string of beads which is always a part of her costume; Lu continually ruffling her hair in a coy manner when talking of any one of her various amours (and also, unknowingly, rubbing her ankle); and Em constantly playing with and rattling her manuscript. We've rehearsed together, broadcast together, argued together, and plowed through three feet of snow to reach the studios during last winter's storm together and in the face of all these changing scenes, to me they are "just three great guys."

The three girls plan to make their homes in Evanston where they now live together. They all have their likes and dislikes and their ambitions. Em is an enthusiastic radio fan; Clara enjoys the radio usually; but Lu is too busy to listen very often. However they all agree on liking two radio features—"Uncle Abe and David" and "The Three Doctors."

In her spare time Em (Miss King) may usually be found creating or listening to music. She is a tall, slender girl, very fond of bright colors, who wears this season's smart clothes with grace and style. (First thing you know I'll be a ladies' fashion expert.)

Clara (Miss Starkey) is quiet and intelligent, spending her time with books and in the theatre. Her one great passion is a contest. Any guessing game or slogan-writing contest, whatever it may be, as long as it has the element of hard work coupled with the element of chance, intrigues her. And she plans to keep on entering all contests until she carries off first honors. (How many of you readers do the same?)

She says that one of her rules for the future is always to avoid women's clubs. She didn't say why and it wouldn't be proper for me to ask.

Lu (Miss Carothers) enjoys dancing very much, as well as books, and says that when she marries a millionaire she intends to be a patron of the arts. Miss Carothers presents a most attractive picture at all times being petite and dainty and always well groomed.

The girls further agree in liking the romantic type of man and say that Ronald Coleman and Douglas Fairbanks, Jr., are their favorite cinema stars. (What a great break for my old side-kick, Doug.) They say they demand men with romance—plus intelligence.

They also would like a vacation some time and would appreciate suggestions as to how to get one. My only suggestion was for them to get married.

McNamee Recalls Grid Thrills

(See football story "Signals" on page 15)

THE sharp, rhythmical voices of quarterbacks already are being heard above the pre-play stillness of football crowds. But the rich, resonant voice of Graham McNamee, National Broadcasting Company ace, has not yet been heard this fall by the arm-chair football fans.

He will probably get into action early in October, according to the latest word from NBC headquarters.

"It's one of the most difficult jobs in the world, reporting a football game accurately and entertainingly," McNamee says, "but the satisfaction of doing a good job is almost tantamount to the thrill an artist gets in doing some masterful creative work.

"And as for the thrills one receives in some games—why, there are games of the past which I'll never forget. Do you remember the Army-Navy tie at Soldiers Field, Chicago, in 1926 and the Al Marsters-Albie Booth battle at New Haven in 1929? Those were two of the greatest games in gridiron history. And while my whole being teemed with excitement, while the crowds were hysterical, I had to sit quietly by a microphone, keep my voice modulated, and tell the vast radio audience why the crowds were raising pandemonium. I just couldn't get up and shout.

"One hundred and thirty thousand partisan spectators all of them alternately overjoyed or morose at stages of the game, witnessed the Army-Navy struggle at Soldiers Field. Some of them were in skyscrapers overlooking the field, some were huddled in aisles, some were lined behind the goal posts, but they all saw two strong teams play one of the most sensational games in football history, ending 21 to 21.

"Caldwell, Schuber and Hamilton of the Navy, cut off big gains early in the game, resulting in two touchdowns, plus two points. It was 14 to 0 when Wilson and Red Cagle started to run wild, Cagle running forty-four yards for a touchdown. And some cadet got another one, tieing the score at the half. Then Army put over another touchdown. Things were looking dark for Navy, and twilight was creeping over the field. The score was 21 to 14 for Army.

"But Allen Shapley, who'd been called a 'running, passing fool', was rushed into the Navy backfield. Description of him could not be quite accurate; he ran and he passed, but he didn't do either foolishly. It wasn't long before he took a pass from Hamilton and crossing the Army line for another touchdown. A kick after touchdown tied the score again.

"One could hardly see the ball after that, it was so dark, but Navy kept on passing. Then an Army man pulled one down out of the air and started towards Navy's goal. At the heighth of the excitement the final pistol broke the stillness and something happened to the Army ball toter. I don't know what. The play was completed some way, and the game was over.

"In the Yale-Dartmouth game of 1929, Yale led 10 to 0 at the half, gaining one of their touchdowns indirectly through a fumble by the famous Al Marsters. But Marsters came back in the second half, after being outclassed by Albie Booth, and led an attack which resulted in two touchdowns in five minutes. The score was 12 to 10 for Dartmouth. Marsters, however, was injured, his playing career ended, and Yale sent in Longnecker in the fourth quarter as a final hope. Deep in his own territory, he prepared to pass and slipped on his knee, but successfully shot a spiral to Hoot Ellis, the fastest man on the field. Many Dartmouth men tried catching him but none succeeded. The final score, Yale, 16, and Dartmouth, 12.

"Those were the most thrilling games in my experiences."

This year, owing to the increasing interest in football broadcasts, officials of the National Broadcasting Company have conferred with executives of associated stations before choosing a tentative broadcasting schedule. And that schedule is subject to change, even as schedules of previous years were changed as upsets were recorded in the collegiate football world. NBC intends to broadcast the most important games on succeeding weeks, and it is probable that some of international interest will be shortwaved to Europe.

Princess Charming

(Continued from page 67)

times wish to avoid recognition—yes, but most of us want more recognition than we get. We cannot count upon Prince Charming to penetrate our disguise. He needs a clue to our attractive character by some outward manifestation. And Princess Charming invariably is discovered when she travels under her own name and does not hide herself as a princess, incognito.

RADIO

IS BROADCASTING FOR TRAINED MEN

MANY successes have been made in radio. Still more successes will be made in the future! But the industry is already closed to all except *trained men.* A man must possess the latest scientific knowledge before he can enter or succeed in radio.

Radio is changing constantly. In the 11 years it has been a reality to the general public, many revolutionary things have happened—tomorrow will bring new revelations!

The International Correspondence Schools, through courses prepared by leading radio authorities, have proved they can give men the necessary training to succeed in radio. Many men in the industry today are studying I. C. S. Radio Courses to keep abreast of the times. They recommend these courses to other men anxious to become associated with the radio industry. **Complete Radio Course — Radio Servicing Course — Radio Operating Course** — in which are you interested? Mark and mail the coupon! Without obligation, it will bring you the important information. Act today!

INTERNATIONAL CORRESPONDENCE SCHOOLS

They've Laughed at the Rain Together

(Continued from page 25)

Their voices blended nicely. And there was a partition that shut them off from the view of the congregation. It was not long before Frank found it convenient to have his chair in the loft directly behind Zora's. His proclivities for action and mischief sometimes threatened to upset the decorum of the choir but a more sanctimonious quietude prevailed when Frank was given a chair beside the young lady instead of behind her. Eventually it seemed that one chair was considerably more than was required for one young lady and the two of them seemed quite contented with one and one quarter chairs.

Happy were those days of choir and choir rehearsal. Both were deeply influenced by the religious fervor of the church. It became an influence that has remained with them to this very hour. It kept them to their ideals. They were married before they were out of their teens. Nobody approved of the match. Everybody said they were entirely too young to embark such a turbulent sea as matrimony. Anticipating this opinion they kept their marriage secret for a while and Frank started out on his first professional engagement as a member of the Meister Singers Male Quartet. He toured the Middle West and drew $30 a week.

Young Love and Art—how many tragedies are written thy name! For Frank and Zora Love remained undismayed; but Art—well, one—yea two—must live. Frank buckled down to a job on an express wagon. But he did not forget his Art as he made enough money to provide a living and put a little by to give Art a chance later on. They were keeping house and looking to the future now.

For two years they both worked and planned. Then came the day when they withdrew their savings, bade farewell to Hutchinson and caught a train for New York. They took their religious faith with them all the way to Broadway and somehow Frank managed to get the right kind of a hearing so that he landed an engagement at the Capitol Theatre. He pleased New York audiences very well but even New York demands change and when he had finished his theatrical engagements he stepped directly from the stage to the pulpit. As a singing evangelist he journeyed back to the land of the Sunflower, the Tall Corn, the Wheat Belt and then on to California.

Zora remained in New York helping the family exchequer by working in sound films at Long Island. Every day tender messages passed between them.

When the evangelistic tour came to an end at the Pacific, the separation could no longer be endured and Zora packed herself off for California immediately. What a lovers' greeting followed when Frank met her at the station as she arrived there. They settled down like a newly-wed pair of honeymooners at Bakersfield where Frank took charge of a choir and recreation work at one of the local churches. All the world loves a lover so all of Bakersfield fell in love with the Luthers. A little later when the regular pastor went away Frank was persuaded to take his place in the pulpit, which he did with great satisfaction to all concerned. There he preached his first sermon and enjoyed the experience.

When the regular pastor returned it was decided that the Luthers should go together on an evangelistic tour. As they continued from town to town Zora performed valuable work by organizing clubs among the boys and girls in the churches where they visited.

Both appreciated they had not reached the high point toward which they were struggling. Together they studied how to advance and take up a bigger scope of work. They went to Schroon Lake, New York, where they studied with Oscar Seagle at his famous music colony. Among the various notables they met there was John Boles. Later in New York, at the conclusion of their courses, Mr. Boles opened the way for Frank to join the famous De Reszke Singers. Returning from a tour with this organization he was invited to join the Revellers. He went to Europe with them. When he returned he became identified with them in radio work.

Zora joined whole heartedly with him in this new field. He developed a new technique. His tenor voice and general versatility registered top notch through the microphone. He created new ideas. Soon he was in demand on such programs as Palmolive, Eastman Kodak, Esso, Peter's Parade, Three Bakers, Pine Tree, Chase & Sanborn and many, many others.

His activities have now become so numerous that he maintains offices in a suite of rooms in a New York City hotel. Zora is right at his side constantly to help him prepare and rehearse his programs. Perhaps if she can ever get a little time for her own talents she too may be heard soon on the air. At any rate they are more devoted than ever—and Art? Yes, indeed, Art and Young Love are together with the Luthers at last and these are the golden days of their splendid happiness.

HARRIET LEE, CBS RADIO QUEEN

ughn de Leath · Kate Smith · Lew Conrad

Why must millions suffer with *pyorrhea?*

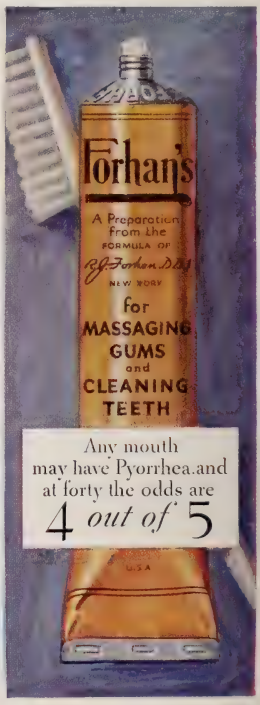
WHEN permitted to go unchecked, pyorrhea can rob you of your teeth; make your face look pinched and old; undermine your entire health by spreading virulent poisons throughout your system.

This is indeed a bitter price to pay for neglect. The menace is greater than most people realize, because four out of five past the age of forty suffer with this dread disease of the gums.

This condition exists mainly because pyorrhea so often infects the gums in youth and lurks there for years before the victim realizes its pernicious presence.

Ward off danger before *the gums bleed*

Once it is established, pyorrhea cannot be cured by Forhan's or any other toothpaste. Don't postpone the protection which may prevent the loss of your teeth (and of your general health). Before your gums bleed start cleansing the teeth and massaging the gums with Forhan's twice each day. And see your dentist twice a year at least—his care can do much to guard the health of your teeth and mouth. Remember, that *half the people who wear false teeth must do so because they failed to guard against pyorrhea.*



An amazing dentifrice developed by a dentist

Forhan's is the formula of R. J. Forhan, D.D.S., who for 26 years specialized in the treatment of pyorrhea. It is unique in that it contains the benefits of Forhan's Pyorrhea Astringent, an ethical preparation developed by Dr. Forhan and used by thousands of dentists in treating pyorrhea.

Don't gamble with pyorrhea

No one is immune from this infection and, remember, it may be at work in your mouth for years before you know it. Resolve to give your teeth the finest care. Use Forhan's twice each day. So mild and gentle, so pure and thorough a cleansing agent, you can make no finer investment in the health of your mouth and the safety of your teeth. Forhan Company, Inc., New York; Forhan's Ltd., Montreal.

Forhan's

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

BIG PAY JOBS

open

for the Radio Trained Man

Scores of jobs are open to the Trained Man—jobs as Designer, Inspector and Tester—as Radio Salesman and in Service and Installation work—as Operator, Mechanic or Manager of a Broadcasting station—as Wireless Operator on a Ship or Airplane—jobs with Talking Picture Theatres and Manufacturers of Sound Equipment—with Television Laboratories and Studios—fascinating jobs, offering unlimited opportunities to the Trained Man.

Ten Weeks of Shop Training

Come to Coyne in Chicago and prepare for these jobs the QUICK and PRACTICAL way—BY ACTUAL SHOP WORK ON ACTUAL RADIO EQUIPMENT. Some students finish the entire course in 8 weeks. The **average time is only 10 weeks.** But you can stay as long as you please, **at no extra cost to you.** No previous experience necessary.

TELEVISION *and* TALKING PICTURES

In addition to the most modern Radio equipment, we have installed in our shops a complete model Broadcasting Station, with sound-proof Studio and modern Transmitter with 1,000 watt tubes—the Jenkins Television Transmitter with dozens of home-type Television receiving sets—and a complete Talking Picture installation for both "sound on film" and "sound on disk." We have spared no expense in our effort to make your training as COMPLETE and PRACTICAL as possible.

FREE Employment Service to Students

After you have finished the course, we will do all we can to help you find the job you want. We employ three men on a full time basis whose sole job is to help our students in finding positions. And should you be a little short of funds, we'll gladly help you in finding part-time work while at school. Some of our students pay a large part of their living expenses in this way. **Mail the coupon below!**

COYNE IS 32 YEARS OLD

Coyne has been located right here in Chicago since 1899. Coyne Training is tested—proven by hundreds of successful graduates. You can get all the facts—FREE. JUST MAIL THE COUPON FOR A FREE COPY OF OUR BIG RADIO AND TELEVISION BOOK, telling all about jobs . . . salaries . . . opportunities. This does not obligate you. **JUST MAIL THE COUPON!**

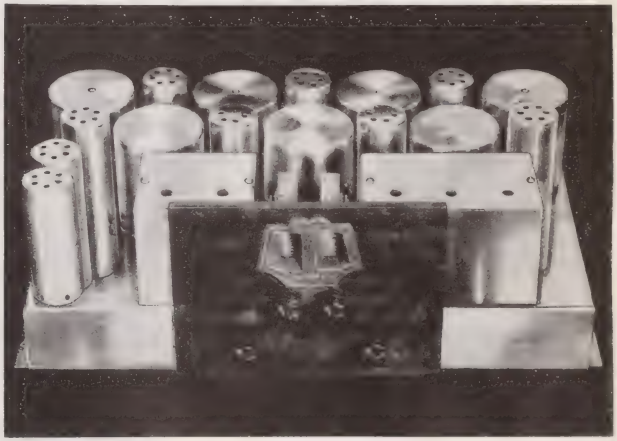
"For 16 Weeks



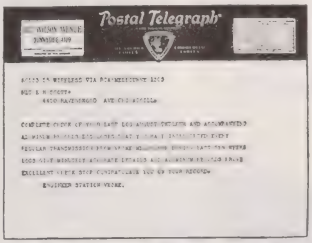
I enjoyed every broadcast from

VK3ME

MELBOURNE, AUSTRALIA"

This is not a "freak" record. Hundreds of other Scott All-Wave Receivers — all summer long — have brought their owners loud, clear, perfect music and song from the other side of the world.

EVERY now and then, the story of some phenomenal instance of extremely long distance radio reception breaks into the press. DX fans usually find little interest in such stories because they know the performance which they relate is invariably due to "freak" conditions.



But DX fans KNOW, when *my* receiver brings in every broadcast from VK3ME for 16 consecutive weeks, that full credit must go to the receiver that did the work. And when they learn that hundreds of other receivers exactly like mine, and located in all parts of the world, are piling up equally sensational records, they are well satisfied that the Scott All-Wave is not only the most powerful, most sensitive receiver possible to obtain, but the one receiver that fulfills their lifelong hopes.

Undeniable Proof

Away last spring I made up my mind to eclipse all standards of radio reception—distance—power—selectivity and tone. I believed the Scott All-Wave would do it, so I set out to make a day-to-day log of VK3ME, Melbourne, 9560 miles away from my receiver. I tuned in *every* broadcast, on the loud speaker, and to prove to the entire world that I heard *every* VK3ME program with full volume, and with perfect tone and clarity, *I made a disc recording of every broadcast!* Half of these records I sent to VK3ME. The others are at my laboratory and will be played for anybody who asks to hear them.

Not a Special Set

The Scott All-Wave Receiver that you may buy, will *in no way*, differ from the one I used in my 16-week test. It will be identical to the hundreds of other Scott All-Wave Receivers that tune in voice from England, France, Germany, Italy, Japan, Indo-China, and South America every day in the week—summer and winter. The set that I will send to you will actually be tested on reception from G5SW, Chelmsford, England, or 12RO, Rome, Italy, before shipping!

Postal Telegraph

This cablegram verifies the first 10 weeks' reception. To date there has not been time for my log of the last 6 weeks to reach Melbourne.

Another Challenge

Again, I challenge the whole world of radio to any kind of competitive test, between 15 and 550 meters. I guarantee that the Scott All-Wave will bring in the most stations between 15 and 550 meters—that the Scott All-Wave will leave no doubt as to superior tone quality—and that it will give actual 10 kilocycle selectivity over the Broadcast Band.

Clip the coupon—mail it today for full particulars. You'll be amazed when you see how little it costs to own a Scott All-Wave Superheterodyne.

News, Views *and* Comment

By Robert L. Kent

THIS has been a busy week. Dinners, parties, radio programs and visitors! The Radio Fair dominated New York. First, there was the showing of new receiving sets . . . models for every room and purse . . . from beautiful midgets to fine consoles. And every last one of the cabinets represented an improvement in design.

The center of attraction at the show was broadcasting from the crystal studios and the television demonstrations. It was like a mob scene in the movies. Everybody wanted to see the radio stars who made personal appearances and equally as many wanted to familiarize themselves with television. There can be no question about the interest of the public in television. Thousands of radio homes soon will be television homes. . . it is up to the manufacturers to get busy and meet that potential demand. How many of you who read this would like to own a television set even knowing that the art is in the same stage of development as radio eight years ago? I'm serious about this. Drop me a card and tell me what you think. It's a straw vote. What do you say!

Big news! Radio Digest is offering Personally Autographed Photographs of Radio Stars. Get yours. Read the requirements on pages 6 and 7.

More news . . . we are planning our own beauty contest. An announcement will be made in a forthcoming issue. Watch for it. Readers of Radio Digest will be the voters. Radio Beauties from Maine to California, North and South will be entered by radio stations. Pictures of these girls will appear in your magazine throughout the period of the contest. It's going to be a whale of a contest and every one of you will have the privilege of helping to select the winner.

Both the National Broadcasting Co. and Columbia are busy places these days; many new programs going on the air. There is a list of them in this issue. Read it over and listen in on "opening night."

Here's a yarn to remember: It's the story about a thirteen piece band that is so good it can be three bands and a ladies' ensemble at one and the same time. It happened on a recent Real Folks program at NBC. Harry Salter's band was doing the honors. The sketch called for four different bands and these musicians portrayed each of the four vying for top honors in playing sour music. Harry says it is more difficult to play off key than to render a first rate program. That's an idea for aspiring young saxophone players to remember.

A "Radio Man's Watch" on which temperature changes have absolutely no effect, has been invented by Dr. Charles Edouard Guillaume. It's a long, technical story and we haven't the space to tell it here, but it is an important invention for radio because seconds are vital in opening and closing programs and this watch will be welcomed by announcers and others in the studios.

When Nellie Revell, the Voice of Radio Digest, on NBC, announced to the listeners during her program recently that "Johnny" Johnstone, the man behind the news at the National

PHOTOGRAPH OF YOUR FAVORITE

Radio Star

Personally Autographed

Rudy Vallee

HAVE you a Radio Favorite? Would you like to have an intimate photograph of this artist or announcer? Personally Autographed? This is your opportunity! Act without delay. Take advantage of this offer and select from the list on the opposite page the name of the Radio Star whose autographed photo you want. For the first time Radio Digest makes it possible for its readers to obtain a PERSONALLY AUTOGRAPHED Photo of an outstanding radio personality.

Kate Smith

You can obtain this PERSONALLY AUTOGRAPHED PHOTOGRAPH of your FAVORITE RADIO ARTIST OR ANNOUNCER by filling in the coupon at the bottom of the opposite page. Read the requirements carefully.

You Save Money

THIS offer is open to *all* readers of Radio Digest who join our growing army of subscribers. This is easy medicine to take BECAUSE YOU SAVE A DOLLAR BY SUBSCRIBING and in addition you get the AUTOGRAPHED PHOTOGRAPH. The price of a single copy of Radio Digest is 25 cents, totaling $3.00 per year. THE SUBSCRIPTION PRICE IS ONLY TWO DOLLARS.

Also Radio Digest is delivered directly to your home each month. No disappointments because your newsdealer is "sold out." No going out in bad weather to purchase a single copy from your newsdealer.

The Ideal Christmas Gift

A YEAR'S subscription to Radio Digest together with the AUTOGRAPHED PHOTOGRAPH makes an IDEAL CHRISTMAS GIFT. If you want to take advantage of this Christmas offer fill in the coupon and we will send a special gift card to the person for whom the subscription is intended.

Mailing of this card will be so timed that it will reach the recipient of the gift subscription on Christmas Eve.

If you have a friend who enjoys the Radio your Christmas problem is solved, for you will increase his enjoyment of Radio Broadcasts by enrolling him as a subscriber to Radio Digest. Send in Christmas Gift Subscriptions EARLY so that we may make the necessary arrangements to send the announcement of your gift.

Graham McNamee

All Subscribers Can Get a Photo

YOU may obtain an AUTOGRAPHED PHOTOGRAPH of your favorite ARTIST or ANNOUNCER simply by RENEWING your subscription NOW for another year, or—

Introduce Radio Digest to a friend. Send in a subscription and indicate on the coupon the name of the artist whose photo you want. The picture will be mailed either to you or your friend—whomever you designate.

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

A FEW nights ago you may have heard the first of a new series of programs under the artistic and scientific direction of Leopold Stokowski. It was a distinct radio triumph in transmitting the intricate harmonies of a great orchestra. Much credit for the success of the broadcast is due to the scientific genius of Stokowski himself. When the gods contemplated his career they were undecided whether to make him a great engineer or a great maestro.

His touch makes things go, musical or mechanical. Months before you heard that broadcast you might have seen him collaborating with the electrical experts in evolving a new system to pick up and give to you the last fibre of quivering sound that his great orchestra could produce. On the night of the first broadcast new equipment had been installed in each of the seventy-one stations of the Columbia System which carried this program. Even the classic hall of the Philadelphia Academy of Music had been altered to meet the acoustical requirements Stokowski desired. He experimented with and without crowds in the auditorium to study such sound variations as might occur.

The new electro-dynamic microphone made its premiere on this occasion. Smaller and yet far more efficient it registers every cycle from 20 to 10,000 per second, which covers the entire audible range so far as music is concerned. On his desk before him as he lifted his baton the director watched a galvanometer which told him precisely at every instant the volume produced by his orchestra and the volume winging off the antenna and away through the network of lines that traversed the country. A series of buttons at his finger tips each button controlling a colored light in the hidden booth of the operating engineer, each color with its own meaning, made it possible for Stokowski to direct the modulation. And thus the gods are served for Stokowski directs the millions of little one-legged notes that march across the page into swirls and masses of perfect harmony at the same time he threads them into thousands of miles of copper wires which throw them over the mountains and vales by measured waves of electrical impulses.

* * *

INCIDENTALLY it is worth noting that this costly program bringing the ultra of fine music to the humblest home without charge is made possible by the enterprise of the Philco company—an answer to those self-interested propagandists who are seeking to destroy the free competitive system of broadcasting. You will find the attacks against American broadcasting growing as the season advances and the time comes for Congressional agitation. The money that Philco is putting into the Stokowski program might be considered the price of black and white advertising space on the part of those who would prefer to have our broadcasting operated by the government.

* * *

STAGE celebrities who have come to radio often express their joy at being able to "tour the country" at each performance. They rejoice that at last they can move out of their travelling trunks and settle down in apartments or even homes in the suburbs and enjoy life as it exists beyond the zone of steel rails and hotel rooms. Isn't it just human that ol' Seth Parker and his Jonesport tribe who have acquired their fame solely through the ether lanes should suddenly decide to pack up and go gallivantin' across the continent over the trails the troupers have surrendered without regret? So, off they go with a prodigious schedule of stops along the way that will carry them through twenty-three states, zig-zagging to Vancouver and around back by Miami on "hum" to Jonesport, Maine, (711 Fifth Avenue, New York) in time for Christmas.

Radio Village

JIMMY MELTON'S ma came up from her home in Ocala, Fla., to hear the boy sing in the studio the other day. She brought along Jimmy's little sister Mary. That child simply was too proud for words while she sat by her handsome big brother and heard him sing into the mike before all those people. They met Mr. Aylesworth, and the Revelers and a whole lot of w. k. people while they were in Radio Village.

* * *

DID you ever hear about Lee Morse and her "Honey"? You know she just up and says "Honey" to everybody and don't mean anything special sentimental about it at all. It's just an old Southern custom. Well she came up to NBC and commenced saying "Honey" off hand to Bob Downey who comes from New England and was asked to play her accompaniments. Bob takes it serious and put quite a store by it. The only way he could get her being so impartial about the way she spread her "honey" around was to marry her and that's how she happens now to be his "Honey" Downey.

* * *

RUSS COLUMBO showed me a package he had under his arm the other day. It was a fan letter in poetry. The title read, *Voice of Love.* "A lovely thing beautifully done," said Russ, "so I had it framed." Oh Romance! Romance!

* * *

GUY LOMBARDO, the w. k. Kanuck orchestra leader, likes to take his exercise racing around in a speed boat but he hasn't been able to beat Floyd Gibbons who holds the speed record for circumnavigating Manhattan Island.

* * *

AND Floyd Gibbons, by the way, has another decoration. He is an honorary member of the Forest Ranger Force of Yellowstone Park. He earned the title by fighting a fire that he ran into while there. And he got a check for $7.20 at the rate of 30 cents an hour for fighting. Save your money, Floyd, and you'll be rich some day.

* * *

ALL the New York newspapers gave Rudy Vallee a great sendoff for his part in the George White Scandals. It was the first time he ever got into anything of this kind without his Connecticut Yankees to back him. He carries on like an old timer, say the critic scribes.

* * *

TOO bad about Coon Sanders coming to Radio Village and getting put away in a back street hotel in the cloak and suit factory district. They're on two short periods a week late at night over NBC.

H. P. B.

ELEVEN YEARS OF MAKING FRIENDS BY MICROPHONE

Eleven years ago a Westinghouse Radio Station inaugurated the world's first prearranged and scheduled radio programs by putting on the air the Harding-Cox presidential election returns.

The months that followed brought new thrills in rapid succession—the President's inaugural address from Washington, the first broadcast of a church service, the first boxing contest blow-by-blow, the first baseball game play-by-play, the Armistice Day address of Marshal Foch.

These, and similar Westinghouse Radio Station achievements, added new friends to the growing family of listeners until now one of these stations alone is a source of entertainment and information to some 800,000 persons a day. Responses often received from distant, unexpected points on the world's map give evidence that almost everyone, at some time or another, listens to a Westinghouse Radio Station.

Radio has changed a lot through these exciting years . . . but friends are still made through the microphone exactly as they were eleven years ago. The same high standards established by Westinghouse Stations in the pioneer days of broadcasting make 980, 990, and 1020 kilocycles favorite tuning points on many thousands of radio sets today.

LEW CONRAD

Among His Souvenirs

PRESSED flowers and black butterflies from a dear old lady in Connecticut, hand-knit socks and a sweater vest from a motherly admirer in Vermont, salt water taffy from a sweet young thing in New Jersey, and Edelweiss from the distant Alps, "for good luck" are among the many odd souvenirs received by Lew Conrad. His voice has a vibrant touch that echoes responsively on the heart strings of his feminine admirers. They send him adoring letters and loving tokens which he fondly treasures although he may never expect to see the donor. Not the least among his souvenirs does he prize a curiously carved letter opener. It is composed of various bits of colored wood. The blade is thin, tough and sharp as steel. It was made for him by the father of a young admirer in Chicago. When he left the air late in the summer the National Broadcasting Company received thousands of letters of regret from feminine fans.

So They Call Lew Conrad

"Body and Soul"

Lovely Ladies Write Him Tender Billet-Doux... They Rave About His Voice and Send Him Presents Too... "I Weep to Think Others May be Writing You the Same Loving Lines," writes One

By Richard Chaplin

THE voice of Lew Conrad, orchestra leader and tenor heard frequently on National Broadcasting Company programs, was recently described so effectively and originally by a sentimentally affected young lady from Massachusetts that the young singer is now the possessor of a nickname which will probably stick to him permanently.

"You have the voice of soul, and my body simply vibrates when I hear you," wrote the New England damsel. And from that time on Conrad has been known as "Body and Soul Lew."

The musical career of Lew Conrad began when he was a small boy in Philadelphia. At a very early age he took up the study of the violin. His musical education was interrupted, however, when he was ten years old by the death of his father. Lew started to sell papers and worked as an errand boy in Philadelphia, and later in Boston, where his mother moved when he was twelve.

He worked his way through high school and Tufts College, at the same time putting as many hours as possible on his music. At Tufts he attended classes all day, had rehearsals and played in dance orchestras evenings, and got around to his studies usually after midnight.

"As a result," he says, "I formed the habit of sleeping only four or five hours a night, and that still is my limit."

Many of the young women who listen to Lew's crooning over the air apparently suffer more from lack of sleep than he does, to judge by their letters, which pour in by the thousands. Perhaps Conrad's strange influence on the female heart may be explained by science. His voice was psycho-analyzed as "unconsciously emotional, regardless of refinement and musical culture," and as possessing "a pronounced primitive appeal that opens up the soul of the multitudes."

Although he started his career as a violinist, Lew comes by his voice naturally. His father was a soloist at the Cathedral of Tours, France, and his mother sang in a church at Leeds, England. After leaving college he played in the Cleveland Symphony and other orchestras until two years ago, when he was given a National Broadcasting Company audition and began to broadcast regularly.

ROMANCE always beckons just beyond the horizon of the visible . . . but especially does it call to the lonely maiden or repressed housewife in the voice of a singer who seems to understand and sympathize. So this young tenor, Lew Conrad, has symbolized the mystic lover of the air for many who find in his voice the answer to their unsatisfied longings—the dream hero of fantasy.

The impassioned fan mail started almost immediately, and has continued ever since. For some reason many women apparently feel that they can unburden their emotions fully when writing to a radio artist, and Lew's fans are certainly emotional. But no matter what requests they make, and their demands are varied, they all get a letter of thanks in reply. It doesn't seem to have occurred to any of the writers that Lew might be married already.

But he is.

And so while the lovely maidens are searching their minds for sufficiently endearing terms in which to vent their emotions, Lew is practicing or planning for his favorite recreations, which are golfing, speed-boating and fishing. During the summer he leaves the NBC studios in New York after midnight and drives to Boston to see his mother over a week-end. There is little traffic, and he keeps the accelerator well down towards the floor board.

He has a motor boat on Marblehead Bay, and does some deep-sea fishing during the summer. But while speed on the ground and in the water thrill him, he doesn't think so much of airplanes. Once after singing at an army camp he was rewarded by a chance to go up in an observation balloon. Lew still remembers how dizzy it made him, and is content to stay out of the air hereafter. Air, he thinks, is a fine thing to breathe, and to send your voice through, and to put in tires, but that's about all.

And now perhaps some of Lew's feminine admirers should be allowed to express their opinions of him. Here they are:

"Of all your programs I like the morning ones best, because your voice is fresh and sweet early in the morning. I am in my twenties, good looking and cheerful, and devoted to your voice. Your picture graces my dresser. I am always careful to be alone when you sing. I love you devotedly, but can do nothing about it. . ."

"I am faithful to you Lew beloved.

What Would They

Famous Explorer Pictures What He Thinks Would Happen First Time Indians Heard Radio

By F. A. MITCHELL-HEDGES
THE EXPLORER
F.R.G.S., F.L.S., F.Z.S., F.E.S., F.R.A.I., F.A.G.S.
Member of the Maya Committee of the British Museum

MANY times since I began my talks over the National Broadcasting Company's networks on the ruthless wilds and primitive life as it actually exists in the jungles of Central America, I have been asked the question—What would happen if suddenly a radio were tuned in from there to New York or some other great city?

It is funny, but during the whole of the seventeen years I have lived among primitive tribes in some of the most remote regions of Central America, I have never thought of it. I will try to draw a picture of what would unquestionably take place.

Summer styles which mean bare to the waist are in vogue all year round among these Indians

You have traveled by dug-out and trails through the jungle a hundred and fifty miles into the interior of a country where no white man has hitherto set foot. Here you come upon a tribe of Indians averaging five feet in height, copper in hue, and all naked to the waist. They are living fifty to sixty families in each large communal bush-house built with cohune palm thatch roofs, bamboo sides, and the bare earth as floor. They have never heard of the United States or the British Empire; they have never heard of a ship, a railroad, an automobile, a telephone or electric light, and money of course is unknown to them. They know no world outside their own rigidly proscribed circle. Here they live, till, plant their little corn-patches, breed and die, walled in by the dense jungle, which is so solid that in many places I know of you could not proceed, even with Indians hacking a trail for you, more than five to six hundred yards in a day. They are completely isolated. How they got there, whence they came—it is a riddle, unknown.

YET I have found, and lived among, several tribes of Indians in exactly this position. Now what would happen if it were possible to tune in to New York on the radio? Normally quite stoical, they would be rooted to the ground. Although they might make no sound or movement, their eyes would betray them—terror, sheer, stark terror is what they would experience; a definite conviction that it was the voice or music of the spirits. Nothing would induce them to touch the apparatus—it must be the mouth-piece

Do?

This picturesque description of life and habits of primitive tribes in Central America was written especially for Radio Digest by the famous explorer who narrates his experiences regularly over the network of the National Broadcasting Company from New York.

Happy family enjoying the balmy air in their open canoe

of either the demons or the gods. And so they would remain, petrified.

Possibly they might remain like this—mute, without ejaculating one single sound; on the other hand after a minute or so with a simultaneous maddened shriek they might flee precipitately and force their way into the bush. But one thing is certain; if they fled they would return. No terror can keep them away from the only home—the only world—they know. But whichever they did their reaction would inevitably be the same; that this terrorizing thing was nothing mortal, that no mortal voice or music could come from nowhere, and that it must therefore be of the Spirits.

As they found that they suffered no injury, after a time decision would be made in their minds as to whether the spirits were evil or good.

It must be remembered that with all primitive and degenerate tribes their lives are entirely ruled by their belief in spirits. There are many evil, but few good. And in the hypothetical case I am describing a meeting would be held among themselves to decide in which category, good or evil, the new visitation should be assigned. If perchance they wanted rain for their milpa (corn patches), and it so happened that rain fell within the next few days, there is no question they would believe it was through the sounds proceeding from this mysterious source. If at the psychological time the Chief's wife had a child, this also would be accounted to the benevolence of the spirit sounds. But if a drought continued, or an Indian was bitten by a snake, or a child died, or a hundred and one other unfortunate occurrences, then nothing in this world would ever convince them otherwise than that it was a voice of evil. There is not a single incident in their lives which is not ascribed to the action of spirits; even such a simple thing as an Indian stubbing his toe against a log of wood, or a woman falling and hurting herself; or even—to us a trifle, but to them an event of importance—a fire going out through carelessness and lack of attention, the Indians would never believe any of these things was his or her own fault. It must be the influence of an evil spirit.

Where dreams come true—if you ever imagined such creatures were only the figment of an alcoholic mind

I had a remarkable instance of how these people are affected. I was living among the Maya Kekchi Indians in the interior of the jungle on the borders of British Honduras and Guatemala at the time I had discovered the great Maya city now known to the world as Lubaantun. For some time I had been engaged with gangs of Indians in felling the jungle, clearing the ruins and excavating, when I fell ill with malaria fever. In despair I foolishly wrote a note to my secretary, Miss Jane Harvey Houlson, who has been with me for years, and who was then in a settlement a great distance away on the coast waiting for instructions from me. My note was laconic. "Jane, I am ill. There's a lot of work to be done and I need you."

The Indians took this note to the river, where it was carried for many miles by other Indians in dug-outs down to the coast, and thence by circuitous channels eventually reached Jane. Without wasting a moment she at once proceeded in an old schooner to the settlement on the coast which was the nearest one to, though still many miles from, where I was in the interior. Here fortunately the Indians were still awaiting her. (As a matter of fact they would have waited for ever.) And entirely alone except for her native guides she began the hazardous journey; day after day up the river, sleeping at night in the jungle. And one day as I lay ill in my bush-house I heard sounds approaching. It was Jane. She entered the bush-house with behind her an Indian nervously carrying her typewriter. And shortly after her arrival she began the work of tapping out my notes.

ONE or two Indians looked in. The news spread like fire. The whole tribe assembled and gazed in amazement through the crevices of the bamboo sides of the shack. Then one more daring than the rest crept within; it was the signal for all to follow; and soon the bush-house was jammed with Indians. Not a sound escaped them. There they remained until the tapping had ceased.

Every day they continued to come, and shortly they would jabber away in their language of which, of course, Jane could not understand a word. Then they began bringing their sick, and laying them on the earth floor beside her.

"Whatever are they doing?" she asked me plaintively one day when I came in to discover there were four or five adults and a number of children lying around in this manner.

"My dear girl," I answered, "They have come to the conclusion that you are tapping out messages to the spirit world, and communicating with good spirits who will aid and send blessings upon the Indians. And all this jabbering is that they are asking you to send messages for them. Now they are bringing their sick so that you may pray to the good spirits with whom you are in communication that they will make them well."

And this went on during all the months that Miss Houlson was up

there typing my articles and despatches.

I only wish it were possible to carry a radio down to these parts when I return there, as I shall do early next year, and pick up a station. It would be invaluable to me.

Now we must look at it from another angle. Civilized people are as ignorant of the habits, customs and psychology of primitive Indians as the latter are of theirs. It would be almost impossible to convey to those living in great capitals the difference between their lives and those of primitive Indians. Imagine if one had a microphone and could speak while there! A description on the spot of the life, scenery, rituals, ceremonies and customs of these strange people would come as a vivid surprise. It would literally be listening to another world. Not one of those dream novels in which the tropics are portrayed as a land of waving palms, coral-sand beaches and scented warm nights; it would be a world where the jaguar and the tapir crash through the underbrush; where the throaty gurgle of the alligators rises up from the river; where in the night the miasma rises together with the vilest sound of all—the droning of millions of mosquitoes. The jungle, that wakes to life as the sun goes down, with a combined orchestration of cicadas, tree-frogs and crickets; the whistling of night-birds and the strange voices of innumerable life blended together in one mysterious medley of sound.

PEOPLE in the cities would hear the Mating-Dance and feast in the Week of the Scorpion and Moon of the Ape, to the God of Fertility. They would hear the shrieks and howls and the pagan wrath arising in the night as a wooden effigy of the God of Barrenness is hurled into the midst of a roaring fire of which the flames are leaping fifty feet into the air, and illuminating the jungle. They would hear the rhythmic beat of the tom-toms, the crashing of seed rattles and the three curious notes played on reed pipes.

It would not surprise me, in view of the rapid strides with which science is advancing, if it became possible for some great broadcasting company to evolve a means of reproducing faithfully these things for the people of civilized countries. I could promise that there would be no paucity of listeners-in. As I said before, it would be a revelation to us modern. I can imagine nothing more fascinating, nothing more intriguing, than to take a radio down to the jungle and watch the reactions of the Indians when the spirit voices came through. Even more I should like to be an eye-witness, if it were possible, of the millions seated in their easy chairs when over the radio in their comfortable homes came the real, ruthless jungle with its blood and sweat, with its life and laughter going hand in hand with sudden death.

Yes, I should very much like to watch their faces.

F. A. Mitchell-Hedges, the Explorer, with the Sukia Woman (witch doctor) of the Laca Indians

Adventure Notables on N. B. C. Programs

HIGH adventure now rides the air waves.

With a staff of war correspondents, explorers and sea-dogs narrators the National Broadcasting Company is bringing the world to millions of listeners annually.

By twisting the dials, Mr. Average Citizen may scale the Mountains of the Moon in Central Africa with Carveth Wells, ride the bounding main with Count Felix von Luckner, or, live again with Floyd Gibbons a breathless moment at the battle of the Somme. Or, while fancy dictates, your listener may be whisked from his arm-chair to stand in awe with F. A. Mitchell-Hedges before the lost cities of a vanished Mayan race in Yucatan, and then be translated in the next breath to the polar ice cap with Sir Hubert Wilkins.

Such is the magic of radio. And, the demand for lecturers on travel is interesting. These interesting fellows are appearing on NBC networks more frequently and in increasing numbers than they did last year, indicating perhaps that the public prefers seven-league boots to prosaic brogans.

On the NBC roster of adventurers there are three war correspondents—Floyd Gibbons, Lowell Thomas and D. Thomas Curtin. Gibbons' "Hello Everybody!" is familiar to millions of the radio audience. His lectures dealing with his adventures in the War bring him thousands of letters from devoted listeners.

GIBBONS began his newspaper career on the Minneapolis Daily News and worked later for the Milwaukee Free Press and the Chicago Tribune. He represented the Tribune in the War. From the very beginning he found excitement on every front. He was a passenger on the S. S. Laconia when it was torpedoed and sunk in 1917 off the Irish coast. He was rescued after a night in a small boat and cabled his newspaper the first graphic account of the disaster. Gibbons lost an eye in action at Chateau Thierry and was awarded the French and Italian Croix de Guerre for gallantry.

Lowell Thomas, whose nightly digest of the day's news is closely followed by an army of listeners, was attached to the Allied armies at the request of President Wilson to write the history of the World War. He served on many fronts and is credited with discovering "Lawrence of Arabia." He has written a number of exciting travel books.

D. Thomas Curtin, whom Lord Northcliffe described as "the man who saw more of the war than any other correspondent," is the author of the series of "Thrillers" heard over NBC networks each week. By the aid of a dramatic cast Curtin relates exciting moments of his experience while working under Northcliffe with the Times.

The explorers bulk large on the adventurers' list. This chain also has two authorities on Africa, Dr. Arthur Torrence, student of tropical diseases and Carveth Wells, often called "that handsome liar."

David Newell, member of the Matto Grasso expedition to Brazil speaks frequently upon South America. These lecturers devote a portion of their time to children's lectures. Wells and Torrence tell interesting animal tales of the jungle and Newell relates the exploits of "jake," his big game hound in the wilds of Brazil.

(Continued on page 91)

Make It SNAPPY!

True Story of a Taxi Driver Who Had Rhythm

By Abe Lyman

HELLO, everybody. This is Abe Lyman speaking.

Do you mind if I start right off by laying claim to a few titles? Here they are:

I probably have been fired from more jobs than any other musician in this country.

I probably am the only American orchestra leader to play in London who didn't give the Prince of Wales lessons on the drums and who didn't meet the Prince socially.

I was the driver of the first Yellow Cab to appear on the streets of Chicago.

I was called "Movieland's Favorite" because so many motion picture stars came to the Cocoanut Grove, at the Ambassador Hotel, in Los Angeles, during the five years I lead my "Californians" there. (I just learned there is at least one dissenter. She is Thelma Todd, the screen star. She sent my engagement ring back a few days ago.)

They tell me I was born with rhythm, that I showed early indications of being a drummer by sitting in the middle of the floor of our tiny Chicago apartment and beating out ungodly noises on a tin pan with a spoon. I can't quite seem to recall that, but I do know that I always wanted to be a drummer and to lead an orchestra.

I guess I must have been pretty determined about this drumming business, because I worked for a long time in Chicago movie houses without any pay just for the experience. I remember being fired from my first job, for which I received no salary, and telling my boss, "But you're not paying me anything." I remember even more vividly his reply, "I don't even want you around the place."

Later I got a job as drummer in the Fox-Lake Illinois at $5 a week and room and board. I used to sit in the orchestra pit and watch Buster Keaton and Roscoe "Fatty" Arbuckle work, and wish I could meet them. And I used to get a great kick out of Tom Mix's stunts, and wish that I might ride his famous horse, "Tony." Not so many years later I became a close friend of all three of the screen stars and rode "Tony" as often as I wanted.

Abe Lyman ready to go

It was after I lost this and countless other jobs that I became a bit discouraged about drumming as a means of earning a livelihood, and got a job as a taxi driver. I was pretty proud of the fact that I was given Chicago's first Yellow Cab to drive.

But the orchestra leader bug was still there, and, in 1913, I took a job at $6 a week as drummer in a Chicago cafe. For the next five years I played in and around Chicago until my brother, Mike, and Baron Long, owner of the Vernon Country Club, in Los Angeles, where Harry Richman, Cliff Friend, Buddy De Sylva and others got their start, sent for me to come to the Coast.

Quitting my job in Chicago, I packed my bags and took the train for Santa Monica, where my brother ran a night club known as The Sunset Inn, which was quite a gathering place for the motion picture stars. A few days after I arrived there I organized a 5-piece band and started playing there. I used to play the drums and lead the orchestra.

WE were getting along pretty well at the inn until my brother and I had an argument and he fired me. And believe me, his firing me was the greatest break of my life. The reason for our disagreement was that my brother said he never had heard of a drummer leading an orchestra. I told him if I couldn't play drums out in front I'd quit. He fired me before I had the chance.

That was one time it was a good break to be fired. A short time later I took my band into the Ship Cafe, in Venice, Calif., and there I met Norma and Constance Talmadge, Thomas Meighan, Blanche Sweet, Gloria Swanson, Charles Ray, Bebe Daniels, Clara Kimball Young and a lot of other actors and actresses who were just baby stars at that time. Apparently they liked my music and talked about it, for Abe Frank, owner of the Ambassador Hotel, in Los Angeles, came in to see me and asked me to add four more men to my band and play in the Cocoanut

(Continued on page 83)

John Anthony in CBS Sea Stories

REALISM

Sea Stories with Alice Brady Gotham Chauffeur to pagos

By NELSON

ON the morning of May 17, 1923, a New York taxi driver was sitting in his cab at 125th Street. It was early. Fares were few. He picked up a morning newspaper. A glance at the front page and he almost jumped out of his car. A minute later he was tearing down the street.

He had read that William Beebe, the noted naturalist and leader of a research expedition to the Galapagos Islands, had returned from there the day before with his ship and scientific treasures.

The connection between a group of islands six hundred miles off the western coast of South America, a scientific expedition to them and a taxi driver may seem remote to you. It appeared strange to Dr. Beebe, too, when, after patient waiting in his machine at the wharf where the Beebe ship was docked, Martin Christiansen, taxi driver, accosted him.

What Mr. Christiansen told Dr. Beebe, however, thrilled the latter to such an extent that he devoted an entire chapter of his book, "Galapagos—World's End," to Mr. Christiansen's story. Where the scientific expedition had spent two and one half months of comparative ease on these volcano-born islands, able seaman Martin Christiansen and eight other members of his crew had met adventure, suffering and two of them, death, when they were marooned there for nearly half a year by the trick currents and doldrums of the Pacific Ocean.

What "Red" Christiansen told Dr. Beebe he told millions of radio listeners when, almost twenty-five years to the day after he and his companions had been marooned on the small Pacific island, he appeared before a microphone of the Columbia Broadcasting System in the leading role of a radio dramatization of the harrowing experience that he and the eight other members of the crew underwent during their months on Galapagos.

This broadcast, one of a series of programs known as Romances of the Sea, was, perhaps, the highest degree of realism yet attained in radio drama. As though it had happened only yesterday, "Red" Christiansen stood before the microphone and related a vivid-word picture of months without fresh water when he and his companions drank nothing but turtle blood and brackish water; of months when they ate nothing but raw turtle meat, and of months when they were without clothing or coverage for the cut and bruised feet.

While the brick-topped Dane carried the theme of his horribly real story, a brilliant cast of actors and actresses reenacted the events that befell Martin Christiansen and the others on Galapagos twenty-five years ago. During the entire broadcast a 25-piece symphony orchestra furnished music that served as a background for the drama, brought out the characters, stressed the emotions and carried out the intent and meaning of the spoken word to the fullest extent. Nearly-perfect sound effects completed the realistic picture.

Galapagos was but one of a number of realistic dramatizations of the best-known sea stories of all time that have been included in this series of broadcasts, heard over the Columbia network from 9:30 to 10 P. M., EST., every Sunday and Tuesday. The opening program of this new and unusual series featured such well-known stage stars as Alice Brady and John Anthony in a dramatization of the ancient, picturesque legend of *The Flying Dutchman,* upon which Richard Wagner based his opera of the same title.

Other well-known sea stories selected by the sponsors for inclusion in this series are Robert Louis Stevenson's ever-popular *Treasure Island, The Strange Story of Aaron Smith, The Golden Peacock* and *Out of New Bedford.*

A GREAT number of these stories which have been dramatized for *Romances of the Sea* are based on actual happenings. For instance, *The Golden Peacock* is based on the story of a trading vessel, whose cargo included some golden peacocks belonging to the Mogul of India, which was wrecked off the East African Coast. Several attempts to salvage the golden peacocks have been made in past years.

Every effort has been made by N. W. Ayer & Son, Inc., who are in charge of the production of these dramas, to make them as realistic as possible. Consequently, when it was decided to include Galapagos in the series of dramatizations, someone suggested that Christiansen be found to play his own part. "Red" had been on the air before, and they knew he would be more than willing to take part in the broadcast if only he could be found.

This was easier said than done. A visit to the headquarters of the taxi company for which "Red" had worked was unsuccessful. "Red" had given up taxi driving two years earlier. Investigators were despatched forthwith to find "Red" Christiansen, "and find him quick." Several of the newspaper radio columns asked "Does anybody know where 'Red' can be found?"

After searching for nearly a month, one of the investigators found "Red." Since turning in his taxi he has been serving as janitor of an apartment house in Washington Heights. "Red" was more than willing to take a few

adds ZEST

and John Anthony Bring Mike as Hero of Gala-Tale

S. HESSE

hours off from tending to the wants of his tenants to live over again the months of hardships on Galapagos.

It really wasn't necessary for "Red" Christiansen to rehearse his part in the radio drama. He remembered every incident clearly. But it helped to create the realistic picture to have "Red" coach the other actors to read their lines just as they had been spoken twenty-five years ago. When, after hours of rehearsal, the dramatization was put on over the air, it was hailed as one of the most thrilling broadcasts since the beginnings of radio. Let's let "Red" tell you the story which was re-enacted:

"WELL, I suppose the story begins when I signed up with the bark 'Alexander' down on the other side of the world. That was at Newcastle, New South Wales, Australia. It was in November, 1906, and I was just 19 years old. The 'Alexander' was loaded with a cargo of coal, bound eastward across the Pacific for Panama. She carried a captain, mate and second mate, cook and sixteen of us men.

"I had been living at a sailor's boarding house run by Nellie Simonds. The day we shipped, November 6 it was, I remember Nellie rowed out in the bay where we lay. She brought some refreshment along as a parting gift. We hoisted it up the side. I don't mind telling ye that her brand of refreshment made a bigger hit with us than the stuff we had to drink before we got through.

"After some singing and some farewells, we slipped out of the harbor toward the open sea with every sail filled. The captain had made the same trip before in seventy days. And so, everything pointed to our being in Panama in a little over two months. Louis, the cook, had 140 days' rations stowed away. Mebbe you don't know that marine laws require a sailing ship to carry rations for twice as long a period

Chaos!

Former Commissioner Contemplates Hostile Elements May Deliberately Wreck Present System by Wave Grabbing

By H. A. Bellows

AGAIN the stage is being set to sell American listeners the idea of discarding the American Plan of Broadcasting for the European system, if "system" it might be called. Enemies of our broadcasting who are envious of the sums spent in advertising on the air are maneuvering to take the free competitive program plan out of the hands of private owners and deliver your radio entertainment into the control of a politically appointed government bureau. The first move to attack the American Plan is to break up the range of channels over which our broadcasters now function.

To start this crumbling process a certain amount of public dissatisfaction must be stimulated. Then some kind of a plausible front must shield the real motives. A certain high powered press agent has suddenly become endowed with the rank of "an educator" and sent to Europe. He sends back cabled interviews with himself as "an educator" telling of the superior excellence of the Russian system of broadcasting. These interviews are published in newspapers throughout the country. When he returns he will doubtless begin operating on a revival of the Fess Bill to set aside 15 per cent of the wave lengths allotted to America for the exclusive use of—well, now you guess who; but you will be told it is for "educational purposes."—Editor.

Vice President, Columbia Broadcasting System, Inc., Former Member Federal Radio Commission

NEARLY five years ago, after months of discussion, Congress passed the Radio Act of 1927.

In this act Congress specifically assigned to the Federal Radio Commission the duty of allocating licenses to transmit radio communication. Since the passage of that law, the Federal Radio Commission has exercised the power of allocation conferred on it by Congress.

Whether the Commission has used this power altogether wisely or not is beside the point. It has done its work in an orderly and systematic manner, on the basis of the best engineering advice it could get, and with relatively little subjection to political influence.

There are a great many people who, for one reason or another have failed to meet the standards of public convenience, necessity or interest set up by the law and interpreted in the general orders of the Federal Radio Commission. These people want to broadcast, but they cannot secure licenses as long as the law is administered in an orderly fashion. Naturally, they would like to see the allocation of broadcasting licenses turned into a political free-for-all.

There are others who, though authorized to broadcast, have been unable to secure from the Commission all the advantages they would like to have. The commission knows that the total amount of facilities available for broadcasting is sharply limited by engineering requirements.

These people believe that they would stand a better chance of getting what they want if allocations were to be made by Congress itself, because they know that Congress has had little opportunity or desire to study the engineering problem of radio communication.

They, too, want to see the allocation of broadcasting facilities turned into a political free-for-all.

When Congress enacted the Radio Law of 1927, its members were wise enough to realize that the problem of allocating radio frequencies, both within and outside of the broadcast band, was a highly technical one. They were content to lay down general principles for the guidance of the Radio Commission, knowing that Congress has more important things to do than to decide whether a license shall be given to John Smith or to James Brown.

Enormous pressure is now being brought to bear on Congress to undo its own wise and sane work. People who see in any orderly system of allocations little chance for securing what they want for themselves, hope that if chaos is again precipitated, they may be able to grab something worth while. Their only hope is in a return to the intolerable condition which existed in

(Continued on page 95)

Dr. Nicholas Murray Butler Heads New

EDUCATIONAL SERIES

IN ANSWER to those who berate the American Plan of Broadcasting comes this announcement of still greater strides in promoting education by radio. No more significant list of American educators could be assembled than those who will be heard in this series. Our national legislators should make note of what is being done for education by radio before yielding to the importunities of those who have selfish interests.

A GREAT deal of wind has been taken out of the sails of those who are trying to use the cause of Education as a cloak under which to wedge off a certain section of the broadcast spectrum. Leading educators of recognized achievement are cooperating with the leading broadcasters in promoting cultural programs in the most effective manner. This movement is fostered by the National Advisory Council on Radio in Education of which Levering Tyson is the director.

Both chain systems conducted comprehensive education features last year. The Columbia Broadcasting System's School of the Air was eminently successful. As Radio Digest goes to press with this November issue the National Broadcasting Company in cooperation with Mr. Tyson's organization has announced a program of lectures that could not be surpassed by any single educational institution in the country. The announcement states:

A GROUP of thirty weekly radio lectures on present-day economics and psychology will be inaugurated on Oct. 17 by Dr. Nicholas Murray Butler, president of Columbia University; Dr. James Rowland Angell, president of Yale University and Dr. Ernest L. Bogart, president of the American Economic Association.

The two branches of discussion will share the weekly educational period, a prominent economist and a leading psychologist speaking for fifteen minutes every Saturday night at 8:30 o'clock. The entire series of addresses on economics and psychology will be broadcast by the National Broadcasting Company. Other subjects in the series will be offered for transmission over the facilities of the Columbia Broadcasting Company and subsequent lectures will be offered to both networks, Mr. Tyson said. In each case the time is donated gratis by the broadcasting organization.

There will be thirty lectures in each series. The first ten addresses in the economics series will deal with the causes of economic depression and possible solutions. Unemployment insurance, national economic planning, the merger movement and other problems of modern economics will be discussed in future lectures.

Thus will the idea, born when a small group of educators met in the Winter of 1929-30 to consider the possibilities of radio in promoting adult education, become a reality. The series will continue indefinitely and has adequate financial support. Nor will it be confined exclusively to the proposition of adult education. Radio as an instrument of education in the classroom is being worked out and one day must come, Mr. Tyson asserted.

But at present the council is emphasizing the idea of radio in adult education, and a distinguished group of educators from all parts of the country have enlisted in the cause. In addition to Dr. Butler, Dr. Angell and Dr. Bogart, others who will participate in the series of lectures on economics and psychology, which will run concurrently, are Jane Addams of Hull House; Edwin F. Gay, Professor of Economic History, Harvard; Walter R. Miles, president of the American Psychological Association; Edward S. Robinson, Professor of Psychology, Yale, and Robert S. Woodworth, president of the Social Science Research.

"Not only have we had the wholehearted support and cooperation of educators throughout the country," said Mr. Tyson, "but it has been amazing to discover that the educators and broadcasters alike have been quick to realize that a different technique is required for the classroom and the microphone."

The subjects that might be covered in a college course in economics and psychology will not be treated in this radio lecture series. Only such topics as capture the popular imagination and offer a solution of problems close to every listener's heart will be on the schedule. Economics and psychology were selected as the subjects of the first series, it was explained, because of their current interest in the public mind.

Complementary to the psychology lectures, a syllabus prepared in connection with the addresses will be mailed upon application to the listener as a preliminary guide following the initial lecture. Copies of Dr. Butler's opening address, with information pertaining to subsequent lectures, will be mailed free of charge upon application. There will be a nominal charge for the syllabus and for printed copies of subsequent addresses in the psychology lectures. Literature with a list of readings and references in the economics series is also being prepared. The purpose of these booklets and pamphlets is to serve the listener as supplementary literature.

MR. TYSON recently returned from the International Conference on Education in Geneva where he said that educators from every country were awake to the possibilities of radio in carrying cultural thinking and knowledge to the masses of the people. He compared the problems of utilizing radio for educational purposes in Europe and the United States. National boundaries there are not so far apart. Programs can be carried through more uniformly without interference by difference in time. He said:

"The problem abroad is considerably simplified because of geography and centralization of government. There they are not confronted with the network idea with all its ramifications, geographical and financial, along with the all-important element of varying time in different zones. For instance, the signal of 2LO at Chelmsford, England, may easily be picked up in any part of the British Isles, while the powerful Warsaw transmitter may be tuned in on almost any part of the Continent. Such a system eliminates the necessity of a network. Moreover, the Central Government, which controls and operates the broadcasting stations, helps to simplify the problem.

"But on this side of the water," Mr. Tyson continued, "we meet the conflicting forces of private ownership of radio stations under government regulation, the time-zone bugaboo and the difficulties to be encountered in broadcasting over a network, aside from the tremendous expense involved."

Hear AMERICA

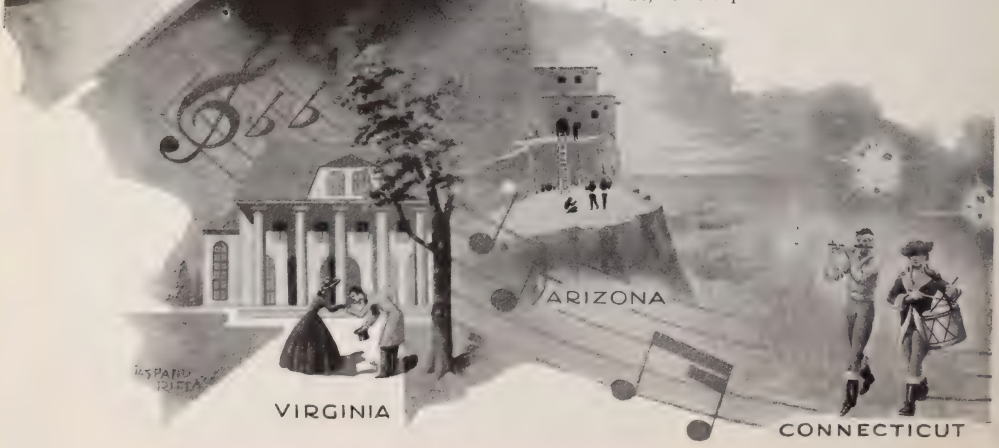
"Parade of States" and Salutation

By DUKE

THE treasure-house of Americana has opened its rich stores to radio.

And "The Parade of the States," radio's newest and much discussed radio program, is the result.

In the Cathedral Studio at National Broadcasting Company several weeks ago there assembled an unusual company of artists. There was a native of Budapest, Hungary. And a native of England. A symphony orchestra made up of men who represented in nationality a concert of European nations.



Erno Rapee, Conductor

An American author. And finally, a noted pianist and composer who claimed as his birthplace, Virginia. They were assembled for the premiere performance on a nationwide network of "The Parade of the States," the answer of the General Motors Corporation, its sponsors, to the assertion that there can be nothing new in radio.

"I am only a young American," Erno Rapee, famed conductor of thousands of symphony concerts, had told me a few days before as we chatted in his offices high above Fifth Avenue. "I am only twenty years in this country. And now I am studying state by state the musical lore and native composers of America. It is giving me a long waited for opportunity to learn more about the original musical traits of this our own country. "The Parade of the States' requires countless hours of research. And I have found, in preparing the music for our programs, a great wealth of characteristic American material, an amount which will, I believe, surprise even most Americans, themselves."

Erno Rapee is musical director of the new radio program, a Monday night Red Network feature which he calls something "distinctively new in radio." More than a score of years ago Rapee, a native of Budapest, was assistant conductor of the Dresden Orchestra. His triumph as leader of the Roxy Symphony and in other important radio and concert roles is musical and radio history.

So, for the premiere of "The Parade of the

First!

a Musical Pageant to All Sections

PARRY

Erno Rapee Delves Into Uncle Sam's Song Chest and Finds Priceless Treasure

States," there were, in the studio, Rapee and his symphony orchestra. Charles Webster, an Englishman and one of radio's best known actors was in the cast. It is Webster's role, strangely enough to read, each week, a tribute to the particular state of the week and his opening tribute, written by Bruce Barton, author, was to Virginia. It must have caused some interest to find that Webster, an Englishman by birth and famed for his impersonations on the air as Abraham Lincoln, was reading the evening's tribute to Virginia, the cradle of the Confederacy.

And, heading a large cast of singers and musicians was to be found John Powell, a native Virginian and called by Rapee, the "most romantic of American pianists". The assets, resources and romance of the various states will form the basis for the music of each program. The Virginia tribute, typical of others that were to follow, opened with a "symphonic poem," entitled *Virginia* and written by Rapee himself. It included a paraphrase of *Carry Me Back to Old Virginia* and some Virginia Reels. Next listeners were transported by music to an Indian wedding festival, followed by a musical representation of the Legend of Pocahontas. A gay Virginia hunting scene next was pictured in music, with lords and ladies of the manor house gathered together on New Year's day for the hunt. *A-Hunting We Will Go* and *Brown October Ale* were included in this bracket. Finally, the *Negro Rhapsody* composed by John Powell and rendered by the orchestra with Powell at the piano, concluded the program.

Choice of the state to be honored each week will depend on the national attention directed at the various commonwealths. Virginia was given the place of honor due to the celebration of the Yorktown Sesquicentennial and as a final number on the opening program there was A Yorktown Sesquicentennial number including the Virginia University airs and a medley of patriotic airs associated with the state.

The procession of states to be honored through to December 21, will follow this order:

October 19—Virginia	November 23—Massachusetts
October 26—Arizona	November 30—Idaho
November 2—Connecticut	December 7—Ohio
November 9—Alabama	December 14—Georgia
November 16—Oklahoma	December 21—Missouri

Vaughn de Leath, whose popularity as a radio star has neither dimmed nor flickered in ten years. She now comes to light as a woman of great inspiration, as an inventor and as a good housewife

The *of* GEER-

Vaughn and Livingston did not even ago but now tney are one of the

By Anne

LIVINGSTON GEER is a great artist—and so is his wife, Vaughn de Leath. Which is a very diplomatic and gentle way of imparting the glad tidings—to those who write burning questions to Marcella—that Vaughn de Leath is married.

That Little Bird, appointed to see all, hear all and know all, called me aside the other day and whispered, "Do you know that Vaughn de Leath's husband is a famous portrait painter?"

"Do tell?" was my original ejaculation, not daring to appear as if I shared in this odd bird's omniscience.

"So while Toddles and I go through our day's mail," continued Marcella as she slowly made her way through a mountainous stack of letters," suppose you act as our ambassador and call upon the Geer-de Leath Household with our compliments."

Half way up the street, ready to carry out my orders, and I heard the shrill, familiar voice of Marcella, "Don't forget the toothbrush!"

"Yes, don't forget the toothbrush!" echoed Toddles through her mouthful of cracker crumbs.

"Don't forget the toothbrush," I repeated mechanically over and over again—"toothbrush, toothbrush—brush."

Upstairs in the National Broadcasting Company's reception room, my mind full of toothbrush, I met Husband Artist and Wife Radio Star.

There is a rich warmth about Mr. Geer's personality which betrays a great depth of sympathy and understanding and he is gifted with a rare perception that brushes aside faulty human traits and reaches only for that which is fine and pure and lovely.

Never working at cross purposes but instead, always cooperating with each other whenever possible, Mr. and Mrs. Geer stand out conspicuously as two successful people whose careers marriage has heightened and not dimmed.

DURING the program, for instance, as Vaughn de Leath was singing some of the old favorite songs, Mr. Geer acted as her critic and advisor. Then as we sat together discussing Miss de Leath's inventions, Mr. Geer quickly but painstakingly sketched them on paper.

And here is where the story of the toothbrush comes in. Now, there's nothing about a toothbrush that would throw anyone into a fit of ecstacy—I mean, of course, by *anyone*, those of us who have, through much discipline, become faithful subjects of this Bristled Buddha.

I guess the only kind of a toothbrush that would gain nation-wide attention would be one designed to fall automatically into children's hands directly after every meal. But Vaughn's invention is not of that kind. Still it is deserving of radio listeners' attention in that it reveals the ingenuity of one of their old favorite artists as an inventor of bright

Firm de LEATH

want to meet each other some seven years happiest couples in radio circles

B. Lazar

A sketch of Livingston Geer drawn by Mr. Geer himself for Radio Digest

promise. From the picture which Friend Husband sketched for me, it is small, graceful and convenient to handle, an article which would be the pride of any veteran of the toothbrush brigade.

Miss de Leath's inventive mind did not stop with the toothbrush—one might indeed say that her mind never stops—for her various activities support the theory of perpetual motion.

For instance Vaughn de Leath has found the panacea for that starched shirt-bosom bulge. It's christened a Shirt Bosom Sta-put and consists of four lengths of stitched tape. One end of each length is fastened to the armored breastplate, and the other to the leather portion of the suspender. With this restraint the bosom front hasn't a ghost of a chance to bulge.

Then there is a road runner—whose noble purpose in the world is to enable victims of flat tires to run their machines to the nearest garage.

Vaughn de Leath in her country garden

IT SEEMS odd that these practical inventions should have come from a mind that is so ethereal as Vaughn de Leath's, for even when you look at her, although she is by no means slight of figure, you get visions of flowers and perfumes and all of the lovely things that are associated with the truly feminine nature.

For seven happy years these two young people have been making parallel strides to progress—never conflicting—never co-elbowing. In the studio where some of the wealthiest and most famous men and women have come to have their portraits painted, Mr. Geer quietly and unobtrusively works with brush and canvas. He is well-built, has blond hair and searching blue eyes that never miss a person's inner nature. That is perhaps why people of means do not hesitate to pay him many, many hundreds of dollars for his masterful work.

HAD it not been for the persistence of a Mutual Friend, Vaughn de Leath and Livingston Geer would still be operating in separate spheres of endeavor, missing each other's beautiful companionship. Something like seven years ago this Mutual Friend discerned the possibilities of a blissful union if only he could get these two young people to consent to meet each other. But Vaughn, always a popular girl, couldn't stand artists and *couldn't be bothered,* while Livingston didn't want to meet any girls. But *Came the Day,* and every matinee and evening performance there after found Livingston Geer in the audience of *Laugh, Clown, Laugh,* the stupendous Broadway production of that season in which Vaughn de Leath was the prima donna, and as Vaughn says, he knew every line of her part and became her unofficial understudy.

Seven years of happily wedded life tell the rest of the story. Every weekend they drive up to their simple country home in Westport, Conn.—The Hitching Post—and there gather fresh inspiration for their week's work in the humming city.

Mr. Geer has made a very profound study of colors, and is always experimenting with them. Thousands of years ago, our ancestors saw only the shades of black. Red was the next color that came within the low range of their vision, declared Mr. Geer, and as he said this, I glanced rather dubiously at my glaring red jersey suit. And violet is the newest color that has come to man's perception.

Mr. Geer spent several months in Oklahoma painting the portraits of some old Indian chiefs there for a wealthy Oklahoma oil man, and as this particular tribe is rapidly becoming extinct. Mr. Geer's paintings will be the only record of their existence and will undoubtedly find their way into a national museum for posterity.

Loves to Go Places but Yearns for Home

KATE *Smith*

By HILDA COLE

ALL her life Kate Smith had felt the urge of the nomad. She longed for the wings of a dove or something like that. The wings not being obtainable she used roller skates. And once she looked longingly at the big and mysterious tank of a gasoline truck. Where did it come from? Where would it go? What was it like on the inside?

It was big, new and empty. She clambered into the dark interior—lucky for her the fumes had been cleared out, but not so lucky was the fact that she found herself unable to crawl out as she had crawled in. She yelped but no one heard her as the truck roared away. She rode all the way to the next town before she was discovered—*was she scared!* They telephoned her family and then sent her right back home to Washington on another truck. So, after all, the adventure had been fairly successful.

Kate told me this little adventure as we were waiting back stage at the Palace on Broadway where she had just completed her record run of eleven weeks.

"I guess that started it," she said. "I'm really a little ashamed at the impish mischief I got into. I wonder where those boys are now that wouldn't let me ride their bikes? I was awful about it. If they didn't let me ride I would kick the spokes out of the wheels. Of course I didn't realize then how really terrible it was. I wonder if those boys still hold a grudge against me?"

From singing at school affairs, she soon broadened her scope of entertainment. Now after school hours, provided of course that she did not stay up too late, Kate was allowed to sing at various affairs in Washington. She was in demand at the Elks Clubs, Masonic Temples, and indeed every kind of organization conceivable that indulged in entertainments and benefits. But before her even yet—like a villain in a fairy story, pranced the knowledge that, when she was old enough, she was to study nursing.

CAME the war. She sang for the original A. E. F. before they sailed for France, and for the Red Devils when they were in Washington. Kate could put over the sentimental songs that were popular at the time. Do you remember? *Just a Baby's Prayer at Twilight — There's a Long, Long Trail a-Winding*—and those perfectly huge men just loved it.

As our Kate grew up she became somewhat less of a rakish tomboy, and began to take more of an interest in household affairs, cooking and sewing. She even had a little spell of playing with dolls, which was quite a come down from her monarchy in gangdom.

After graduation from high school, without honors but with an adequate percentage of marks—Kate obediently went away to study nursing at Georgetown. The family insisted upon it, but her heart was not in her work, and she longed to begin her theatrical career.

"The very biggest kick I got out of nursing," says Kate simply, "was in giving transfusions, and I did give a great many of those. One time I gave over a quart of blood to a girl who was in a coma and wasn't expected to pull through. But she did. It was a direct transfusion and the doctors advised me to lie quietly after it was all over. They said I'd faint if I tried to get up and walk around. But I did get up and I didn't faint. I'm cursed or blessed with an unbelievably robust health."

Kate being big and capable, must have been a most reassuring person to have about as a nurse.

"As much as I hated medicine," she added, "I do love to take care of people when they're sick and need some real, good care. Now that I'm in radio and have everything I always longed for, I do enjoy nursing. When I was actually in training, I constantly looked forward to the thing I couldn't do."

After the war was over, Kate sang for General Pershing at a special dinner given at the White House. Later on she sang for President Harding and President Coolidge. She was frequently greeted by some celebrity anxious to pay special compliment. President Harding predicted that one day she would become a great singer.

The Anchors-Aweigh clan down at Annapolis will not forget Kate. She sang regularly for them at graduation

Ka-ka-Katy, Morton and Bing—
A Queen, a Jack and a King,
Yet Aces they're all
At Columbia's call
And Lordy, how they can sing!

from 1921 to 1926 and regretted very much when circumstances made it impossible for her to go on.

After one year of study at Georgetown, Kate announced quite vehemently that as a nurse she was a good singer, —and the family gave in. They had decided by this time to let her follow her own inclinations, and agreed to let her venture into the theatrical profession.

Her first experience on the legitimate stage, which came directly as a result of her amateur appearances in Washington, was in *Honeymoon Lane*. Eddie Dowling heard her sing and approached her after a benefit performance in the Keith theatre in D. C. It did not take them long to come to terms. Kate packed her trunk for New York and went straight into an excellent production. It was a great success, and ran two years from September, 1926, to May, 1928, in which time she never missed a performance.

HOWEVER, during that period she was terribly homesick. After each performance she would shed her "footlight face," go back to her apartment, and despondently dream of Washington, and the good, informal old days. She never went out on parties with theatrical folk, but kept very much to herself. Every Saturday would find Kate on the train heading for Washington, and each Monday would find her back in New York again, frolicking, gay and care-free, through her performance.

"I missed my gang," Kate says, "And you know, New York isn't a very friendly place to complete strangers. I figured that people just didn't have time to bother with me, so I kept pretty much to myself."

She affirms that she has always shied away from people who were willing to push her up the rungs of the ladder through introduction to theatrical magnates. She didn't like the idea.

She had several amusing experiences while playing in *Honeymoon Lane*. It was against the rule for the actresses to wear real flowers on the stage during a performance. One day a young lady of the ensemble violated the rule, wore real flowers, and one of their treacherous petals fell on the stage. Kate slipped on it, skidded dizzily and finally flopped down with much reverberation on the floor.

"I did have the presence of mind," recalls Kate, "to go into a silly pose, and there I lay sprawling prone on the floor with my hand beneath my chin cherub-wise and a pious smile on my face. The comedian, who was a little fellow, came over and struggled to lift me up—but it was too much for him, and in the end I carried him across the stage and lifted him in a chair to recuperate.

"Another time," she went on, "I kicked my shoe off in the beginning of one of my dance numbers, and had to finish it like Diddle Diddle Dumpling with one shoe off and one shoe on. The shoe I kicked off went sailing beyond the orchestra leader, past the saxophones, past the violins and finally, I believe, landed in the lap of an indignant matron."

She hesitated, and pushed back some of her blonde hair from her forehead.

"When I was playing in *Honeymoon Lane*," she went on reflectively, "I really got one of the biggest thrills I've ever had anywhere. There was a bridal party filling up two rows of the theatre. After my number was over they all took off their corsages, — tea roses, gardenias and showered me with them. Oh, they were beautiful!"

"When the moon comes over the mountain . . ." but let Hilda Cole tell you the rest of this interesting Kate Smith story of which this is the second and concluding part.

Toward the latter part of the life of that production, Kate had trouble with her tonsils that led to quinzy throat. She was miserable a great part of the time, but was so anxious not to miss a performance that she often went on, she says, in "perfect agony," and had to consult a doctor the moment she came off. The show closed in Chicago in May of 1928. She had been so utterly miserable and worn out that she packed her bags, went back home to Washington again, and was happy to be reunited with her family and friends. There she recuperated, and coaxed herself into good spirits with canoe rides down the Potomac, swims in the Chesapeake, and picnics in Virginia.

But, as might very well have been expected, Kate soon became restless again. Within a year, even the pleasant homeiness of life seemed incomplete. She wanted more footlights.

Kate, with a typically swift decision, and without quibbling, wired New York for bookings, packed her bags, and came to the Metropolis again to work for Keith.

SHE worked fifteen weeks for them, making a tour of most of the big cities in the country. Everywhere she went, she got a very "big hand." Kate sang all the popular music, interpolating her melodies with jazzy syllables—and short dance steps.

"One time," Kate says, "In a Midwestern theatre, I was wearing a long string of pearls. In the midst of my song they broke and went rattling over the stage and into the orchestra pit.

Ardent admirer of Mahatma Gandhi and eager to help his cause Miss Spring obtained this autographed snapshot of him through a mutual acquaintance.

INDIA *on*

America Became Suddenly Conscious of India as Never Before when the Voice of Mahatma Gandhi Swept Majestically Across the Country from His Modest Quarters in London--When this Great Leader Speaks All Else that is His Country Listens for Mahatma Gandhi is India

AS the measured and inspired words of Mahatma Gandhi came sweeping across the Atlantic and over all America a few weeks ago no one in this country could have listened with keener interest and attention than Miss Helen Spring in her apartment on Long Island. Miss Spring, famous American actress, spent a year traveling about India in 1930. She found that the people of India, high caste and low, revered this great leader almost as a deity. She has continued to keep in touch with leaders there from her home in New York. She receives the Indian newspapers that are published openly and surreptitiously. She tells of atrocities she beheld there with her own eyes.

—Editor.

"LIVERIED men stand and salute when Caesars pass. Their legs are weary with standing, their hearts weary with disgust. The Caesar holds them in pay. They have neither love nor reverence.

"Far different are the men and women who snatch an hour from a busy day and waste fifty-nine minutes of it that the sixtieth might bring them a fleeting glimpse of a Ruler of Hearts. The crowds that gathered on that monsoonish Saturday morn came not with the bought salute of the hand but with the unbought homage of the heart.

The one question on all lips was,
Has he come? Is he there?
The psychologist could have answered
'Look into your hearts for there he truly is.'"

(Comment in a Bombay newspaper on the day Gandhi sailed for England.)

"Do I have to speak into this little thing?" These were the first words which an expectant American radio audience heard of the voice of Mohandas Karamchand Gandhi, as he faced his first microphone. I was listening with perhaps more than ordinary anticipation because I had but recently returned from a year's travel in India where I had witnessed the amazing effects of Gandhi's leadership of the Indian people in their fight for political and economic freedom. I'll confess I was no little excited and anxious, for this was to be Gandhi's first broadcast, and those of us who had participated in various radio programs can scarcely forget the trembling and trepidation, if not actual stagefright which we experienced on the occasion of our first appearance before the "mike."

You may remember Miss Spring as the leading lady in the most recent presentation of the stage play of The American Tragedy. She prays for Gandhi's cause.

ACQUIRING leadership in India is one thing, and holding a critical American audience is another. I couldn't help but wonder, would he "get over?" The delicious chuckle which followed his words put his listeners entirely at their ease—for it made them realize that here was a plain and simple human being who was mildly amused at the type of mechanical contrivance before him. Perhaps his success in retaining his hold upon the hearts and imaginations of the masses of Indian people, lies in his ability always to proclaim himself first as the man, and then as the leader.

Seated cross-legged on a chair, and gripping the "mike" firmly at its base, he did not begin at once, and even through the miles of separation the silence could be sensed as the silence of his prayer.

"In my opinion the Indian struggle bears in itself consequence not merely affecting India, but the whole world," he began, and for twenty minutes his slow clear baritone was distinctly transmitted. People everywhere were thrilled by the richness of tone, and his fascinating diction. From the depths of his voice one might easily visualize a tall, broad-chested man who takes his voice culture seriously, and it is hard to believe that such quality of tone could come from the very frail body of a sixty-seven year old man, who deprives himself of virtually all worldly comforts, and whose only sustenance is goat's milk and a few pieces of fruit each day.

Many of our best and most interesting announcers could look to this novice of the air for pointers on how to hold

the AIR

By Helen Spring

an audience. People who are not particularly interested in India's freedom, people to whom kaddar, untouchables, lathis, ahimsa, and the Congress movement mean nothing, found themselves listening to his every word. His voice

Snapshot Miss Spring made of three Indian girls of well-to-do family wearing the homespun of the Ghandi followers. The instrument is the citar.

was calm and serene, and he appealed to the intelligence. The inflexions of his voice were not varied, but were intensely sincere, and his word carried conviction.

It was not my good fortune to meet the Mahatma while in India, for he was the guest of the British Government behind the bars of a jail near Pooma, but while I didn't meet him personally, I felt I knew him well, for the pulse of India beats through Gandhi. Everywhere there seemed to be a sense of him. His doctrine of love and his weapon of non-violence was being reflected through the masses for whose freedom he is making a desperate fight.

I did, however, meet a number of his leaders, many of them men and women of wealth and excellent education, who, like Gandhi, have given up their entire fortunes, donned the homespun garments and were living a life subjected to hardships and even imprisonment.

He is the leader of the Indian people who is making a desperate fight for their freedom. His doctrine is love. His weapon, non-violence, and that is why—unlike the average political speaker—he never condemned the country against which he is struggling; nor does he ever use malicious words against any individual anywhere. On the other hand, he admitted India's people are not perfect or without blame, and he patiently teaches them to—"First put your own house in order before expecting consideration of your foreign ruler."

To be a politician in India customarily means to give up all wealth, to don crude homespun, and to live a life subjected to hardships and even imprisonment.

Gandhi's diction made one recall his background of intelligence, modest wealth, and a university of London education. Except for a slight "de" instead of "the," his address was in the King's best English. His wealth has been given to India's cause and his European attire has been discarded for a loin cloth, because until the half-starved millions of his beloved country can afford to wear more, he will not allow himself the luxury of more regal robes.

Mahatma is a name which the people of India have given to Gandhi. It means "the great soul."

Farm workers are being taught by the Gandhi followers to weave their own textiles in order to carry on the strike against the purchase of British goods.

Miss Spring in a gorgeous green sari which she wore while in India. It was a gift made of chiffon with real gold inlay and consisted of a single strip seven yards long used as a drape.

In my opinion the three outstanding points of his speech were: First his admission that India is not perfect, that it has many shortcomings. This required courage. Most modern politicians are extremely reluctant to make any admission of weakness. Second, his public acknowledgment of the participation of the women of India in this struggle for freedom, and the psychological as well as the practical effect of their splendid assistance. As you know, it is Gandhi who has encouraged women to emerge from their state of purdah to a position where they are socially conscious and

TELEVISION

By MARSHAL TAYLOR

NO QUESTION about it everybody is waiting for the next chapter in the television story. Just like the dramatic thriller all the little tricks to create suspense have been presented naturally if not artfully. The eager fan is waiting tensely for the conquering hero to emerge unrestrained from the baffling toils of the laboratory.

Last month we stated that television is here. We stand by that statement. It is here even though it be somewhat cloyed by obstacles making it less than perfect. A survey at the Radio-Electric World's Fair in New York showed that the interest of the 50,000 who attended was predominantly concerned with television.

Hollis Baird of Boston (left) and U. A. Sanabria of Chicago, boy television inventors who meet at fair in New York. They will try to make pictures like this move and talk to you through your radio receiver

At almost any day or hour we may hear the announcement of the R. C. A. television receiver—the "pre-commercial" model, as it is called. It is understood they have definitely eliminated the rotary scanning disk in favor of the cathode ray tube. It will be more costly but much simpler to operate owing to the fact that the amateur will not have to bother himself about moving mechanical parts.

The cathode tube is a curious looking affair resembling somewhat a bell-shaped bottle, the bottom utilized for a screen, similar to the ground glass plate on which an image is thrown in the back of a camera. The screen may vary in size from three to eight inches square. Resources of many of the world's greatest experimental laboratories have been joined to produce this remarkable tube. German scientists came to confer with the experts from General Electric and Westinghouse at the Camden laboratories of the Radio Corporation of America.

Just the cathode ray tube alone will cost approximately $125, which will be no little set-back for the amaateur who makes his own receiver.

"Suppose it rolls off the table when you take it out to clean the socket?" remarked one young enthusiast who had just purchased his first kit. "I'm going to play with the disk system until they get one of those tubes down to what an ordinary chap can buy for at least no more than a day's pay."

Philo Farnsworth on the Pacific Coast is still a mystery man although he is said to have afforded some startling demonstrations with enlarged images. He too has been working with the cathode ray as an electric scanner.

In the meantime the National Broadcasting Company is progressing with the installation of its new 5,000 watt television transmitter on top of the Empire State building in New York — in fact right in the heart of the city surrounded by a veritable giant's gridiron of steel framed structures. The NBC being a member of the R.C.A. family doubtless is proceeding to keep step with the R. C.A. television receiver which has been announced for release to the public within the year. A fund of $125,000 has been appropriated for the building of the studios and transmitter; this notwithstanding the fact that all NBC studios in the great Rockefeller Radio City, now under construction, will all be equipped for television.

Ultra-short waves will be used for the NBC television broadcasts—43,000-46,000, 48,500-50,300 and 60,000-80,000 kilocycles. Other short wave groups will probably be used for the synchronization of sound. These very short waves have a very limited range and that is why the NBC obtained the highest point in New York to carry out this project. The Empire State is the tallest building in the world. The studios will be on the eighty-fourth floor which is about 1,000 feet above the street level. The antenna will be strung from the mooring mast which towers 250 feet above the building. Since these waves are said to travel only as far as the horizon from the point where they emanate it will be seen that the lofty mooring mast will be very useful between times while waiting for dirigibles.

While the world waits for the dawn of the cathode ray system no time is being lost with the scanning disk devices of which Jenkins, Sanabria and Hollis Baird are the chief exponents in this country. Sanabria's widely heralded "ten-foot image" did not come up to expectations. It lacked sufficient illumination to be seen well from the full length of Madison Square Garden, and

(Continued on page 90)

"THE big problem in television has always been, is now and probably always will be to obtain high definition and yet retain sufficient brilliancy for satisfactory reproduction of the picture at the receiving end," said Sanabria.

"What did you learn from the demonstration at the radio show?" Sanabria was asked.

"We learned that there is no myth about the public's keen interest in television," replied Sanabria. "We know now that every contact in the circuit must be welded and not bolted. Every piece of apparatus must be built in duplicate so that in case of emergency the show will not be stopped.

"We have learned that greater brilliancy is essential. And this means that we must turn to water-cooled glow lamps. We are at work on tubes of this character, and when I get back to New York I hope to demonstrate the improvement they offer to television. Incidentally, we are using helium instead of neon in the glow lamp now because it gives a whiter picture. The neon tube gave a pink tinge to the image."

Vis-a-Vis

with

BILL SCHUDT, Jr.

Director Television Programs, CBS

FIRST to project a fight by television, the Columbia Broadcasting System can now boast that it was the first to broadcast a football game over the visual air . . . even though the football game was followed on a chart while wistful Ted Husing synchronized on sound from the sight of the event.

We had hoped to perfect a miniature baseball field to be utilized for television purposes in following the World Series, but efforts failed because of lack of time and lack of proper devices to make the contraption worth while. However, W2XAB did project box scores of the games each day of the series.

Experiments with a football board were carried on for a month before proper sizes and proper color contrasts could be developed. In the final analysis a football play board was painted black with all lines and notations in heavy white.

An oversized football cut out of sheet tin was painted white with the black letters of the teams on either side and an arrow showing toward which goal the team was working.

Thin wires were utilized to move the football across the field as either team made a gain or loss. Movements were in complete synchronization with the description by Husing on the regular CBS network.

I may be presumptuous but it seems to me that this experiment should go down in history as marking the first football game to be broadcast anywhere by television. At least, it was as near to the real thing that present day apparatus makes possible.

An odd incident was reported during the month. One of our South American singers playing in Vincent Sorey's Gauchos program on the television waves received a letter from his home country, Argentina. He became so excited that night he couldn't play at all. It was a revelation to him.

BUT, careful analysis proved that after all it was not extraordinary. He had not been seen by television; he had, on the contrary, been heard over the sound channel which is W2XE, and which operates on 49.02 meters. W2XE, by way of mention, has been heard regularly in Australia, New Zealand and other parts of the world.

Half a dozen fan letters from Radio Digest readers ask me to define "television." Well, I talked it over with Edwin K. Cohan, CBS technical director who for many years has defined everything in radio. What Mr. Cohan told me went something like this:

The present method requires four essential devices for transmission and reception, in addition to the ordinary electrical amplifying equipment such as is used for regular broadcasting. These four devices are—a powerful source of concentrated light to illuminate the object, a scanning disk to control and direct the illumination, a group of photo-electric cells to pick up the reflected illumination from the object and translate it into electrical energy, and last, a neon tube connected in the output of the television receiver to reconvert the electrical energy back into light.

In non-technical language these devices may be briefly described as follows:

Scanning disk — This is conventionally a metallic disk upon the surface of which are 60 very small perforations near the outer edge. In the transmitter this disk is located between the source of light and the lens, and is driven by a synchronous motor revolving (at the present time) at a speed of 1,200 revolutions per minute. It requires one complete revolution of the scanning disk to completely "scan the object" and therefore, at the speed mentioned, we are able to obtain 20 revolutions or 20 complete images per second.

THE perforations in the scanning disk are so located as to permit the control of a beam of light passing through them. This directs the said beam of light across the object being televised in straight lines from

(Continued on page 90)

This television ghost is most startling as it flits out of the dark shadows of the night across your screen. It comes over W2XAB Thursdays at 9:30. Some say he walks too seldom.

RECENT guest artists on Radio Digest's television program were Margery Swem, left, and Charles Umbach, right, in a program entitled "Song Stories"—a skit written especially for television. Both of these artists have theatrical backgrounds and represent the type television will be eagerly seeking before long. Below is Harry Glick, welterweight wrestling champion of the world, who, as a Radio Digest guest artist, staged the first evening television program of calisthenics.

White Paint Creates A GHOST in TELEVISION

IS television already by one of those mythical corners? Are the programs interesting? Would it be worthwhile to invest in one of the modern shortwave and television sets now on the market?

The answer is yes to all three questions. Television promises to blow the lid that is keeping broadcasting in the dark higher than a kite. Radio Digest has been conducting its own school of experimental television broadcasting. W2XAB, that's the television station operated by the Columbia Broadcasting System, has been the scene of our activities. And we have become convinced that a new art of entertainment is well under way and that many of the problems that seemed insurmountable a few months ago are now at least partially solved.

NOT the least of the difficulty revolves around make-up. Television does queer things to the human face. A man without trace of a beard may look like one of the Smith Brothers at the receiver end. And then again the chap who is clean shaven but whose beard is noticeable comes through perfectly and requires absolutely no paint. Some persons find black lip stick necessary and others use brown to obtain a natural effect when that tricky scanner is turned on. Noticed a beautiful, flaxen haired damsel in the studio who had been experimenting for some weeks with different types of make-up. That

Harry Glick

night her lips were blackened and her face was powdered a brick red. She had tried everything and she came through in a natural manner with that particular make-up on.

One of our guest artists was a black haired dark skinned type. We experimented and found that unless we rubbed just a trace of white grease paint under the eyes the entire face was distorted.

One of the most effective make-ups is that of the Television Ghost, a weekly feature at W2XAB. He plasters his entire face with white grease paint and then paints a black circle where his eyes are, another for his nose and another for the mouth. Then he drapes a white sheet over his head like a hood. When that man shrieks into the mike and gestures with his bony hands he's a ghost all right. His face looks like a grinning skull and his stories are shuddery things that should prove a great help to purveyors of antidotes for insomnia.

Another chap who had no more trace of a whisker on his face than a young girl gave us a jolt when we looked into the receiver. The sides of his face appeared as though covered with heavy fur-like muskrat skin. A thin spread of white grease paint fixed that.

These few incidents picked at random give an idea of only one phase of television experimentation. Experiments are going forward in many other directions and even now the television sets available to those interested represent a tremendous advance in the art. Television broadcasting has plunged forward, equipment is being improved constantly and the receiving sets themselves show the progress that is being made in the manufacturers' laboratories.

THE technique of program building also is being studied and successful experiments have been made with every conceivable kind of act. There have been boxing bouts, comedies, parts from theatrical productions, magicians, pantomime, marionnettes, et cetera. Radio Digest staged the first evening television program of calisthenics. Harry Glick, welterweight wrestling champion of the world, who has been broadcasting a program of ex-

Good Music and a Pleasant Chat Enhance the

Voice of Firestone

NEW Fall Program Presents the Commercial Phase in Way to Appeal without Offending the Listener. . . Readers Asked to Criticize

ONE of the finest of the new fall programs that we have heard this season is the Voice of Firestone. Good music and a good talk that entertains and informs you without boring. The Voice, incidentally, is literally the Voice of Firestone, for Mr. Harvey S. Firestone, Jr. is the speaker. You can't go wrong with James Melton for tenor, and Gladys Rice, soprano—and Melton, of course, identifies pretty well the Firestone Quartet which takes a name according to the hour of the day or night it is on the air.

Then there was William Merrigan Daly and his 30-piece symphonic orchestra which afforded a most delightful relief from the deluge of jigg-jazz that seems to be coming to the ether surface again for another kick or two before expiring.

It was a pleasing program all the way through and no one could take offence at Mr. Firestone's comparison between the old days of the horse and buggy and the modern motor car with its resilient pneumatic tires. He did not stress his own brand of tires, he just talked about the significance of rubber as it makes life more comfortable and convenient for us today.

There may have been something in this talk by Mr. Firestone of value to other sponsors who are putting sizable appropriations into their broadcasting. He takes a broad and human view without making the slightest allusions as to comparative merits of his particular merchandise.

We asked for a copy of the talk and would be interested to hear from our readers as to their opinions or criticism concerning it as a type of advertising on the air—but, if you didn't happen to hear the broadcast do not forget that the talk was handsomely garnished with music that was happily arranged sufficiently apart from the stratas of frothy syncopation on one side and the dry pedantic of the ultra-ultra on the other.

Mr. Firestone's comment follows:

"Friends and neighbors, the privilege has been given to me to speak to you briefly on behalf of the Firestone Organization and its multitude of dealers. I greet you as friends, because that is the spirit in which I come before you. I salute you as neighbors, because the magic of radio makes it possible for me to come as a guest into your home for this little while, and because this same magic instrument draws the whole nation together as one community, and we are becoming more and more neighbors in fact.

"Insofar as it is possible, I would like to take you with me in these weekly talks as we seek out the romance and the fascination of the great rubber tire industry. There is indeed much more in a well-ordered business than inanimate merchandise and cold economics. There is a sweeter and nobler side, and a wealth of fine sentiment that I wish to present to you in a series of word pictures.

"May we now turn back the pages of memory and view for a moment the conditions of yesterday. You folks who are now past middle age, let me summon the recollections of your childhood. Do you not remember what an event it was when father hitched up his best-looking horse in his best buggy and took the family to the nearest town, five or ten miles away? Do you not recall what an extraordinary experience it was if you traveled to distant places, fifty or a hundred miles away, by train or otherwise? All such events were looked forward to with eagerness and planned for with enthusiasm and exultation, because travel was so tremendously circumscribed by time and distance and inadequate facilities.

"Now let us spring lightly across the intervening period of thirty or forty years and live once more in our today. If we want to travel five or ten miles, or even twenty-five or fifty miles, we do it in a matter-of-fact sort of way and without preliminary thought or preparation. An hour's ride in the modern automobile or a short evening trip are sufficient for our purpose. If we want to travel a thousand miles in any direction or to any location, we merely set aside four or five days of convenient driving and we have arrived at our destination comfortably, whether it be in a great city or far away in the wilder country.

"These things are true because pneumatic tire, made of rubber, have been perfected in construction and manufactured in almost endless quantities at amazingly low cost, and have been made available to people everywhere without regard to wealth or social position. I would not detract in the slightest degree from the tremendous credit that is due the automobile, and the foresight and genius that have made it possible. But the automobile could not be the great and wonderful thing that it is without pneumatic tires upon which its occupants safely ride in comfort.

"Good springs and shock absorbers perform their essential service, but have you not noticed how hard the going is when one or more of your tires are flat? Can you imagine riding for pleasure on solid tires of any kind? No, friends, it is the air cushion within the rubber tires that makes travel comfortable, and adds to it the zest of pleasure and enjoyment.

"Perhaps the other evening you drove to a neighboring town to visit with relatives or friends. Or it may be that something was urgently needed in the home and you went quickly in the motor car to secure it. Probably father drove to work today or mother went shopping. Perhaps within the week you took the children out for a picnic supper some place where the trees grow tall and the flowers bloom, where the birds sing sweetly and the lazy brook wends its peaceful way. Maybe you went out just for a pleasure ride to enjoy the fresh air and the sunshine by day, or to revel in the moonlight or the brilliance of the starry heavens by night. All of these things you do with assurance and satisfaction because the perfected pneumatic tires take you

(Continued on page 91)

The Duchess de Richelieu

THE BEAUTIFUL Duchess de Richelieu was a recent guest artist on Radio Digest's Television program at W2XAB, operated by CBS. Short wave carried her voice to all parts of the world. The Duchess is intensely interested in charity and she has given a number of concerts to aid unfortunates. Through her singing, the Duchess was instrumental in raising more than $100,000 to fight the White Plague in France and that government honored her by bestowing upon her the gold medal of the Reconnaissance Francaise.

Lavender . . . . and Stardust . . . .

Kathryn Parsons, Columbia's "Girl O' Yesterday" Makes Memories Live Again

By Thomas J. Randall,

Author of "Virtue O. K'd!" and other novels

EVENING had come quietly and, one by one, the lights of the village in the hollow below had blinked on, each a tiny star; and, now, a great, mellow moon was shouldering over the tree-tops.

Crickets chirped in the wet grass by the side of the porch, and, up on the hill-side, a whip-poor-will called. Through the night came the odor of clipped clover and roses from the little garden somewhere beyond in the shadows. . . It was a glorious night, a night for silence, waking dreams, and the aroma of a good cigar.

My hostess, a lovely, little old lady, an aunt, came out to us there and we talked quietly. Then, after awhile she stole away, and soon out from the darkened house came music. In a moment she returned, walking softly, and whispered—

"Ssh, the Girl O' Yesterday. . ."

Listening intently my ear caught the sound of a voice, sweet and clear, singing "My Old New Hampshire Home". . . An interval, then "The Little Lost Child," "Break the News to Mother," "Comrades" and "The Banks of the Wabash."

Softly the voice came, and softly rocked the dear little old lady while her husband, help-meet of many years, sat quietly by, the glow of pipe shining in the darkness. . . Then it was over, and someone within snapped off the radio.

"My mother loved those songs," said the little old lady, musingly; and, then—

"You're a writer," she continued, "you know many and can meet people. . . When you get back to New York why don't you look for this girl, and when you find her I wish you'd tell her for me how much I love her programs. . . She—she makes me young again. . ."

I promised, little thinking that I would meet The Girl of Yesterday so soon; but, meet her I did, at the Columbia system's annual artists' dinner at the Hotel New Yorker, and it struck me then that there was a story in her song collection. Where, thought I, did one so young, so beautiful gather together such a library of old, sweet songs. She laughed when I asked her, and then became serious.

Kathryn Parsons, the "Girl O' Yesterday," is as quaint as her character. She sincerely loves to spread happiness!

"I LOOK for them until I find them," she said, simply, "and sometimes it's not easy. . .

"One dear little old lady wrote to me and asked for 'The Volunteer Organist.' I tried and tried to find it, searching through library files and through the little, musty music shops I know down near Washington Square. . . Many knew the song—some the words, and a few the thread of the melody, but none knew it all, and none knew enough of it so I could put their combined recollections together. I had about despaired, and, then, an old, old man, who lives in a little shack down on Chesapeake Bay sent it to me without even my asking.

"I wrote to the little old lady, to tell her I was going to sing it for her. . . I received a black-edged letter from her daughter in reply. . . She died the morning of the day I was to sing for her."

She was silent for a moment, this black-eyed, black-haired girl. Then—

"It is amazing how many of my listeners love the bright old songs, the Harrigan and Hart masterpieces, the old bar-room ballads, the lovely, old wooing-songs. I receive countless letters from the Irish neighbor-

"Hitting It on the

Just a Few Words about the Production Man Who Stages Programs and Brings Them Through on the Dot

"WHO is that fellow over there with the watch in his hand?"

That is the question most frequently asked by visitors making their first inspection of the Columbia Broadcasting System studios.

The reply: "Oh, him? Why, he's just the production man." Usually this discourages any further questions, and sends the visitor on his way with only a vague idea, or perhaps no idea at all, of exactly what is a production man.

John S. Carlile, who is Production Chief at Columbia, could say truthfully although modesty forbids it, that the production man is the most important individual during the rehearsing or broadcasting of a radio program; that inside the studio the production man is the absolute monarch of all he surveys: that only by a wave of his hand does a program start and end; that artists, announcers, engineers, and audience take their cues from him, and him alone.

The production man is a comparatively recent development in radio broadcasting, who grew up quietly and unobtrusively while radio was undergoing the change from a mere mechanical toy to an important medium of entertainment.

In the ancient days of broadcasting, say ten years ago, there was no such thing as a production man. An announcer, an engineer and one or more artists would get together anywhere from ten minutes to a half hour before broadcast, decide what sort of program they would put on, and then shoot it. Time wasn't so important then, because there were no sponsored programs. It didn't matter much if they ran short or ran over.

IN THOSE days, talent consisted of second and third-rate entertainers who had seen their day, more frequently, youngsters who had not yet had their big opportunities. Program directors, who were station managers then, couldn't afford to pay much for talent, and held out the rather feeble inducement of free publicity to reconcile the low wage scale. Ten dollars was a lot of money for a half-hour program.

Then came the sponsored programs. The possibilities of radio as an advertising medium did not undergo any lengthy and tedious experimental progress. Advertising people are quick to lay hold of a new thing, and the sponsors came with a rush. The cry went out for more and better entertainment, and high priced talent stormed the doors of broadcasting stations. There was gold in "them thar studios." The loud speaker was replacing the earphones in the American home, and radio ceased to be a novelty.

All this was lovely for the future of radio, but rather tragic for the reputation-less fellow who had been doing his stuff for a pittance and publicity. The

Arthur Pryor, Jr., (seated) responsible for the elaborate production of The March of Time, directing rehearsal. Even the March of Time must hit it on the nose and finish "on time"

NOSE"

By J. G. Gude

once indigent but now prosperous station manager no longer called him at the last moment, to beg him to do a half hour spot, to "just help me out of a jam, old man; Joe was supposed to go on for me, but he phoned and said he had a heavy date." Those boys found themselves, just when radio began to be worth something, very much out in the cold.

But then a curious situation arose—a situation not anticipated and for some time puzzling to program directors. For some reason or other the big-name artists who were flocking into radio were not doing so well. In many instances it was just a case of temperament. Although radio was paying out big money, it was nevertheless looked upon with condescension, if not utter disdain, by much of this high priced talent. It was difficult to get many of them to rehearse, because they didn't think rehearsals were necessary.

But even those who weren't temperamental had trouble. Accustomed to an audience, whose response they could intuitively feel, many of them almost died of fright when faced by nothing but a microphone. This was equally true of monologists and other funny men of the stage, and singers. What radio needed was showmen, but where were they?

ANNOUNCERS might be equipped with lovely baritone voices, ingratiating manners and red-hot personalities, but when a perfectly good contralto sounded like an alley cat just because she didn't know how to use her voice in front of the microphone, they might not be aware of it. Control room engineers knew which dial to turn and how far, in order to get the sounds from the studios as clear and clean as possible, but when a French horn sounded like a moo-cow, they weren't expected to know the difference.

Then the second and third-rate performers, who had been left out in the cold when radio got rich, began to drift back. Used, in the old days, to putting on half or even full-hour shows, single handed, they knew how to project their personalities into a lifeless metal gadget and through the ether. They had learned, through long practice, how to modulate, inflect, and otherwise control their voices or their musical instruments in order to obtain true reproduction of sound. They knew, in short, what is now referred to as microphone technique.

At first, they were simply seated alongside the engineer in the control room during rehearsals, to time programs and to pass judgment on the quality of performances. The timing of programs, of course, took on a new importance. Time became radio's stock in trade, and it couldn't be wasted. That meant more rehearsing of programs, and the haphazard, slap-dash methods of broadcasting became a thing of the past.

The production man was a natural development of radio's metamorphosis from an electrical toy to an art, or industry (take your choice). His title is self-explanatory; he is the producer of radio shows. As the development of radio along technical lines kept step with its commercial growth, the program builders—idea men and continuity writers—were becoming more ambitious, more imaginative. The modern production man's job is to put the ideas conceived by these program builders into programs as they were conceived.

The most difficult, if not the most important end of production is the studio set-up of orchestras. In general, the arrangement of orchestras for broadcast work is based on the regular standards of instrumentation. Engineers claim that there are set rules for the placing of microphones in order to get the best reception, and the up-to-date production man will always first try to set up his orchestra around the mikes. Juggling mikes is sometimes necessary in the case of orchestras of unconventional character and make-up, but it is usually avoided if possible.

John S. Carlile, production chief of CBS

ALL of the large studios at Columbia are spaced by numbers along two parallel baseboards, and lettered along the other two. When an orchestra is finally set up the position of each member of it is charted. These charts are kept on file, and are referred to the next time an orchestra of the same make-up is rehearsed.

These records save the production man a good deal of time, for he does not have to go through the same juggling process again. They do not mean, however, that two orchestras, made up of the same number of strings, brasses, woodwinds and traps, and playing the same piece of music, will sound the same if set up the same way, even assuming that the individual members of the two orchestras are equally skilled musicians. A difference in the way their selections are scored may require an entirely different set-up. Some orchestras, for instance, go in strong for solos by one player, or one section; others may have their pieces arranged for full orchestra most of the time. Then, there is almost invariably a difference in the instruments themselves. The first violinist, an important musician in the average orchestra, might have a fiddle that is brittle and bril-

(Continued on page 86)

Oh, Yes?

Pity the poor Production Man
Who does the best he ever can
Putting the bassos on the spot,
Telling tenors what is what,
Asking sopranos "what to heck?"
Taking maestros by the neck
Grilling 'em all across the pan—
Pity the poor Production Man.

Catherine Field

A real girl of the Golden West Miss Field has sung herself into a nice contract with the NBC, New York. She is lyric soprano. Born in Lawrence, Kans. Lived in Oklahoma and Texas. She studied voice four years in New York.

Harriet Lee
(Chosen Radio Queen of 1931-32)

VIVA Queen of Etherland! Behold Queen Harriet with her hat off! Gaze on the lovely mass of honey colored hair! Long may she wave! She has her throne room at WABC, New York,—and her court? That's another story!

Peter and Aline

BETTER known to radio listeners as Ken and Joan Lee in the NBC program, Raising Junior. You know, of course that Aline has been away for a time while another little Dixon was arriving in this world. This is the first picture of ma and pa since. Imagine these two kids being parents!

Mary Williams

A Titian blonde with lily white skin and a silvery voice that simply makes you surrender, dear. She clicked with the Ziegfeld Follies, Strike up the Band, Yours Truly and many others. Now she's head over heels in love —with radio. Made her debut on WMCA. Who's got a match, please?

Tashamira

(LEFT)

FANTASTIC sensation of all Europe Tashamira was recently brought to America where she is becoming equally renowned. You can see her dance on air over W2XAB of the CBS television waves, New York.

Winnie Shaw

(RIGHT)

EYES and hair coal black and a voice that has just had its first try at radio over the CBS Roundup. She followed Ruth Etting in the Follies for the New York show. But there's a strong possibility she will become a regular on the Columbia staff.

Broadcasting from

New Era Demands Frequent Shifts In Programs

ARE we approaching the dawn of a new era in radio programs, an era in which the creators of programs will draw even more heavily upon the long time experience of other media designed to maintain public interest? On Broadway, for instance, the most successful producers of legitimate plays have long since learned that an *Abie's Irish Rose* comes only once in a generation so far as the length of run is concerned. They have learned that plays which last even half as long are great exceptions. They have learned that a normal success will not last more than a season. They have proved some supposed failures to be successes, but it didn't take an unlimited amount of time for the change to occur. They have learned to provide a continuous flow of new vehicles (meaning new plays) for even their greatest stars. They have tested out the possibilities of revivals and have demonstrated that intervals must elapse between successive revivals of even the greatest masterpieces played by the most popular stars.

In the moving picture field, much has also been learned about the maintenance of audience popularity. In the largest cities the big features are run for a period of weeks, but with competitive territory well protected as regards releases. And from this peak, we drop down to the same show for a full week and to the two-shows-a-week house the latter policy being that of the great majority of photoplay theatres. The stars don't come back with revivals; they always appear in new vehicles and in many cases the time which elapses between two releases by the same star is deliberately made long. Even so great an artist as Chaplin intentionally stalls on the frequency of his screen appearance. He knows the difference between satiating the appetite of the minority of his audience and making nearly 100% of his potential audience eagerly await his next appearance.

The very essence of successful newspaper publishing is to keep newsy. No one will read forever about even the most intriguing murder case—no one will read about Lindbergh every day with equal relish—no one wants a presidential speech every day. The showmanship of newspaper publishing lies in the constantly changing panorama of interesting events and people which is spread before the reading public—even the features must go through periodic revamping of policy or base their success on hooking up with something of a newsy character.

But what, you may ask, have all these obvious things to do with the future of radio programs? Only this. That it may behoove more of our creators of programs, sponsored as well as sustaining, to think more deeply into the question of how long even the greatest programs can be expected to retain maximum popularity—of how long the programs of lesser merit should be run—and of whether it is better to seek a turnover audience (as in the theatre and movie business) for a limited time before shifting the program (as happens in theatres and movies) or work for a repeat audience of growing size during the first part of the cycle and diminishing size as the cycle ends. In both instances there is also the question of how long a cycle lasts—where one is dealing with a turnover audience and with a repeat audience.

Let us get even more specific. The great plays on Broadway can run long only because they draw their attendance from all over the country. New Yorkers don't keep going back to the same show, but the audience keeps up because the out-of-towners can't all move in pronto and *en masse*. With the movies, where speaking nationally, the attendance is largely drawn from local inhabitants, three or four days for one show have proved about the desirable maximum for a given show. Moreover what works in the theatrical and movie business is not guesswork, because the daily and nightly attendance *for each and every night* is exact box office knowledge.

What then does this all suggest as regards radio programs? Suppose we start with Amos 'n' Andy, on the basis that they are the Abie's Irish Rose of the air or the Charlie Chaplin of the air. Possibly the experience of theatres and movies, when dealing with comparable successes, indicates that peri-

the Editor's Chair

odically Amos 'n' Andy should be withdrawn from the air entirely, in order that their reappearance could be worked up with all the fever of reawakened interest—instead of trying to keep up continuous interest on too long a basis. Possibly it means when they come back after a vacation that they would change the setting of their amusing dialog. There is no doubting that darky humor and negro dialect are permanently entertaining, but Amos 'n' Andy don't have to work on a taxicab and restaurant forever and a day. Understand, none of this has anything to do with the greatness of their present act or the popularity of these two favorites—it has only to do with the ultimate length of their popularity and the size of every night's audience which their sponsors have a right to expect after a run of colossal success.

THE same sort of reasoning goes for a whole lot of other radio acts, but with far greater force of reason. Radio hits can't last forever and sooner or later a new technique must be developed—a technique which preserves the popularity of given programs by changing the play with adequate frequency—a technique which preserves the popularity of radio stars by changing the vehicles in which they appear with proper frequency—a technique which produces well-timed gaps in certain types of programs and the continuous appearance of certain artists in order to whet the public appetite and make for greater audiences over shorter periods of this time.

The editors of Radio Digest believe this new era of program conception has arrived, although as yet it can hardly be said to be under way. It is going to be hard for a lot of broadcasting stations to accept this important principle of showmanship, particularly when it means periodic gaps in time schedules and makes it necessary to create new programs of a masterpiece variety with greatly increased frequency. Similarly it is not going to be taken easily by some of the radio stars whose current popularity convinces them that all America wants to hear them once or twice every day—for years and years to come. It won't be an easy idea for the script writers and program conceivers and directors. But in the end, the new era will be the greatest thing that ever happened for radio and all who play a part in broadcasting. For the new era will cause people, in greatly increased numbers to make dates with their radio even as they do now on a vast scale with the theatre and the movies. The public will become increasingly conscious of not being able to put off until tomorrow what it really wants to hear, because it will become increasingly posted on the fact that great radio programs, even as is true with plays, movies and newspapers, are coming and going with a rapidity that demands the making of personal plans to keep from missing a high precentage of the best.

Under this relatively new conception, the editors of Radio Digest predict that millions and millions of new radio sets will be sold and that each and every set will be in more constant use. In other words, the creator of a good program, which is not too long lived in character, will know that he can win over a comparatively short period of time an audience that is from two to four times as large as any reasonably good program can expect to hold, day in and day out, over a more extended period.

You know sometimes, the broadcasters fail to realize why the newspapers do not have to give radio such a great break in the editorial columns. They do not stop to appreciate that the newspapers must give news service along every line that represents wide-scale human interest, but that the number of new programs that make good news are scarce rather than plentiful. Newspapers give lots of space to stock prices, to baseball, to horse-racing and a lot of other activities that mean little by way of direct financial gain to the publisher, but in every instance continuous widespread news interest is the answer. The newspapers always have and always will render news service to the public but even the most ambitious broadcaster must recognize that there is a fundamental difference between news on the one hand and on the other publicity based on a program story or an artist story hoary with age.

The new era is here. We predict it is here to stay. And in large part its realization will involve an application of showmanship principles to the air which have already been developed to considerable of a science by Broadway producers, movie feature producers and newspaper publishers.

By INDI-GEST

NOT so good. Not so good. Feeling very low. This New York University professor has had it published all over the world that anyone who whistles is a moron. Suppose somebody'd find it out about me? Where would I be? Sh-h-h, don't breathe it to a living soul . . . promise me that . . . listen . . . I whistle. . . . Don't ask to hear me now. I wouldn't for the world. . . Oh, me oh my. . .

* * *

Don't tell me! What? Really? . . . And you, too? . . . And you? . . . And all of you too. . . Honest? . . . Do you, really? . . . Well, I guess I'm not the only one then. Let's all be miserable together. . . Wonder about people who snore? Isn't that some sort of a whistle?

* * *

Come to think of it aren't there a lot of people who come right out in the open and whistle over the radio? How about Bob McGimsey? Guess I'll call up Don Higgins and see what he can find out about the mental rating of this triple-toned whistler? How terrible he must feel!

* * *

Hello Don. Get me the low-down on this whistling racket over at the NBC, will you, please? Yeah! Ask those two X-Rays, Perkins and Knight. I don't want to slander anybody but I think I've heard them doing something that sounded mighty like whistling. . . Yes. . . What? . . . Holy cat. . . You don't mean it? . . . What a shameful confession for an otherwise bright young man like you to make. . . Oh dear. . . No, no, no, please don't. . . Stop it. . . He was really starting to whistle in my ear. . . but maybe it was just a wire whistle or something.

I'll find out about those low browed whistlers at Columbia too.

* * *

While the boys are investigating let's take a look through the mail and see what the Indi-scribes are sending us. Oh Rufus, let's have the Indi files. . . My what a big bag, didn't think you'd need a truck to bring it in though. . . "Yes Miss-tuh Indi, an' tha's anuthuh one out in de stock room. . ."

* * *

Gosh, sure gotta have more space now. . . Well, let's start opening them. I'll open 'em and you read 'em.

* * *

Here's one from Charley Stookey at KFOR, Lincoln, Nebr.:

Dear Indi:—

While broadcasting the Nebraska State Fair at Lincoln September 4 to 11, the Gooch Milling Company (sponsors of the remotes) presented on the air the three ladies whose bread, made with Gooch's Best Flour, had won first, second and third places in the Culinary Arts Exhibit.

The general manager of the company was asked if he wouldn't like to introduce the ladies on the air. Finally he consented, but it is doubtful if he'll ever face a mike again. He had written part of his presentation talk and everything went okey until he ran out of written matter and started to ad lib—then about every thirty words he'd pause and say "paragraph."

He caught himself the first time—mumbled an oath under his breath and went on something like this:—

"We are mighty glad to be able to present to you today the three ladies whose bread took first place at the 1931 Nebraska State Fair—paragraph—(dammit)—Ah—er—You know that for 21 consecutive years Gooch's Best Flour has won this honor, and naturally we are proud of it—paragraph—(oh, hell)—Thank you."

Those of us in the studio nearly died laughing and scores of folks on the air got quite a kick out of it too, judging from the calls which came in for the few minutes following his broadcast.

His explanation of it was that he had talked to a dictaphone so long, he couldn't do other than say "paragraph" when addressing a microphone.—We wonder if he says "paragraph" to the missus when he calls up around 5:15 explaining that he won't be home for dinner.

* * *

Ben Bernie on the Blue Ribbon Malt Program: "Our next number will be *You Call It Madness and I Call It Love.* Ladies and gentlemen, you call it madness, I call it love, and my dad calls it boloney." From Eleanor Merriam, 6025 Kimbark Ave., Chicago, Ill.

* * *

Here's one from Olive M. Cook, Twin Falls, Idaho. "Wouldn't you call this a horse on the announcer at KTFI who referred to the song Calvary, 'you have just heard the song Cavalry?'"

* * *

Dear Indi: The other day during the Crosley Hour over WLW at Cincinnatti I heard, "Our next number will be I'm Keeping Company with a vocal refrain by Ralph Simpson." Mrs. E. R. Kell, Box 113 Wilmore, Ky.

* * *

Governor "Alfalfa Bill" Murray of Oklahoma on a recent visit to Texas talked over the Columbia chain from KRLD, Dallas. At the same time Rufus and Rastus were broadcasting from WRR, which divides time with KRLD. Something must have gone awry on the switchboard because as soon as Governor Murray said "Good evening, Radio Audience," we heard the two black face comedians cut in with "throw him out! Throw him out on his haid!" From Dorothy Hudel, 7118 Cherokee Trail, Dallas.

While listening to a western play over KEX I heard the hero ask the heroine if she could cook. She replied: "Can I cook? Why, I'm bowlegged from riding the range." From Mrs. G. T., Box 406, Woodland, Wash.

* * *

Heard on the Variety Program over WENR: Announcer—"And here's Edwin Delbridge—Deep in the Arms of Love with Sallie Menkies." From Margaret Gutwald, 3143 North 12 St., Milwaukee, Wis.

* * *

The most humorous incident I have heard was during Tony's Scrap Book reading. Tony said he saw a sign over an ice cream counter that read: "TAKE HOME A BRICK, YOU MAY HAVE COMPANY." Sergeant William C. Stilley, Company F, 16th Infantry, Governor's Island, N. Y.

* * *

Marjorie Mapel, 4523 East 18th Ave., Denver, Colo., one of our high school contribs takes up the question of Wave

Catch That Slip!

THERE'S many a slip twixt the lip and the mike. Next time you hear a good one jot it down and send it to Indi-Gest, care of Radio Digest. We pay contributors from $1 to $5 for material accepted for this department. Indi likes short verses on the same terms. Suggestions welcomed.

Grabbing, and should the teachers and deans get a strangle hold on broadcasting. Heading her thesis *The Student's Lament* she says:

Someone's always taking the joy out of life. Now must we have the joy taken out of RADIO, just when we were beginning to think that the increasing number of young teachers were understanding modern youth—they walk out on us and support the Fess Bill. Well it goes to show!

We grind all day, from morning till late afternoon, then we come home to a little relaxation, The Radio, and what do we hear? Super classics, Professor So and So's talk on Medieval History, plus a few interesting governmental reports? How wonderful! But no, thanks, we would rather listen to Rudy Vallee, Smith Ballew, the wise-cracking Sisters of The Skillet—. And if we can't—what then? Do we step out for our fun? Just when we were beginning to have it at home!

Permit me to tell you this, you supporters of the Fess Bill, you can educate us intensively all day in the class room, but when you try it on the air—Well, we'll give you the air!

* * *

This rather good poem from Frank O'Brien, Los Altos, California.

RADIOLAND

The throbbing city, the sleeping vale,
The crowded highway, the mountain trail.
The silent desert, the surging sea,
Neighborhood—nation—infinity.

A palace, a hovel, a ranger's shack,
A homestead far off the beaten track.
A mansion, a flop-joint, a great hotel,
A fireside, a prison — heaven and hell.

A king and an outcast, a preacher, a drunk,
A buyer of Rembrandts, a dealer in junk.
A lady of grandeur, a skirt of the slums,
A college professor, a couple of bums.

A sage and a halfwit, a cop and a thief,
A face wreathed in smiles, and a head bowed in grief.

The guilty and just, the chained and the free.
Jim, Jack and Mary, and you and me.

* * *

RAY PERKINS OF NBC UP AND SAYS—

I know a Scotchman who would give $1,000.00 to be a millionaire.

"New lamps for old!" announced the first air salesman as he kicked a kink out of his Bagdad balloon carpet and brandished a polished oil burner. "Darby Dardanella now sings our theme song WICK UP! WICK UP! EVENING SHADOWS FLEE."

Good old England is back on her fleet.

* * *

Aimee Semple McPherson not only will make a good wife, but she will make her man a good husband.

The present galaxy of debs who attend finishing school are always ready to start something.

* * *

"TO THE PLAID EYES OF—" JESSICA DRAGONETTE

THEY WRITE OF EYES — OF BROWN AND GRAY
AND THOSE OF DEEPEST BLUE;
BUT YET, THE EYES THAT LIGHT MY DAY
ARE "PLAID" EYES — WISTFUL, TRUE.

ONE EVENING, 'ERE THE SETTING SUN
SANK SLOWLY IN THE WEST,
GOD TOOK EACH COLOR—ONE BY ONE,
AND MADE THESE PLAID EYES BLEST.

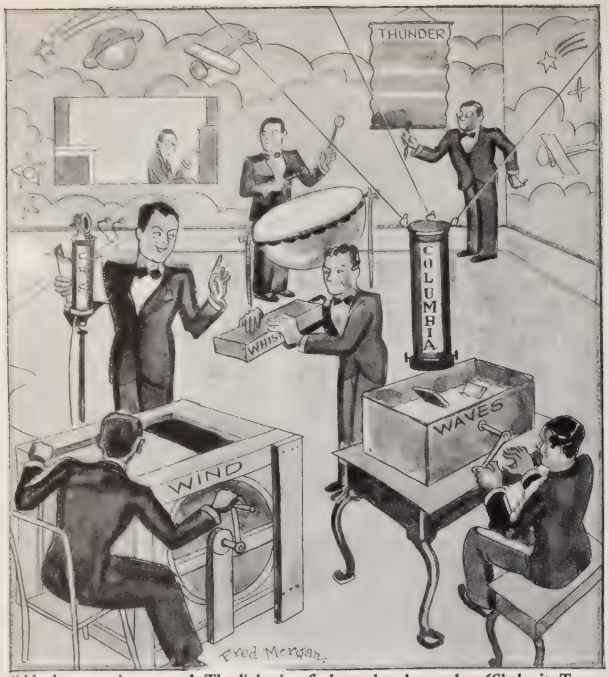
A BIT OF GOLD, A BIT OF GRAY
A HINT OF HEAVEN'S BLUE;
AND WHEN THE DARKNESS TURNED TO DAY,
HE GAVE THOSE EYES TO *YOU*.

ACROSS THE WORLD — ON LAND OR SEA
AND IN THE AZURE SKIES,
THERE'S HAPPINESS AWAITING ME
WHEN I BEHOLD YOUR EYES.

AND IN YOUR DEPTHS, PLAID EYES I LOVE,
IS SOMETHING — TENDER, TRUE;
FOR, FROM THE HEAVENS FAR ABOVE,
THE ANGELS GAVE US—YOU."

—Dorothy Lee Glass, 113 Alger Ave., Detroit, Michigan.

Dear Indi-Gest:



We've a radio fan so erratic
We are sure he has bats in his attic;
When nothing comes in
But a horrible din
He sits down and listens to Static!

The above is a lim' from the "limerick tree" of a radio widow.

—G. D. Stockton, 57 Maple St., Hudson Falls, N. Y.

* * *

Two of our best Indi-Scribes finding themselves within a day's mail of each other got together postally and composed the following "colyum" of verse and prose for us. We had to hold it until we got the additional space we were howling for.

"Ah the storm is upon us! The lightning flashes—thunder crashes (Shake it, Tony, shake that thunder sheet). The screeching wind and the merciless waves. We're lost! We're lost!"

Lay of a Might-Have-Been Minstrel

Breathes there a fan with soul so dead
Who never to himself hath said:
"This is my own, my favorite station,
My favorite artist in all the nation!"
Whose heart hath ne'er within him
burned
As others his opinion spurned;
Who hasn't argued pro and con
With battle cry: "I'm right—you're
wrong!"
If such there be, go mark him well,
He has no place in V. O. L.
High tho his titles, proud his name,
He's a looker-on at the listening game;
Who tunes and gets not the radio craze,
Who "fans" no program in all his days;
Living shall forfeit the right to know
The thrill of this aerial age, altho
He tunes his set, and lends his ears. . .
Boy! . . . what he misses!! . . . eh,
old dears?

* * *

WHEN MIKE FEELS FUNNY!

What IS funny? What induces people to crinkle up their faces in defiance of beauty advisers—stretch their lips to the cracking point and indulge in a long, loud, spontaneous, inelegant and youth-restoring guffaw?

This sad, weepy old world NEEDS to laugh—it WANTS to laugh—it's CRYING to laugh! But what makes one half of it emit cackles of purest glee leaves the other half staring blankly into space, wondering what the joke is all about!

It's amusing to note the effect of what you may consider a good joke upon a gathering of festive spirits. Have you ever told a funny story in your best comedy manner and had the carefully worked-up climax greeted with an anti-climactic silence, and a woeful lack of comprehension upon the part of the solemn souls present? And then you suddenly wish that you had spent the evening at home, reading Les Miserables! How would our best radio humorists feel if they could but see the reception accorded some of their choice bits! Fortunately they cannot. Altho the listeners' reaction is conveyed to them thru the medium of "fan" mail, the shock of the Dear Public's insusceptibility is mercifully modified by the delay attendant upon its disclosure via the mail route.

East and Dumke, twin editions of avoirdupois and good spirits present "Sisters of the Skillet"—the grandest fixit firm ever permitted to operate without a license! What they don't know about housekeeping is plenty, but this minor detail doesn't prevent them from giving advice cheerfully if not helpfully! This SOS service is occasionally extended to a brother of a Sister of the Skillet in distress, and it proves the efficiency of this flourishing concern when the Brothers horn in! A lively and refreshing departure from our sob-sisters of the love-lorn "colyums" and other popular forms of rescue-the-perishing service. Here's to them. . .

WHILE THE TOAST IS BURNING!

East and Dumke,
Skillet Sisters,
Full of pep
These polly misters!

Problem solvers,
Nothing vexes,
None can stump them
Naught perplexes!

What lovers, too,
Of "pome-tree"—
The dishwater
Variety!

Hearty laughter,
Lilting song. . .
Whoops! what fun
When they are on!!

WE HAVE yet to hear anyone say that these boys are not really funny, but doubtless someone, somewhere, is saying just that! As in the case of the radio listener who grimly elected Roy Atwell, CBS funster, to the Pet Peeve records—a sort of listeners' lament conducted by Nick Kenny for the relief of those long-suffering critters afflicted with pet radio abominations. Mr. Atwell crosses his fingers, ties his tongue, and achieves truly marvelous concoctions. Adulterated doses of historical episodes tumble apologetically out of one's loudspeaker, motivated by so obvious a desire to edify and please that one is glued to the spot! If you are an apt scholar, you will soon be unable to ask your dinner-partner to pass the sugar, please, without becoming involved in your pronunciation. Most diverting—especially if you are really in earnest about wanting that sugar! Try this on your chauffeur. . .

TONGUE MAGIC

Gicky, streasy, garry tum
Mannot cake the motors hum;
Unnatural history laid in mortar—
No—unnatural history made to order;
Tidewater Inn as seen by a knight.
I mean Tidewater Inn, the scene—
(that's right!)
The host Oil Ratwell—Rat Oilwell. . .
no! no!
Well Royat—oh, let it go! let it go!
English as she is spoke (and how!)
In the better garbled circles now.

Only three in a long list of clever comedians—practiced in the amiable art of beguiling a nation into good humor. And at the present time of general business depression their services are of inestimable value to the country at large. If we couldn't laugh, we might have to cry—so long may they ether-wave! . . . these rib-tickling heroes!

* * *

Sorry I haven't had a chance to sort out those fresh limericks hot off the limerick tree cause I just got a long thick envelope from Don Higgins. I'm handing it to you without comment. And if Bob Triggerfinger of CBS doesn't step on it you'll never know what Mort Downey and those other expert whistlers of Columbia have to say on this burning subject.

* * *

They're All Whistlin'!

By Don Higgins

CALVIN COOLIDGE came out for Hoover, England went off the gold standard, the Lindy's flew over flood-swept China, and it remained only for Professor Charles Gray Shaw of New York University to announce that "whistling is an unmistakable sign of the moron." Then the world shook.

Professor Shaw, deep in the study of the road to culture, proclaimed through the morning press that all whistlers were morons and that world leaders were non-whistlers. His words went 'round the world and back again.

Friends of Premier Mussolini snickered and admitted Il Duce had whistled. Chairman Borah of the senate Foreign Relations Committee said that of course he whistled. The White House remained silent. And S. L. (Roxy) Rothafel, off in distant, censored Russia in search of art and music for radio, was unreachable.

Thousands wrote the professor and the papers in protest and the news finally reached the ears of Robert Hunter MacGimsey, by summer a Louisiana attorney, and by winter and permission of the copyright owners, the world's champion three-toned "harmony whistler," heard over National Broadcasting Company networks.

Mr. MacGimsey's ear burned red. Discovered whistling in his bath, he admitted, "Yes, I whistle. I also chew gum and the ends of pencils in moments of thought. Professor Shaw must be spoofing. But if you're asking me, it's hardly fair to say that whistling has any more to do with a man's mentality than playing the bass viol—probably not as much. If so, what about the yodlers and Swiss bell ringers?"

He tried to reach the professor by telephone in a challenge to prove it. "Forget it," replied the professor, "I meant only lip whistlers."

"But I am a lip whistler," MacGimsey said. The professor hung up while MacGimsey, desperate, recalled three fellow faculty members of Shaw, had examined his whistle and found his mentality A-1. "One of them did some very nice whistling himself, in fact," Whistling Bob added.

Radio rallied to the whistlers' defense. Stars of NBC spoke boldly. Said Jesse Crawford, Poet of the Organ and amateur whistler:

"People who like to whistle and can carry a tune, do so as a natural reaction depending upon their contentment. Of course, a moron may whistle but all whistlers are not morons. I don't believe an unhappy moron can whistle. Whistlers are to be envied."

"Whenever a play or motion picture presents a person happy or well-pleased, the character usually breaks into a whistle. Most of us are not gifted enough to burst into song, nor is it natural in public places. I am very inclined to whistle personally, but then, of course, I might be a moron."

The controversy caused Vaughn de Leath, contralto and occasional whistler, to revert to Shakespeare: "The man who has no music in his soul is fit for treason, strategems and spoils." Whistling indicates a happy disposition and a certain exuberance or gaiety. I suggest that the professor try a little whistling himself.

B. A. ROLFE, whose orchestra sets a happy tempo for the nation, denied whistlers were morons, including himself, and added: "Inasmuch as I interspersed whistling in vaudeville acts and found it got the applause spot, I concluded it has a financial and entertainment value." He does object to whistlers off key.

Ray Perkins, The Old Topper and NBC wit, avered: "It (the professor's comment) sounds a great deal like our old friend, George Bernard Shaw. If it's not one Shaw it's another! He might put a P in front of his name. Personally, I confine my own whistling to a few bars a day and I have my whistle whetted twice a week."

Lewis James, tenor of the famous Revelers Quartet: "I whistle often and, being a singer, that may make it doubly bad. I disagree in self-defense."

Leslie Joy, baritone and announcer: "I whistle for my dog, and he's a very intelligent dog. I figure that if my dog will come when I whistle that neither he nor I am a moron."

Breen and De Rose, noted harmony and song-writing team, issued jointly: "Many song writers whistle while making their arrangements. True, some can't do any more than whistle their tunes, but they compose them. Anyway, whistling airs your thoughts." Peter De Rose recalled his song "Whistling Willie" (adv.) as a bright piece.

Several days later, Raymond Knight, "Cuckoo" commentator who hides behind the name of Ambrose J. Weems, boldly cast aside anonymity and came out with a statement. He came out a bit confused, but nevertheless he came out. And he settled the matter.

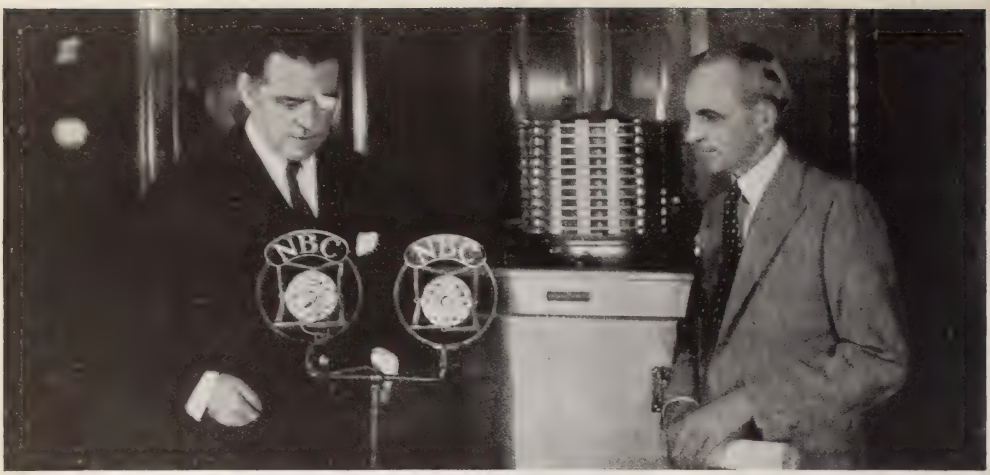
INTERVIEWED by the press of Australia, Letvia and New Jersey, Mr. Knight spoke his mind (taken off the shelf with the advent of winter).

"I have been asked," asserted Mr. Knight, "to state my views on the Whistle-Moron situation. I want to apologize to my public at this time for not coming forward sooner with a statement.

"The delay has been due to a misapprehension on my part. When first informed that Professor Shaw stated that only Morons whistled, I immediately went out among my Irish friends and collected statistics to prove that the Moriartys, the Finnegans, the Murphys and the Flannigans whistled just as often as the Morans."

"This set me back about forty-eight hours and in the meantime the market has been flooded with thousands of replies to Professor Shaw.

"However, in order to whistle it is necessary to pucker up the lips, and since lemons and pickles cause a puckering of the lips, I have been asked by the National Citrus and Pickle Growers Association (whose coat of arms bears a little figure of Puck on a field of tulips) to answer the professor.



"This can be done in one withering blast. I shall waste no time on recriminations. I shall waste no time on detailed statistics. I shall waste no time on homely women—

"I merely ask Professor Shaw, with a slight smile of scorn playing around the corners of my lips and in my moustache—'Professor, is it or is it not true that one of the greatest artists of all times was a Whistler!'

"A fig for your hypotheses Prof! You can fool some of the people some of the time, and you can fool some of the people some of the time, but you can't fool some of the people some of the time!"

Just as Mr. Knight finished, MacGinsey stepped forward triumphantly and revealed that Dr. Prescott Lecky, professor of psychology at Columbia University, had found him to have an intelligence quotient greater than seven ty-six per cent of the public. MacGimsey's rating was an I. Q. of 109, compared with a grade of 20 to 50 for imbeciles and from 70 on down for morons.

The world is safe for whistlers, or vice versa.

"TALK about pick-up and speed, do you know, Mr. Ford, that this little two cylinder doo-hickey can put my voice down from here to New Zealand as quickly as you can hear it across the room?"

THESE postures show Henry Ford at the time he made his personal debut in Radio. Note the concentration revealed by his face.

Tuneful Topics

By RUDY VALLEE

You Didn't Know the Music, and I Didn't Know the Words

IT WON'T be another *Just One More Chance,* though it is entirely written by Sam Coslow, who wrote the words of that composition which has achieved such a popularity due mainly, no doubt, to the wonderful phonograph record made by Bing Crosby, which seems to be in every home. I believe Coslow outdid himself in this particular new song, one of the torchiest of torch ballads, a song which has as its unhappy story "what might have been."

It lends itself more to the feel of a beautiful ballad than to the dance type of song, though if played expressively, with the right instrumentation and the proper speed it becomes an admirable stimulus to the enjoyment of a public on the dance floor.

There is one little difficulty in singing the song, and that lies in the pronunciation of the word "music." The "ic" syllable in "music" has always made it a difficult word to pronounce when singing; only one who sings considerably can appreciate these little difficulties, which, after all, are not insurmountable if one only exerts the diction producing factors to his or her aid.

Larry Spier, of Famous Music, believes that when he carries the lyrics of any particular song around with him for weeks, that the song must have something. That was the case with *Just One More Chance,* and is likewise the case here, with his latest bid to the hall of musical fame.

We take about a minute and ten seconds to play the chorus, and as I have already said, it is published by Famous Music, Inc.

I Love a Parade

HAROLD ARLEN, writer of *Get Happy, Hittin' the Bottle, One Love,* etc., pianist par excellence, with a most excellent voice, was formerly featured with Arnold Johnson, but lately he has written the material for several more or less successful shows. Incidentally, his *Get Happy* was perhaps the greatest material ever provided for one of the cleverest girls on the stage, who was lost to musical comedy and dancing when she became the wife of Roger Wolfe Kahn—Hannah Williams.

This same Harold Arlen, turns extremely sentimental and classical in the writing of a little gem called *I Love a Parade.* Its radio attractiveness may have been enhanced by a little brainstorm that came to me as I considered its presentation, my idea was to follow my vocal chorus with a chorus played by two trumpets and a trombone, with the stirring beat of the drums, as they briefly touched on six or seven standard march compositions, such as *Stars and Stripes, Spirit of Independence, Anchors Aweigh, Stein Song,* in fact, any march which, as children, we have come to associate with parades, the beating of

drums, the blare of flashing trumpets.

I Love a Parade will probably never mean very much as a best seller for Harms, Inc., but it is certainly one of the most stirring tunes it has been our pleasure to present in a long time. Naturally we play it in march time.

My Sweetheart Tis of Thee

I SPENT last Sunday at a rehearsal with Johnny Green, the young Westchester County society boy who was practically disowned by his father for his resolve to go into the field of music and composition in preference to his dad's seat on the exchange, but who subsequently showed his father that he knew better than Dad wherein his talents lay, after his writing of *Body and Soul,* and *I'm Yours.*

Together with Eddie Heyman he has been writing material for various Paramount short subjects out in Astoria, and he has directed many of the orchestras for the incidental music which was cued in on many of the very fine Paramount pictures where incidental music has contributed to your enjoyment.

Due to his cultural nature and background, Johnny writes not so much for the masses as for the classes, though in the writing of this new musical comedy which Peter Arno has sponsored, in several cases he has written an approach to the commercial type of tune. Heyman, I believe, deserves even more credit than Green for his titles and his exceedingly clever lyrics. Even Lew Brown might well look to his laurels as one reads over the score of *Here Goes the Bride,* the inspiration for which probably came to Arno shortly after his own trip to Reno.

Perhaps I have an unusual interest in the show due to the fact that the singing star is none other than my little Florida protege, Frances Langford, who has been sustaining on WOR. The two songs she sings are both excellently suited to her, and I believe if the show is anything at all of a success little Frances will create a great deal of Broadway talk about her.

The Sunday I caught the show in rehearsal the cast had been at it for many hours on end, and they were all extremely fatigued; yet even at that there was a very apparent quality about the show which leads me to believe that, given a fair chance, it should be a success. Edward C. Lilley is directing, and the very efficient manner in which he handled things that afternoon leads me to believe that my protege is in very good hands. But to get to the songs themselves.

First, the outstanding song in the show is unquestionably the theme song. It would not have been the theme song had they not expected it to be the outstanding song; that, of course, is quite self-evident. Cleverly enough, Heyman selected as his title *My Sweetheart Tis of Thee,* which is, of course, a pun on the composition which in England is *God Save the King,* and which in America has been *America,* and which, for many years preceding the final triumph of the *Star Spangled Banner* was

the reason for many a very disgruntled theatre audience clambering to its feet and standing at attention. It still is, for that matter, as there are still many bands and orchestras, as well as audiences, who are not so very sure of the ascendency of the *Star Spangled Banner,* and the strains of *America* bring many of them instantly to their feet, while others, with a sheepish and foolish expression on their faces half sit and half stand, not quite knowing what to do.

The gist of the song, *My Sweetheart Tis of Thee,* is simply that the song the individual is singing at this time is, as the title implies, of that person. It has nothing to do with Tennessee mammies, moonlight and roses, or any of the things with which songs deal. Rather is it expressly a song to her—to him, and it is an extremely lovely one.

There is a direct change of key in the sixth measure, very typical of the desire on the part of Johnny Green to be different—musically different. However, the change is a lovely one; though a little difficult to assimilate, once learned it will cause no trouble.

Unless the song is restricted I am sure that it will bombard you from your radio quite a bit as soon as the show makes its debut in New York, which is to say two weeks from the time we write this article, though of course as you read it the show will have already opened here, and either be on its way to prosperity for its producers, or maybe, heaven forbid, have gone the way of so many shows. I sincerely hope, not alone for Frances Langford, but for my old school-mate, Peter Arno, Mr. Lilley, and all the hard-working members of the cast, that it enjoys a real success.

"Here Goes the Bride" Three Rhythm Numbers

THERE are three fine rhythm songs in the show. When I say "fine," I mean fine. They are just the sort of thing we have been looking for for our dance programs, both on the air and at the Penn. People like fox trots, brisk tunes to which they may walk around, keeping in perfect step with the beat of the rhythm. These are tunes which any band may play as fast as they desire with no subsequent damage to melody or lyrics, as they are written for fast dancing choruses. You will probably hear these tunes often as the various bands play on into the wee hours of the morning over your favorite station.

Quite the cleverest of the lot, in my opinion, is the song which Frances Langford sings later on in the show. It is called *Music in My Fingers,* and what a clever song it is, too!

Then there is another which the boys have called *OHHH! AHHH!* and still another which will be interpreted by some radio stations as rather risque and doubtful of broadcast permission, though in the show it will be perfect for the chorus girls in one of their dances—*Shake Well Before Using.*

There are several other songs in the show, one especially which Frances sings called *Hello, My Lover, Goodbye,* a lovely thing though one which will never be commercial due to its intricate construction and its most non-commercial make-up. Still even this may occasionally find its way to you; it certainly will through the medium of our programs, as it is the type of song that I enjoy doing best.

These are all published by Famous Music, for whom Johnny Green writes almost exclusively, and the three rhythm tunes may all be played extremely brightly, though the irony of it is that some bands that usually tear the heart out of composers by playing some of their ballads *extremely fast,* will probably play these tunes *extremely slowly.*

I Don't Know Why

I AM a little late in discussing this tune, mainly because I was late in hearing it. It remained for the aforesaid Crosby to really popularize it, as it fits him admirably.

It was written by Messrs. Turk and Ahlert, of whom I have said reams in past issues of *Tuneful Topics,* two of the cleverest writers in Tin Pan Alley. Its construction is that of the very short chorus, half the usual length, or sixteen measures, and it lends itself admirably well to the slow, schottische tempo for which the Lombardos especially are famous.

My good friend, Rocco Vocco, of Feist, may take the bow for this one, and it is probably the saving grace of that particular firm in these dark days of great overhead and little or no profit.

We play the chorus at about 35 seconds, and, as I have said, it is published by Leo Feist, Inc. *(Continued on page 93)*

Marion Brinm the soap box crooner who has been taking part in both television and chain hook-ups over the Columbia system

GABALOGUE

By Nellie Revell

The Voice of RADIO DIGEST

HOWDY, friends. Two of the most attractive and interesting radio artists are those delightful Ponce Sisters, Ethel and Dorothea. These talented young ladies were both born in Boston, but raised in New York and were both graduated from Brentwood Academy.

They have been on the air five years. You've heard them on Eveready, Valspar and Camel programs . . . and at the Roxy and Palace theatres. They've made phonograph records and some motion picture shorts. These are about the homiest . . . (no, not homeliest . . . far from that) . . . I should say, home-grownest girls I've met in many a day. Healthy, happy, talented, devoted to each other and to their Dad. Their mother having died a few years ago . . . these motherless girls succeeded in keeping the home fires burning by keeping house for their father . . . who is an executive in the NBC Artists Service Bureau. Not the kind of housekeeping that's done with a can-opener and a delicatessen store. Dorothea does the marketing and Ethel does the cooking. Then they both wash the dishes . . . and make a lark of it. And refer to the washing of the dishes as pearl diving . . . and the drying of them is called polishing pearls. Excepting for the traditional washwoman one day a week, they have no outside help in the management of their home. And when the house is tidied and vegetables prepared for dinner . . . they practice their songs for the next day. Ethel, the pianist, is the older . . . but Dorothea, the comedienne, is the taller. She is five feet seven. Ethel is only five feet five. Each weighs 125 pounds. Dorothea has dark hair and gray eyes. Ethel has light hair and is dying to be a blonde . . . but is afraid of Dad. Neither uses make-up of any kind. Don't require it. Neither of the girls are married. Are waiting, they say, to find men like their Dad (that will be some chore). The family spirit in the Ponce home is beautiful. And as Mr. Ponce is very prepossessing in appearance and manner, the trio forms a pretty picture when they appear together in public.

EVERY Wednesday night at 11 o'clock Miss Revell takes her WEAF mike in hand and rattles off a good old fashioned chinfest about the great and near-great of Radio and stage circles. On this page you will read some of the things she broadcast in case you did not hear her on the NBC network.

When President M. H. Aylesworth, of the National Broadcasting Company, entertained Amos 'n' Andy at the Lotus Club, New York, there was great speculation as to what artists he would select. Of all the splendid singers and musicians at his call, Mr. Aylesworth picked the Southernaires Quartet for that occasion. The Southernaires are four talented colored men who have been a popular NBC feature for many months. They appear on Major Bowes Capitol Family program . . . are frequently heard on the RKO Theatre of the air . . . and on the Mobiloil and Great Northern programs . . . and, of course, "Southland Sketches." Three of the quartet are college graduates . . . and the fourth is a high school graduate. William Edmondson, the manager of the group, hails from Spokane, Washington. Homer Smith is a native of Florence, Alabama. James S. Toney was born at Columbia, Tenn., and Lowell Peters, the fourth member of the quartet comes from Cleveland, Tenn. The four youths met and formed their quartet two years ago in New York's famous Harlem. In addition to frequent radio appearances, the Southernaires Quartet sing at many Church entertainments.

When Gene and Glenn go fishing, they don't always get fish, (without they buy them), but on their last vacation, they did create a splendid opportunity for two young men who knew how to meet opportunity when she knocked. And that's Lum and Abner. . . who through pinch hitting for Gene and Glenn, have become regular features on the NBC network . . . and are soon to make a personal appearance tour for Quaker Oats Company. Lum and Abner's right names are Norris Goff, who is Abner, and Chester

Silhouettes

By CRAIG B. CRAIG

THE author of this series which Radio Digest has christened "Silhouettes" has been closely identified with the growth of radio broadcasting for a number of years. Mr. Craig's acquaintance with radio notables has been more than casual. He gives you an intimate profile of each one, as one friend sees another. We are looking forward to a book on the romance of the growth of radio which Mr. Craig has written and which soon will be issued from the press. Craig B. Craig is known in the financial district as managing editor of the Financial Digest.

Helen Nugent

PRIDES herself in being an old fashioned girl in a modern setting. Contralto—twenty-seven years old. Born in Cincinnati, Ohio, on January 6, 1904. Attended Mount Notre Dame Academy in Reading, Ohio, and the Cincinnati Conservatory of Music. Studied at the latter for four years. Winning a scholarship each year.

Easy on your eyes, Irish descent. Beautiful pink and white skin. Five feet five and one-half inches tall. Weighs 125. Large hazel eyes. Lovely dark brown hair. Sometimes it looks black.—Would make a swell health "ad."

Taught school for a couple of years before doing anything professionally with her voice. Put in six seasons with the Cincinnati Opera Company. Soloist. Then joined a mixed quartet in her home town. This brought the opportunity for a radio audition. This at station WSAI in Cincinnati.—Made it. Scared pink. So began her broadcasting career. Her voice registered so well through the "mike" that she was made a staff soloist of that station.

DECIDED to conquer New York. Arrived here September, 1928. Joined Columbia in January, 1929. Soon featured on more than a dozen programs.

Fond of the movies. Likes Garbo and Shearer, also John Gilbert. Movies that are chock-ful of romance are the kind that thrill her.

Gets lots of fan mail. Answers most of it herself. Particularly interested in letters from the sick confined in hospitals and from soldiers stationed in remote places.—Mushy letters don't appeal.

Superstitious—Oh, very!—Believes in 'em all. Thirteen at a table—under ladders—black cats—spilling of salt and all the rest.

Likes to read popular fiction. Chinese stories particularly. Fond of all sports. Swimming and tennis her favorites. Never gets her head wet when swimming. If it happens—the day is spoiled. She plays an exceptionally good game of tennis. Good for the wind. Good for the form.

Helen Nugent

Relishes all kinds of shell food. Boiled lobster her favorite. Eats lots of spaghetti, and she says that she herself prepares the best stuffed pepper ever tasted.

She likes big men. Ideal type must be six feet or over. Also must be plenty good looking. (Likes to show 'em off.) He should have lots of character in his face. Personality plus. She thinks man's best quality is sincerity.

Woman's greatest charm, according to Helen, lies in a crown of glorious hair. She must be fairly good looking too, but to be particularly appealing, she must have that crown of glory.

She hates to go to bed and she hates to get up.—When she finally does retire, she dons silk nighties. Particular about this. They must be silk and they must be beautiful.—Sleeps on her left side all night. Vividly remembers her dreams.

VERY prim. Everything must be just so. She takes great pride in her home. Has a great habit of frequently shifting the furniture from place to place. Loves her piano and a canary bird that sings incessantly. The bird was a gift from Harriet Lee, her closest friend.

Terribly temperamental. Moody on the least provocation.

Twilight and the fall of the year sadden her. Things are dying. Thunder and lightning storms frighten her nearly to death. Hides her head under the covers if they occur while she's in bed.

Plays piano. Accomplished. Likes violin best.

She can't whistle. She tries and tries. Not a peep—this annoys her and she tries again. Says she'll do it yet. Snaps her fingers with a loud crack, but has to use the fourth finger to do it.

Originally Helen had ambitions of becoming a dancer. She found she could manage her vocal cords better than she could her feet. Consequently—

Rehearses every day. Spends as much as eight hours a day with her music. Rehearsing and broadcasting. When

Connie Boswell

she finishes she goes to a musical comedy for relaxation.

Still nervous every time she sings. Loves radio work. Says the future of it is unlimited, especially with television in the offing. Likes to listen to the radio plays. Believes that better scripts would improve them some, although they're pretty good as is.

Once made a slip of the tongue into the mike.—Bumped into someone in the studio—forgot she was on the air—apologized saying "I'm sorry." Listeners wondered why she was sorry.

Missed a performance once. She failed to appear for "Manhattan Moods" at scheduled time. A substitute served. The studio phoned and found her in bed. She had completely forgotten that the broadcast had been switched from Tuesday to Monday night. It will never happen again.

Has an elaborate wardrobe. Most of her clothes are black. Likes sport clothes best. Wears them a lot. These are mostly blues and browns.

Uses little make-up. Lipstick and powder, with a touch of mascara at night.

Unmarried, but not sour on it. Believes it would be swell IF you could find the right one.

Her pet aversion is people who affect an unnatural manner of speaking. Nothing more irritating than that throaty tone of the would-be ritz.

Helen got her big thrill back in Cincinnati. It was an Atwater Kent radio contest. Seventy-five contestants. She was fiftieth on the list. She had some real competition.—She won.

Dislikes jewelry. Very seldom wears any.

Speaks French excellently. Sings in five languages. Loves stories. Never forgets a good one.

Terrific yen for sweets. A box of candy and all kinds of desserts are seventh heaven.

She has traveled quite a bit. Been all over the States. Likes the coast best. Particularly San Francisco. No special reason—just does. Some day is going to buy a big home out there.

New York night life is too strenuous. Besides that she thinks it is very much over-rated. You can't take part and still stay in condition. Consequently she doesn't play at it at all.

She's lucky. She once won a Chrysler in a raffle. Although she likes to ride she doesn't drive, so she sold the car. Had a hard time doing it too—even at a price.

Been in a plane once.—An unhappy experience. She flew steadily for eight hours. From New York back to Cincinnati. Her mother was ill. She arrived just in time to say good-bye to her mother, who was leaving on a longer journey.

And yet she sings to make other people happy.

Connie Boswell

COLLECTS hanks of her friend's hair. Ties the hanks with little ribbons. Has been doing this as long as she can remember. Has a suitcase full. Carries a pair of scissors in her hand bag just for this purpose. Maybe she'll make a mattress some day.

Constance—her real name. Nicknamed "Tony" when she was a kid. Changed to "Connie" when dignity set in.

She's the middle sister of the Three Boswells—Connie, Martha and Vet, (Helvetia—phew!) originators of the now famous Boswell Rhythm. Syncopated harmony that gets right under your skin.

Connie is the little girl with the big voice. The one that sings the deep contralto.—Four feet eleven. Tips the scales at 105. Great big light brown eyes. Raven black hair. Very proud of her hair. Olive skin, just 22, and single.

She hails from New Orleans, Louisiana—a locale where close harmony is second nature. Connie has heard the southern negroes sing at their Spiritual meetings and in the fields or at work on the wharves loading cotton, where they sing as long as they have strength to work. When the singing stops—so does the work. Theirs is a real natural harmony. Once in a great while the white folks get this natural gift of harmony. The Boswells have it—yea!

Connie started her musical career at the age of five.—Mastered one of the most difficult of all instruments—the 'cello. It is one of the smallest 'cellos in captivity. Her mother has it tucked away in a closet down home in New Orleans.—Vet learned the violin before she was seven and Martha played the piano even before she started her schooling.

First appeared as a trio when but kids. Used to play at all sorts of school affairs and church socials. Classical music, then. In addition to being an accomplished 'celloist, Connie plays piano, guitar and that beloved of all instruments—the saxophone.

Loves the profession. If she or the other girls had it to do over again they'd follow the same line.

Regular youngsters. Father used to drive them to school down home. When he'd let them out, Connie and Martha would go into a huddle and decide on the movies in preference to school. Vet being the youngest would tag along. She'd invariably spill the beans about them playing hookey. Not that she

(Continued on page 82)

Station Parade

Pageant of Personalities and Programs as they Appear Across the Continent for the Biggest Show on Earth

THERE are about 600 radio broadcasting stations in the United States. There are 96 pages and cover in Radio Digest. Obviously we cannot give a full page to each station and have any space left in which to tell about the popular radio folk who are heard alike over all parts of the country.

Station Parade aims to give highlights from the individual stations as they are scattered across the continent. All stations are invited to supply us with information that would be of interest to Radio Digest readers—especially those readers who reside in the vicinity of the station contributing the station notes.

Sometimes we hear that material has been sent and we do not use it. Where special material is prepared for Radio Digest that has not been sent to the daily newspapers special consideration will be given. We publish syndicated material with great reluctance because it cannot be used until long after the newspapers have had a chance to use it. Radio Digest comes out only once a month. Our editorial contents are sent to the printer from six to eight weeks in advance of the date of publication. Mere program listings of local stations require too much space and are uninteresting to the great majority of our readers. But brief notes about personalities and programs are sure to find their way into Station Parade. Station managers should not depend on our buying "write-ups" about their stations from free-lance contributors. Authentic information should come directly from the station representatives.

—Editor.

Maybe Harry Can't Get a Girl?

ALAS for the Three Bachelors of WAAM, Newark. They were so sure they were girl-proof they locked arms in front of an open mike and sang a challenge to all femininity at large. They became known to the listeners as Norman, Harry and Sonny. Gay, happy and free they sang ballads and taunted every girl who listened. Now this couldn't go on forever for all three of the young men were really very nice, good to look at and most excellent material on which to operate to design a first class husband. Sonny was the youngest. More than once he felt feverish impulses as a pair of luscious eyes were leveled at him. Girl proof? Ha! Ha! A little moonlight, a gentle touch on the hand, murmuring leaves, whispering wavelets—a *kiss*—and they scattered rice over Sonny's departed bachelorhood. In the meantime Norman had begun to feel the effect of irreparable crevases in his armor. Dan Cupid's darts wedged through. Presto! Off to the church walked Norman with wedding bells tolling a knell to his bachelor days. And now only Harry remains.

"Yer-r-rrp! Yerp! I'm yerping from WNAC, Boston, where I'm a gift artist. Nancy Howe is my girl friend. Yerrrp!"

Perhaps Harry is a bit cynical. He is the type of man in appearance that artists love to portray as vigorous hemen, a clean cut square jaw, keen gray eyes, dark wavy hair and altogether presentable. He smiles and says he still can sing. He does sing bravely and sincerely. He declares he will carry on. But there is a certain box of fudge that keeps coming to him through the mail. He's come to look for it with some show of eagerness. After all there's an old saying about the way to a man's heart is through his gastronomic system. And, Harry, you may be a marked man.

A Prolific Radio Script Grinder

HOWARD REED, script writer for the Buffalo Broadcasting Company, has probably written more dramatic material in the past seven years than the average author does in a lifetime.

Reed began his radio career with WOR with a radio play which showed a natural flair for air productions. He wrote "Black Fear" which went over WGY and the New York State chain in 1926, and continued writing serials for the Schenectady station.

At present Reed has written more than three hundred scripts for stations WGR, WKBW and WMAK of the Buffalo Broadcasting Corporation, and he is still going strong with new ideas.

Reed has heard his stories over the air from a dozen different stations from coast to coast. He has written scripts for WTIC in Hartford, KOA in Denver, WHAM in Rochester, and WJR in Detroit.

His one bit of advice to those who would be writers for the radio is "write the script, cut out the parts you think are good, and you'll have a show."

Governor Ely Appoints Official Radio Advisor

GOVERNOR JOSEPH B. ELY of Massachusetts has taken active recognition of the census report that Massachusetts ranks as one of the first states in the country in the percentage families owning receiving sets. Something should be done about it. So he officially appointed George A. Harder of WBZ-WBZA as Radio Adviser to

the Administration. It will be Mr. Harder's duty to supervise and arrange all broadcasts in which the governor is to participate.

Regarding the appointment, Governor Ely said: "In these times when 52 per cent of Massachusetts families own radio sets, the governor must do his part in discussing with the people matters vital to them. I believe that next to the press, the radio is the most powerful force in moulding public opinion.

"No governor can devote the time to informing himself fully on the new wrinkles of a science so complex as broadcasting, or to the arrangements incidental to his radio engagements. It is for that reason that I have entrusted this work to Mr. Harder who has had a wide experience in the field."

Governor Ely is widely-known to the broadcasting fraternity as the original "Radio Governor". His belief in radio as a great democratic institution prompted him at the outset of his administration to have a special microphone installed in the Executive Chamber.

Almost overnight the hitherto unknown practice of a governor sitting at his desk and addressing a message to the people from one end of the state to the other was adopted by the chief executives of other New England states, New York and Pennsylvania.

The governor's use of the radio has proved itself an effective means of stirring widespread public interest in current problems of the Administration. Governor Ely knows its effectiveness and by dint of a forceful radio personality and able treatment of his subject always commands statewide attention while he is on the air. The special messages he broadcasts to the people inevitably bring a flood of complimentary telephone messages, telegrams and letters.

It is believed that the Governor's appointment of a personal adviser on matters of radio is strong evidence that he intends to intensify his use of the microphone during the remainder of his administration. It is likewise argued that Governor Ely's acceptance of radio as a primary means of moulding public opinion will point the way to its general adoption by other state governments.

Harder is one of the pioneer officials in the New England broadcasting field, entering radio after several years in newspaper work. He is a graduate of Harvard and saw action in France during the war with an ambulance outfit. Besides his special work for Governor Ely, Harder will continue in charge of public relations and program and editorial features for the New England Westinghouse stations.

Boston Director Also Composer

CHARLES R. HECTOR, director of the Yankee Network orchestra, seems to have scored a hit with his song, *When I Whispered Sweetheart,* which had its premiere in Boston a few weeks ago. It was sung for the first time by Lee Le Mieux, former mill girl, who now is widely known as the popular girl baritone of the Yankee Network.

The initial effort of Mr. Hector in writing music was accepted by one of the largest music publishing concerns in America, the House of Kornheiser.

American, International and Mechanical rights have been obtained by the composer.

Mr. Hector who started out in life to become a medical man, turned to music after three years study in a Berlin medical school, still retains his ambition to become a symphony director, regardless of his initial success as a composer. In fact he viewed the acceptance of his writing efforts as another step toward his announced goal.

At present he is working on another musical number which has been accepted by the House of Feist, and will appear in printed form in the early future.

When Uncle Wip of WIP-WFAN says "monkey business is goin' on" over his program he means monkey. Only this happens to be Mona the chimp on Uncle Wip's knee

Quick Success for Mill Girl at Microphone

LEE LE MIEUX, latest addition to the Yankee Network's staff of artists, possesses a voice the quality and clarity of which strongly resembles that of Kate Smith, radio's big mamma, who tips and breaks the scales at 204 pounds.

The petite Lee Le Mieux differs from Kate in several respects, the greatest difference being in weight which is 82 pounds less than that of her more illustrious contemporary. Her voice, too, is lower. Lee is really a mezzo-contralto, sometimes referred to in speaking of singers of popular songs, as a "girl baritone."

Her debut over the Yankee Network, which took place only a few weeks ago, was an unheralded event that has already accumulated a large mail response. Several sponsors of programs now in preparation for late fall broadcasts are angling for her services.

How Miss Le Mieux stepped from the whirling spindles of a woolen mill to the microphones of WNAC is an Horatio Alger story from true life. Forced to give up mill work because she was not constitutionally suited for such strenuous labor, Lee sought other employment. Her friends suggested she make something of her voice via the radio and she clicked into the WPAW staff via the audition route. Naturally big hearted and realizing that the Yankee Network offered larger possibilities for this unusual artist than his own station, Paul Oury, manager of WPAW, brought her to Boston for an audition which was promptly arranged during one of Big Brother Bob Emery's "audition days" at WNAC. Immediately she became a full-fledged member of the Yankee Network artist staff.

Miss Le Mieux is 24, was born in Taunton, lives with her mother in Pawtucket, and has three sisters and four brothers.

Kay-Dee Did Kall Kiddies Klub at KDKA

By Dorothy Davidson

MANY parties and other fun are in store for children who are members of the KDKA Kiddies' Klub recently organized by Uncle Kay-Dee who is heard daily through Westinghouse Radio Station KDKA at Pittsburgh.

Uncle Kay-Dee, in real life C. A. "Tony" Wakeman, broadcasts at 5:30 o'clock each week-day. Each of the young members of the KDKA Kiddies' Klub is presented with an attractive membership card. No restrictions are required regarding residence, children of cities and towns distant from Pittsburgh being eligible the same as those residing within the Pittsburgh district.

Within a week 2,500 members were enrolled in this new "klub" for children. Many are from far distant states and communities.

Fred Goerner is Real Pioneer Broadcaster

A PIONEER in radio broadcasting, Fred F. Goerner, cellist, has been appearing in musical programs from Westinghouse Radio Station KDKA since the inception of broadcasting. In fact, Mr. Goerner even broadcast in experimental programs from the original KDKA transmitter before the first program for public reception was sent out in November 1920.

Mr. Goerner is a native of Pittsburgh. He received his elementary education in the city's public schools after which he attended the Oberlin Conservatory from which he was graduated in 1916. He is a resident of Ingram.

During the World War he was graduated from the United States Naval School at Harvard University. From 1918 to 1920 he studied at Dresden, Germany.

Max Vinsonhaler, new dramatic director of KOIL

The manner in which Mr. Goerner entered radio broadcasting is rather unique. During the experimental work which preceded the first broadcast he was a service engineer with the Westinghouse Electric and Manufacturing Co. and it was due to his connection with the company that he succeeded in playing over the station during the days when early radio history was being made.

WNBO Boy Announcer to be "Big Shot"

RALPH SHAFFER, the youthful announcer at WNBO, Washington, Pa., has a style suggestive of the dynamic Floyd Gibbons. His versatility may be compared to that of Ted Husing. Whether it's a football game or a "soup and fish" affair with the "highbrows" Ralph just seems to blend right in with the occasion and his followers are legion in number. He is Warner Bros. representative with the station and directs their policies followed in broadcasting. When the Warners "hook-up" is completed in Pittsburgh, Ralph will be the "big shot." It is his privilege to introduce the various talking picture stars to his audience and as a result he is an authority on those bits of news concerning them in private life that the radio listeners delight in hearing about. His position as Governor Gifford Pinchot's announcer did not require a larger hat or affect his radio personality other that to increase his friends.

WCAU Plans $350,000 Studios

EXPANSION plans for WCAU in Philadelphia involve the proposed expenditure of $350,000. Three floors will be added to the Franklin Trust Building* for studios which will be designed as the last word in studio equipment. Special reservations are being made for Dr. Leopold Stokowski, conductor of the Philadelphia Orchestra, who will supervise the construction of studios he will use according to plans he has worked out since he has entered into broadcasting. He has spent two years of constant experimentation in the study of the science of broadcasting as it particularly embraces the transmission of orchestral music.

In addition to the general administrative offices and studios, there will be an experimental laboratory especially constructed for Dr. Stokowski where this noted musical authority will continue his studies and experiments in the transmission of music with the assistance of a radio engineer, assigned exclusively to him for this particular work.

The broadcasting facilities will include seven studios of various sizes to accommodate every known type of program. Each of these studios will be as sound proof as modern science can make it—constructed with a floating floor, walls on springs and suspended ceiling. Each is to be a room within a room, with partitions of double glass of two different thicknesses to prevent transmission of vibration. A special flexible accoustical treatment will enable the period of absorption and reverberation to be changed according to the size of orchestra or number of people in the room.

Every studio will be air conditioned automatically thereby maintaining a normal temperature and humidity throughout the entire year.

Betty Lee Taylor, organist at WGY, Schenectady, is taking up piano lessons. You'd be surprised what this infant grand does with its electrical connections with the big pipes

Another exclusive innovation of station WCAU'S new quarters is the separate room outside of the main studio for the conductor. Here, within a glass enclosed accoustically treated room, the conductor will hear the program—not as it sounds in the studio, but through loud speakers as it sounds when it reaches millions of listeners everywhere.

Through a double curved glass, embracing this enclosure, the conductor will be on a platform flooded with spot lights, whereby every move of his baton will be clearly visible to every musician in the orchestra.

Another feature shows there will be with each studio, a separate control room, whereby the program may be properly blended before it is sent through the main control room to the transmitting plant, and then broadcast to the listening audience.

Provisions also are being made for observation galleries, whereby the many thousands of visitors coming to Philadelphia, who have never seen a large broadcasting station, may observe all of the movements used in sending programs of national importance over the air. There will be visitors lounge rooms, separate rooms for artists and announcers, an extensive music library, special audition rooms and the general offices of the company.

Arthur M. Clark, nationally known engineer, with a reputation for sound proofing and accoustical engineering, will be in direct charge of the entire installation of the new station.

---

*Late dispatch states the Packard or some other near-by building may be used instead of Franklin Trust.

These plans anticipate the broadcasting of television programs, by providing for a television transmitter, necessary lighting equipment and dressing rooms.

WUPETYFUF REVUE

"Here we are again
On the air again,
Wu-Pe-Ty-Fuf!
Here to play for you
And be gay for you
Wu-Pe-Ty-Fuf!
We hope you like it
For we are doing it just for you
And if you're happy, then we'll be happy,
So here's to another Revue!"

WITH this jolly song and a rollicking tune each Thursday morning at eleven o'clock (EST) the "Wupetyfuf Revue" goes on the air from WPTF, in Raleigh, North Carolina. The name of the Revue is easily discernible from the call letters of the Station—W-P-T-F—and the entire half hour keeps up the informal spirit of fun and happy harmonies introduced in the little song at the first.

Kingham Scott, staff wit, is master of ceremonies for the Revue—and hilarity and sparkling tunes certainly take over the air when this jovial master reigns supreme for thirty minutes.

One of his favorite "acts" for the Revue is to present original parodies on programs regularly broadcast from the station. For instance—Kingham Scott presents the "Poets' Corner"—With voice quivering with suppressed emotion and a background of heart-breaking music such as *Hearts and Flowers* for accompaniment Kingham reads:

"I lay me down neath a chestnut vine,
I dream of thee, sweetheart of mine.
Pine scented flowers swinging high
Thou art mine—I know not why.
Don't shrink as the buttercup
That pallors in the morning dew,
Seek the hope of the evening star
With breath of life anew.
All hopeless lies the mark of time
With fretted brow and fevered lips;
Calm as the waning moon
The heated day to cooling night slips.
Ah, no! A million nays!
Come from the mocking brow—
But unswaying and dismayed
We dash the spray from off the bow."

Kingham follows this plaintive poetic outburst with sparkling bits of music either by himself or by some other member of the staff—for the master of ceremonies is as versatile as he is entertaining, holding a place as organist and pianist on the staff entertainers.

Perhaps turning from such levity Mr. Scott will select to read the account of "The Coquette" as written by himself: "I found myself staring rudely at her.

"Gully-gee, how'm I gonna git 'at Jawbreaker in my mouth?" asks Little Elmer at KOMO, Seattle.

She turned her head the other way—perhaps a bit embarrassed, perhaps a bit abashed, then she nodded her head in the direction of a man standing next to me. A surge of jealousy ran through my veins, but I said nothing. Just as she turned her head in my direction a man came within sight and she dashed off to meet him. . . My opinion of her was quite correct. She won first prize over thirty other horses."

Dramatics are introduced into the Revue with quite a touching version of *My Buddy*—"They had been pals ever since they met many months ago at a training camp. They had shared their meagre possessions together and fought through thick and thin side by side. They had become separated for a long time, and suddenly one day they met! Crowds of humanity surged past them as they met. With a fond embrace they greeted each other.

"Harry, old man, it's you!"

"Yes, Tom—it's me! Oh! I'm so glad to see you once more before I go—before I go!"

"Harry, you can't leave me like this—just when we've found each other again! Harry!"

"It's no use, Buddy, they've got me—I'm going west—west!"

And he caught the train bound for Leavenworth!"

Well, as Kingham would appropriately say—"Drop in on WPTF sometime on Thursday morning at eleven o'clock through the medium of your dial set! The Revue will enjoy having you tune in, just as much as you will enjoy the Revue!"

Carolinas Add Two Links to Eastern NBC Chain

TWO Carolina links were added to the NBC chain within the last few days (October 10) with ceremonies that brought Governor O. Max Gardner of North Carolina on the same program with Governor I. C. Blackwood of South Carolina. The two new NBC stations are WWNC of Asheville, N. C. and WIS of Columbia, S. C.

A studio party with many headliners was held in honor of the event in the NBC studios in New York. Erno Rapee directed. On the list of guests who entertained were Rudy Vallee and His Connecticut Yankees, Jesse Crawford, Russ Columbo, Vaughn de Leath, Little Jack Little, Ramblers Quartet, Amy Goldsmith, Fred Hufsmith, Gladys Rice, Theodore Webb, Veronica Wiggins, Henry M. Neely, Mexican Typica Orchestra, and Rapee's Concert Orchestra.

Station WWNC is owned by the Asheville Citizen and the Asheville Times. It operates on a frequency of 570 kilocycles or 526 meters. WIS is owned by the Liberty Life Insurance Company and operates on a frequency of 1010 kilocycles or 296.9 meters. Each station has a power of 1000 watts.

The addition of the two stations brings the total number of NBC outlets to eighty-two, including WEAF and WJZ of New York.

"Scandalous Past" of Dumb Major is Exposed Here

"HULLOOOOO PEEPUL!!" This is the noon time signal from WGAR, ushering in the Song Parade. The perpetrator of this unholy yell is none other than the Dumb Major of this parade of WGAR crooners—Rocky Austin—nee Rockwell Hughes Austin. He is by no means as diminutive as the automobile that was named after him. Anyhow, to get on with the mysterious life history that now arises to confront our hero at the above Cleveland station.

He was born March 25th, 1900, in Catskill, New York. Jumping over those years when Rocky as a little boy was the bane of existence of a number of neighbors on account of the large number of broken windows, we find our young man just on the threshold of

manhood, entering the Albany Military Academy at Albany, New York. During his senior year he became major of the school battalion, which probably accounts for the ease with which he assumes command of the Song Parade. Major Austin, just to show what a versatile young man he was, became president of the student council, chairman of the debating team—where he received plenty of practice for future announcing—and ended up by collecting nine letters in all—for football, basketball and baseball.

Upon graduating he honored Cleveland with his residence, where in the course of a prolonged career he has been automobile mechanic, buyer of men's furnishing departments, file clerk, has peddled handbills and at various other times he has sold automobiles, vacuum cleaners, kitchen utensils, aluminum wear and fire extinguishers. He has never yet gone in for bootlegging. He says he has also painted, though he refuses to state what.

Rocky entered radio work in 1926, which makes him a veteran in this comparatively young business. After three years with a local station, filling various spots on the bill, he went to New York where he played six months at famous "Barney Gallant's" night club down in the "village"—and also had numerous other engagements in other places of nightly frolic. He knows personally a number of the night club stars of New York, including the well known Texas Guinan.

The lure of radio and especially radio in Cleveland was too strong, however, and Rocky returned to continue over another Cleveland station. During this time he also coached a girls' basketball team that won the State Championship for two years.

On February 20th, of this year, Rocky became a permanent fixture in the WGAR studios—and does just all sorts of things in addition to being the Dumb Major. He has programs called "Rock Gardens"—"Memories"—"The Minute Man"—"Rocky's Review," and also is constantly called upon for personal appearances in front of various organizations.

He describes himself as "Single—sound in wind and limb—has five teeth out"—and we add that his smile is his greatest asset!

World's Youngest M. C. At WJAY, Cleveland

CHILD radio artists are certainly not a novelty anywhere, and are usually tolerated merely because they are children. But WJAY in Cleveland claims a young master of ceremonies, who would be a star on any radio program, regardless of age or experience.

He is little Jackie Hughes, 8 year old announcer and singer. WJAY for over a year has been claiming for him the honor of being the youngest radio master of ceremonies. In all that time there have been no others to challenge this claim.

Jackie takes full charge of his weekly program, listed as "Jackie Hughes and His Gang," and the program itself has become most popular with children in the Cleveland station's territory. It is put on each Saturday morning between 11:15 and 12 noon, so that all school children may hear it, and the amount of mail that Jackie gets would enlarge many an older performer's head.

Jackie Hughes has been performing before the microphone for three years starting in the ranks of child entertainers when he was only five, rapidly rising to the top because of his inherent and unusual ability. For some time now he has been featured in WJAY's weekly program utilizing child artists of 12 years and under.

Little Jackie has also broadcast over stations WHK, and WGAR of Cleveland, WKBN, Youngstown, and WADC, Akron, Ohio. He is in the third grade in Lakewood School and is active in all boys' sports and playtime gatherings.

Dorothy Churchill of KQW, San Jose, California. Miss Churchill is soprano soloist at this pioneer station

WLW Presents Ohio School of the Air

EDUCATION by radio is not a new thing in Ohio where the Ohio School of the Air entered into its fourth consecutive year October 12th. Quite different from the little hand bell with which the teacher summoned the children from the schoolhouse door of old was the great peal of silver-toned bells of the WLW organ. Nearly 400,000 students answered the call. Some of the students in the back row sat 2,500 miles away from their teacher.

More than 120,000 children were registered as pupils of the Ohio School of the Air from the Buckeye state alone, last year, with over 3,000 school-rooms throughout the state reporting a regular use of the Ohio air school courses. B. H. Darrow, director of this unique school which is a division of the Ohio Department of Education, estimates that approximately 10,000 schoolrooms throughout the country made use of this Ohio educational feature during the 1930-31 term.

"Through the Ohio School of the Air school children of our state and of the entire country have the opportunity of receiving training directly under the nation's foremost educators," says Dr. Darrow in pointing out that his faculty is recruited from the ranks of leading university and public school pedagogues.

No classes were held during the initial session of the WLW air school, the time being taken up with exercises marking the opening of the fourth fall term of this pioneer radio school.

George White, Governor of Ohio; Frank E. Reynolds, secretary of the Ohio Education Association; B. D. Skinner, Director of the Ohio Department of Education; and Powel Crosley, Jr., president of the Crosley Radio Corporation, were among the notables to gather at the studios of WLW to attend the opening exercises and to deliver brief talks to the school children of the air.

WGN Studio Notes

THE return of Wayne King and his orchestra to WGN was the signal for a home coming celebration that took the form of a tremendous amount of welcoming mail. King was recipient of 200 telegrams, and nearly a thousand letters on his opening night. The letters came from all parts of the continent and one letter came from Mexico City, Mexico. Another came from Quebec, Canada.

* * *

Votes on the most popular radio program have been coming into WGN by

the thousands during the last week. Scanning of the piles of returned ballots indicates plenty of admirers for the dance orchestras of Earl Burtnett, Ted Weems, and Jan Garber. With Wayne King back on the air, there is added another popular band to garner votes.

The radio sketches, Orphan Annie, Harold Teen, Uncle Walt and Skeezix, the Gumps, Louie's Hungry Five, and Painted Dreams have fared well in the balloting.

* * *

Easy Aces, a comedy of bridge errors, satirizing the great American pastime as it is usually played, is now heard three times a week on WGN at 7:15 p. m. and are booked for this same period on Monday, Wednesday, and Friday nights.

Easy Aces comes to WGN from Station KMBC of Kansas City where for over a year it was one of the most popular features in the Missouri Valley states. The feature is written and produced by Goodman and Jane Ace. Ace is a newspaper man who for a year wrote a column on the Kansas City Journal-Post called "Lobbying."

* * *

FROM the theatre box office originates the title *Fifth Row Center* the name for the new theatre review which WGN listed for each Sunday at 5:15 o'clock, immediately preceding the music of Wayne King and his Aragon Ballroom orchestra. *Fifth Row Center* will present an intimate chat about some one of the outstanding plays appearing in Chicago and will be followed by the personal appearance of the star of the production.

In presenting *Fifth Row Center,* WGN is enlarging it's already successful policy of presenting stage stars of prominence to its vast audience of radio listeners. In the past year WGN has brought to radio such famous people of the theatre as Otis Skinner, Grace George, De Wolf Hopper, Tom Powers, Oscar Shaw, Blanche Ring, Lillian Kemble Cooper and Minnie Maddern Fiske.

Some of the coming stage attractions for review and presentation of principal stars are: Lionel Atwell in *Silent Witness, The Third Little Show* with Beatrice Lillie and Ernest Truex, *Girl Crazy, Crazy Quilt* with Fannie Brice, Phil Baker and Ted Healy, *Private Lives* with Edith Taliferro and Donald Brian, *The Venetian, Surf* with Walker Whiteside, *Against the Wind* with Minnie Maddern Fiske, *The Admiral Crichton* with Walter Hampton and Fay Bainter, *Earl Carroll's Vanities,* and the Theatre Guild's *Tomorrow and Tomorrow.*

Miss Irma Hall at WJSN had the contest judges worried when they saw this photo and were deciding on the new Radio Queen. However, friends say this photo never did the real beauty of Miss Hall justice

"LITTLE ORPHAN ANNIE," radio dramatization of the popular Tribune cartoon strip, has returned to the network, to an estimated audience of five million children. Twenty-nine stations now carry Annie's adventures.

Annie's return to the NBC chain is

the result of her continued popularity in and around Chicago, where she has been presented nightly from WGN, The Chicago Tribune station on the Drake Hotel, coupled with her satisfying "test" of last spring, when she was heard over an experimental network of six stations. So successful were her adventures, and so instantaneous the listeners' response, that immediately upon conclusion of the series, plans were made for the broader network.

* * *

The five greatest dance bands in the Middlewest will be presented to WGN listeners nightly this fall—Wayne King's, Ted Weems', Earl Burtnett's, Art Kassel's and Tweet Hogan's.

Earl Burtnett, "the toast of the coast," and his band from the Mark Hopkins Hotel in San Francisco, touched off the winter's dancing season at the Blackhawk restaurant, and Art Kassel and his "Kassels in the Air" served up their grand inaugural at the Bismarck hotel.

Earl Burtnett's aggregation will take up the work of Coon-Sanders' orchestra of other years, in specializing in programs for the collegiate crowd at the Blackhawk. As soloists he will have Jess Kirkpatrick, former stellar halfback at the University of Illinois in 1921 and 1922, Arthur Jarrett, Gene Conklin and Harry Robinson. Between dance groups a specially picked lineup of entertainers will assume the spotlight.

Burtnett's band was the favorite orchestra of the movie colony on the Pacific coast during its stay of five years. They appeared in many talking pictures, including *Broadway Melody, Coquette, Gold Diggers of Broadway, Reaching for the Moon, Puttin' on the Ritz,* and *Viennese Nights.* Among his own compositions are *Sing Another Chorus, Please, Leave Me with a Smile, Mandalay,* and *Do You Ever Think of Me.*

Art Kassel is a Chicagoan who has played his way into national fame as a radio and recording orchestra leader in the old home town. Back in 1923, he had aspirations to become a commercial artist, but he couldn't keep his hands off a saxophone and clarinet. So he decided to devote his entire time to music. He also is a composer, with a number of hits to his credit, the most popular being the sensation of two years ago, *Around the Corner.*

Tweet Hogan's peppy crowd of musical youths will hold forth at the Drake Hotel, while Wayne King, "the waltz king," and Ted Weems will continue to play for thousands of dancing feet at the Aragon and Trianon ballrooms respectively.

* * *

HOTTEST program ever sold in Michigan was at Marquette. Bob Kaufman had rushed a portable to a fire and was telling the WBEO listeners all about it when Al Loomis of the advertising staff saw the owner of the store in the crowd. There would have to be a fire sale, of course. He sold the startled store keeper the idea on the spot and Bob told the listeners to come in for bargains the next day.

* * *

Station WTMJ at Milwaukee has one of the fastest nut programs on the air. It is called the Three Flying Filberts. They fly from one subject to another without stopping. They are Bob De Haven, Dave Willock and Julanne Pelletier. De Haven is a member of the Haresfoot club at the University of Wisconsin, and has written several plays and revues for that organization.

* * *

Green Bay, Wis., merchants have sponsored a program over WHBY which will be for the benefit of disabled World War veterans. Every Tuesday night at 7:15 some authorized representative will tell the veterans how to file their applications for compensation and answer such queries as may be sent to the station. The information will be applicable to all veterans of the United States.

* * *

In answer to a demand for detailed information as to its advance program listings Station KSTP, St. Paul, Minn., is issuing a weekly bulletin or "tiny tabloid." In the issue before us is an attractive picture of Marc Williams, Cowboy Crooner, singing to a bright faced baby in the hands of a nurse.

* * *

A LETTER from York, Nebraska, states that Jerome DeBord and Henry Peters, "The Yodeling Twins," who received the Radio Digest award for being the most popular team in the West have moved from KGBZ to KFEQ at St. Joseph, Mo. DeBord has been a radio entertainer for the past nine years, and Henry Peters for five years. They have been yodeling together for the past three years. They were scheduled to make their first broadcast from St. Joseph September 15 and the deal calls for a daily broadcast.

* * *

WE do not hear often from KOA, Denver, of late. A picture received which we were unable to publish shows a group of international educators around the microphone. It was taken during the convention of the World Federation of Education Associations.

* * *

STATION KABC of San Antonio sends a clipping from the San Antonio Light which reads in part: "While WOAI is broadcasting (the World Series) in English, KABC will be putting the play-by-play report of the contest on the ether in Spanish for the benefit of the large Mexican population of Southwest Texas. . . This will be the first time in history that the pellet will be called a 'pelota' in anything but a slang sense."

* * *

OUR old friend Bill Ellsworth, formerly of WIL, St. Louis, we are glad to learn has been made manager of KUOA, owned and operated by the University of Arkansas. It was Bill Ellsworth who gave WIL the title of "the friendly station." To bring KUOA

This is the WTMJ Little Symphony Concert Orchestra which has made such a stir within the radio horizon of the Milwaukee station

up to par the university has decided to put on a few commercials to help carry the cost. To be identified with a university station has given Mr. Ellsworth a great thrill. He has a yen for altruistic broadcasting even if he does have to sell a little time to get along. He has a knack of creating an atmosphere of cordiality. He wants to feel that he can do a whole lot more for some other fellow than the fellow can do for him. The sincerity of the man has earned him strong attachments with those who have been identified with him in the past. So it happens he has been able to bring many of his former associates to the Arkansas station. Radio Digest wishes Mr. Ellsworth the best of luck and hopes he will keep notes coming here about the activities at the Fayetteville station.

* * *

Kansas City Campfire Girls are intensely enthusiastic over the programs being conducted for them by Mondane Phillips over KMBC. She comes to them every Saturday morning at 9:45 as Mary Ann. She plays the role both of mother and daughter. A mid-week program is presented Thursdays at 4:45 in the afternoon.

* * *

John Henry has been made station director of KOIL at Council Bluffs and Omaha. Mr. Henry leaves a radio editorial job to take command in place of Hal Shubert who resigned to enter another field of radio activity. For several years Mr. Henry was managing editor of the Daily Nonpareil of Council Bluffs, a powerful publication covering southwestern Iowa.

Pacific Coast Notes

By Dr. Ralph L. Power

BILL RAY, energetic assistant manager at KFWB, Hollywood, resurrects his Ragtime Revue for Sunday night patrons. It had been carefully stored away for more than a year. "Not good, but loud," softly whispers Bill between station announcements and the band begins to thump away with "Alexander's Ragtime Band" or some other tune of years gone by.

* * *

Robert Bowman, KHJ's technician-announcer, who in a pinch can also strum away on the fiddle, has wandered to other fields. Now the young man is at San Diego as KGB's program manager.

* * *

Twenty-five years ago Roy Leffingwell wrote his first song, "Every Girl's a Flirt" . . . and women wore puff sleeves, bustles and derby hats. Now he dashes off his latest, *I'm Afraid That I'm Falling in Love"* and the cycle swings around to where all these accoutrements for milady are back in style again. Leffingwell is KECA's music-philosopher and a well known composer with more than 200 tunes to his credit.

* * *

Liborius Hauptmann, former music director at KGW, joins up with the KTM staff as leader of the concert ensemble and pianist for the little symphony at Los Angeles. His colleagues dub him "What a Man" Hauptmann, since all the other members of the symphony are of the fair sex.

* * *

KMTR's debonair organist, Harold Curtis, has gone Hollywood in a big way these days. His family chariot is equipped with a French top, looks sporty and chic.

* * *

Dean Metcalf teams up both as a staff baritone and announcer for KFWI, San Francisco, and once in awhile he even essays the role of pianist. Although he took an education course at the University of Southern California, he later became interested in radio work and started his career at KFI five years or so ago.

* * *

Dave Ward, KELW's chief announcer, gets another job. But he keeps 'em both. He now directs a ballroom orchestra in a nearby town and moves the group bodily from studio to dance hall and back again a couple of times a day. And in between, without any provocation at all Dave lustily lifts his voice in song as a solo performer.

* * *

L. Scott Perkins, NBC continuity scribe, is a son-in-law of Roy Leffingwell, western pianist-composer. Scott lives down the peninsula at Redwood City and both he and his wife drive the car along the smooth highway . . . not all at once of course, but at different times for each has a personal conveyance.

* * *

Roy Ringwald, versatile young man in his teens, comes back from the east a sadder and wiser boy. He started out to conquer the world with a vocal trio. Now he sings, plays the piano and organ over at KECA, Los Angeles, and enrolls in the state university to finish his education. Roy didn't begin to lift his tonsils in song while in the bathtub as so many tenors do. Not a bit of it. He began to sing while wringing out suits in the Santa Monica bath house where he was an attendant.

* * *

Dr. Wade Forrester, "singing chiropractor," has closed up his Los Angeles shop because he says Angelenos don't respond to night treatment. He goes back to Oakland and sings over KROW. He had been heard over KELW, Burbank, for a number of months with a program.

* * *

Carl T. Nunan, KPO's publicity impressario, is a son of the coast's oldest radio-music critic. Numan, Sr., has for twenty-five years been in succession music, drama and radio editor for the Los Angeles Examiner.

* * *

Lee S. Roberts, California composer, who gives the Sperry Smiles program over NBC, has two sons . . . one twenty-one and the other fifteen.

* * *

Sydney Dixon's robust tenor voice isn't being heard much from KYA studios of San Francisco these days. He has been busy in the commercial and executive departments.

* * *

Clarence Muse, colored star who was discovered by Bill Sharples at KNX a couple of years ago, is one of the characters in the new Sky Dwellers Sunday program at KTM. For twenty years the Sky Dwellers, stage players, have met on both sides of the Atlantic. Now all of them are in Los Angeles in the talkies and they again meet in informal mood and entertain.

* * *

Julius Brunton's voice is once more ringing around the KJBS (San Francisco) studios where he is owner-manager. He went to Honolulu on a honeymoon jaunt.

* * *

When KFRC opened up for business nearly ten years ago Harrison Holloway was on the job as engineer. He is still there but is now the station maestro. A short time later Monroe Upton joined the group and he's still there . . . with a dozen radio aliases ranging from Lord Bilgewater and Simpy Fitts to sundry other nomenclatures.

* * *

Glenhall Taylor says he would rather be a pianist and staff member than a station manager. And he ought to know because he has managed two or three stations since he was KFRC accompanist six years ago, later directing KTAB and KTM. Now he is pianist at KTAB once more.

* * *

Dick Dixon believes in spreading honors around. First at KGER, Long Beach, he is now across the street at KFOX in the same city where he does a midnight organ hour from one of the picture palaces. Small, wiry and energetic, Dick always had a sneaking ambition to own a string of hot dog stands.

Though KQW, San Jose, has been taken over by the Pacific Agricultural

(Continued on page 87)

If your table can't look like this for Thanksgiving—
Photo Courtesy of Macy's, Inc.

Economy

They can be just as elaborate holiday —and you can have what you can get

By Ida

THIS year when the President issues his Thanksgiving proclamation, he will doubtless have to scratch his head—if Presidents scratch their heads ever—and think hard to find anything to be thankful for; of course we can always be thankful we aren't as badly off as other people.

But such a hymn of praise seems to be rather negative. And I have decided, entirely without word from the White House, to assist President Hoover in his task of digging up something to be thankful for. I should begin with the depression. And when the loud chorus of *raspberries* or perhaps *cranberries,* in this instance, had died away, I should repeat: Yes, the depression.

Why shouldn't we be thankful for it? It has furnished a topic of conversation for over a year now; it has given twenty million husbands an excuse for not buying a car or not presenting the wife with pearls for her birthday. It has permitted us to escape every social duty, every patriotic duty, every religious duty we didn't wish to face. And it has furnished us with the most amusing comedy in two theatrical seasons: A study of a whole world so afraid of its own shadow that it won't move. The natural resources of the world haven't grown less, certainly; the population hasn't decreased, when you consider the whole, to any appreciable extent. Machines have freed us for higher things than the mere business of living. Then what in the world is the matter with us?

Nothing; except that we have frightened ourselves into a kind of paralysis. We have all been so afraid our incomes would cease that we have stopped buying; and thus, with true brilliance, we have cut off our incomes at the source. Commerce isn't a stream with a beginning and an end. It's a circle; and if you break it anywhere, it can't function. During a year now we have not purchased the things we needed because we trembled lest next year we shouldn't be able to buy them. Next year is here almost, and we are beginning to discover that certain things we must have, whether we can afford them or not. The day we all become convinced of that fact and rush down to the stores and start buying again, the depression will end; and we shall suddenly find that we can afford what we need.

THE depression has been a blessing in many ways, you see; I never had much interest in finance before, but now I can almost understand people who chatter about international exchange, credits, and so forth. I am getting back to first principles; I have never before appreciated people, just plain, everyday people, so much as I do now although they have always been the most important element in my life.

And when I face a problem, no matter how big it is, I try to put it in terms of people and of the existence I know best. Primarily I am a housewife, even if I happen to keep house over the radio and have about one million neighbors, close neighbors, who train their ears on me and catch me in any slip I make. And so my contribution to the depression literature is a depression dinner for Thanksgiving. The prime essential, of course, is a grateful heart and a smiling face. The depression is a huge joke; if you don't agree with me, observe what a lark our depression dinner is going to be.

First of all, nobody is going to have to bear the whole cost of it; every person invited could well afford to pay for it, because it isn't going to be a bit expensive, but we are like a crowd of children playing a game. The game is depression. We imagine ourselves low in funds; and then we try to see how good a time we can have without much money. I know before we start that we shall learn only an ancient truth: Happiness doesn't depend upon wealth.

But the rule of the game is to consider ourselves poor. Therefore, every guest must contribute something toward the meal. Eight of us will share the food—and the entertainment; we shall assign the various items to people who can best supply them.

However, my recently acquired politico-economic knowledge intrudes at this point, and I lay down another rule. Because we have a surplus of certain products in this country, at our depression dinner we are going to substitute

A Thanksgiving Dinner

Tomato Juice Cocktails
Egg and Pimiento Canapes
Chopped Onion Broth
Celery Olives
Roast Fresh Ham with Bread Stuffing
Gravy
Mashed Turnips Riced Potatoes
String Beans
Cranberry Jelly Cubes
Harvest Cole Slaw
Little Pumpkin Custard Pies
Cider Pop-corn Fruit

Tomato Juice Cocktail

2 large cans of tomatoes and juice
2 medium-sized green peppers
1 chopped onion—3 tablespoons sugar
Cleaned outer stalks of one bunch of celery
2 teaspoons salt—¼ teaspoon pepper
2 bay leaves, 6 whole cloves, 4 peppercorns

Cook these ingredients together for ten minutes. Strain them through a fine sieve or cheesecloth and chill. Serve in small glasses with the egg and pimiento canapes.

Dinners

appetizing as those meals of yesteryear lots of fun in seeing out of very little.

Bailey Allen

—You can still enjoy your dinner on a setting like this
Courtesy of Dennison Mfg. Co.

for some of the traditional and none too plentiful dishes those things of which we own a superabundance. It's amusing to consider that a surplus may cause a lack; we continue the paradox and declare that the way to end the lack is to eat it.

If you don't think depression tastes good, just examine the menu given in this article and let your mouth water.

Note how much wheat that dinner requires! Yet it is a well balanced, appetizing meal; the charm results from using a little thought in preparing the food and from converting a simple repast into a party.

IN THE recipes, we have included ingredients of which there seems to be a surplus in the food markets. Nevertheless, we mustn't neglect the wheat crop; and here's how to concoct the bread stuffing. Melt four tablespoonsful of butter; add one medium-sized onion—I guess we have plenty of onions, too—and this medium-sized onion you should mince, not to make it different but to make it more effective. With it put one-half minced green pepper; and saute until the onion is yellow. Add next two and one-half cups soft bread crumbs, one teaspoonful of Worcestershire sauce, and enough water to moisten. Mix the whole thoroughly and use as a stuffing for the roast fresh ham.

I haven't heard whether there is also an overproduction of cabbage, but I next display a recipe for a salad that's good whether we have a depression or not. To achieve the harvest cole slaw, shred very fine enough white cabbage to make three cups; and combine with one cup of fine-chopped, unpeeled red apple and one-half cup of halved seeded raisins. Season with salt and pepper, and moisten with one-half cup of mild-flavored boiled salad dressing. Arrange in nests of lettuce; and garnish with a dash of paprika.

THE dessert, always a climax in the meal, is a triumph because it now gives us a chance to dispose of a lot of over-blessings. To prepare the pumpkin custard pie, combine two cups cooked, sieved pumpkin, one cup of light brown sugar, one-half teaspoonful of salt, one teaspoonful of powdered cinnamon, one-half teaspoonful of ground ginger, one-half teaspoonful of allspice, and two cups of rich or top milk; let these ingredients stand for five minutes, to ripen the seasonings. Slightly beat two eggs; and add them to the pumpkin mixture. Transfer the pumpkin custard filling to two pie pans or to little patty pans lined with plain pastry, the edges having been built up. Bake in a very hot oven —400 degrees Fahrenheit—and continue baking until the pie filling is firm and brown on top.

But we are not going to deliver three or four blows at the depression and stop; we shan't forget the South. The tablecloth and napkins for our depression dinner are to be of cotton. If possible, the lady guests will wear cotton clothes; and, in areas where the raw cotton itself is available, the centerpiece for the table might be a heap of cotton-boles with apples and yellow persimmons or wild grapes or autumn leaves. Those who live where apples are much in evidence, may provide a centerpiece to consist of a pewter or wooden bowl filled with autumn leaves, apples, and any other fruit they can obtain easily.

AND—oh, we were overlooking the pop-corn industry! Somebody must do something to relieve the depression in the pop-corn industry. Nothing is more depressed than depressed pop-corn. Well, our favors are to be of pop-corn, but booming. We construct little cylinders of celophane packed with pop-corn, the ends of the containers being twisted tight, so that the cylinder will be almost rigid. Then we wrap every cylinder in yellow crepe paper, again twisting the ends; and about three-quarters of the way around the yellow paper, we put green, securing the ends again, but leaving some of the yellow showing thru along one side and at the ends. Thus we have an artificial ear of corn that is nevertheless real and that is in perfect harmony with our depression dinner, the most lightsome affair of the season!

And How to Make It

Egg and Pimiento Canapes

With a medium-sized biscuit cutter, shape eight slices of bread in rounds. Brush them with one-half cup of melted butter and brown them in a hot oven. Cut three hard-cooked eggs in three even slices to make three rings each. Mash the yolks; combine with two tablespoons of minced pimiento, two tablespoons of mayonnaise, one-eighth teaspoon of dry mustard, with salt and pepper according to your taste. Thoroughly blend these ingredients. Spread the prepared canapes with the egg-yolk mixture; place a slice of egg-white on each canape, and sprinkle with minced parsley.

Onion Soup

Caramelize in a heavy frying pan one teaspoon of sugar; add three tablespoons butter and twelve small fine-minced onions. Cook these all slowly until the onions are brown. Add two quarts of meat stock or eight bouillon cubes dissolved in two quarts of hot water; salt and pepper as you wish. Cook this mixture slowly together for thirty minutes; serve in bouillon cups and sprinkle the top of every serving with grated Parmesan cheese.

Evelyn Hoey, wistful and charming actress who was guest star on a chain program recently

For Pity's Sake!

Thumbs are down on Purveyors of Sympathy. They are foes to happiness and progress

By

FRANCES INGRAM
Consultant on Care of the Skin, Heard on NBC Every Tuesday Morning

TODAY I had luncheon with an old friend—a girl who was graduated in my class and who went on to become a doctor. In the course of our conversation, Dr. Evelyn mentioned a serious disease which she characterized as "pernicious pity." "The plague of pernicious pity" she called it.

"I've seen too many of my patients retarded in their recoveries by the overzealousness of these chronic pityers. I've finally decided that people who play the part of Job's comforter to hospital patients should either be barred from the doors or operated on for their malady—pernicious pity. The idea of visiting patients and attempting to drown them in pity! It's criminal. Why one of my patients told me just the other day that she was sending out cards to her friends with this hint—'For pity's sake, please omit pity.' I don't blame her, either. I've heard some of her friends—I've seen them in action—cheering up a patient with stories of an aunt or an uncle or a niece or a nephew who died from exactly the same trouble for which my patient is receiving treatment! How they pitied her! Pity—it's a plague, and one of us will have to devise a cure for it sooner or later."

A diatribe against pity was somewhat of a novelty to me, but somehow or other I'm inclined to agree with Dr. Evelyn. I've met some of these chronic pityers and I've seen some of the damage they do. For instance, take the case of Margery. After two years in New York, she was finally able to furnish a tiny one room apartment. It was a charming place and Margery was naturally very proud of it. Then her mother came to town. It so happened that I was present when Mrs. Winters saw the apartment for the first time.

"OH, my dear child, if I had only *known* you were living like *this!* Margery, you must come home. You can't go on living cooped up this way. I can't have my only daughter living in one room. You poor child!"

You're right—Margery never enjoyed her charming little apartment again. From that day to this, cobwebs of pity have marred the decorative scheme which Margery worked so hard and so happily to achieve.

I saw pity at work in the Waldorf last week, too. At the table next to me were two young girls. From their conversation, it appeared that one of them was wearing a new fur coat.

"It's terribly smart, of course," said her companion, "but you'll never get any wear out of it, you know. Sue had one just like yours two years ago and it was being repaired all the time. It's a shame. I'm sorry you didn't let me know you were buying a fur coat."

PITY, I'm afraid, is often a cloak for less commendable emotions. Envy, malice, covetousness, all of these are sometimes seen in the mask of pity. It isn't always the pitied who suffer from this plague, either. Pernicious pity can be a boomerang to the chronic pityer as well. Slowly, but surely, the state of mind hammers the tissues of the face into a mold which reflects the thoughts. Inevitably one's customary mental state shows itself to the casual passerby. When we say to a child, "Don't make a face like that! It might freeze that way" we are saying something that really has an element of truth in it. So beware of pity—pernicious pity—pity which is not compassion, not sympathy, but a destructive disease which in time devours the pitied and the pityers.

Free booklets on the Care of the Skin by Frances Ingram, will be mailed to readers of RADIO DIGEST. *Send your request to Miss Ingram, in care of* RADIO DIGEST, *420 Lexington Avenue, New York.—Editor.*

Social Life in the Gay Nineties

By

Marguerite Richardson-Wood

Marguerite Richardson-Wood

The author of this article recently broadcast on the Woman's Radio Review Hour over NBC. Mrs. Wood is thoroughly familiar with every phase of social life both here and abroad. Her main interest lies in collecting antique furniture, textiles, glass and china. As a woman of great culture, her talks should be an inspiration to the radio audience.—Editor.

THE phrase "Naughty Nineties" or even "The Gay Nineties" as these years are called by the present generation, carries with it a strong element of ridicule. The emphasis is put on the negative side, along with the repressions, until our grandchildren believe we led most terrible, cheerless and unhappy lives. This is far from the truth.

Then there was a standard of living, which had dignity and charm. Our manners had to be good. We were not tolerated if rude or inconsiderate of the older generation. Invitations did not

In Grandmother's Day

come our way, no matter what names our family held, nor what figure our father's bank account showed, unless our training was correct.

I was the youngest of three girls, and a most adventurous youngster. The training for social life of my older sisters occupied much of my waking hours, and although I was told to sit quietly in the corner and not speak a word, still when there both ears were kept well forward and eyes wide open! All the talk sank deep into my untutored mind.

Unusual entertainments were most welcome even in those days. This dinner of twenty was to be a progressive affair. Every second course the men took their napkins and wine glass and moved to the right two places. Think what a flip-up this gave to conversation! No sticking with people who would not say a word until they had finished the fish! And so it was planned.

The great night arrived and as the guests came down the stair the butler handed each gentleman a tiny envelope with their names on the outside, while inside was written the name of the lady they were to take into dinner.

I witnessed this pageant from behind a curtain in the hall closet!

THRILLED to the tip of fingers and toes, I rushed down the back stairs, tore through the kitchen, where I heard Mary-Ann exclaim, "Glory be! look at that child! There's some *diviltry* brewing in that tousled head, all right, all right!" There was indeed, for I longed to hear how "grown ups" talked at play. What could they possibly talk about when they had such good food in front of them. I dived right under the dining table! There I made myself as comfortable as possible on my Mother's foot-stool, just as the guests were taking their seats. The talk did not register for some time in my child's mind; not until the second course had made an impression on the gaiety of the company. What they said seemed very silly to me but what they *did* intrigued me tremendously!

One man, a great beau of my oldest sister's loved olives—that was the day before stoned olives were in existence—so as not to appear too greedy he put these stones under the table! I counted them carefully for future reference. When he teased me the next time or pulled my curls unmercifully, I would have something to say that might make him consider me in a different light!

SOON I noticed another man kick off his patent leather pumps, and there was a hole in the toe of his silk sock! That sock harbored the foot of a most debonair young lawyer, brilliant and witty, who had just been made a Judge in our District Court. I fear I put those pumps as far away as possible from those august toes! Yes, he found them again, but not until he had gotten down on his knees and reached long and hesitatingly under that table!

Later when the gentlemen had joined the ladies in the drawing room and the proper pumps were on the proper feet, I emerged from under the table to see what was left to eat.

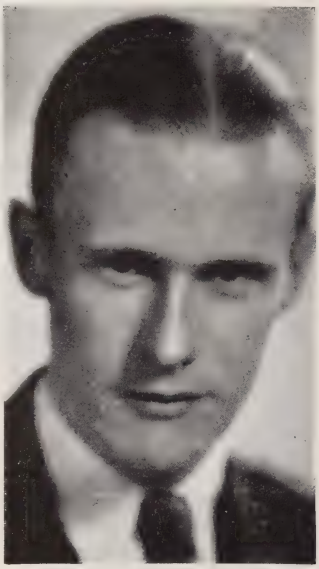
My recollection of the front stairs was very dream-like and very long! My nurse found me sound asleep across the doorway to my nursery. Her exclamation was forcible—"We entirely forgot to put the poor child to bed, we did!"

Years passed and my own "coming

(Continued on page 87)

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of America's Great Key Stations



Peter Van Steeden

By Wallace B. Liverance

INNUMERABLE stories, both real and fancied, have been written of those who have risen from the humble obscurity of the farm or the small rural community to positions of prominence in the large city or in the affairs of the nation. This, however, is not concerned with the farm boy who made good in a big way in the big city and returned to pay off the mortgage on the old homestead. Rather it is of one, reared in the hurly-burly of a great city and under the handicaps which confront the city boy from a family of modest means, who, through his own efforts and at the early age of twenty-eight, has attained eminence in his chosen profession, not only in New York, the city which from early infancy has been his home, but throughout the nation.

Whyte's Restaurant, famous old Fulton Street eating house but recently moved from the downtown financial section up into the Forties on Fifth Avenue, is crowded to capacity at the dinner hour. The hum of voices of patrons seemingly fills the large room to overflowing. Suddenly the strains of soft sweet music are heard through the din of voices. Conversations are hushed and cease altogether as the diners one by one become conscious of the perfect orchestral harmony. Nor are they resumed until the last note of the selection has been sounded, and then only to discuss the exceptional technique of the orchestra supplying the music, and the slender graceful young man in evening clothes who directs it.

But the patrons of Whyte's Restaurant are not the only ones who are privileged to hear this music. Even as they are enjoying it, so is a countless mass of people from coast to coast, up into Canada and down into Cuba and Mexico, in farm house, cottage and mansion, wherever a radio is to be found. Peter Van Steeden and his orchestra are before a microphone and the harmonies which they produce are being carried out into space over the great network of the National Broadcasting Company. It is of this cultured versatile young orchestra director, composer and arranger that this article is concerned.

Peter Van Steeden

Destiny may not shape our ends but surely there is some great force which supplies that divine spark that enables a certain favored few to accomplish the seemingly impossible; handicaps do not deter these from their purpose. As one of the many thousands of boys taking advantage of the public school system of New York City, the outstanding traits of Peter were a quiet determination, a meticulous thoroughness and an eagerness to learn which were foreign to the great majority of his playmates.

THESE characteristics, together with judgment beyond his years, placed him in a position of leadership among his associates which he did not seek but which he did not evade. We who knew him at that time appreciated the latent possibilities within the boy but felt that, because of the lack of available funds in the family exchequer to develop them, they might never be realized.

But young Van Steeden was one to be reckoned with; his was a heritage handed down through generations of Dutch ancestors. He early determined on a college education and matriculated, without funds, at the close of his high school career in the Engineering Department of New York University. The element of luck, which favors those who work, was somewhat kind to him at the outset. He applied for a scholarship and with that quiet determination, which is and always will be associated with him, persisted until it was granted him. This partially solved his financial problem. However, there were many expenses to be met, but young Peter characteristically met them by earning the necessary money himself.

As a boy, Peter was a student of the violin. With an inherent love for music, he continued his studies and became proficient on that instrument. A natural leader, he organized while still in high school, an orchestra composed of boys of his acquaintance who had received some musical training. While that orchestra did not persist, memories of it evolved the idea whereby he was to secure funds to put himself through college.

HE organized and directed a college orchestra popularly known as "Van and His Collegians," which acquired a wide and most favorable reputation, and with it as a source of revenue he did not want for sufficient wherewithal to meet the expenses incident to his college training. Without funds at the beginning of his college career, he finished with money in his pockets.

Through college, Van Steeden the young industrial engineer, at once secured a position in keeping with his university training. However, two factors diverted him—his love for music and the young lady who had been his inspiration since grammar school days. His soul cried for a musical career and his practical nature demanded that he earn more money than could be obtained through his profession for a great many years in order that he and the young lady in question might realize the dream

that long had been theirs. His natural inclination toward music won out and from that time his progress has not only been meteoric but constant. The dream came true and in the Van Steeden home now can be found two additional members of the family of the younger generation.

Reviving his college orchestra, which for some time continued to be known as "Van and His Collegians," Peter spent two summers at the socially famous Adirondack resort, Paul Smith's. As "Van and His Orchestra," he then opened the season at the Half Moon Hotel in Coney Island furnishing dance and concert orchestration there for a year. Throughout this time and even while in college, he and his orchestras had been heard frequently over both WEAF and WJZ, which then were totally separate units and not a part of a great broadcasting system, although he personally was given no publicity. It was while substituting for B. A. Rolfe, famed leader of the Lucky Strike Orchestra, at the Palais D'Or Restaurant during the summer of 1928, that his unusual ability and musical proficiency won for him the interest of the National Broadcasting Company. At that time, they contracted with him for the exclusive use of his services.

UNDER the auspices of the National Broadcasting Company, and through the kind offices of Edwin W. Scheuing of the NBC Artists' Service, Peter managed the transcontinental tour of the Ipana Troubadours, and for ten months he conducted the Cliquot Club Eskimos on a coast to coast tour. While he was given no official recognition on the latter trip, readers of this article who danced to the music of the Cliquot Club Eskimos at the Tulsa Club in Oklahoma, the Playmore Ballroom in Kansas City, Missouri, the Broadview Hotel in Wichita, Kansas, the Graystone Ballroom in Cincinnati, Ohio, the State College Commencement Hop in East Lansing, Michigan the McGill University Convocation Dance, Montreal, and the thousand and one other points where the Eskimos were heard will now know that the young leader who wielded the baton so effectively was none other than the subject of this sketch, Peter Van Steeden.

Upon his return to New York, Van Steeden and His Orchestra, for six months prior to the opening of the New Yorker Hotel, broadcast as the New Yorker Hotel Orchestra three times weekly over a nation-wide hookup. He was made musical director of the Johnson and Johnson musical melodrama and has been closely associated with the Nat Shilkret Victor Dance Orchestra and the Florence Richardson Orchestra. His exceptionally well chosen and beautifully rendered programs are now being broadcast daily from Whyte's Restaurant over WJZ and its associated stations.

It is related that on one of his transcontinental tours, Van Steeden had been booked to appear in Rockford, Illinois, and the next night in a small Pennsylvania mining town. He knew that it was impossible to reach the second town at the scheduled 8 o'clock period, but he boarded trains here and there and arrived at midnight.

THOSE Pennsylvanians, like most people, take their parties seriously, and growls and subdued mutterings ushered him in. The chairman of the committee on arrangements started rather menacingly toward the trembling Peter, who retreated a step and raised his hand.

"Gentlemen," he said, swallowing, "I'd intended to open this program with *Moonlight and Roses,* but now it looks like *Just Before the Battle, Mother.*"

The miners laughed; the chairman grinned; and they danced until morning.

Peter's life ambition is to be able to conduct a symphony orchestra. Those who know him well are confident that he will succeed in this as he has in all the other things that he has undertaken.

BARBARA MAUREL

ONE must be familiar with the true essence of life and must know and appreciate art to be a great singer. That's Barbara Maurel's philosophy and she holds to it.

When she was in France not so very long ago her press agent gave out the story that Miss Maurel was gathering some interesting material, and not vicariously either, for a series of lectures on —of all things—love! That she was interviewing all of the Parisian men famous for their propensities at fencing with Cupid's darts—and that American women would at last get the authentic recipe on how to receive the attentions of men.

Every member of the feminine persuasion in this country from the flapper to the high-heeled grandmother were eagerly awaiting the return of Miss Maurel so that they could make reservations for these lectures. True, they realized, she herself was not married—but after all are not the most noted authorities on child training, themselves childless?

The situation was quite tense here in America—everyone was fairly bursting with expectation of this French revelation on *les affaires de coeur.* In the meantime, all manner of stories, and strange enough, with no element of scandal, were being circulated about Miss Maurel. Could the expert French gentlemen who knew so much about *l'amour* talk coldly on this engrossing subject without giving appropriate illustrations?

And now for the climax—Miss Maurel's own story. While newspapers flashed the dizzy headlines of her research in love, Barbara Maurel, Columbia contralto, claims that she was busy and quietly studying voice and piano. And she is such an accomplished artist that it is hard for anyone to believe that she spent her time as assistant to Cupid—a story made of whole cloth by her very efficient press representative.

Miss Maurel's background is rich and diversified and her culture has been absorbed from both sides of the Atlantic. She not only sings in five languages but is also on speaking

(Continued on page 96)

Barbara Maurel

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

A VERY breezy letter from Uncle Jack toppled in this morning—you know, Jack Shannon, of the Gossipers. He and Marie Stoddard have been broadcasting over the Yankee network and in Uncle Jack's own words, they have been "hitting like a rolling pin in the hand of a jealous wife on the head of a magnetic husband." Translating that into pure English, they have been going over with a wow and a bang. There isn't a radio listener in sight, I don't believe, that hasn't heard the chatter of the Gossipers, but if there should be such a solitary figure, he ought to make haste and listen in through the doorcracks on these two entertaining characters.

Which recalls an incident—it almost turned out to be an accident—that happened last summer. Toddles, Presiding Pigeon of Graybar Court, was struck on the cranium with an idea. We should have an automobile to do things and places. Uncle Jack had a perambulator of the vintage of '28 and one balmy day was instructing my pigeon pardner and myself on how to make the roads. Toddles' fingers couldn't wait until they had the wheel and before we knew it she had us almost hitting the side of a passing machine. Uncle Jack snatched the wheel from Toddles' grasp and thereby preserved us for the noble calling of writing this column.

Our Women's Feature Editor had finished her broadcast over CBS on Front Page Personalities. In the studio were Emory Deutsch, Paul LePorte and Fred Utall. Fred, by the way, is guilty of having destroyed nine hundred feet of good film for D. W. Griffith in the picture, *America*. Fred's feet were very much in evidence, too much so for the benefit of the picture. If you remember having seen a handsome face in any mob scene or crowd in a big-sized production, parenthesis, not *America*—it probably belonged to Fred Utall, now announcer on CBS. It was suggested to Emory Deutsch to search his memory for a few interesting incidents to be incorporated in an article, and this came from Fred, "He might be called M'Emory Deutsch." Now let me explain.

ELLIOTT SHAW leaves the Revelers Quartet and the next day my desk is bent under the weight of letters asking why, when and wherefore. Well, if you really want to know, Mr. Shaw has joined the ranks of the Cavaliers who are with Cities Service.

James Melton

* * *

And talking about the Revelers Quartet, maybe you have heard of James Melton. There's a story about how he joined Roxy's gang. He went to the theatre for an audition, but was told by doorkeepers, attendants, secretaries and assistants that neither Mr. Rothafel nor Mr. Rapee could see him. "I don't want to be seen—I want to be heard," and with this he broke out into his best tenor voice which resounded all over the place. The entire staff of the theatre including Mr. Rapee, rushed to the scene to put the brakes to this vocal explosion—and Melton got the job. A note of warning to aspiring tenors—this mode of applying for a job may not always work. Mr. Melton is tall, has sparkling mischievous eyes, lives in a penthouse in a fashionable section of New York and owns a yacht. In 1929 Miss Marjorie Louise McLure became Mrs. Melton. James was born in Moultrie, Ga.—November 1904, studied at the University of Florida, University of Georgia and obtained his A. B. degree at Vanderbilt University.

* * *

EDMUND B. RUFFNER, formerly of the National Broadcasting Company, from latest reports, is with the Judson Radio Bureau. They nicknamed him "Tiny" because he reaches an altitude of 6 feet five and a half inches. Ever since he was a youngster he outlined for himself a musical career, and at an early age left home to take up any job that would give him sufficient time on the outside for study. He tried his hand at everything from fisheries in Alaska to work in a department store. But it was all for the benefit of his career, and he undertook these tasks cheerfully, even the driving of a bread wagon in New York city during which period he saw every sunrise for five years, all of which proves that the road to the microphone is not paved with roses.

Ed. B. Ruffner

* * *

JESSE BUTCHER, Director of Publicity, told a story about a member of the Big Brotherhood of Editors who had met every celebrity in the world—from Shaw to Gandhi. One day as he was seated before the solemn little microphone at the CBS studios, just starting an oration about something or other Mr. Editor threw up his hands in despair and cried, "Oh, I can't go on with this any longer." That statement went over the entire network, but Jesse Butcher, equal to the emergency, picked up the pages, and whispered, "Don't look at the microphone, just talk to me," and the delivery continued without any further interruption. Someone ought to come along and take the scare out of this black-faced, inanimate purveyor of programs—and then perhaps we would hear from many important people who are afflicted with this thing called mike-fright.

Ford Bond

* * *

FORD BOND is an imposing figure in the NBC studios, so imposing, in fact that his friends constantly advise him to diet, and strangers call him Milton Cross when he is viewed from the rear. Not that it is anything but a compliment to be called after that august personage. Both Ford and Milton are authorities on food, but Ford has taken more than an academic interest in starting a campaign to discontinue the practice of attacking salads without the aid of a fork. He says, "The slipperiest thing on the table is the salad, and I certainly should be allowed to hold it with a fork while bringing up the heavy artillery in the way of a knife. Also I would discon-

tinue the habit of cradling it in a lettuce leaf. When it's just one of those things where I don't want the lettuce wasted, and when the salad is particularly good, I feel robbed of the parts which could only be obtained from the fevered clutch of the lettuce leaf by taking it in my hands and applying the all-day-sucker touch of my tongue." It may be that others who suffer miserably when they have to leave the choicest part of the salad on the plate, will want to enroll in Ford's worthy "Greater and Freer Salads Club." Get in touch with him at NBC or with Toddles who has been made secretary of this new organization. Personally, I don't like salads, and my platform in this coming election will be for the complete abolition of them—so Ford and I are in opposing camps. And frankly, I don't think chewing lettuce leaves dripping with French or Russian dressing would be an aesthetic gesture on the part of any announcer, especially the imposing Mr. Bond. All those in favor, say "aye"—opposed, "aye."

* * *

HARRY SALTER, orchestra leader on the Coty program over CBS, and on the Real Folks program over NBC, is a Roumanian by birth. As a youngster he would rebel strenuously against appearances before company where fond Ma and Pa would have the genius of their son displayed. One can easily visualize curly-haired little Harry protesting vigorously against the cajolings of his doting parents, for he was always minimizing his own talents—that is until he began to make professional appearances. He misses audiences terribly on his radio programs and he enjoys nothing better than to have lots and lots of guests present in the studio.

Harry Salter

Enric Madriguera, who is responsible for Cuban melodies which are broadcast over CBS from the Biltmore Hotel in New York, is closely related to Spanish Royalty.

"Just a word from an itinerant announcer in the middlewest," writes Howard Butler, husband of Edith Thayer (the Jane McGrew of Hank Simmons Show Boat). "I am now with WXYZ, Detroit." Although Howard doesn't claim that his family came over on the Mayflower, they were among the early settlers of this, our great land—for the first Butler found a haven here as far back as 1627. Howard has been with many musical shows, and met his diminutive wife while he was connected with the Viennese Operetta Company.

Al Llewelyn is married, but his wife is not a professional woman. For the benefit of Chas Linch and Kansan of Parsons, Kans., Ben Bernie is married. Emory Deutsch still stands among the bachelors and so does Art Gillham whose sentimental philosophy is like unguentine to fellow sufferers. Ben Bernie is one of six or seven brothers. Born on the East Side of New York, loves to bet on horses, and carries half a dozen cigars with him. Came by the name of Old Maestro at a dazzling party where Toscanini and others of equal fame were gathered. They were all maestro-ing one another, and not to be outdone, Ben broke in with "Well, I'm a Maestro myself—*I've* got an orchestra," whereat he was hailed with great ado as one of them. May Stewart of Charleroi, Pa. also wants to be included with the Bernie Boosters.

* * *

KHJ Shorts: Ted White is single, comes from an old Virginia family, is 32, slightly over six feet in height and has dark complexion; Kenneth Niles was married a few months ago to Nadja Vladnova, the beautiful KNX violinist; is 24 years old and is almost six feet tall; Lindsay MacHarrie is 30; Robert Sawn is 30, and comes from an old New England family. Robert Bradford is married to Jeanette Rogers (KHJ flutist), is 24, and is mixture of Scotch and Irish.

Franklyn Bauer, who used to be the Voice of Firestone, has forsaken broadcasting and is now living in Brooklyn. The Slumber Hour has been on the air since November, 1927—and the Black and Gold Room Orchestra since June 1, 1929.

* * *

TO everyone the dictionary is like an old friend—something to have around when you need it. It was not until I met Dr. Frank H. Vizetelly, who is Managing Editor of Funk and Wagnall's Dictionary that I even began to realize the monumental work and research that lie behind this unpretentious-looking volume. In order to get the ancestral strain of even a single word, Dr. Vizetelly corresponds with every nation which he suspects had anything to do with moulding it to its present state of development. If it's the history of a kiss or a cootie, Dr. Vizetelly can always produce a fascinating and engaging story. He is the father of some very important words himself, among them being myobism. Myobism is a good word for the curious—of course, not the professionally curious, like myself—for it means the act of minding one's own business. Now, knowing the personality behind Funk and Wagnall's Dictionary, isn't that book more than an endless alphabetically listed series of words with definitions and instructions for pronunciation? Speaking of pronunciation, Dr. Vizetelly's occupation is to teach the radio announcers over Columbia's way how to pronounce their tomatoes and vases. If one announcer calls that luscious vegetable *to-mah-to*, and another *to-may-to*, how is the poor public to know what to say to the greengrocer? There should be a uniform pronounciation for announcers, believes our noted lexicographer—considering their influence, direct or otherwise, upon the speech of radio listeners who form so great a part of our population.

Dr. Vizetelly

Leonard Cox

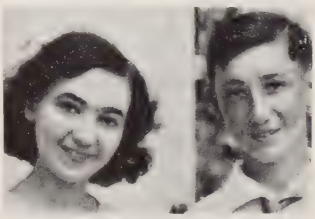
* * *

GUESS who's back in town after a three years' absence from New York? None other than the man, Leonard Cox, originator of *Main Street Sketches* over WOR. Had him over to the World's Radio Show to be featured on the giant television screen—and Count Von Lueckner, Leonard, and a few other such notables waited around for a few hours while the stage was being set. Carveth Wells was master of ceremonies, Hal Stein the Photographer-Elect was mixing around as usual with famous personages, and we were all having one grand time—just waiting around, you know and being told that the program would go on any minute. Well Leonard told me all about his exploits down south. There's a quiet magnetic charm about Leonard that attracts people to him. If he's having a tire fixed, he'll be invited by the repairman to his home for dinner, and if he's sipping an ice cream soda, he'll be knowing the soda dispenser's family probably before the evening is over. It is known in radio circles that Leonard is a genius—and that he has enough ideas to keep half a dozen radio chains in full operation. But like all brilliant people he needs a practical person to manage his affairs for him—and the person in this case is Mary Olds who harnesses his ideas as they are flung through space and drives them to a suitable sponsor.

* * *

I AM deeply moved, and grieved, Mrs. Miller—and Toddles has just doffed her Empress Eugenie chapeau for a monk's cowl—just because Henry Edward Warner prefers to remain impersonal in dispensing substantial beads of wisdom to his host of admirers. Mr. Warner, just read this—and it is only one of the many letters addressed to Toddles

and myself, blaming *us*, if you please, for not digging to the roots of your ancestry and sending forth your biography. Writes Mrs. Miller—"The paragraph you have in the June issue about Mr. Warner doesn't tell me anything. I want to know the story of this man's life with a front page picture. I have listened to his programs of original verses, songs and philosophy for three years over WBAL and WCAO and they are the best on the air. There is an appealing and irresistible charm of manner. He is sympathetic and persuasive in his philosophy that touches the hearts of all people. Just why this artist should be so modest about his broadcasting I can't understand. Why he should prefer to stay on a small station as WCAO when he could reach the hearts of so many people over a network, I cannot understand. Edgar Guest has never written anything to compare with Mr. Warner's style." Read this, Mr. Warner and weep. Then adds Mrs. Miller, on second thought, "Enclosed find check for a year's subscription for Radio Digest. Can't get along without this periodical." So that's that. As soon as Mr. Warner has a change of heart, you may be sure that our columns will be the first to bear witness to his story.



* * *

PHILLIPS H. LORD and his cast of NBC actors are making a tour of the states and those along the road who may want to meet these radio folks from the stage will be interested in their schedule. No. 1, Chicago; Nov. 2, Davenport; Nov. 3, Des Moines; Nov. 4 and 5, Kansas City; Nov. 7, Omaha; Nov. 8, Denver; Nov. 10, Salt Lake City; Nov. 12, Portland, Ore.; No. 13, New Westminster, B. C.; Nov. 15, Seattle; Nov. 18, Oakland; Nov. 19, San Francisco; Nov. 22, Los Angeles; No. 23, San Diego; Nov. 26, Phoenix; Nov. 28 and 30, Houston; Dec. 1, San Antonio; Dec. 2, Oklahoma City; Dec. 3, Tulsa; Dec. 8, Louisville; Dec. 9, Nashville; Dec. 11, Atlanta; Dec. 13 and 14, Miami. Those who are accompanying Mr. Lord are: "Mother Parker," Effie Palmer; "Lizzie Peters," Agnes Moorehead; "Cefus Peters," Bennett Kilpack; "Captain Bang," Raymond Hunter; "Laith Pettingal," Carlton Bowman; "John," Norman Price; "Jane," Ruth Bodell; "Mrs. Hooper," Gertrude Forster; and "Fred," James Black. Despite this very ambitious tour, not one program will be missed, and fans will continue to hear their program each Sunday night at 10:45 p. m. E.S.T.

* * *

HAVE you heard of *Gentlemen Prefer Blondes?* Well, Helene Handin and Marcella Shields, the Troupers of NBC, are working on a book that will make Anita Loos' volume read like a funeral sermon. Helene has the duckiest little apartment on the —steenth floor of the Dixie Hotel in New York, but the only drawback is that it's too small to hold all of her fur coats. Helene, by the way, is an animated fashion plate —she gives a certain little twist to a ribbon on a dress or hat that makes it look like the latest expensive import from Paris.

When a boy walks away with a medal from every contest he enters whether it is for music, athletics, or photography, and is only fifteen, he deserves more than the few passing remarks that can be given in this column. This habit of winning every contest in which he becomes a participant is so chronic—that I believe the family moved from their comfortable little apartment on Central Park South just to get larger quarters for these trophies. He holds the championship of Greater New York as the best violinist of his age. And it is remarkable to watch this young boy, instrument tucked under freckled face (he even has a medal for having the greatest number of these golden blemishes) play the classics with the same vigor and eagerness as if he were in a football game. Toscha Seidel, violin virtuouso, under whose tutelage young Julian

Sylvia and Julian Altman
(©INR Photo)

is unfolding his great gift, has said that the boy has more than talent—he has genius. And with all of this, he's just a real boy, as handy around the house with tools as he is with his violin. Mother Altman called me up just yesterday to tell me that he won a fellowship in the Juillard School of Music. The announcement came right at the moment when Julian was scrambled under the kitchen sink doing a plumbing job and retarding a persistent and powerful spout of water which threatened to flood the whole apartment. Sylvia, his seventeen-year old sister, is the youngest graduate of New York University with a Bachelor of Science degree. She is a concert pianist and has appeared in vaudeville with her brother. Both have been frequently heard on Columbia and National programs. Sylvia is a very vivacious young girl with a smiling voice. She and her brother are sometimes engaged in what would appear to be endless repartee to the hearty amusement of those who happen to be around. Sylvia is a master of the piano keyboard and is studying under Ernest Hutcheson. Both youngsters have attracted national attention and have been the guests at the White House of both former President Coolidge and of President Hoover. Elmer, the younger boy, is also a fine radio actor and is studying the 'cello. He's the business man of the family and when he goes to market, Mother Altman is assured of getting the finest head of cabbage and the choicest cut of meat.

C. Dickerman

* * *

IF any of the boys around WEEI, Boston ever get the toothache, they don't have to go very far to have it doctored up, for Carlton H. Dickerman, senior announcer of WEEI was trained for the profession of dentistry. In his own words, he has forsaken "the laughing gas of the dentist chair for broadcasting ether. It was a mighty struggle, though in the beginning—with his mother planning a music career for him, and his dad laying the groundwork for a professional career as a dentist. He did not take to either and compromised by often running away to the Taunton Insane Asylum gate and bribing the attendant to allow him to visit the playground for the inmates. Here he received his early training as an announcer in umpiring baseball games among the more rational of the inmates. After attending for a time Tufts Dental College in Boston, he became an electric appliance salesman, and Bostonians who bought vacuum cleaners from a cheerful, sprightly salesman, can now say that they knew Carlton Dickerman "when."

* * *

WHEN you hear John M. Davis over WCAU, you are listening to a potential winner of matrimonial, real estate and other lawsuits —for John is a lawyer, having graduated with honors from the University of Pennsylvania in 1929. He was born in the coal regions of Pennsylvania but shortly after his arrival the family moved to Reading.

John M. Davis

* * *

MARCELLA hears all, tells all. Write her a letter, ask her any of the burning questions that are bothering your mind.

New Programs

Thumb Nail Comment on the Features now Bidding for the Listener's Favor

On the NBC Waves

Silent Cal of our days of prosperity is demonstrating that he has vocal powers over an NBC-WJZ hook-up on Tuesday nights. Mr. Coolidge is a director of the New York Life Insurance Company which sponsors the broadcasts.

Ohman and Arden, WEAF, pioneers on the double pianos, are back Mondays with "radio finds" for guest artists. Well worth hearing.

Welcome back to the McKesson Musical Magazine featuring Fred Hufsmith, tenor, and a concert orchestra. WEAF Tuesdays.

"What I Would Do With the World," with H. G. Wells, famous British author, as the first of many noted speakers is good solid stuff for the thinker and the whiners who say radio is all jazz and raspberries. It's WEAF, Mondays.

NBC adds one million dollars worth of new talent to the October budget.

Good plug for Uncle Sam and his House by the Sentinels of the Republic program over WJZ net Sundays.

You should become acquainted with George Barrerre and his Symphony Orchestra in Melodies de France Sundays at 4 p. m. on WJZ circuit.

Devotees of the opera are informed the Chicago Civic Opera is due back for its sixth season beginning Nov. 7. Booked WJZ for thirteen Saturday nights.

Atwater Kent programs are scheduled WEAFward November 15, 29 and December 13. The last program will present winners of current Atwater Kent National Auditions.

Buick Hall of Fame, dramatizing lives of famous persons, makes premier November 8, 9:45 p. m. E.S.T. WEAF-with. Concert orchestra background.

Barbasol with hymns begins Sunday series November 22.

Parade of the States described in detail elsewhere in this issue started over the WEAF tour with Erno Rapee as grand marshal. It's a General Motors new program with a broad gesture that should win many friends.

Dr. Nicholas Murray Butler, president of Columbia University, inaugurated a new educational program series under the direction of the National Advisory Council on Education by Radio. Two fifteen minute lectures by world's greatest educators every Saturday night from 8:30 to 9:00. Another slap at the gang organized to break up the American Plan of Broadcasting.

Joe Moss comes on regular as a new feature through the opening of the Waldorf-Astoria. Joe's dance orchestra is the current social pet.

Up-to-the-minute stuff in the way of true life drama is presented weekly by D. Thomas Curtin, World War correspondent, who narrates thriller experiences with aid of characters in flashes of drama. Listen Tuesday night WEAF 9 o'clock.

Raymond Knight, NBC comedian, is in a new comic series called the Breyer Leaf Boys. The Landt Trio and White also are on this program. Thursdays and Saturdays 6:30 p. m. via WEAF.

Richard Gordon is playing the part of the famous detective Sherlock Holmes while Leigh Lovell plays the part of Dr. Watson. The longer and more comprehensive Conan Doyle mystery stories are listed on the new series.

The CBS Circuit

Alice Brady and other stage notables are helping to put over the new Sea Romance stories in a grand way. If you have love for the mystery of the waves and odd tales that come therefrom you'll be entranced by this series which comes Sundays and Tuesdays from 9:30 to 10 p. m. Symphony orchestra background.

Regal Reproductions with impersonations of famous stars of the stage and past and present with a twelve piece band for back drop due Fridays 9 p. m.

November 1 inaugurates the new Carborundum program with a pickup of the roar of Niagara Falls (in person not a sound-effect). Dramatization of Iroquois Indian legends. Musical setting. Ought to be good.

Major and Minor another piano duologue with the Roundtowners Quartet singing the interludes. Comes Mondays 10:45 a. m.

Station PME is a new one on the CBS travels. It's just a stage station operated by Charlie and Oscar and affords listeners amusement. Great possibilities. Tuesdays at 6:30 p. m. Sundays at 7:30 p. m.

Bob Haring and His Pilots now come Mondays, Wednesdays and Fridays at 6:45 p. m. Tubby Weyant, Scrappy Lambert, Lem Stokes, and Bob Moody supplement Haring's band. Program is sponsored by Goodyear.

Drama, special music, celebrities and other divertisements are featured in the Blue Coal program which is heard Sunday at 5:30 p. m.

"Your Child" is the name of a program conducted by the famous writer in child subjects, Angelo Patri. It is instructive and of special interest to parents. Thursdays and Sundays at 8:45.

Are you air minded? Then you will be especially interested in the new series by Casey Jones who keeps you posted on the flying news of the week. He's on Fridays at 9:45 p. m.

Eight Sons of Eli are heard Sundays from 9 to 9:15. It's a double quartet from the Yale Glee Club and we'd like to see them get more than a quarter hour.

Walter Winchell has received such a glamorous fame he always is tuned in with special interest. He interviews stage and screen celebrities Tuesdays at 8:45 p. m.

While CBS has cut down its periods more and more to the quarter-hour lengths it sure did let out all the notches for Stokowski and the Philadelphia Orchestra which have recently come with a Philco program that takes an hour and three-quarters. A wonderful program of music.

Another great orchestra for the Columbiads is the New York Philharmonic-Symphony Orchestra every Sunday from 3 to 5 p. m.

Oldest of America's symphonic orchestras, and yet the first to go on the air in a regular series of full-length concerts broadcast over a nationwide network, the New York Philharmonic Symphony will be heard in twenty-nine concerts during its second season. Until November 15 the baton will be wielded by Erich Kleiber, famous for the many new works he introduces.

Voice of the

HE'S AN UNBELIEVER

I ENJOY Radio Digest, but I fail to see my letters in the Voice of the Listeners. It seems like it's a fake. Some of the people write in saying they got 127 stations in one night. Some people believe it, but I don't. I could say I got 150. I wish you would publish a real photo of the orchestras as I requested before. What's the matter? Are you cheap? You deserve a lot of credit putting in such topics as *Are American Women Happy?* and *Temper*. These topics are awful. They should be cut altogether. I wish you would give information about stations in Cuba, Mexico, Bermuda, Hawaii, Alaska, Nova Scotia, etc. The programs on the stations in N. A. are just about the same. I wish you would publish this letter.—Jack Keefe, Parkview Avenue, Lincoln Place, Pa.

BUT HERE'S A LIBERAL

YOU can please all of the people some of the time. You can please some of the people all of the time. But you can't please all of the people all of the time. But you should kick in the pants all of the time the guy who knocks another chap who is trying to please some of the people over the air, on the screen or behind the footlights, any time. Society has laid down the Golden Rule; but not caring particularly for it, I have formulated one for MYSELF (and am not imposing it on anyone else); namely, Do unto others what you would like others do unto you, which is to praise and encourage you when the going is hardest and when you can scarcely make the grade. After you have made the grade, well, you can tell the others to Hi, de dum, so if someone comes on the air, I either listen and try to find out their redeeming feature or shut them off and let someone whom they appeal to find out their virtues and then when I hear about it I too learn to see that phase of their game. I honestly do not think it fair to print criticism—it is d—n poor psychology. Print the praises and the ones who are not so good will be impressed by the absence of their names and it will be a spur to better their technique; but a downright out and out slam knocks the backbone out of a fellow who, while not a finished artist, is nevertheless doing his best to win the approval of the public. Personally, I like sketches, continuities, astrology and philosophy; but my husband and oldest daughter nearly pass out when these are on and go for Rudy, Jack Little, Morton Downey, Lew Conrad and other dance orchestras.—Nora W. McGinnity, Clinton, Conn.

ATTENTION CONRAD MUSKETEERS!

See Pages 10 and 11

I AGREE with Musketeer No. 1. You haven't published enough stories about Lew Conrad. He's a fine gentleman and a good entertainer and we want to know more about him. And in the future Lew Conrad and his Hotel Statler Orchestra is going to be the drawing card of the air. Let us have a new picture of him, and a BIG writeup. That writeup by Marcella wasn't enough. Here's to Lew Conrad and his success.—Musketeer, No. 2, Chicago, Ill.

A GRAND RAPIDAN LOCATES JACK TURNER

HAVE read your magazine for almost a year now, and surely do enjoy it. More success to you. Always read your latest reports of radio stations which are listed alphabetically. I noticed a few mistakes in it which I would like to have you correct in your next issue. WKZO is now at Kalamazoo and WHBD is at Bellefontaine. Certainly like to hear Miss Revell each Wednesday. She has the most original way of saying things. Do wish that she could be on earlier in the evening though. Also, for your information, Jack Turner, the crooner-pianist, is no longer at WHAS but over the NBC from WTAM, Cleveland, Ohio, sponsored by some coffee concern. He is heard every evening except Saturday and Sunday.—Miss T. J. Benkema, 308 W. Burton St., Grand Rapids, Mich.

ZEAL FOR OSBORNE

OH, I've just read the current issue of Radio Digest. Everything was nice but one thing—not once did you publish my letters or requests from fans writing in about Will Osborne. Lots of space seems to be devoted to Rudy Vallee, but nothing to Will Osborne. Won't you please publish the following paragraph in a future issue of Radio Digest. Any Will Osborne fan wishing to join the Will Osborne Radio Club may write to the name given below for all information and their membership blanks. Thank you kindly and I shall look forward to the next issue of Radio Digest for that announcement in the Voice of the Listener Department.—Jean Anderson, 623 East 141st Street, Bronx, N. Y.

SHE SEEMS TO LIKE US

THIS is my lucky day! I've discovered Radio Digest. After reading my copy from cover to cover, I'm ready to stand or fall by this grand magazine! Long life to you! I do hope some time soon you'll have some news and pictures of the grandest orchestra leader of them all, Paul Tremaine! I think he and his unusual "Band from Lonely Acres" are quite the finest thing on the air! And how about this new and charming personality, Bing Crosby? His voice is rich, deep, and beautiful and here's a vote of thanks to him for bringing the vogue of baritones to the fore. They are such a treat after these crooners and high tenors. Three cheers for the baritones, and the heartiest of them for Bing! Just a last word—can't John Mayo, that perfectly swell announcer, resurrect a fairy godmother from somewhere—so he will get the "breaks" he deserves? Surely CBS could give him a few evening programs. Perhaps you'll start the good work by printing a nice big picture of him! Best of luck—and all due congratulations for your splendid magazine!—Elaine Melhuich, 44 Sickles Street, New York, N. Y.

A VOICE FROM THE WEST

IT SEEMS that most of the readers who contribute to this Voice of the Listener are from eastern or midwestern cities. They are listening mostly to New York and Chicago orchestras, such as Paul Whiteman, Coon-Sanders, Duke Ellington, Guy Lombardo, Wayne King, and hundreds of others. But I am a westerner and I'll stick up for the western orchestra. In my estimation, Gus Arnheim at the Cocoanut Grove has the best orchestra in the country. He has an uncanny rhythm which sends a thrill into one. Loyce Whiteman, who sings with the orchestra, is my choice of the queen of all singers. You can have your Jessica Dragonette, Ginger Rogers, and others, but I think Loyce beats them all. Please try to publish a picture of Gus and his band in your magazine, and put in more write-ups about western orchestras and singers.—John Lucas, 209 E. 10th Street, Olympia, Wash.

GOSSIP—NOT SCANDAL

RADIO DIGEST is a very popular magazine at our house. We all enjoy it and especially do I, for I read it from cover to cover. It is more interesting to listen to the announcers and artists when one knows a little about them and what they look like. Please don't spoil the magazine by printing scandal about artists or announcers. We get enough of that in the daily papers. I think your idea of a Magazine of the Air is splendid, especially if Floyd Gibbons is editor-in-chief. We could then be sure of a good program every night, instead of only several evenings a week. Floyd is a favorite of ours, and we know anything he had in charge would be made interesting. Here's hoping your Magazine of the Air becomes a reality and Radio Digest continues to be as fine a magazine as it now is.—Mrs. C. L. Riege, 538 Cedar Street, Platteville, Wis.

* * *

JINNY—WE APOLOGIZE!

I HAVE received several letters from people who read my letter in the September Radio Digest, and they wondered why I didn't have Coon-Sanders' name with the other orchestras. I said quite a bit about them in my letter but you left them out. Now, I think Coon-Sanders' Original Nighthawks are perfect and their music is the best ever. This is my favorite orchestra—always has been and always will be. So you see, it is more important to have their names in my letter than the names of all the other orchestras put together. I'm afraid that you made a very sad mistake—but I'll forgive you. I still think Radio Digest is the best ever.—Virginia "Jinny" Peters, 3021 Fairfield Ave., No. 14, Cincinnati, Ohio.

* * *

DO'S AND DON'TS FOR ANNOUNCERS

I THINK it would be interesting to have a discussion upon "The Kind of Radio Announcer I Like Best." We each have favorites and there are many good ones whom we cannot criticize but if we analyze them and actually get down to the reasons for our likes and dislikes we shall probably agree upon a few strong or weak points which may be summed up as follows: He must have a clear, strong, easily understood voice with no effort to call attention to himself in any way. Extra "niceness" or affection never works. He must have a good education so that he will be equal to any occasion which may fall to his lot. If there is anything which grates

Listener

upon us it is to hear unpardonable mistakes by those who should know better. You'd be surprised at what I find by listening carefully and at the people who make the mistakes! Some of the "higher ups" are as guilty as the little fellow, but I do not mean to say that the blunders are all made by the announcer, far from it! There are some who I may say are comparatively free from criticism and who measure up to the standard set by the audience whether they may know exactly the reason or not. The announcer should have a pleasing personality—but not too pleasing, for if he tries that, perhaps husbands may object to their wives listening in to certain ones. Have heard of that happening and quarrels follow sometimes even becoming serious. I heard a young fellow speak of a certain man who is most popular with some and most unpopular with others, say, when asked if he liked that particular fellow, "No!" When asked why, he said quickly, "Why nobody likes him but the girls!" The announcers or the talent have no idea how we size them up pro and con and what we do about it! But thanks to the fine competition in this broad land, if we choose we may "take it or leave it" for there are many programs to suit any and all of us. So those over there who speak to us out here, STOP, LOOK AND LISTEN! He who runs may read! If the shoe fits, wear it, if not, well, it's just too bad!—Mrs. H. P. Cook, 412 West 11th Street, Anderson, Ind.

* * *

DID YOU SEE OCTOBER, HELENE?

FOR some time now, I have been an interested reader of your one and only magazine devoted to radio and its stars. But looking through the September issue I looked in vain for any mention of that new star of the air who has blazed a spectacular and shining path from the West Coast—Russ Columbo. His delightfully mellow baritone voice I am sure, has thrilled more than just me. Please devote a big space regarding him in your publication. Here's one for CBS and NBC too. Just listen in to the announcer at WAAF, Chicago. John Tyson is his name. Can't figure out why he hasn't been snatched up by a more prominent station—long before this. Tune in and see if I'm not right! Just want to add that I particularly enjoy Marcella's articles. Real entertainment, I say. —Helene L. Lee, 1812 Central Avenue, Whiting, Ind.

* * *

ADVERTISING BETTER THAN POLITICS IN PROGRAMS

THE question of whether advertising shall be taken off the air is being brought up rather often lately. We say leave advertising on the air. First, because we hear of interesting developments in manufacturing and science on the advertising programs much sooner than we otherwise would, if ever. Second, because we believe we receive a better class of entertainment with each advertiser trying to present a little better or more unique program to the public than his rival. Third, because we believe we, the listeners, have more to say about who shall entertain us, with advertising in the air. All we have to do is write letters of praise to our favorites and they will be kept on the air because in that way the advertisers know we are interested in their program and consequently listening to their advertising. If advertising is taken off the air we will have to pay for our programs by a direct tax. And a chosen few will say what we shall listen to. We can take it or leave it. Nine chances out of ten politics will creep in and it would take pull instead of nerit to put artists on the air and keep them there. We think the VOL is one of the most interesting features of Radio Digest. Also it gives the listeners a chance to express their opinion on questions concerning the ruling of the radio world. Best wishes from your friends.—Mr. and Mrs. Frank A. Jennings, Caro, Mich.

* * *

I HAVE been reading Radio Digest for two years and enjoy it immensely! I think Guy Lombardo, Jack Denny and Wayne King have the best jazz orchestras on the air. I would like to hear from Lombardo fans. I also like the Landt Trio & White. Won't you have an article about them some time? Keep up the good work on the best magazine on the newsstand!—Miss M. R. Ballard, 1738 Kalamazoo Ave., Grand Rapids, Mich.

* * *

RUDY'S RANK AND FILE

AFTER "running round" this entire "town" I finally "landed" a Digest. Notice in your "Coming and Going" there'll be no scandal printed. That's fine. Leave that to "Old Petticoats" Winchell. Your readers are a little beyond Walter (thank goodness). There are many popular artists I do not like but on the other hand I like many others do not like—so why should I or anybody else "raspberry?" Missed a picture of Rudy—surely you could have found one and a little space to put it. Other magazines print such good ones. Time you looked up one worth while. Yes, and as one writer tells you—a good one of his band—wonderful Ray Toland, Cliff Burwell—what a pianist; Joe Miller, Chas. Peterson—and I would like to get acquainted with his violinists. They are new, I think. That's some "personality" band—via air and stage—never miss a program or performance if I can get to it. Lew Conrad is a fairly good Vallee imitator and there are dozens of lesser ones—but who wants to listen to an imitator. Enjoy so much your Voice of the Listener. I say with one of the writers, "Three Cheers for Smith Ballew"—and for those who have not seen him—he's as grand as he looks. I like him—next to Rudy. Then there's Lanny Ross—another nice boy—and good singer. Well, here's looking for "Connecticut" Yankees—and don't be stingy. Let's have a line about each one of them. Yours for every success.—Sally Oneall, Absecon, N. J.—Everywhere the hue and cry has been "Bigger and Better Vallee writeups!" And now we Vallee fans are beginning to realize that in the shuffle the Connecticut Yankees have been forgotten where the press is concerned. Won't you as the leader of all radio publications do your bit and give these Yankee boys a break?—M. B., 7012 S. Rockwell, Chicago, Ill.—Being one that never has missed a month's Radio Digest I would like to ask you to please have a writeup of Rudy Vallee's boys. Also a nice picture of them because they deserve a lot of credit.—Katherine Von Krebs, R. F. D. No. 4, New Brunswick, N. J.—Rudy Vallee is and always will be my favorite over the radio. I left Montreal on an auto trip and visited New York and Atlantic City. It was at George White's Scandals that I saw my favorite. I had been told that I would change my mind when I saw him, but instead I found him more charming than he was on the radio. I enjoy Radio Digest from cover to cover.—Mrs. A. L. Brown, 2205 Florian Street, Montreal, Canada.—You have a great magazine and I for one, wish it were published twice monthly. The first article I read is Rudy Vallee's, "Tuneful Topics" then V.O.L. then Marcella, and I enjoy Radiographs. Hope you keep Rudy writing for you for months, and months. Rudy's the very best on the air and Radio Digest seems to bring him closer to us. Wishing you success.—Agnes Gearhart, 1746 Arlington Ave., Toledo, Ohio.

DX DIVISION

I HAVE a three-tube home-made radio using only 45 volts of B. Battery and it operates a loud speaker fine. I am very much interested in getting distant stations. I have heard Cuba, Mexico, California, Nebraska, Manitoba, Porto Rico and nearly all other parts of the United States. I would like to hear from any listeners interested in DX. My favorite stations are WCKY, WJSV, WRVA, WLS and KWKH. I promise to answer all letters received.—Anthony Aisenault, Summerside, P. O. B. 444, Prince Edward Island, Canada.—I am writing in reference to organizing a correspondence radio club through V.O.L. column. Any radio fan who would want to help start the ball rolling could either write me in care of V.O.L. or to my address. I think Radio Digest is the best radio guide published.—Vic O'Connor, 69-27 Burchell Avenue, Arverne, L. I.

* * *

WHERE THE VEST BEGINS

PLEASE don't think I am criticizing your magazine, because I am not. I think it is the best ever. What I am speaking of is the article about Carveth Wells. You say, "Ever since Carveth Wells was frost-bitten on the equator he has been a skeptic." What part is his equator? I don't blame you if you don't print this, but the devil in me makes me send it. Please believe me when I say, "I like Radio Digest" —Gladys Slate, 2436 S. 3rd Street, St. Louis, Mo.

* * *

SUNSHINE CLASS ON WHDL

WHILE pastor of a Mohawk Valley Church it was the writer's custom to take his turn with other pastors in ministering to the sick and shut-ins. Upon being transferred to Newcomb he was followed by many who missed the services. Upon their request to "get on the air" he now conducts the Sunshine class on Station WHDL.—Rev. Frederick B. Grim, Pastor, First Methodist Episcopal Church, Newcomb, N. Y.

Chain Calendar Features

See Index to Network Kilocycles on page 79

Throughout the Week

Blue Ribbon Chain

Throughout the Week

8:00 a.m.—WEAF—Gene and Glenn. Quaker Early Birds burst into mirth and melody. (Daily ex. Sun.)

8:15 a.m.—WABC—Something for Everyone with Ernie Naftzger, jovial master of ceremonies, disseminating crumbs of wisdom. (Daily ex. Sat. & Sun.)

8:30 a.m. — WEAF — Cheerio — inspirational talk and music directed by J. Harrison Isles. (Daily ex. Sun.)

8:45 a.m.—WABC—The Old Dutch Girl in amusing, appealing melodies. (Mon., Wed. & Fri.)

10:00 a.m.—WABC—Ida Bailey Allen elevates housework to a scientific level and educates housewives in puddings and politics, sauces and sociology. (Mon., Wed. & Fri.)

10:00 a.m.—WJZ—Ray Perkins, Disciple of Satire, just drips with drolleries. (Libby, McNeil & Libby) (Thurs. & Fri.)

3:30 p.m.—WABC—The Three Doctors, Pratt, Sherman and Rudolph, prescribe split sides and chuckles for that "sallow complexion." (Daily ex. Sun.)

6:30 p.m.—WJZ—Breyer Leaf Boys. Raymond Knight, Landt Trio and White in music snappy and comedy light. (Thurs. & Sat.)

6:45 p.m.—WJZ—Lowell Thomas—Literary Digest's herald trumpets daily news through your loud speaker. (Daily ex. Sun.)

7:00 p.m.—WJZ—Amos 'n Andy those black-faced, high-powered business eggsecutives. (Pepsodent) (Daily ex. Sun.)

7:30 p.m.—WJZ—Phil Cook, the Quaker Man—a whole radio show rolled up in him. (Quaker Oats Co.) (Daily ex. Sat. & Sun.)

7:45 p.m.—WEAF—The Goldbergs give true cross-section of Jewish life. (Pepsodent) (Daily ex. Sun.)

8:30 p.m.—WABC—Kate Smith and her Swanee Music. Enjoyable program with Queen of Crooners. (Congress Cigar Company) (Mon., Wed., Thurs. & Sat.)

11:00 p.m.—WABC—The Street Singer and Jack Miller rapidly climbing to fame on music scale. (Daily ex. Sun.)

11:00 p.m.—WJZ—Slumber Music. No other fitting close to an evening's radio entertainment than this program of semi-classical music directed by Ludwig Laurier. (Daily ex. Sun.)

Sunday

12:30 p.m.—WABC—International Broadcast spans the measureless seas to enlighten you on world's affairs.

3:00 p.m.—WABC—New York Philharmonic Orchestra offers full-length concert for the jazz-worn.

7:15 p.m.—WEAF—Gilbert and Sullivan Gems—and pol-ished up so care-fully by an able cast.

7:15 p.m.—WABC—Fray and Braggiotti illustrate harmony of French and Italian temperament in piano performances.

7:30 p.m.—WJZ—The Three Bakers featuring: Billy Artz's dance orchestra; Men about Town; Frank Luther, Jack Parker, Darrell Woodyard and Will Donaldson — Master of Ceremonies — Ray Perkins!

8:00 p.m.—WEAF—Chase and Sanborn with Dynamic Dave Rubinoff's Orchestra, not forgetting Eddie Cantor's campaign to tread the stepping stones to the White House.

8:15 p.m.—WJZ—Collier's Radio Hour offers the best of everything in entertainment with John B. Kennedy, M. C.

10:30 p.m.—WJZ—Harbor Lights—Tales of the briny deep dramatized from stories which were told by old salts.

Monday

3.45 p.m.—WABC—Ben and Helen, a pair of music-ers in delightful duets.

9:00 p.m.—WABC—Pompeian Program —Jazz orchestra under Milton Retternberg and beauty talk by Jeanette de Cordet.

9:00 p.m.—WEAF—A. & P. Gypsies with Harry Horlick's Orchestra, Veronica Wiggins and Frank Parker.

9:30 p.m.—WEAF—General Motors—Martha Attwood, soprano; male quartet, Frank Black's orchestra.

9:30 p.m. — WJZ — Chesebrough Real Folks. Entertaining rural sketch drawn from real life—with George Frame Brown the guiding spirit.

Tuesday

5:30 p.m. — WABC — Salty Sam, the Sailor, and the theme of his melodies is the storm-tossed sea.

6:45 p.m.—WEAF—Swift Program, with Parker Fennelley and Arthur Allen as the Stebbins Boys in a comedy act.

7:00 p.m.—WEAF—Mid-Week Federation Hymn Sing. The Mixed Quartet: Muriel Savage, Helen Janke, Richard Maxwell, Arthur Billings Hunt, and George Vause at the piano.

8:45 p.m. — WABC — Walter Winchell, celebrated columnist and Broadway news digger.

9:00 p.m.—WEAF—McKesson Musical Magazine, whose pages unfold a concert orchestra, guest artists and soloists.

Features

9:30 p.m.—WEAF—The Fuller Man. Don Voorhees' orchestra in snappy tunes—and two soloists, Mabel Jackson, soprano, and Earl Spicer, baritone.

10:30 p.m.—WABC—Arabesque. Who would think that the desert could yield as flourishing and blooming a program as this?

Wednesday

6:00 p.m.—WABC—Bill Schudt's Going to Press. For benefit of fourth estate. Of the, by the, for the, and to the—spoken word.

7:15 p.m.—WEAF—Boscul Moments are pleasant but fleeting with the famous prima donna, Mme. Alda, and Frank La-Forge at the piano.

8:30 p.m.—WEAF—Mobiloil Concert—always a brilliant performance—Nat Shilkret as director, John Holbrook, M. C., a guest artist, male chorus, Gladys Rice and Doug. Stanbury.

9:30 p.m.—WEAF—Palmolive Hour is a real treat for music lovers. Erno Rapee's orchestra, the Revelers Quartet, Oliver Palmer, and Paul Oliver, et al.

9:30 p.m.—WJZ—Dutch Masters Program provides a good bag of laughs—and Marcella Shields is the feminine portion of the comedy trio.

10:00 p.m.—WABC—Vitality Personalities. An energizing program featuring a guest artist and the newest from Tin Pan Alley.

10:15 p.m.—WABC—Columbia Concerts Corporation brings to mike celebrated stars of the concert stage.

11:00 p.m.—WEAF—Nellie Revell, Voice of Radio Digest, one of the foremost personalities on air today gives thimble biogs of your favorite radio stars.

Thursday

11:30 a.m.—WEAF—Hugo Mariani and his Morning Serenaders—a thirteen piece band, but their program is a lucky break for listeners.

8:45 p.m.—WABC—Angelo Patri. Noted authority on child training educates parents on how to rear children.

9:00 p.m.—WEAF—Arco Dramatic Musicale—interesting dramatic sketch—with music by Jaffrey Harris' orchestra, the Rondoliers Quartet and sundry soloists.

9:30 p.m.—WABC—Love Story Magazine aircasts stories of love and romance.

9:30 p.m.—WJZ—Maxwell House Ensemble—an invigorating feature with Don Voorhees' orchestra and a guest soloist.

Selected by the Editors

To provide you with the outstanding features for each day of the week the RADIO DIGEST *program editor has selected the programs indicated as Blue Ribbon. Do you agree with her selections? (For stations taking the programs, see adjoining list.)*

Friday

4:15 p.m.—WJZ—Radio Guild dramatizes the plays you have always wanted to see. Vernon Radcliffe is director.

7:00 p.m.—WEAF—Major Bowes' Family, happy and musical. With Yasha Bunchuk director of orchestra.

8:00 p.m.—WEAF—Cities Service is a rare dish—with Jessica Dragonette and the Cavaliers.

8:30 p.m.—WABC—The March of Time, one of the most ambitious programs to be heard, in its vivid dramatization of world's stirring news.

9:30 p.m. — WJZ — Armour Program serves delightful tunes via baton of Josef Koestner.

10:00 p.m.—WABC—Pillsbury Pageant with world famous virtuoso—Toscha Seidel, at the violin.

10:00 p.m.—WEAF—Paul Whiteman's Paint Men and Mildred Bailey, blues singer. (Allied Quality Groups.)

10:30 p.m.—WEAF—RKO Theatre of the Air—always a brilliant array of talent.

10:30 p.m.—WABC—Football Coaches discuss ins and outs of gridiron season.

Saturday

11:30 a.m.—WEAF—Keys to Happiness, with Sigmund Spaeth in role of maestro. Piano lessons everyone can afford to take.

5:45 p.m.—WABC—Football Scores. Bill Fagan discusses gridiron games of the day.

6:30 p.m.—WEAF—Mr. Bones and Company with Paul Dumont, who steps out of his announcerial capacity to take you for a trip to a minstrel show.

7:15 p.m.—WABC—Frederic William Wile—in his illuminating discussions of "the political situation in Washington."

**8:00 p.m.—WJZ—Corse Payton's Ten-Twent'-Thirt melodramatic sketches.

9:00 p.m.—WJZ—Careless Love—a dramatic sketch of Negro life.

9:30 p.m.—WEAF—Club Valspar with Norman Sweetser, M. C., Aileen Clark, soprano, and William Wirges' orchestra.

10:00 p.m. — WABC — Hank Simmons' Show Boat. Harry Browne directing these hair-raising melodramas aboard the "Maybelle."

FOR many months Radio Digest has published regularly a comprehensive list of stations throughout the United States, Canada, Cuba and Mexico arranged, for the convenience of our readers, alphabetically and according to states and cities and meters. Important changes in allocations are pending, which may be effected before this issue comes from the printer. We are therefore planning to have in your December number of Radio Digest the most authentic State and City Index yet produced.—Editor

Radio Digest Publishing Corp.,
420 Lexington Ave., New York, N. Y.

To make sure of every forthcoming issue of RADIO DIGEST I wish to become a regular subscriber. Enclosed find $2.00 in payment for my subscription for one year. Canadian and Foreign subscriptions $4.00.

Silhouettes

(Continued from page 53)

meant to tattle—but kids will be heard.

Later attended art school. Won many prizes in competition. When doing art posters, they'd merge their talents.—Martha would get the idea and lay out the copy, Vet would do the black and white pen and letter work and Connie was a whiz at coloring. Result a swell job. In union there is strength.

First stage appearance at ten, during the thrift stamp drive, just after the war. Played a week's engagement for $400 and bought thrift stamps with the money. Later made Victor records in New Orleans—this led to a radio audition. Made their first broadcast over WSMB in their home town. Not a bit nervous. Gloried in it.

Connie's favorite radio star is—Connie Boswell, with Kate Smith a close second.—The girls do all their own musical arranging. No outsider could get that individual touch. Funny how they do it, too. They put the cart before the horse. They never start at the beginning of a song and arrange. They take the last eight bars first, and after they have the effect they want, they take the next eight bars, and so on until the introduction is reached.

Plenty of time devoted to rehearsal. In fact all available between performances. They never sing a song as it is written. Always improvise their own interpretation of the song, composing what's called a counter-melody.

Fan mail plays an important part in their lives. They get loads of it and read eagerly for constructive criticism.—Many proposals for all of them.—Serious proposals. Many letters from college professors. One young man writes every time they broadcast—never misses. Another thing—they get just as many letters from girls as they do from the men. The girls' letters are sincere—too.

Connie is superstitious about one thing only.—She never brags about any forthcoming contract or performance.—If you do, it's ten to one it'll flop.

She's traveled all over the States. Likes her home town best. New York next best. Too busy to see much of the night life. Went up to Harlem once. Disappointed.—Not so hot. The revues are not what they're cracked up to be.

Fond of all sports. Particularly fights. Whenever she gets the chance, you'll find her in the front row at some arena. Likes rowboats. She herself pulls a mean oar.

For relaxation, she reads when the opportunity presents itself. Heavy stuff. Likes to listen to others broadcast to hear how good they are.

More talents.—She draws exceptionally well and is a sculptress of no mean ability. Does heads mostly.

She prefers her career to marriage. Happiness in marriage is possible, if you can find the right one, but what a chance you take.

Cracked up in a car once. Out for a little ride. A collision turned her car over several times. No one was hurt. Connie landed on her head. Says that's what saved her. She likes planes too—done quite a bit of flying as a passenger.

Hard work. No time for vacations. Maybe a week-end now and then. A recent one spent at Saratoga, but even then an engagement at a private affair. A party given by Mrs. Harry Payne Whitney. Their appearance a surprise for Mr. Whitney, a rabid radio fan, numbering the Boswells among his favorites.

Took a flyer on the horses when up there. A four horse race. Each girl bet on a different horse. The fourth horse won.—Connie was the only one to have any luck at it. Another race, Connie took a chance on a horse named "Indigo." A hunch because she was to make a recording the following day of a song called "Mood Indigo." The hunch won.

AMONG the most prized possessions of the girls are the documents they received from the State of Louisiana. These documents, with the gold seal of the State affixed and signed by Huey P. Long, Governor of Louisiana, appoint, officially, Connie, Martha and Vet an Ambassador of Harmony from Louisiana to the radio audiences of the world. This was supplemented by an official proclamation of the New Orleans Association of Commerce with a similar appointment, which charges them with the bounden duty of spreading continually over the air and over the land the good cheer of the city of New Orleans.

The girls are just two years apart in their ages. Martha is twenty-four. Connie next at twenty-two and Vet just twenty. All of them born, bred and buttered in New Orleans.

Connie likes great contrasts in her clothes. Wears black and white a lot. Wears trick hats that look well on her.

Goes to bed sometime between twelve and three in the morning and gets up about ten or eleven—sleeps in pajamas—always. Flat on her back for forty-five minutes or so and then all up in a knot until morning. Loves to dream.

Eats anything as long as it's food. Especially fond of raw meat. Prepares potato soup like nobody's business.

Always puts on her left stocking first.

Likes big men best. Six feet or over, weighing about 175. Believes truthfulness is their best quality. But it's darn hard to find a man with any of it. Has no particular ideal. They just must be big he-men who can take it on the chin.

Loves to talk. If she ever gets you over in the corner, she'll bend your ear off. Funny part of it is—you like it.

Connie uses very little make-up for street wear. Powder and lipstick. Once in a while a touch of brown eyeshade.

The light brown eyes turn green when she's mad, which is seldom.

Doesn't like candy and never eats any dessert. Plain food and plenty of it.

Always on the go.—Broadcasts—vaudeville—Brunswick recording artist. Whistles with her little fingers stuck in her mouth. Plenty loud.—Not so good, but plenty loud.

And sing—shout—sister—shout.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of RADIO DIGEST, published monthly at New York, for Oct. 2, 1931. State of New York, County of New York, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared Raymond Bill, who, having been duly sworn according to law, deposes and says that he is the Editor of the RADIO DIGEST and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are: Publisher—RADIO DIGEST PUBLISHING CORP., 420 Lexington Ave., New York, N. Y.; Editor—Raymond Bill, 420 Lexington Ave., New York, N. Y.; Managing Editor—Harold P. Brown, 420 Lexington Ave., New York, N. Y.; Business Managers—Lee Robinson, 420 Lexington Ave., New York, N. Y.

2. That the owner is: (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one per cent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a firm, company, or other unincorporated concern, its name and address, as well as those of each individual member, must be given.) Radio Digest Pub. Corp., Edward Lyman Bill, Inc., Raymond Bill, Edward L. Bill, C. L. Bill, Randolph Brown, I. Spillane, B. Titman and Chas. R. Tighe, all located at 420 Lexington Ave., New York, N. Y.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is..... (This information is required from daily publications only.) R. Bill, Editor.

Sworn to and subscribed before me this 5th day of October, 1931. Wm. A. Low, Notary Public. N. Y. Co., No. 753. Reg. No. 3L487. My commission expires March 30, 1933. [Seal.]

Make It Snappy

(Continued from page 15)

Grove, in his hotel. That was in 1921. I stayed there until 1926, which isn't a bad run.

When I look back at those years at the Cocoanut Grove I recall many interesting incidents concerning persons who since have become famous. For instance, I remember:

Lending $20 to a young, good-looking foreigner, who had been unable to break into pictures, so that he could take out a girl. He was the late Rudolph Valentino, who, a short time later, was catapulted to fame and fortune after his tango in "The Four Horsemen of the Apocalypse."

Helping Paul Whiteman hire musicians for his first dance orchestra job in the Alexandria Hotel, Los Angeles, where he had been playing the violin for tea with a 6-piece string ensemble.

Taking Ricardo Cortez to the Lasky studios and getting him a screen test, which landed him his first picture job. Watching Norma Shearer and Billie Dove take their first screen tests.

Cashing a pay check every Saturday for a young girl who was working at the Metro-Goldwyn-Mayer lot for $75 a week and who was going with one of my saxophone players. It was Joan Crawford.

Blanche Sweet's chauffeur, who used to drive her to the studios every day and to the Cocoanut Grove at night. It was Marshall "Micky" Neilan, now Blanche's husband and one of this country's best-known motion picture directors.

Giving saxophone lessons to a 15-year-old boy who asked to be allowed to sit on the band platform for an hour each evening to listen to the music. . . Howard Hughes, now head of Caddo and producer of *Hell's Angels.*

Allowing another young fellow to sit on the band platform several nights a week . . . Carl Laemmle, Jr., who now is head of Universal Pictures at the age of 24.

Receiving a telegram from a chap who wanted to play the banjo in my orchestra. . . Hearing six months later that he had been hired to take the leading role in *All Quiet on the Western Front.*

In 1923 we made our first record. It was *No, No, Nora* and *Sweet Little You,* and it sold more than 400,000 discs. Since then we have made more than 250 different discs.

After leaving the Cocoanut Grove I took my band to Chicago, and we played there for seventy-two weeks in *Good News,* in which Jack Haley, Mildred Brown and Dorothy McNulty were starred. Then came the talkies, and we played in the talkie-singie version of *Good News.* Other pictures in which we were seen or heard were *Hold Everything, Paramount on Parade, Pardon My Gun, Madame Satan,* six *Merry Melody* shorts, *Young As You Feel, Just Imagine, Transatlantic, Big Business Girl, Chances, Five Star Final* and a few short features.

In January, 1929, I accepted an offer to take my band to London for an engagement of four weeks at the Kit Kat Club and at the Palladium Theatre. Instead of staying four weeks we remained seven months, going from London to Paris and playing in the French capital at the Moulin Rouge and at the Perroquet.

Among those who came to the Kit Kat Club quite frequently to dance to our music were the Prince of Wales, Prince George, Lord and Lady Louis Mountbatten, Prince Arthur of Connaught, Lord Brougham, Lady Ashly, Lord and Lady Portarlington, Lord Donagle and others of the nobility.

NO, I never gave the Prince of Wales drum lessons, nor did I meet him socially. I did, however, play a command performance before him and some of his friends.

After taking a pleasure trip all through Europe I returned to this country and, after playing at the Pavillon Royal, the Club Richman and other well-known night resorts, I began an extended engagement in a motion picture theatre in Los Angeles, doubling on the movie sets in Hollywood.

I believe I was one of the first dance orchestra leaders to broadcast, for I began playing over the air as far back as 1919. By the way, it might be of interest to some to know how I was signed for my broadcasts over the Columbia chain for Phillips Dental Magnesia. While I was still playing on the Pacific Coast, the sponsors heard my record of *Milenberg Joys* and liked it so much they entered into negotiations which led to my coming East.

In between theatrical, motion picture and night club engagements I have found time to write a few songs. Perhaps you will remember them. They are still played over the air. The best-known were *Mary Lou, Mandalay, What Can I Say, Dear, After I Say I'm Sorry, I Cried For You* and *You Told Me to Go.*

People always ask me to what I attribute whatever success I have attained. When they ask that, I tell them "by giving the public what it wants, by eating pears, chewing cigars and working eighteen hours a day."

In playing for radio, for the theatre or for night clubs, my theory has always been "give them what they want." I try to please the public, not the musicians. If I am working in a new hotel or cafe, after my first few numbers I ask the dancers what they want, and from their requests I am able to tell their favorite type of music.

I always have found that most of the bands that are boosted by the musicians are the bands that seldom make good for dancing. That's usually because they are over-arranged. I'm always happy when a musician pans me, for I know then that I'm going over with the public.

In playing over the air I try to give radio listeners something they understand. I think of the folks at home who aren't familiar with trick arrangements. I try to think of the mothers and fathers as well as the young people who like the so-called "hot stuff."

In short, I strive to present well-balanced programs, each of which contains some number that will please someone. I strive for melody at all times, with a rhythm background.

The essence of my whole theory is, "Don't try to educate the public to something new which they may not understand. Give them what they know and like."

As for the pears, sometimes I don't eat anything but pears for three or four days at a time when I am working hard. They are easy to eat, they don t take my mind from my work, they taste good and they make me feel like a million dollars.

And the cigar—well, I smoke one all the time. In the broadcasting studios, on the orchestra platform, wherever I'm rehearsing, I always chew on a cigar. Just another thing I enjoy because it helps me keep my mind on what I'm doing.

That business of working eighteen hours a day is a serious one. I mean, you've got to work hard if you expect to get anywhere. Which reminds me that I've got to get to work on my next program right now.

This is Abe Lyman signing off, ladies and gentlemen. I hope you've liked this little autobiography, and I hope you'll tune in on "The World's Biggest Fifteen-Minute Program" which is presented every Tuesday, Thursday and Saturday from 8:15 to 8:30 P. M., EST., over the WABC-Columbia network.

Stop! Hold that Pose!

Now turn to page 6 Please

Ruth Etting

THIS smart young woman is known now as a stage star come to radio. As a matter of fact she was a radio star first and before she became the feature of the current Ziegfeld Follies. But she has not deserted her radio public and you are liable to hear her NBC one time and CBS the next. Her latest was on the Nestle program over the NBC.

CHOOSE YOUR BRANCH OF RADIO

Seek advancement...adventure in Aircraft Radio ...Broadcast Station or Studio...Direction Finder and Radio Compass...Disc and Film Recording... Talking Pictures...Servicing of Home Entertainment Equipment... Television...and other new developments.

LOOK! HERE'S a thrill! Short wave operation between ground and airplane!

HERE is a list of 7 thrilling branches of radio. Choose the one you like...learn it and fit yourself for radio's future! Remember, it's only the well-trained men who will get ahead in radio. So prepare yourself. Develop your talent by study at America's oldest radio school —RCA Institutes, which offers the most modern training courses.

These four complete resident schools . . . in New York, Chicago, Boston and Philadelphia . . . are the only schools associated with the largest, most complete research laboratory in the radio industry. Founded 22 years ago, the RCA Institutes' purpose is to train men who seek to advance themselves in radio.

RADIO ENGINEER controlling volume of a broadcast.

MAIN CONTROL ROOM of a great broadcasting studio . . . where the programs start that entertain millions.

Learn at RCA Institutes

At RCA Institutes you study by advanced methods, under outstanding instructors. The schools offer elementary and advanced instruction in every branch of practical radio. New courses are added, old ones revised constantly as new developments are perfected. No "rubber-stamp" courses at RCA Institutes either —if you already have a radio background you can enter a course fitted to your own particular needs.

Win Radio Scholarship

If you cannot attend the resident schools, RCA Institute Extension Courses enable you to study at home and keep your present position. Special laboratory equipment is furnished. Outstanding graduates of Extension courses become eligible for a free scholarship at nearest resident school. Cost of either resident or extension study moderate. Visit any of our schools, see what we offer, or write today for free catalog, full details. The coupon makes it easy.

RCA INSTITUTES, Inc.

RCA Institutes, Inc., Dept. DR-11, 75 Varick St., New York, N. Y.

Gentlemen: Please send me your General Catalog. I am checking below the phase of radio in which I am particularly interested.

- ☐ Aircraft Radio
- ☐ Broadcast Station or Studio
- ☐ Direction Finder or Radio Compass
- ☐ Disc and Film Recording
- ☐ Talking Pictures
- ☐ Servicing Home Entertainment Equipment
- ☐ Television

Hitting It on the Nose

(Continued from page 35)

liant in tone, or he might have one that is soft and rich.

Orchestra leaders with little radio experience are apt to be afraid of brass, when, as a matter of fact, all stringed instruments are more troublesome to place properly. One of the commonest faults in orchestral production is the strident fiddle, and the instrument that has to be set most carefully of all is, strangely enough, the cello. On certain tones, particularly in the middle register, the cello will often create what is known as a "woof"—really an overtone, and in the case of the cello it has the unique faculty of distorting the tones of all other instruments.

Another difficult instrument to place properly is the piccolo, because of its high range and shrill quality. It is an instrument that is used principally for brilliant figures and cannot be played softly.

An experienced and musically capable production man does not have much trouble in arranging the position of instruments for good reception. His big worry is with the men. Few realize how much actual body movement is necessary for musicians. The saxophonist may have three or four saxophones on the rack alongside him; the horn player has his mutes and other paraphernalia. Above all, they must not be uncomfortably crowded for the sake of tricky arrangements.

Individual singers do not present so much of a problem, although the sanity of production men was threatened for a time with the advent of the "crooner" and the "whispering" baritone. The technique of "crooning" consists of lowering the voice level almost to a whisper, at the same time crowding the microphone. The effect is a fairly pleasant one, and it's easy to do. And that's the trouble with it. One doesn't have to have an excellent voice to be able to hum or whisper with a sentimental lilt. But unfortunately *good* crooning is not so easy. True enough, it covers a multitude of defects that would be apparent with the use of the full voice, but it also requires considerable voice control. Most of the good crooners were good straight singers in the first place, and only a few poor singers get away with it. Crooning is "phoney" singing, and the average production man would rather work with a temperamental opera star; but for awhile every dance orchestra had a crooner, and no matter how lacking in vitality or naturalness they were, they had to be handled.

Of course, opera and concert singers without broadcasting experience are sometimes difficult, as the same amount of voice used on the stage or auditorium is not necessary in the studio. But singers can develop microphone technique in a short time, and the production man attaches more importance to the accompaniment than to the soloist. A solo can be spoiled utterly by careless arrangement of the accompaniment. Even simple piano accompaniment must receive careful attention.

The thing that is apt to rattle a production man quickest is the timing of a program, and that's the one thing he must not allow to rattle him. Nine times out of ten when some slight thing goes wrong to spoil the perfect quality of reception. Nobody notices it, but let a program run more than a few seconds short or over, and somebody is going to raise a howl. And the howl, of course, is justified, for nothing can spoil a program more easily than obviously dragging it out or rushing it to a close. The word "obviously" is important, because frequently even the most carefully rehearsed programs must be stalled or hurried. The trick is to do it without being obvious.

Listeners take the timing of programs pretty much for granted. They set their kitchen clocks by the beginning or close of a program that might include two or three dramatic sketches, a dozen dance numbers and solos and a monologue, and not be more than two or three seconds off. But they do not share with the production man his satisfaction when he "hits it on the nose."

"Hitting it on the nose" means exactly on the second, and that is balm for the harried production man. He is usually satisfied if his show ends within a few seconds of the dot; he is disgraced if it is more than that, and is thrilled when it is "on the nose."

CONVINCING proof of the value of radio broadcasting as a public attention-getter is evidenced by a contest being conducted over the Columbia Broadcasting System by the Cudahy Packing Company, sponsors of the Old Dutch Girl program.

Shortly before August 1, the Old Dutch Girl announced that until further notice over the air, a beautiful perfect white diamond, mounted in the very latest square-prong setting 18-karat white gold ring, would be awarded each broadcast for the best letter of not more than 100 words on the subject: "Why Old Dutch Cleanser is the only cleanser I need in my home."

As a result of similar announcements being made by the Old Dutch Girl during her three-a-week programs, letters are literally pouring in to the Old Dutch Cleanser offices in Chicago by the thousands. By actual count, 33,057 communications have been received in sixty days from experienced housewives in all sections of the country.

The name of the diamond ring winner is announced and the winning letter read during each Old Dutch Girl program, which is broadcast over thirty-six stations every Monday, Wednesday and Friday morning, at 7:45 a. m. Central Standard Time.

The competition is open to everyone except employes of the Cudahy Packing Company and their families.

CHRISTMAS GIFT CERTIFICATE

RADIO DIGEST,
420 Lexington Ave., New York, N. Y.

Gentlemen: Herewith is remittance for $2.00 to cover GIFT CERTIFICATE to Radio Digest for one year starting with the.....issue. Send to (Name).....

(Street).....(City, State).....

I would like an autographed photograph of (Name of Artist).....

See Pages 6-7 for details

(Name).....(Street).....(City, State).....

Even the most ordinary program requires patient rehearsing and re-working for the proper timing. And no matter how perfect the final rehearsal, it is never a certainty that the show will end on the dot when it eventually is put on the air. For that reason a production man must be able to adjust a program at almost any time, and do it so skillfully that it will not be noticeable. In the middle of any musical number he must be able to tell, without consulting his watch, the correct time within a few seconds.

Of course, he does consult his watch and his continuity sheets constantly. He usually makes any necessary adjustments after the station break, and never makes up a discrepancy in time on one number. By a system of signals through the control room window he tells the orchestra leader to make his timing a shade slower on the next number, making up perhaps five to ten seconds. Ten seconds doesn't sound like much, but slowing down any more than that on a single number would make it obviously dragged out. Slowing down three pieces in the same way would make up half a minute, which is about as much as a well rehearsed program ever falls behind. If it should be any more than that, the production man, instead of signaling for a carefully spread out slowing down of two or three numbers, will signal for an extra chorus of the final number.

Production men are hard-worked people, and a twelve or fourteen-hour day is their lot. It is the hundreds of little details that the production man is responsible for that make for the excellent quality and smoothness of a radio program. It is the patient and painstaking consideration of these small details that mean the difference between a good and a bad program, but small credit ever falls to the production man.

He might be likened to the stage manager of a theatrical production, but then, who ever heard of a stage manager?

Gay Nineties

(Continued from page 65)

out" drew near. My excitement was intense. My white satin gown was perfect, but no confidence reigned in my fluttering heart, although I thought I knew how to mind my manners. My old nurse, now turned personal maid and was to accompany me in my mother's closed carriage, with our old coachman on the box.

Would my host and hostess really think I did my family credit? Were there any men who would really like to talk to me? And if they did, how long could I hold them in conversation without appearing to monopolize their time? Oh, dear, Oh dear, would anybody really like me? These thoughts milled around in my poor young head, until I was almost in tears from fright.

Presently I spied a most fascinating looking man coming towards me. His look held just the right interest as he said, "Miss Richardson, I have the great pleasure of taking you into dinner."

"Thank you," I replied, in a trembling voice, pitched very low in the hope he would not hear the quaver.

"Your sisters, I know of course, but where, oh where have they kept you all these years?" he asked.

"Well, Judge," I answered, "I feel that I have known you for years and years and years; in fact, I know you from the feet up!"

My cheeks flamed red as I realized I had allowed childish memories to catch me out!

"Why," he gasped, "how is that?"

"We met first *under* my Mother's dining room table, and you were particularly witty that night, for I remember all you said even to this day."

That first formal dinner of mine in New York Society was a thriller. At the witching hour of two in the morning, my sleepy old nurse and fat grumbling old coachman, brought me home, much to my disgust—for I couldn't see how it was they had so soon forgotten what it felt like to be eighteen!

Kate Smith

(Continued from page 25)

They got in the saxophones and on the piano keys. I missed a couple of beats and needed a Murad."

After her engagement with Keith had terminated, she worked all the summer and fall of 1929 with Fox, and then, Warner. In the fall, however, Kate decided to do something definite about her tonsils. They were constantly giving her colds and sore throats. So she went home, and spent two weeks in a hospital. Having lost those bothersome appendages, she went off to Havana to recuperate.

"It was just marvelous there," she says, "I took my car along with me, and we drove all over those beautiful white roads. It was like going away from America to some entirely foreign country."

When she returned, Kate was immediately signed as a leading feminine role in *Flying High*. That musical comedy, which ran for one year on Broadway was one of *the* things to see, and Kate's numbers therein were wonderfully successful. After it closed in New York, however, she decided not to go on the road with it. It went on the road without her—and closed in six weeks.

During *Flying High* Kate had begun to be interested in radio. Quietly she decided to have a finger in the pie. Destined for success, apparently, in anything she undertook, Kate in due time was given fifteen minutes nightly of Swanee Music over the WABC network. Fan mail began to pour in. It increased steadily in volume. One began to hear about this big stout girl with the pastel blue eyes, and the tortoise shell "specks" who sang with enthusiasm and charm.

She is accompanied on her programs by one Nat Brusiloff, director of the Rhythm Kings—and it is a curious coincidence that they knew each other when they were children, down in Washington. One of Kate's favorite stories, recounted with a malicious little twist, is the time Nat borrowed her ukelele and finally returned it a year later with the initials of his family, relatives and friends, engraved permanently in its prodigal varnish.

There is something enchanting about Kate's music that so far, no one has been able to exactly define. At any rate, she has an uncanny genius for making people remember. She gets bags of fan letters daily, and some of them are filled with stories that would furnish inspiration for a novelist.

For instance, there was a young man who had had an automobile accident. He had been very active: the sort of a person to play tennis fast, dance fast, and drive fast. Too fast. He suffered an accident. Doctors said he would always be crippled. The young man, with that glum verdict ringing in his ears suddenly had no desire to live. He was literally pining away. One evening his despairing mother installed a radio in his room, thinking that he would enjoy some music. By the merest chance she dialed Kate Smith, and from the first strains of her music he lay quietly listening. Suddenly a strange smile broke across his young face. "Why," he said quietly, "It is worth living—to hear a voice like that." He conquered his melancholia then and there.

Then there was the pathetic letter begging Kate to sing *Where is My Wandering Boy Tonight* and to ask a certain young man to come home to his mother again. He had been gone many weeks and she had had never a word from him. The mother was certain that, inasmuch as he had never to her knowledge missed a Kate Smith program, the message would reach him. Kate complied, and read the boy's initials over the radio.

No word came from the unfortunate mother who had first written her, but as an aftermath she did receive a letter from another mother. It greeted her with a fervent "God bless you, Kate Smith," and explained that she had a young daughter, seventeen, who had run away with a "girl friend" having found home too small and dull. In a small Newark rooming-house the daughter heard Kate's program, absorbed the full sentiment of the song, the message to come home, and decided that what was good for the goose was good for the gander—or, vice versa.

And so, Kate has actually played an intricate part in many people's lives, mending broken hearts, and stimulating romance, soothing tired, resentful souls behind prison bars, teasing them into temporary forgetfulness.

Last Fourth of July, Kate stood before her microphone and sang *The Rose of No Man's Land*. Following that piece, which hearkens back to war days, she received letters from soldiers, and veterans all over the country. They were deeply thankful, they said, that in the midst of all the flag-waving, there was one who remembered the soldiers who had given their lives in the Great War. One letter explained, tremulously, that they had all stood up during the rendition of the song and that those who were too crippled to stand, had sat and saluted. They had lain awake that night, the letters explained, talking about old times. Affectionately these men address Kate as "Our Lady Song Bird."

It is a strange thing how when one's life hangs on a narrow string, some inexplicable force saves the situation. Kate has had two distinctly narrow escapes—or, as the lady briefly classes them herself, "close shaves."

"The first time I almost signed off from this happy life," says Kate, "was when I was about sixteen, and visiting some friends of mine near Chesapeake Bay. One morning I wakened up early and decided that it would be fun to borrow their canoe and do some paddling before breakfast. Well, I paddled out farther than I realized, and the waves suddenly became very rough. I got a little frightened trying to keep the boat from capsizing—then a large wave turned it completely over. I was dumped out, of course with all my clothes on. Lordy, was that water cold! There wasn't a soul in sight. I kicked off my sneakers and got out of my dress. Then, like a crazy kid I not only swam myself back, but dragged the canoe along too. It wasn't mine, and I didn't want anything to happen to it. Well, let me tell you I'm glad the shore came along when it did, because by that time I was pretty well exhausted."

Another accident occurred shortly before Kate's first attempt at professional theatricals. She and a young and exhilarated escort were driving home from a dance. There was a smooth white road and a big orange moon. They did the only human thing, turned out the headlights and went just as fast as they could by the light of the moon. It was thrilling, going around the curves at about sixty-five miles an hour and Kate was emitting one delighted squeak after another when the road suddenly dropped into space. Where the road was a second before, there was a big black chasm. Then there were noises, a dull pain, and fleeting terrible thoughts like random parts of a nightmare. When Kate woke up she was upside-down.

"I am up-side-down!" she exclaimed to her escort, "Are you?"

"Of course," replied her escort in a weird voice, "The car is up-side-down."

"Well, let's do something about it," suggested Kate weakly, "I know my arm is hurt—I'm not sure about anything else."

Eventually, and with many groans, Kate and her young gentleman emerged from the debris. She had been right. Her arm was broken, but there was nothing else amiss, besides a few bruises and an altered idea about speeding with one's lights out.

K-k-k-Katie, while we're on the sub-

ject, is always getting herself into scrapes. Even now the young lady who has sung everything but grand opera —and sung it well—does things that are, as she puts it herself "just crazy." Not long ago, in the Columbia studios, she had an embarrassing experience that would probably have dashed cold water on the spirits of an average person. But Kate's good spirits are intact, so her only reaction was a subdued giggle. Being possessor of one of those nasty summer colds that go the rounds, she was sucking a cough drop pending her date with Mr. Mike. She forgot to remove it, and stood, with the orchestra playing and the announcer giving his preliminary few words, with the pesky cough drop in her mouth. She began to sing and had to perform a great many mouthy acrobatics to keep the cough drop in either side of her mouth, while she endeavored to sing naturally.

Suddenly, on striking a high note, the unfortunate cough drop slid down her throat.

"I went gulp-gulp," says Kate, "just like a frog."

After her program, her mother called up from Washington.

"Darling," demanded Mrs. Smith, anxiously, "What *was* the matter with you tonight?"

Mrs. Smith often calls up her daughter, Katherine, from Washington, and they discuss for half an hour at a time ships and shoes and sealing-wax and cabbages and kings.

"And is she my critic!" says Kate.

Here are a few things about this Smith lady. She's mad about circuses. She has a strenuous aversion to shopping, venturing out on orgies just twice a year, in which times she buys twenty-five dresses at a throw, a dozen hats, breathes a sigh of relief, and forgets about it for another half year.

Kate's favorite hobby is collecting perfume. She has over 600 bottles of it. Six of them are in circulation at one time.

"No matter how many I have," Kate smiles, "I am always lured into buying another bottle."

We asked Kate how she liked the longer and more feminine type of dresses.

"I adore them," Kate answered with spirit, "And I think they are much more becoming than the straight, shortish ones. I think the way women are wearing their hair now is a great improvement too—softly around their faces, you know."

"There are just two kinds of women I don't approve of," continued Kate, "One is the kind who talk baby talk—Oh Lordy, I can't *bear* those kind! The other is the kind who have cigarettes perpetually drooping from the corners of their mouths. I think it is dreadful. I don't mind smoking you know—I just mind the girls that smoke that way. It looks too masculine."

Kate is quite a sporty person. She likes summer sports particularly, because she is especially fond of swimming. She likes tennis, bowling (yes, really!) and is an ardent baseball fan.

"Do you cheer?"

"Do I cheer! I cheer so hard and loud that I had to deprive myself of baseball last season. I would have been continually hoarse!"

There are two places Kate wants to go: Switzerland and Hawaii—Switzerland for its mountains, Hawaii for its black sands.

Then there is something we may as well tell you about Kate. She has what she calls "a secret inspiration." Nothing we said would coax it out of her. What *can* it be!

There is a curious thing about her voice. It covers three octaves. There have been many arguments, among musical people, as to just what she is—contralto, mezzo-soprano—or what?

Kate has often been advised to study for grand opera.

"I'll tell you why I haven't," she says, "It is my personal opinion that Grand Opera should be sung in whatever native language it was written, and in order to sing it as it should be sung, you would have to spend years of study. I am perfectly happy singing everything outside that particular field, light opera, ballads—and all sorts of musical compositions."

And, as a parting shot about this big Southern girl—who is adored wherever strains of her music travel over the far-reaching fingers of the Columbia System—it is our personal opinion that, with her complete lack of affectation, social climbing, et al, combined with the utter simplicity of her genuine self she will not only remain perfectly happy, but will continue to communicate some of it to other people.

Television Ghost

(Continued from page 30)

ercises for some time, appeared as our guest artist. The lookers-in were enabled to visualize exactly the various exercises . . . a big improvement over a broadcast description of the movements.

These studio experiments prove one thing conclusively: The day will soon be here when the demands for talent will be immeasurably expanded. Entertainers who are able to do an entirely new act each week without the aid of continuity will be in demand. Stars will be drawn from the legitimate stage, from the movies, from vaudeville and from the concert stage. New faces and new voices will go out over the ether to be reborn in the homes of lookers-in and many of those who are at the height of their popularity now will slip back into obscurity.

Radio Digest will carry on its experiments and will keep its readers informed of the progress being made. That television is ready to take its place in the home as a new medium of entertainment it is foolish and futile to deny. It is far from perfected but so was radio broadcasting a few years ago. Television is on a par with radio eight years ago. And if the images leave something to be desired the shortwave set that goes with the televisor brings in the sound part of the program in excellent fashion. Then, too, several enterprising manufacturers are making combination sets: that is an ordinary radio receiver, a short wave set and a televisor combined.

See America First

(Continued from page 21)

"Two great forces bind the people of North America together," said Graham McNamee, regular announcer for The Parade of States, in introducing the new radio feature. "They are transportation and communication. Of these the automobile typifies the first; radio the second."

Thus the new General Motors program, employing a good dozen arrangers and producers headed by Rapee, will use radio to bring the country closer together, to go even further towards proving that radio can, and does, break down sectional barriers and laugh at distances.

As Rapee's programs travel from state to state he will portray, in music, Indian, Spanish and Mexican influence in Arizona. Life is a mushroom town in the silver district will be faithfully reproduced by one of radio's best known symphony orchestras. Passing to Connecticut there will be the trek of religious rebels from Massachusetts to the "nutmeg state." And such homely scenes in the Connecticut hills as barn dances — *Moonеymusk* and *Harvest Moon* numbers—with a special group of fiddlers to fit this type program. And finally, as tribute to Connecticut's patriotism a large symphonic number, scored especially from patriotic airs. Later Alabama, with musical representation of the old French influence, deep shadows and pools and the plantation scenes. With, of course, some negro voices for this particular state's program.

Those who work with Rapee will tell you that his whole being is wrapped up in this new radio presentation.

"It brings us one step nearer solution of the problem of giving a real theatrical performance on the air instead of a straight musical program," he

said recently in speaking of "The Parade of the States."

It is estimated that several hundred people will participate in the various programs, as different units composed of singers, string quartets, and specialists are heard according to the musical backgrounds of each state. Special male quartets, sopranos, blues singers, negro spiritual singers and many other types of musicians will be called in from a supplemental group of artists included in the program plans.

There is much of an educational nature in the tributes prepared each week to the various states. But it is education presented in so romantic a way as to be entertainment as well. For example, in the tribute to Virginia we find:

"Side by side the old state and the new state go their way together. Each has its visions of splendor to show you; and over them all is an all-enveloping, unforgetable charm.

"Said Captain John Smith, 'Heaven and earth never agreed better to frame a place for man's habitation.' General Motors borrows his words and uses them as its tribute. To the Old Dominion, Mother of Presidents, we pay our grateful homage."

In announcing the new program, Alfred P. Sloan, Jr., President of General Motors, said that a program of national interest had been sought in preliminary plans for "The Parade of the States." "The new program," said Mr. Sloan's statement, "contemplates extensive research into the states' industrial, commercial and agricultural activities, historical and artistic features."

That the program is in excellent hands is quite evident when one talks about it to Erno Rapee. He believes in the idea and he has a deep respect for the audience he will reach. His first consideration, or his yardstick if you will, for measuring the quality of each presentation is the fan response to it. In this connection he speaks of the greatest thrill he has derived from conducting a two hundred-piece symphony at the Roxy Theatre.

"The big thrill to me—there is no question about it," Rapee muses. "It is the fact that regardless of the composition—if the same orchestra plays the same number and the same conductor conducts it time after time, some day it is a huge success with the public and another day it is not. This has convinced me of the sympathetic assimilation of our music on the part of the American public. It is because of this quality of sympathetic assimilation that the radio public, as well as the visible audience at a symphony, can differentiate between a good and a mediocre performance. In a word my big thrill, after more than twelve thousand symphony concerts, is the fact that I can appreciate their appreciation."

Television

(Continued from page 28)

visitors were not permitted to occupy seats at nearer vantage points in the gallery. They probably were kept at a distance to let space tone down the flicker of the scanning lines.

However, criticism was mild. Credit was given for the courage to make the attempt although it was felt that preliminary technical preparation had been neglected. It was explained by Mr. Sanabria's manager to Radio Digest that the apparatus used at the Radio-Electric World's Fair would be shown in theatres across the country. The audience will see the studio and televisee on one side of the stage and the projected image on the other side. In this way it is expected hundreds of thousands will become further interested in the advent of television.

The Federal Radio Commission is swamped with applicants who are anxious to install television stations throughout the country. One of the most pretentious projects is that of William L. Foss who announced to the Commission that his plan contemplated the expenditure of $200,000 for a television station at Portland, Maine. Mr. Foss is chief engineer for Station WCSH in that city. He placed his tentative order after viewing the R.C.A. —Victor television development at Camden, N. J. "That," he said, speaking for his backers, "is the Rines company's bond of confidence in the imminent future of television."

Manufacture of parlor receivers by Jenkins, Hollis Baird and Sanabria is progressing along lines similar to the audio receivers. Jenkins, being first in the field, apparantly holds the lead in production. At the CBS studios the Jenkins has replaced others for the reception from the Columbia television station W2XAB. Illumination is good through use of the DeForest crater neon lamp. The receiver also contains a dynamic speaker.

Vis-a-Vis

(Continued from page 29)

left to right and from top to bottom.

Photo Electric Cell—This is a vacuum tube device containing chemically treated elements which have the capacity to alter the flow of an electric current in a circuit to which it is attached in accordance with, and in direct response to, the amount of illumination which falls upon it. In other words, its action is that of a "valve," permitting a varying light source to directly control an electrical circuit in exact accordance with the fluctuations of the light source.

Neon Lamp—This is also a vacuum tube device used to reconvert the electrical energy flowing in an amplifier back into light. Its response is very rapid, and it can be satisfactorily controlled by the energy flowing into the audio amplifier of a receiving set. This therefore permits the conversion of the received electrical energy into light in direct response to the light energy originally picked up by the photo-electric cells, and previously converted into electrical energy.

The individuals to be televised are placed in an appropriate darkened studio in front of a bank of photo-electric cells. An intense light passing through a scanning disk and suitable lens is concentrated upon the object. The intense light travels rapidly (20 times a second) across the area being scanned so that, while to all appearances the entire object is illuminated (this due to the persistency of vision of the human eye), actually at any given instant only a very minute portion of the entire area is being illuminated.

In the case of W2XAB, the scanning is what is known as "60-line scanning." In this case, the televisor is scanning the object 60 times horizontally by 72 times vertically for each revolution of the scanning disk, which, when multiplied, gives us 4,320 elements. Since this scanning is repeated 20 times per second, we actually have 86,400 elements transmitted within this short period of time.

As the scanning light passes over the object more or less light will be reflected on the photo-electric cells, depending upon the natural lights and shadows of the object. These the photo-electric cells interpret in terms of electrical energy and thus, by amplifying this energy and impressing it upon a radio transmitter, we are able electrically to transmit the lights and shadows reflected from the object.

At the receiving end it is necessary to have a radio receiver which is capable of picking up the television transmitted energy, a suitable audio amplifier with sufficient energy to actuate a neon lamp and scanning disk connected to a synchronous motor revolving at the same speed as, and in step with, the scanning motor at the transmitter. With this equipment, the radio receiving set picks up and amplifies the received electrical energy, which, in turn, actuates the neon lamp in exact accordance with the fluctuations of the transmitted energy. The scanning disk in the receiving set, revolving between the neon lamp and the eye, breaks the light fluctuations of the lamp into elements identical with those at the transmitter, but all this happens so much more rapidly than the human eye is able to perceive, that the impression one gets is that of a complete picture rather than a rapid

series of dots of light.

With the coming of colder weather lookers-in have reported much clearer television images, and at much more distant points. The black snow fall of television, which is caused by bursts of static on the screen, has practically disappeared and fading likewise is less than in the summer months when W2XAB got under way.

We have had almost continuous daily operation with W2XAB since July. No technical difficulties were encountered and the station only went off the air once, and that was a precaution taken during a particularly dangerous electric storm which was hitting close to the antenna.

For one thing, this shows the stability of television, now only in its swaddling clothes, or should we say the experimental state?

Studio technique is being continuously studied by our engineers and production men. New ideas are resulting day after day. Screens, scenery and lighting effects are all being worked out simultaneously while you look at our programs. In the background behind that colorful screen, or piano, you see, engineers are tirelessly toiling—toiling to perfect a new technique.

My time is up, and I'll just say: "You'll be seeing me!"

The Voice of Firestone

(Continued from page 31)

where you want to go in comfort and safety.

"We are so accustomed to this wonderful modern convenience that we seldom give it a thought; and yet, it has woven itself so inseparably into our modern life and activities that it has become almost completely indispensable. It has added so immeasurably to our convenience and our practical service, to our pleasure and our day by day happiness, that it would be almost impossible to measure its value. It has become a part of us, and we of this generation would have to re-mold our lives without it.

"The Firestone Organization, great and far-flung as it is, has labored unceasingly to deserve the confidence and good-will of you, the individual tire user. We have a just pride in the contributions that we have been able to make to so fundamental an industry, and we have profound satisfaction in the improvements that we have pioneered and in the achievements that we have wrought in bringing the pneumatic tire so close to perfection. It is Firestone's duty to serve you well. It is our privilege to strive earnestly and always to be worthy of your friendship."

And that was all the advertising there was to it. Mr. Firestone has a good mikable voice and there's a promise that stirs your interest.

Adventure Notables

(Continued from page 14)

Torrence traveled 18,000 miles across Africa to study sleeping sickness. Wells, an Englishman by birth spent six years in Malaya as a railroad engineer and is a recognized authority of the habits of animals. He has trailed lions in Uganda and contends that wild animals are wild only when shot at by big game hunters. He made the first successful study of the Mountains of the Moon in Central Africa and endured terrific cold and privations while exploring there on the Equator.

F. A. Mitchell-Hedges, lecturer on Central America which he describes as the "land of wonder and fear," will soon head an expedition under the auspices of the British Museum of the American Indian to study the vanished cities of a "lost race."

The two remaining lecturers are Count Felix von Luckner, whose exploits during the War as buccaneering Captain of a German raider are told in his book of exciting adventure and Sir Hubert Wilkins, explorer and journalist who is now in the Arctic on a scientific expedition in the submarine Nautilus. Both have lectured throughout the country under NBC auspices.

Lew Conrad

(Continued from page 11)

I weep to think that others must be writing you the same loving lines. . ."

"Everything I have in the world is yours. . ."

"I wait until the children have gone to school and my husband has started for the city. Then I turn on the radio, sit and listen, and dream. I lock the front and back doors so no one can disturb my thoughts. . . But I must remember my family. . ."

A woman writer wrote that she was weaving the love scenes of her latest novel around Conrad, "because I know we can never meet except in my thoughts, but the ending of the book will be just as we both might honestly wish."

Some radio singers are said to suffer a falling off in fan mail when they send photographs to their admirers, but with Lew it is quite the opposite. The lovesick maidens get one look at his face and then write more voluminously than ever.

The postal department ought to be mighty grateful to Lew. He sells a lot of stamps for them. But wait until they see his picture in this issue of Radio Digest and we'll see what happens.

Realism Adds Zest

(Continued from page 17)

as the time estimated to make the trip. Little did we know then where two months really was going to bring us or how important a part them rations was going to play in our lives.

"One morning after we had been out only a few weeks, I came up for my turn at watch. We wasn't moving. No wind. Sails empty. We was drifting. To make a long story short, we had drifted out of the ship lanes. Currents got hold of us and no wind come up to help us fight our way back. Strict watch was set at all times for passing ships. And at night we sent up flares. But nobody saw them. We was out of the shipping lane and getting further out every hour. Farther and farther away from any fellow travelers of the sea, and helpless to stop the drifting because the wind wouldn't stir even a flicker of a breeze.

"Then we began to realize we was in the doldrums or that place around the equator where there's hardly ever any wind. We drifted in this way for over five months! And we had shipped for a voyage of only seventy days. There wasn't much to do—wasn't nothing—except keep watch and pray for wind. We lay around deck. We swapped yarns. It got monotonous. We'd try to sing. But pretty soon we had sung all the songs we knew so often they got on our nerves.

"Well, to cut this short, on May 8, six months since we sailed, the captain called us together and told us he thought we should take the few remaining rations and set out in the two small boats for the Galapagos Islands. Nine of us went in one boat, with the captain, and the others went with the mate in the other boat.

"We rowed in two-hour shifts for twelve days, suffering terrible hardships until we finally sighted land. Just as we were nearing shore our boat upset and we had to swim for it. We lost what provisions and water we had.

"For days we had been drinking salt water and our throats were parched. As soon as we had regained our strength we split up and went looking for a spring or a lake from which we could drink. We all got together back of the shore a bit an hour or so later. There wasn't any water. Everybody had the same story. No water anywhere.

"We never did see the mate's boat. Later we found out that he and the others in that boat had been picked up the following day. They reported that we were missing and ships were sent out to look for us. I guess they gave us up for lost.

"The hardships we endured in the months that followed would take hours in the telling. Nothing to eat but lizards' tails and raw turtle meat. Nothing to drink but turtle blood and salt water, until, after several months on the island, we finally found a spring. But before that we lost two of the men.

"After months and months of torture, we all but gave up hope. And then one day, as I was stretched out on the beach with my arms under my head, I heard a young Dane who had climbed a jagged cliff yelling 'Ship! Ship!' He was young and didn't seem to realize how we was all fixed. He'd done that a couple of times before, thinking he was funny. So this time, when he done it, one of the men jumped up and give him a belt over the head that knocked him flat. Then the old cook yelled out 'Ship! Ship!'

"We all looked up. There coming around the east point was a sail. For a minute we just sat there. Then a rush to the beach. We shouted. We screamed. We waved our arms frantically. We expected the sloop would come about and into the bay. But she kept on going past. Say, we nearly went crazy!

"WE ran up and down, screamed and cried, but she kept right on and went out of sight behind that island in the middle of the bay. It sure looked like we was lost. But the captain knew his job. Just as he almost passed the western point, she came about and made a long tack into the bay. Then she came around on the other tack, and, before she could make the third one, we were in the water swimming to her.

"That night they took us off and in less than a week we was landed at Guayaquil, Ecuador. Years later, after I had come to America, I ran into the mate, who was in command of the other boat that took off from the 'Alexander.' He was in charge of a building gang, and I went to work for him. A few years ago I heard from the sister of one of the boys who died. Now I've lost track of all of them."

This is only part of the story of adventure that was acted over the Columbia chain on this program sponsored by the Harold F. Ritchie Company, a thrilling story, so realistic that the listeners shuddered at the tales of some of the harrowing adventures and actually rejoiced at the rescue.

Charles Previn, who was heard over the air for many months when he directed the orchestra on "The Camel Pleasure Hour," is responsible for the musical background used on "Romances of the Sea."

"The principle that is being used in the 'Romances of the Sea' programs is that same that was used in scoring motion pictures when they were silent," Previn explained recently. "Music is used as a background to bring out the dramatic intent of the spoken word. By associating a musical theme with a character, you can bring out that character or stress an emotion.

"In short," he concluded, "we are using music to take the place of scenery that is used in stage productions. What radio does not supply universally as yet is vision, and the music is being used in our productions to take its place."

A sterling cast of fifteen actors and actresses was used in the opening presentation, which was the dramatization of the legend of *The Flying Dutchman.* The part of the Dutchman was taken by John Anthony.

Gabalogue

(Continued from page 51)

Lauck, who plays Lum. Lum was born in 1902 in Allene, Kansas, and was educated at Arkansas University. Was editor of the college humorous magazine. Was later a free-lance advertising man. Worked in a bank . . . and is a member of Sigma Chi Fraternity. Is a Shriner and a member of the Lions Club . . . and is Past Exalted Ruler of the Elks. He now lives in Chicago and has a hobby of collecting statues of elephants.

Norris Goff, that's Abner, was born in Cove, Arkansas. Also educated at Arkansas University and played football, baseball and was a member of the track team. Started work for his father in his wholesale grocery store at Mena, Arkansas. Later he conducted a jazz orchestra known as Goff's Melody Makers. He, too, is a member of Sigma Chi, an Elk, a Mason and a member of the Lions Club. And is also a Deacon in the Presbyterian Church.

Al and Pete have acquired a library of more than 10,000 old-time songs, most of them contributed by listeners. Al spends his spare time writing short stories . . . and (whisper) . . . at the moment, he is working on the Great American Drama. Pete is an inveterate solver of newspaper cross-word puzzles . . . and he also devises those brain teasers. Both have written songs . . . among their most successful is "Needin' You Like I Do," which they wrote during a period of financial distress.

Tuneful Topics

(Continued from page 50)

You Call It Madness But I Call It Love

PERHAPS one of the most unusual situations in radio has come about through the appearance of two individuals, both presenting a rich, throaty, low baritone type of singing, namely Messrs. Bing Crosby and Russ Colombo. Colombo has seen fit, for publicity reasons no doubt, to change his name to Columbo.

Both styles are dangerously close to a crazy style in which Louis Armstrong, colored trumpet player, orchestra leader, and singer, has been bellowing his songs for years. The identical qualities of *various parts* of their *lyrics* would unquestionably show, to any thinking mind, that one must have originated the expression. For instance, "ah—but is one both use often." While I have my own opinion as to which came first, the egg or the hen, in this particular case it behooves me to say nothing more than that both gentlemen are extremely pleasant to listen to, and both are doing big things for the respective chains they are associated with, and big things to the hearts of our younger college and high school set, who are ever eager to seize upon a new style and fad.

Mr. Columbo's choice of theme song was an extremely wise one, as half his battle is won before he has finished his theme song. A lovely song which, sung with expression by anyone, would win the listener who gives his attention at the outset of the program. In fact, when he is on in the late hours, around 11:30, nothing is more lovely than to hear this particular song come stealing across the air waves to you in that husky, throaty quality, with the exaggerated *glissando*, which is the same effect as produced on a steel guitar, only much lower.

Again, I say, the most laughable effect of both gentlemen's broadcast is the constant repetition of the expression "ah—but," and since no such expression would be likely to occur in two minds simultaneously, that, to me, as an amateur Sherlock Holmes in such matters, would lead me to a conclusion.

It is a lovely song, and is published by Harms, Inc. In order that its full beauty be appreciated, it must be played and sung at a speed of not less than one minute and ten seconds for the chorus.

Guilty

THOSE of you who have any ability for remembering songs after hearing them will, upon seeing Eddie Cantor's picture *Palmy Days*, be struck by a similarity between the melody of the feature song of the picture, "There's Nothing Too Good For My Baby," and the song under discussion, *Guilty*.

There have been many odd, fantastic, and almost impossible things happen in the music industry, but few of them have been quite as unusual as the case of these two songs. The same man had a share in the writing of both of them, and the tragedy of the song from the picture is that Robbins, Inc., is reputed to have paid $5,000 for the publishing rights on it, whereas Feist had already published *Guilty* and had started the song to a great etherization of it.

Just how this writer could have written two songs so almost identical and given them to two separate publishers will always remain a bit of a mystery which he alone, I suppose, could clear up.

The three writers of *There's Nothing Too Good For My Baby*, upon realizing the conflict of the two songs, were magnanimous enough to return the advance given them by Robbins, though I suppose the song must still stay in the picture, since the picture is already being shown, and to substitute another song would mean thousands of dollars and the return of Eddie Cantor to Hollywood to remake the scenes.

However, *Guilty* itself is certainly written in the popular trend, with an outstanding title and an unusually high range. In the key of "C" it goes to high "F" which strains the voice for that particular measure. The song, however, is certainly pleasing the radio public, as one hears it everywhere and of course band leaders usually play request numbers.

No less than Gus Kahn and Richard Whiting collaborated with Harry Akst in the writing of *Guilty*. Kahn and Whiting are already well known to my readers without any elaboration of their respective abilities. Harry Akst has been writing for years—a very clever pianist, having made a record with my ideal Rudy Wiedoeft years ago, which brought his name to my attention, and unforgetably so. Akst's name appears on both songs, and it is he who probably can account for the similarity of the two songs.

Guilty is published by Leo Feist, and we play it at about one minute and fifteen seconds for the chorus.

ured quite disastrously, though with every good intention, has there been any attempt to utilize the thousands of newsstands in railroad stations and on street corners as a means of distributing sheet music. These newsstands have been selling the paper composition "Hit-of-the-Week" records for the past year or so, but even these have failed to be the great success that they started out to be. Some time ago an organization —Popular Songs of the Day—was formed, and was reputed to have had so many thousands of the newsstands at their command, and not since has there been another attempt.

Now comes forth another organization—Song Hit Guild—which really has affected a contract with every organized newsstand throughout the country, which gives them a terrific selling agency running into millions, if the public will but buy. There is an arrangement with the newsstands which would stimulate them to return as few copies as possible, which actively means that the newsstands will be expected to really push the songs, and not passively place them on the stands and wait for the public to ask about them. More records and more sheet music unquestionably could be sold if the public were informed of them. This takes good salesmanship, which one rarely finds at a newsstand, or even in a phonograph store, because good salesmen soon discover their talents and migrate to more lucrative fields.

This is one of the first songs of this new organization, and one of the best. We program it this Thursday. It has the unusual title of *Fate Introduced Me to You,* and the melody has a slight similarity to *I Found a Million Dollar Baby 'In a Five and Ten Cent Store,* which augers well for this new song, as the latter song was a big success.

We play it at one minute and ten seconds for the chorus.

When You Were Only Seventeen

ARCHIE FLETCHER, the guiding shepherd of the Joe Morris Music Co., holders of several hundred copyrights of some of the best hits of the past twenty years, is responsible for some of the big waltz hits of the past few years. It was he who published *Carolina Moon* for Joe Morris and made the mint of money that song must have made. It was he, also, who dictated to Peter de Rose and Charlie Tobias the type of song they should write, which resulted in *When Your Hair Has Turned to Silver.* He has suggested that they pattern their song along the lines of *When You and I Were Young, Maggie,* and he makes no excuses for the similarities of the melodies.

While I don't think that *When You and I Were Seventeen* will achieve the same sensational popularity that did "Silver," yet it is one of the homely, old-fashioned type of waltzes that, by dint of constant repetition, eventually charms "plain" folks all over our forty-eight United States, and after all, these are the people who finally go to the music store and ask for that song and keep it as an heirloom.

It is a simple waltz, and we play it as such, with no elaborate arrangement, or confusing harmonies. As I have said before, it is published by Joe Morris.

Can't You See?

IT seems almost impossible to compile a list of ten popular songs without bringing in Roy Turk and Fred Ahlert. Not since *Walking My Baby Back Home* have these boys had a big hit. Their *Why Dance* and *There's a Time and Place for Everything,* and a new one which they have placed with Abe Olman, are good songs, and are doing well, still that spark of *something* which the unusual song must have to crash through seems to be lacking in all of these compositions. Neither does it seem to be here, in one of their latest and best efforts, *Can't You See?*

While the song has a melodic tinge of *My Fate Is In Your Hands,* it still seems to lack that final little bit of perfection which really shoves the song to the top places. The song will be done a lot, be very popular, and probably sell well.

I am still rooting for the boys to give us another real hit like *I'll Get By,* or *Mean to Me,* or *Walking My Baby Back Home,* and I know they will do it.

Can't You see? is published by Davis Coots & Engle, and is one of the best in their catalogue at the present time. We take one minute and ten seconds for the chorus, and I would suggest that to save your voice you get the lowest key, although its range is quite human.

News, Views, Comment

India on the Air

(Continued from page 27)

capable of independent thought.

The third point and the one which endeared Gandhi to my heart even deeper, was the fact that during his entire broadcast he never condemned the country against which he is struggling. How many of us who felt that we were victims of centuries of oppression and domination by a foreign power, would be able to prevent our resentment from developing into bitter antagonism and hatred? How many of us can avoid such feelings arising when we have differences in our personal relationships with other people? Gandhi who has upset all traditions by substituting truth for force and non-cooperation for violence, considers the English people as his friend. His fight is against the Government policy, not against the individuals who compose that Government. He never uses malicious words against any individual anywhere. His patient courage and supreme understanding have won a place of deepest affection in the hearts of the Indian masses, and gained for him the title of the Mahatma, which means The Great Soul. Tagore on a visit to Gandhi's home quoted this:

"He is the one Luminous, Creator of all, Mahatma
Always in the hearts of people enshrined
Revealed through Love, Intuition and Thought,
Whoever knows Him, Immortal becomes. . ."

Chaos!

(Continued from page 18)

1926, after the collapse of the Radio Law of 1912 as applied to broadcasting and before the enactment of the Radio Law of 1927.

Congress in the forthcoming session will have to make up its mind whether it wants a return of this chaos or not. The moment it begins to allocate frequencies by special legislation, no matter how worthy or how politically important the beneficiaries may be, it will destroy the entire structure which it so carefully set up in 1927. It will put an end, probably for all time, to the orderly allocation of radio facilities, and will utterly destroy the entire organization which it built up for the express purpose of handling this work.

The real issue is not to determine who shall be licensed to broadcast; it is to determine who shall do the licensing. Congress has said that the work shall be done by a special body, created by legislation and strengthened by experience and by competent technical advice. Individual broadcasters may feel bitterly about certain specific actions of the Federal Radio Commission. As a whole, however, they stand solidly for an orderly administration of the Radio Act of 1927, as against any attempt to break down the provisions of that act through special legislation. They see in the insistent demands for such legislation only the imminent risk of a return to chaos.

Does Congress want to undo its own work, and destroy its own administrative agency, in order that broadcasting facilities may become political prizes?

Lavender and Stardust

hoods in New York for the Harrigan and Hart pieces—'Paddy Duffy's Cart,' 'My Dad's Dinner Pail,' 'The Market on Saturday Night' and many others.

"I received one letter—" and she dimpled prettily — "from an old Irish bar-tender. He took me severely to task for singing 'Maggie Murphy's Home' in too fast a tempo. The song, he explained, should be sung in time to the swinging of beer mugs, and would I please, please sing it slower for I was ruining the disposition of his old cronies from the corner.

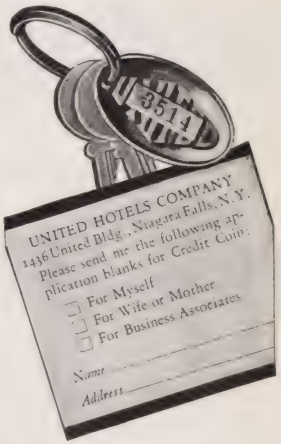
"Never do I sing such a song now without a picture in my mind's eye of that speakeasy audience—bless their rugged, old hearts! . . ."

Miss Parsons has found that her audience, however, is more easily moved to tears than to laughter. She is invariably deluged with letters after a particularly sad rendering of such old ballads as "The Baggage Coach Ahead," "Put My Little Shoes Away," or "Why Did They Dig Ma's Grave So Deep!"

She was a close and devoted friend of the late Charles K. Harris, to whom she recently dedicated an entire program during her Columbia system broadcast.

"After the broadcast," Miss Parsons told me, "Mrs. Harris telephoned to me. She was crying, and she told me that surely her Charley had been close to me as I sang."

"After the Ball," is, incidentally, one of Miss Parsons' most asked-for selections.



Mrs. Mary F. Brennan, a sister of the late Paul Dresser, who wrote "The Banks of the Wabash," "My Gal, Sal," "The Letter That Never Came," and many others, also writes to Miss Par-

sons frequently, as does Mrs. Addie Witt Goodstein, the sister of Max S. Witt, who wrote "The Moth and the Flame," "While the Convent Bells Were Ringing," and many others. Paul Dresser, incidentally, was a brother of Theodore Dreiser, the famous novelist, who wrote his biography.

Up in New Haven, in comparative retirement, lives another famous one of another day, and she, too, has thrilled to the songs of the Girl O' Yesterday—so much so that she wrote for her the theme song she now uses: "Sweet Girl O' Yesterday." She is Anita Owen, author and composer of all the old "Daisy songs"—"Sweet Bunch of Daisies," "Daisies Won't Tell" and others. The two women are fast friends and boon companions, each drawing inspiration from the other.

"You have made me live again," wrote Anita Owen to her friend. . . .

Miss Parsons answers every letter sent to her, and keeps a file of all letters and requests. Recently an old couple in New Jersey were amazed on their Golden Wedding day to receive a note from Miss Parsons asking them to tune her in that afternoon. They heard, dedicated to them, "Love's Old Sweet Song," a selection they had requested more than six months before.

Once, too, she nursed via radio two little sick children back to health. One had diphtheria; the other scarlet fever. Their mothers are now devoted followers of yesterday's girl.

Miss Parsons told me of a touching episode, which worked itself out during the recent radio exposition in Madison Square Garden, New York.

"I was standing in a booth, autographing photographs," she said, "when, suddenly, I felt a tugging at my arm. I looked around and there was the loveliest, little old woman imaginable. She gazed up at me, smiling, and said: 'I'm Mrs. B—,' and she smiled again.

"I searched my memory for a moment, and then it came to me—she had been writing to me for months, and I had been answering her, and she had sent me string after string of beautiful beads, all strung while she was on her back in a hospital.

"I had made her well, she said, and, despite her seventy-four years, she had made up her mind she was going to the radio show to see me after reading in the papers that I would be there. . . . It was the first time in six months, she added, that she had been out of the house, and the first time she had ever been in the garden.

"Never was I so touched, and, believe you me, I tried to show her the best time she ever had. . . . I hope I succeeded. . . ."

There was much more we talked about in the quietness of Miss Parsons' New York apartment, and I could not help but let my memory stray back to the lovely cottage where I had spent so happy a summer, and to that dear, little old aunt of mine, who, it seemed to me, had summed up all of Miss Parsons' efforts in—

"She has made me young again. . . ."

Radiographs

(Continued from page 67)

terms with them.

She was born near Strassbourg, in Alsace-Lorraine and the conflicting national influences in that troublous strip of land left their marks on her character before she moved with her family, when still a child, to the United States. She received the balance of her early schooling in Philadelphia. Here she showed marks of real talent and when this was discovered her parents sent her back to Europe.

She went to Germany to study piano with Mannheim masters, but at the same time she grew into the realization that her voice had possibilities for development. Returning to Philadelphia she confessed to vocal ambitions and receiving encouragement from her parents and friends, once again set out for Europe, this time to study with the noted Jean de Reszke.

Under this master's aegis she made her debut three years later at Covent Garden, London. It was evident that the singer's gifts were of the highest calibre, for her success was immediate and emphatic.

Returning to the United States, Miss Maurel made her American debut with the Boston Opera Company as leading contralto. In spite of her youth her repertoire was extremely varied. It included such operas as Tales of Hoffman, Rigoletto, Samson and Delilah, Carmen, Martha and Madame Butterfly.

Concert tours took her to forty-seven of the forty-eight states. Her tremendous energy as well as the strength of her subtly controlled voice enabled her to give fifty to sixty concerts yearly in addition to the making of phonograph records.

Public appreciation of the radio turned Miss Maurel to broadcasting. Her success in that field was also immediate and she has been a featured singer on some of the many programs.

Because of the great demand for popular music, Miss Maurel has stepped out of her so-called high-brow song repertoire and is giving to her radio listeners the melodies they love so well. And that's a concession for any great artist. One of the programs on which she is featured is the Blue Coal Program, every Sunday evening on CBS.
